Further components in the ET 200SP I/O system:
- SiePortal, see SIMATIC ET 200SP
- Homepage, see www.siemens.com/et200sp

ET 200SP is a scalable and extremely flexible modular I/O system with degree of protection IP20.

As I/O modules, the ET 200SP e-Starters are an integral part of this I/O system. They are fully electronic switching and protection devices for 1-phase and 3-phase loads with fully electronic short-circuit protection, reversing functionality and optimized start properties.

SIMATIC ET 200SP e-Starter - Fully electronic switching and protecting

Basic functionality

All versions of the ET 200SP e-Starter feature the following functionality:

- Fully pre-wired e-Starter for switching and protecting any AC loads up to 3 kW from 48 to 480 V AC
- Fully electronic short-circuit protection up to 100 kA. The switch-off is less than 5 µs and can be reset.
- Self-assembling 32 A power bus, i.e. the load voltage is only fed in once for a group of ET 200SP e-Starters
- All supply voltages connected only once, i.e. when modules are added, they are automatically connected to the next module
- Hot swapping permissible
- Digital inputs can be used optionally via 4DI (LC) submodules.
- Control of the SIMATIC ET 200SP e-Starter from the control system and of the diagnostics status via the cyclic process image
- Diagnostics-capable for active monitoring of the switching and protection functions
- The signal states in the process image of the e-Starter provide information about protective devices (short circuit or overload), the switching states of the ET 200SP e-Starter and system faults.
- Smart Start function to avoid high starting current peaks and torque surges
- Phase-optimized connection to avoid inrush currents
- Upgradeable to include future functions

Fan unit

All ET 200SP e-Starters are supplied as standard with a fan unit equipped with a single fan. For applications subject to harsh ambient or load conditions, a fan unit with two fans can also be ordered as an optional accessory (see Accessories). For information on these boundary conditions, see Equipment Manual.

© Siemens AG 2026

Overview (continued)

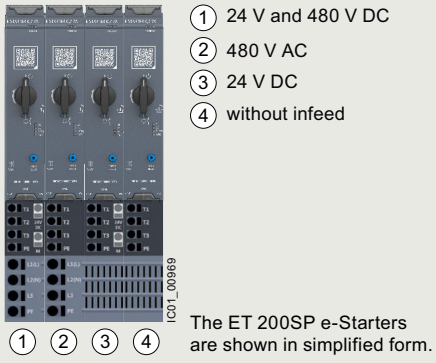
Interference-proof setup of ET 200SP e-Starter

For interference-proof operation of the ET 200SP station in accordance with the IEC 60947-4-2 standard, use a dummy module upstream of the first ET 200SP e-Starter. The dummy module consists of the 6ES7193-6BP00-0BA0 or 6ES7193-6BP00-0DA0 BaseUnit and the 6ES7133-6CV15-1AM0 15 mm BU cover.

The 15 mm BU cover protects the plug contacts of the BaseUnit against dirt.

Electromechanical switching devices in series with ET 200SP e-Starters

Switching an inductive load - in particular of motors < 1 kW with high inductance - with an electromechanical switching device (e.g. contactor) can cause high and steep voltage edges.



The resulting faults/damage can be prevented by first disconnecting with the ET 200SP e-Starter or by using EMC suppression modules:

- 3RT2916-1P.. EMC suppression modules for direct mounting on the contactor (see Accessories for SIRIUS 3RT2 contactors and SIRIUS 3RH2 contactor relays → Miscellaneous)
- For motor suppression modules that are fitted in the main circuit, (see Motor suppression module)

Note:

For more information, see https://support.industry.siemens.com/cs/ww/en/view/109758696.

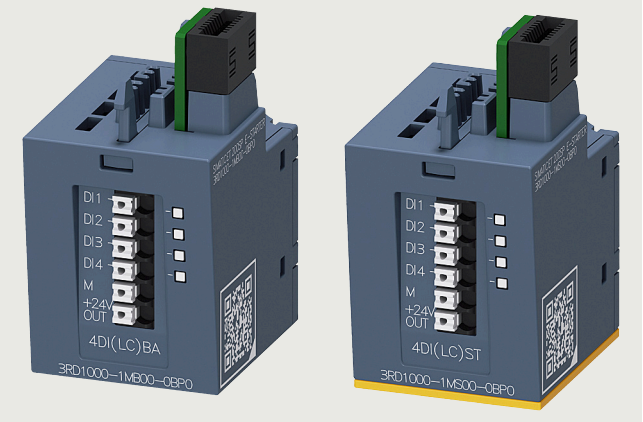
BaseUnits for ET 200SP e-Starter

View of the BaseUnit infeeds for the ET 200SP e-Starters

BaseUnits are components used for mounting the ET 200SP I/O modules.

The self-assembling voltage buses integrated into the BaseUnits reduce wiring outlay to the single infeed (both of auxiliary and load voltage).

All modules following on the right are automatically supplied upon plugging the BaseUnits together, if BaseUnits are inserted with a loop-through.



The rugged design and positively driven connection technology enable use in harsh industrial conditions.

The BaseUnits are available with various infeeds for the ET 200SP e-Starters.

Optional 4DI (LC) submodules

Optional 4DI (LC) submodules for the ET 200SP e-Starter

Each module is plugged into the front of the ET 200SP e-Starter, which supplies it with a 24 V DC operational voltage.

Basic 4DI (LC) submodule

This is an optional, digital input module with four inputs for local motor starter functions such as "manual local operation", "implementation of fast inputs" or "end position disconnection".

Standard 4DI (LC) submodule

This module offers additional features beyond those of the Basic 4DI (LC) submodule:

- Safety-related shutdown (STO) up to SIL 3/PL e Cat. 4
- ATEX/IECEx certification for the operation of motors in hazardous areas
- Advanced Condition Monitoring

Note:

For a list of all the functions provided by the 4DI (LC) submodules, see Equipment Manual.

Benefits

The ET 200SP e-Starters offer a number of advantages:

- Fully integrated into the ET 200SP I/O system (including TIA Selection Tool and TIA Portal)
- Extremely fast, fully electronic and resettable short-circuit protection
- Phase-optimized switching on to reduce inrush currents
- Integrated reversing functionality
- Simple integrated transmission of measured values (current, voltage, power, etc.)
- Extensive parameterization by means of TIA Portal
- Increase of plant availability through fast replacement of units (easy mounting and plug-in technology)
- Long service life and low wear thanks to fully electronic switching
- Less space required in the control cabinet (20 to 80%) as a result of greater functional density
- Comprehensive diagnostics, information and limit value monitoring for preventive maintenance
- Optional, configurable inputs via 4DI (LC) submodules
- Less wiring and testing required as a result of integrating several functions into a single device
- Lower overheads for stock-keeping and configuration as a result of reduced variance due to high functional density and wide setting range of the rated operational current
- Compatibility mode for direct replacement of the hybrid ET 200SP e-Starter without having to stop the CPU
- Smart Start function to prevent torque surges during the starting process of asynchronous motors

Standards and approvals

- IEC/EN 60947-4-2
- cULus 60947-4-2
- CCC approval for China

Application

The ET 200SP e-Starters are suitable for the following applications:

- Switching, protecting and monitoring of
  - 3-phase motors with overload and fully electronic short-circuit protection
  - 1-phase motors with overload and fully electronic short-circuit protection (e.g. 230 V motors for pump applications)
  - Ohmic loads with overload and short-circuit protection (e.g. for heaters)
- Plant monitoring and energy management in conveyor systems: Drive belt monitoring and blocking monitoring are possible by means of the phase asymmetry and zero current detection during current measurement, for example.
- Track switching and lifting table control in conveyor systems: Track switches can be implemented by means of the quick stop function and lifting table controls by means of the "immediate end position disconnection" function without any laborious programming.
- Safe isolation of the drive from main power supply: The isolating functions according to IEC 60947-1 offer protection against inadvertent activation during plant maintenance.

Further components in the ET 200SP I/O system:
- SiePortal, see SIMATIC ET 200SP
- Homepage, see www.siemens.com/et200sp

ET 200SP is a scalable and extremely flexible modular I/O system with degree of protection IP20.

As I/O modules, the ET 200SP motor starters are an integral part of this I/O system. They are switching and protection devices for 1- and 3-phase loads and are available as direct-on-line or reversing starters.

Video: SIMATIC ET 200SP motor starter - Flexible, powerful, compact

Basic functionality

All versions of the ET 200SP motor starter feature the following functionality:

- Fully pre-wired motor starters for switching and protecting any three-phase loads up to 5.5 kW from 48 V AC to 500 V AC
- Disconnection possible via fail-safe motor starters up to SIL 3 and PL e Cat. 4
- Self-assembling 32 A power bus, i.e. the load voltage is only fed in once for a group of motor starters
- All supply voltages connected only once, i.e. when modules are added, they are automatically connected to the next module
- Hot swapping is permissible
- Digital inputs can optionally be used via a 3DI/LC submodule
- Control of the motor starter from the control system and of the diagnostics status via the cyclic process image
- Diagnostics-capable for active monitoring of the switching and protection functions
- The signal states in the process image of the motor starter provide information about protective devices (short circuit or overload), the switching states of the motor starter, and system faults.

Use of fan

For motor starters with a 12 A rated current, the 3RW4928-8VB00 fan is included in the scope of supply.

This fan can also be ordered as an option for motor starters with lower rated currents, if the boundary conditions demand this. For information on the ambient conditions for the use of motor starters, see Equipment Manual.

Designing interference-free motor starters

For interference-free operation of the ET 200SP station in accordance with IEC 60947-4-2 standard, use a dummy module before the first motor starter. The dummy module consists of the 6ES7193-6BP00-0BA0 or 6ES7193-6BP00-0DA0 BaseUnit and the 6ES7133-6CV15-1AM0 15 mm BU cover.

© Siemens AG 2026

Overview (continued)

The 15 mm BU cover protects the plug contacts of the BaseUnit against dirt.

Electromechanical switching devices in series with hybrid motor starters

Switching an inductive load - in particular of motors < 1 kW with high inductance - with an electromechanical switching device (e.g. contactor) can cause high and steep voltage edges.

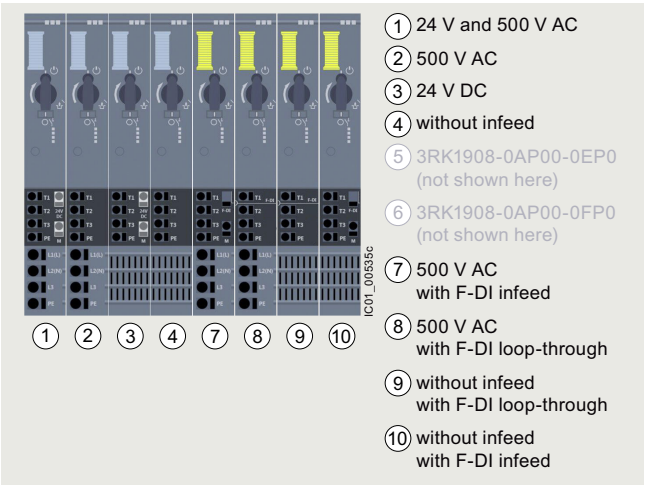
The resulting faults/damage can be prevented by first disconnecting with the hybrid motor starter or by using EMC suppression modules:

- 3RT2916-1P.. EMC suppression modules for direct mounting on the contactor (see Accessories for SIRIUS 3RT2 contactors and SIRIUS 3RH2 contactor relays → Miscellaneous)
- For motor suppression modules that are fitted in the main circuit, (see Motor suppression module)

Note:

For more information, see https://support.industry.siemens.com/cs/ww/en/view/109758696

3DI/LC submodule



3DI/LC submodule

This is a digital input module with three inputs for local motor starter functions such as "manual local operation", "implementation of fast inputs" or "end position disconnection".

For a list of all the functions permitted by the 3DI/LC submodule, see Equipment Manual.

The module is plugged into the front of the motor starter from which it is supplied with an operational voltage of 24 V DC.

BaseUnits for motor starters

View of the BaseUnit infeeds for the motor starters

BaseUnits are components used for mounting the ET 200SP I/O modules.

The self-assembling voltage buses integrated into the BaseUnits reduce wiring outlay to the single infeed (both of auxiliary and load voltage).

All modules following on the right are automatically supplied upon plugging the BaseUnits together, if BaseUnits are inserted with a loop-through.

The rugged design and positively driven connection technology enable use in harsh industrial conditions.

The BaseUnits are available with various infeeds for the motor starters.

Benefits

The ET 200SP motor starters offer a number of advantages:

- Fully integrated into the ET 200SP I/O system (including TIA Selection Tool and TIA Portal)
- High degree of flexibility when it comes to safety applications via SIMATIC F-CPU or 3SK safety relays up to SIL 3 and PL e Cat. 4
- Simple, integrated current value transmission
- Extensive parameterization by means of TIA Portal
- Increase of plant availability through fast replacement of units (easy mounting and plug-in technology)
- Greater endurance and reduced heat losses thanks to hybrid technology
- Less space required in the control cabinet (20 to 80%) thanks to high functional density (direct-on-line and reversing starters in same width)
- Extensive diagnostics and information for preventive maintenance
- Configurable inputs via 3DI (LC) submodule
- Less wiring and testing required as a result of integrating several functions into a single device
- Lower overheads for stock-keeping and configuration as a result of the wide setting range of the electronic overload release (up to 1:3)
- Technology has lower intrinsic power losses than speed-controlled drive systems, so that less cooling (and smaller footprint) are possible

Standards and approvals

- IEC/EN 60947-4-2
- UL 60947-4-2
- CSA
- ATEX
- IEC 62061: SIL 3
- ISO 13849-1: PL e
- CCC approval for China

Application

The ET 200SP motor starters are suitable for the following applications:

- Switching and monitoring of
  - 3-phase motors with overload and short-circuit protection (e.g. 400 V asynchronous motors for secondary drives in conveyor systems)
  - 1-phase motors with overload and short-circuit protection (e.g. 230 V motors for pump applications)
  - Resistive loads by means of current value and diagnostics via the maintenance function (e.g. for heaters)
- Plant monitoring and energy management in conveyor systems: By means of the phase asymmetry and residual current detection during current measurement, drive belt monitoring and blocking monitoring are possible, for example.
- Track switching and lifting table control in conveyor systems: Track switches can be implemented by means of the quick stop function and lifting table controls by means of the "instantaneous end position disconnection" function without any laborious programming.
- Safe isolation of drive from main power supply: The isolating functions in accordance with IEC 60947-1 offer protection against inadvertent activation during plant maintenance.

Motor starters in the process industry

For the ET 200SP motor starters, special 3RK1908-0AP00-0.H0 BaseUnits are available that enable the devices to also be used in the ET 200SP HA I/O system. This is typically used in process engineering applications.

Overview

- For pneumatic control of actuators with ET 200SP
- Can be used together with system and IO components of the ET 200SP distributed I/O system.
- Product of the product partner Bürkert Fluid Control Systems, and can only be obtained from Bürkert Fluid Control Systems.

Note

Product partners are external companies outside Siemens AG and its associated companies. Information and descriptions of products made by product partners are non-binding, and are the responsibility of the product partners. These products are manufactured independently and under the responsibility of the respective product partner, and are sold and supplied by it under its terms of business and delivery.

Unless compulsory by law, Siemens assumes no liability or warranty for these products or for connection with these products of the product partners. Also refer to the note on disclaimer/use of hyperlinks under "More information".

Benefits

- High process safety by using non-return valves and pneumatic infeed modules with pressure monitoring.
- System-wide detailed diagnostics in plain text, and also locally on an LC display
- Quick and easy valve change during operation (hot swapping)
- Reduced number of components in the control cabinet (compact control cabinet is possible)
- Quick and easy installation due to full hardware integration: Physical interfaces of pneumatic and I/O components are fully compatible
- Fast and error-free configuration and diagnostics due to full software integration into the Siemens ecosystem (Step 7 Classic, PCS 7, PCS neo, TIA Portal):
  Bürkert pneumatic modules are treated like Siemens I/O modules in configuration and programming

Application

Valve terminals are widely used in industrial automation, and serve as pilot valves for controlling actuators in the food, pharmaceutical and water treatment industries. In combination with the AirLINE SP, type 8647 from the Bürkert Co., the ET 200SP forms a universal interface between process and plant control, and enables the flexible, modular structure of pilot valves and I/O modules. The valve terminal can optionally be equipped with the AirLINE Quick Adapter for installation on the control cabinet floor, which further reduces the installation space required in the control cabinet and significantly simplifies pneumatic installation.

More information

For more detailed information about the AirLINE SP, type 8647 (e.g. data sheet, operating manual) please contact Bürkert directly, see under this link.

Disclaimer of liability

This information and the descriptions have been compiled with great care. However, it is not possible for Siemens to verify that the data supplied by product partners is complete, correct and up-to-date. The possibility that individual items of information might be incorrect, incomplete, or not up-to-date cannot therefore be ruled out. Unless compulsory by law, Siemens accepts no liability for the usability of the data or of the products for the user per se.

Overview

In terms of design and functionality, the SIMATIC ET 200SP PS single-phase load power supply with automatic range switching of the input voltage is perfectly matched to the SIMATIC ET 200SP. The SIMATIC component and the power supply are wired by means of uniform push-in terminal technology. The 24 V supply provides power to the ET 200SP system components such as the interface module, technology module and communication module, as well as the digital or analog inputs/outputs. Comprehensive certifications, such as UL or GL, facilitate universal use. Its extremely flat design also makes this power supply ideally suited for installation in compact on-site control boxes.

Overview

With the BaseUnits (BUs), the ET 200SP offers a rugged and service-friendly design with permanent wiring:

- No tools needed for one-handed wiring using push-in terminals
- Actuation of the spring NC contacts with a standard screwdriver, with a blade width up to 3.5 mm
- Outstanding access due to arrangement of measuring tap, spring NC contacts and cable entry in columns, while at the same time reducing the space required by 64%
- Fault-proof color coding of the spring NC contacts for better orientation in the terminal panel
- Replacement of I/O modules during operation without affecting the wiring
- Operation with module gaps (gaps without I/O module)
- Automatic coding of the I/O modules prevents destruction of the electronics if a module is accidentally inserted in the wrong slot during replacement
- High EMC interference immunity:
  - self-assembling shielded backplane bus
  - multi-layer conductor plate with shield levels for interference-free signal transmission from the terminal to the I/O module
  - system-integrated, space-saving shield connection for quick installation
- Self-assembling potential groups without external wiring or jumpers
- Replaceable terminal box
- Side-by-side latching of the BUs for high mechanical and EMC loads
- Optional module-specific color coding of the terminals according to the color code CC
- Optional equipment marking using slide-in equipment labeling plates

An ET 200SP station can be expanded via one BU-Send BaseUnit with a BA-Send BusAdapter plugged onto it with up to 16 modules from the ET 200AL series of I/O devices with IP67 protection.

Selection and ordering data

Type A0 BaseUnits	
BU15-P16+A10+2D	
BU type A0; BaseUnit (light) with 16 process terminals (1 ... 16) to the module and an additional 10 internally jumpered AUX terminals (1 A to 10 A); for starting a new potential group (max. 10 A)	
• Pack of 1 unit	**6ES7193-6BP20-0DA0**
• Pack of 10 units; to order a pack, please order this Article No. with an order quantity of 10.	**6ES7193-6BP20-2DA0**
BU15-P16+A0+2D	
BU type A0; BaseUnit (light) with 16 process terminals to the module; for starting a new potential group (max. 10 A)	
• Pack of 1 unit	**6ES7193-6BP00-0DA0**
• Pack of 10 units; to order a pack, please order this Article No. with an order quantity of 10.	**6ES7193-6BP00-2DA0**
BU15-P16+A10+2B	
BU type A0; BaseUnit (dark) with 16 process terminals (1...16) to the module and an additional 10 internally bridged AUX terminals (1 A to 10 A); for continuing the potential group	
• Pack of 1 unit	**6ES7193-6BP20-0BA0**
• Pack of 10 units; to order a pack, please order this Article No. with an order quantity of 10.	**6ES7193-6BP20-2BA0**
BU15-P16+A0+2B	
BU type A0; BaseUnit (dark) with 16 process terminals to the module; for continuing the potential group	
• Pack of 1 unit	**6ES7193-6BP00-0BA0**
• Pack of 10 units; to order a pack, please order this Article No. with an order quantity of 10.	**6ES7193-6BP00-2BA0**
Type B0 BaseUnits	
BU20-P12+A4+0B	
BU type B0; BaseUnit (dark) with 12 process terminals (1 ... 12) to the module and an additional 4 internally jumpered AUX terminals (1 A to 4 A); for continuing the potential group; 1 unit	
• Pack of 1 unit	**6ES7193-6BP20-0BB0**
• Pack of 10 units; to order a pack, please order this Article No. with an order quantity of 10.	**6ES7193-6BP20-2BB0**
Type B1 BaseUnits	
BU20-P12+A0+4B	
BU type B1; BaseUnit (dark) with 12 process terminals to the module; for continuing the potential group; 1 unit	
• Pack of 1 unit	**6ES7193-6BP20-0BB1**
• Pack of 10 units; to order a pack, please order this Article No. with an order quantity of 10.	**6ES7193-6BP20-2BB1**
Type C0 BaseUnits	
BU20-P6+A2+4D	**6ES7193-6BP20-0DC0**
BU type C0; BaseUnit (light) with 6 push-in terminals (1...6) to the module and an additional 2 AUX terminals; new potential group	
Type C1 BaseUnits	
BU20-P6+A2+4B	**6ES7193-6BP20-0BC1**
BU type C1; BaseUnit (dark) with 6 push-in terminals (1 ... 6) to the module and 2 AUX terminals; bridged to the left	
Type A1 BaseUnits (with temperature detection)	

© Siemens AG 2026

Selection and ordering data (continued)

BU15-P16+A0+12D/T BU type A1; BaseUnit (light) with 16 process terminals (1 ... 16) to the module and 2x5 internally jumpered additional terminals (1 B to 5 B and 1 C to 5 C); for starting a new potential group (max. 10 A)	**6ES7193-6BP40-0DA1**
BU15-P16+A0+2D/T BU type A1; BaseUnit (light) with 16 process terminals to the module; for starting a new potential group (max. 10 A)	**6ES7193-6BP00-0DA1**
BU15-P16+A0+12B/T BU type A1; BaseUnit (dark) with 16 process terminals (1 ... 16) to the module and an additional 2x5 internally bridged additional terminals (1 B to 5 B and 1 C to 5 C); for continuing the potential group	**6ES7193-6BP40-0BA1**
BU15-P16+A0+2B/T BU type A1; BaseUnit (dark) with 16 process terminals to the module; for continuing the potential group	**6ES7193-6BP00-0BA1**
Type F0 BaseUnits	
BU20-P8+A4+0B BU type F0; BaseUnit (dark) with 8 process terminals to the module and an additional 4 internally jumpered AUX terminals (1 A to 4 A); for continuing the potential group	**6ES7193-6BP20-0BF0**
BaseUnits type U0	
BU20-P16+A0+2D BU type U0; BaseUnit (light) with 16 process terminals to the module; for starting a new potential group (max. 10 A)	
• Pack of 1 unit	**6ES7193-6BP00-0DU0**
• Pack of 10 units; to order a pack, please order this Article No. with an order quantity of 10.	**6ES7193-6BP00-2DU0**
BU20-P16+A0+2B BU type U0; BaseUnit (dark) with 16 process terminals to the module; for continuing the potential group	
• Pack of 1 unit	**6ES7193-6BP00-0BU0**
• Pack of 10 units; to order a pack, please order this Article No. with an order quantity of 10.	**6ES7193-6BP00-2BU0**
BaseUnit for redundant setup	
BaseUnit type M0 With 2 slots to accommodate R1-capable interface modules IM 155-6 PN R1; incl. server module	**6ES7193-6BR00-0HM0**
Station expansion with IP67 I/O system ET 200AL	
BaseUnit BU-Send	**6ES7193-6BN00-0NE0**
ET 200SP BA-Send 1 x FC BusAdapter	**6ES7193-6AS00-0AA0**
Accessories	
Equipment labeling plate 10 sheets of 16 labels	**6ES7193-6LF30-0AW0**
BU cover For covering empty slots (gaps); 5 units	
• 15 mm wide	**6ES7133-6CV15-1AM0**
• 20 mm wide	**6ES7133-6CV20-1AM0**
Shield connection 5 shield supports including support foot and shield terminals each for plugging onto BaseUnits with automatic low-impedance connection to functional grounding	**6ES7193-6SC20-1AM0**
Color-coded labels	
• Color code CC01, module-specific, for 16 push-in terminals; for BaseUnit type A0, A1; 10 units	**6ES7193-6CP01-2MA0**

Selection and ordering data (continued)

• Color code CC01, module-specific, for 16 push-in terminals; for BaseUnit type A0, A1; 50 units	**6ES7193-6CP01-4MA0**
• Color code CC02, module-specific, for 16 push-in terminals; for BaseUnit type A0, A1; 10 units	**6ES7193-6CP02-2MA0**
• Color code CC02, module-specific, for 16 push-in terminals; for BaseUnit type A0, A1; 50 units	**6ES7193-6CP02-4MA0**
• Color code CC03, module-specific, for 16 push-in terminals; for BaseUnit type A0, A1; 10 units	**6ES7193-6CP03-2MA0**
• Color code CC04, module-specific, for 16 push-in terminals; for BaseUnit type A0, A1; 10 units	**6ES7193-6CP04-2MA0**
• Color code CC71, for 10 AUX terminals 1 A to 10 A, for BU type A0, yellow/green, with push-in terminals; 10 units	**6ES7193-6CP71-2AA0**
• Color code CC72, for 10 AUX terminals 1 A to 10 A, for BU type A0, red, with push-in terminals; 10 units	**6ES7193-6CP72-2AA0**
• Color code CC73, for 10 AUX terminals 1 A to 10 A, for BU type A0, blue, with push-in terminals; 10 units	**6ES7193-6CP73-2AA0**
• Color code CC74, for 2x5 additional terminals, 5 x red, 5 x blue, BU type A1 with push-in terminals; 10 units	**6ES7193-6CP74-2AA0**
• Color code CC81, for 4 AUX terminals 1 A to 4 A, yellow/green, for BaseUnit type B0; 10 units	**6ES7193-6CP81-2AB0**
• Color code CC82, for 4 AUX terminals 1 A to 4 A, red, for BaseUnit type B0; 10 units	**6ES7193-6CP82-2AB0**
• Color code CC83, for 4 AUX terminals 1 A to 4 A, blue, for BaseUnit type B0; 10 units	**6ES7193-6CP83-2AB0**
• Color code CC41, module-specific, for 12 push-in terminals; for BaseUnit type B1; 10 units	**6ES7193-6CP41-2MB0**
• Color code CC84, for 2 AUX terminals 1 A to 2 A, yellow/green, for BaseUnit type C0; 10 units	**6ES7193-6CP84-2AC0**
• Color code CC85, for 2 AUX terminals 1 A to 2 A, red, for BaseUnit type C0; 10 units	**6ES7193-6CP85-2AC0**
• Color code CC86, for 2 AUX terminals 1 A to 2 A, blue, for BaseUnit type C0; 10 units	**6ES7193-6CP86-2AC0**

Overview

With the BaseUnits (BUs), the ET 200SP offers a rugged and service-friendly design with permanent wiring:

- No tools needed for one-handed wiring using push-in terminals
- Actuation of the spring NC contacts with a standard screwdriver, with a blade width up to 3.5 mm
- Outstanding access due to arrangement of measuring tap, spring NC contacts and cable entry in columns, while at the same time reducing the space required by 64%
- Fault-proof color coding of the spring NC contacts for better orientation in the terminal panel
- Replacement of I/O modules during operation without affecting the wiring
- Operation with module gaps (missing I/O module)
- Automatic coding of the I/O modules prevents destruction of the electronics if a module is accidentally inserted in the wrong slot during replacement
- High immunity to electromagnetic interference due to
  - self-assembling shielded backplane bus
  - multi-layer conductor plate with shield levels for interference-free signal transmission from the terminal to the I/O module
  - system-integrated, space-saving shield connection for quick installation
- Self-assembling potential groups without external wiring or jumpers
- Replaceable terminal box
- Side-by-side latching of the BUs for high mechanical load capacity
- Optional module-specific color coding of the terminals according to the color code CC
- Optional equipment marking using slide-in equipment labeling plates

An ET 200SP station can be expanded via one BU-Send BaseUnit with a BA-Send BusAdapter plugged onto it with up to 16 modules from the ET 200AL series of I/O devices with IP67 protection.

Note:

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the corresponding standard products. SIPLUS extreme-specific information was added.

Selection and ordering data

SIPLUS BaseUnits type A0	
BU15-P16+A10+2D (Extended temperature range and exposure to environmental substances) BU type A0; BaseUnit (light) with 16 process terminals (1...16) to the module and an additional 10 internally bridged AUX terminals (1 A to 10 A); for starting a new load group (max. 10 A)	**6AG1193-6BP20-7DA0**
BU15-P16+A0+2D (Extended temperature range and exposure to environmental substances) BU type A0; BaseUnit (light) with 16 process terminals to the module; for starting a new load group (max. 10 A)	**6AG1193-6BP00-7DA0**
BU15-P16+A10+2B (Extended temperature range and exposure to environmental substances) BU type A0; BaseUnit (dark) with 16 process terminals (1...16) to the module and an additional 10 internally bridged AUX terminals (1 A to 10 A); for continuing the load group	**6AG1193-6BP20-7BA0**
BU15-P16+A0+2B (Extended temperature range and exposure to environmental substances) BU type A0; BaseUnit (dark) with 16 process terminals to the module; for continuing the load group	**6AG1193-6BP00-7BA0**
SIPLUS BaseUnits type A1 (with temperature detection)	
BU15-P16+A0+12D/T (Extended temperature range and exposure to environmental substances) BU type A1; BaseUnit (light) with 16 process terminals (1...16) to the module and an additional 2x5 internally bridged additional terminals (1 B to 5 B and 1 C to 5 C); for starting a new load group (max. 10 A)	**6AG1193-6BP40-7DA1**
BU15-P16+A0+2D/T (Extended temperature range and exposure to environmental substances) BU type A1; BaseUnit (light) with 16 process terminals to the module; for starting a new load group (max. 10 A)	**6AG1193-6BP00-7DA1**
BU15-P16+A0+12B/T (Extended temperature range and exposure to environmental substances) BU type A1; BaseUnit (dark) with 16 process terminals (1...16) to the module and an additional 2x5 internally bridged additional terminals (1 B to 5 B and 1 C to 5 C); for continuing the load group	**6AG1193-6BP40-7BA1**
BU15-P16+A0+2B/T (Extended temperature range and exposure to environmental substances) BU type A1; BaseUnit (dark) with 16 process terminals to the module; for continuing the load group	**6AG1193-6BP00-7BA1**
SIPLUS BaseUnits type B0	
BU20-P12+A4+0B (Extended temperature range and exposure to environmental substances) BU type B0; BaseUnit (dark) with 12 process terminals (1...12) to the module and an additional 4 internally bridged AUX terminals (1 A to 4 A); for continuing the load group; 1 unit	**6AG1193-6BP20-7BB0**
SIPLUS BaseUnits type B1	
BU20-P12+A0+4B (Extended temperature range and exposure to environmental substances)	**6AG1193-6BP20-7BB1**

© Siemens AG 2026

Selection and ordering data (continued)

BU type B1; BaseUnit (dark) with 12 process terminals to the module; for continuing the load group; 1 unit	
SIPLUS BaseUnits type C0	
BU20-P6+A2+4D (Extended temperature range and exposure to environmental substances) BU type C0; BaseUnit (light) with 6 push-in terminals (1...6) to the module and 2 AUX terminals; new load group	**6AG1193-6BP20-7DC0**
SIPLUS BaseUnits type F0	
BU20-P8+A4+0B (Extended temperature range and exposure to environmental substances) BU type F0; BaseUnit (dark) with 8 process terminals to the module and an additional 4 internally bridged AUX terminals (1 A to 4 A); for continuing the load group	**6AG1193-6BP20-2BF0**
SIPLUS BaseUnits type U0	
BU20-P16+A0+2D (Extended temperature range and exposure to environmental substances) BU type U0; BaseUnit (light) with 16 process terminals to the module; for starting a new load group (max. 10 A)	**6AG1193-6BP00-7DU0**
BU20-P16+A0+2B (Extended temperature range and exposure to environmental substances) BU type U0; BaseUnit (dark) with 16 process terminals to the module; for continuing the load group	**6AG1193-6BP00-7BU0**
SIPLUS BaseUnits type M0 (Extended temperature range and exposure to environmental substances)	
For redundant configuration, with 2 slots to accommodate R1-capable interface modules IM 155-6 PN R1; incl. server module	**6AG1193-6BR00-7HM0**
Accessories	
SIPLUS Mounting Kit ET 200SP with maximum width of 172 mm	**6AG1193-6AA00-0AA0**
SIPLUS Mounting Kit ET 200SP with maximum width of 19" Mounting accessories for use with increased mechanical vibration and shock loads. Can be used with SIPLUS BaseUnits with a height of up to 117 mm, types A0/A1 without AUX or add-on terminals, as well as types B0, B1, C0, C1, D0, U0	**6AG1193-6AB00-0AA0**
Other accessories	See SIMATIC ET 200SP BaseUnits

Overview

SIMATIC BA 2xFC BusAdapter for direct laying of the PROFINET cable via FastConnect connection

SIMATIC BA 2xLC-LD BusAdapter with 2 LC-LD sockets, for use in redundant systems, max. cable length 20 km

SIMATIC BA LC/RJ45 BusAdapter for use as a system-integrated media converter from copper (RJ45) to multimode glass fiber (LC).

Overview (continued)

SIMATIC BA LC-LD/M12 BusAdapter for use as a system-integrated media converter from copper (M12) to single-mode glass fiber (LC-LD).

ET 200SP BA-Send BusAdapter for expansion of an ET 200SP station with ET 200AL modules

For SIMATIC ET 200SP, two types of BusAdapter (BA) are available for selection:

- ET 200SP "BA-Send" BusAdapter
  for expansion of an ET 200SP station with up to 16 modules from the ET 200AL I/O series with IP67 protection via an ET connection
- SIMATIC BusAdapter
  for the free selection of the connection system (pluggable or direct connection) and physical PROFINET connection (copper, POF, HCS or glass fiber) to devices with a SIMATIC BusAdapter interface. One further advantage of the SIMATIC BusAdapter: only the adapter needs to be replaced for subsequent conversion to the rugged FastConnect technology or a fiber-optic connection, or to repair defective RJ45 sockets.

Selection and ordering data

BA 2xRJ45 BusAdapter For IM 155-6 PN ST, HF, R1	**6ES7193-6AR00-0AA0**
BA 2xFC BusAdapter For IM 155-6 PN ST, HF; R1; for increased resistance to vibration and EMC loads	**6ES7193-6AF00-0AA0**
BA 2xM12 BusAdapter For IM 155-6 PN ST, HF; R1; 2 x M12 push-pull sockets, D-coding, also suitable for standard M12. For PROFINET	**6ES7193-6AM00-0AA0**
BA 2xSCRJ BusAdapter For IM 155-6 PN HF; R1; fiber-optic cable connection for POF or PCF cables up to 250 m, with monitoring of attenuation	**6ES7193-6AP00-0AA0**
BA SCRJ/RJ45 BusAdapter For IM 155-6 PN HF, R1; with media converter glass fiber-optic cable - copper; 1 x SCRJ glass fiber-optic cable connection, 1 x RJ45 connection	**6ES7193-6AP20-0AA0**
BA SCRJ/FC BusAdapter For IM 155-6 PN HF, R1; with media converter glass fiber-optic cable - copper; 1 x SCRJ glass fiber-optic cable connection, 1 x FastConnect connection	**6ES7193-6AP40-0AA0**
BA 2xLC BusAdapter For IM 155-6 PN HF, R1; two glass fiber-optic cable connections	**6ES7193-6AG00-0AA0**
BA LC/RJ45 BusAdapter For IM 155-6 PN HF, R1; with media converter glass fiber-optic cable - copper; 1 x LC connection, 1 x RJ45 connection	**6ES7193-6AG20-0AA0**
BA LC/FC BusAdapter For IM 155-6 PN HF, R1; with media converter glass fiber-optic cable - copper; 1 x LC connection, 1 x FastConnect connection	**6ES7193-6AG40-0AA0**
BA 2xLC-LD BusAdapter For IM 155-6 PN HF, R1; two glass fiber-optic cable connections	**6ES7193-6AG50-0AA0**
BA LC-LD/RJ45 BusAdapter For IM 155-6 PN HF, R1; with media converter glass fiber-optic cable - copper; 1 x LC-LD connection, 1 x RJ45 connection	**6ES7193-6AG60-0AA0**
BA LC-LD/M12 BusAdapter For IM 155-6 PN HF, R1; with media converter glass fiber-optic cable - copper; 1 x LC-LD connection, 1 x M12 connection	**6ES7193-6AG70-0AA0**
M12-180/M12-180 IE connecting cable Preassembled with IE FC trailing cable GP, M12 plugs (D-coded, push-pull)	
0.5 m	**6XV1871-8AE50**
1.0 m	**6XV1871-8AH10**
1.5 m	**6XV1871-8AH15**
2.0 m	**6XV1871-8AH20**
3.0 m	**6XV1871-8AH30**
5.0 m	**6XV1871-8AH50**
10 m	**6XV1871-8AN10**
15 m	**6XV1871-8AN15**
MM FO CORD LC/LC Preassembled patch cable with 2x LC duplex connectors; 1.0 m	**6XV1843-5EH10-0AA0**
SM FO CORD LC/LC Preassembled patch cable with 2x LC duplex connectors; 1.0 m	**6XV1843-5FH10-0AA0**

Selection and ordering data (continued)

FO standard cable 50/125 MM FO standard cable preassembled with 2x LC duplex connectors, 5.0 m	**6XV1873-5AH50**
FO ROBUST CABLE 50/125 Robust MM FO cable preassembled with 2x LC duplex connectors, 10 m	**6XV1873-5RN10**
FC IE stripping tool	**6GK1901-1GA00**
IE FC RJ45 plug 2x2 Industrial Ethernet FastConnect RJ45 plug 180 2x 2, RJ45 plug-in connector (10/100 Mbps), with rugged metal enclosure and FC connection technology, for IE FC cable 2x 2; 180° cable outlet; 1 unit	**6GK1901-1BB10-2AA0**
Station expansion with IP67 I/O system ET 200AL	
ET 200SP BA-Send 1 x FC BusAdapter	**6ES7193-6AS00-0AA0**
BaseUnit BU-Send	**6ES7193-6BN00-0NE0**
Accessories	
Equipment labeling plate 10 sheets of 16 labels, for printing with thermal transfer card printer or plotter	**6ES7193-6LF30-0AW0**
Unlatching strap for M12 BA 10 units, for push-pull PROFINET plug, e. g. when using the BA 2xM12 BusAdapter	**6ES7193-6DL00-2AA0**

Overview

SIMATIC BA 2xFC BusAdapter for direct laying of the PROFINET cable via FastConnect connection.

SIMATIC BA 2xLC-LD BusAdapter with 2 LC-LD sockets, for use in redundant systems, max. cable length 20 km

SIMATIC BA LC/RJ45 BusAdapter for use as a system-integrated media converter from copper (RJ45) to multimode glass fiber (LC).

Overview (continued)

SIMATIC BA LC-LD/M12 BusAdapter for use as a system-integrated media converter from copper (M12) to single-mode glass fiber (LC-LD).

ET 200SP BA-Send BusAdapter for expansion of an ET 200SP station with ET 200AL modules.

- ET 200SP "BA-Send" BusAdapter
  for expansion of an ET 200SP station with up to 16 modules from the ET 200AL I/O series with IP67 protection via an ET connection.
- SIMATIC BusAdapter
  for the free selection of the connection system (pluggable or direct connection) and physical PROFINET connection (copper, POF, HCS or glass fiber) to devices with a SIMATIC BusAdapter interface. Another advantage of the SIMATIC BusAdapters: only the adapter needs to be replaced for subsequent conversion to the rugged FastConnect technology or a fiber-optic connection, or to repair defective RJ45 sockets.

Note

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

Overview

Redundant R1 applications place high demands on

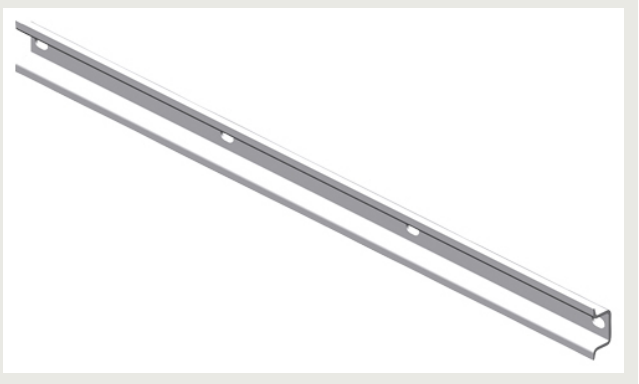
- the mechanical fixation and
- the low-impedance functional grounding connection of the functional grounding

of the individual ET 200SP components. These requirements cannot be ensured with DIN rails according to EN 60715.

For this reason, the use of the specially developed SIMATIC system rail is mandatory for an R1 design of the ET 200SP.

The system rail has

- tight dimensional tolerances for operating conditions under high mechanical load
- long-term stable surface coating for optimum interference suppression
- sturdy design for cantilever construction
- integrated Bosch profile grooves for easy and flexible mounting of modules and accessories (mounting brackets and hinges, damping elements, shield connections, cable ducts, etc.)



This ensures the high availability of an ET 200SP in R1 operation.

Selection and ordering data

SIMATIC system rail	
with DIN rail according to EN 60715 (35 × 7.5), with 6 mm profile grooves, B-type	
• Length: 482.6 mm for 19" cabinets	**6ES7193-6MR00-0AA0**
• Length: 530 mm for 600 mm cabinets	**6ES7193-6MR00-0BA0**
• Length: 830 mm for 900 mm cabinets	**6ES7193-6MR00-0CA0**
• Length 2 m	**6ES7193-6MR00-0DA0**

Overview

The head-end stations and I/O modules can optionally be equipped with labeling strips (13 x 31 mm) for system-specific marking. The labeling strips can be inscribed mechanically. Labeling strips are available in two versions in the colors light gray and yellow:

- 500 strips on the roll, for printing on thermal transfer printers. Core diameter 40 mm, external diameter 70 mm, width 62 mm
- 10 DIN A4 sheets with 100 strips each, 180 g/sm card, perforated, for printing using a laser printer direct from TIA Portal or via print templates

Selection and ordering data

Labeling strips	
500 labeling strips on roll, light gray, for inscription with thermal transfer roll printer	**6ES7193-6LR10-0AA0**
500 labeling strips on roll, yellow, for inscription with thermal transfer roll printer	**6ES7193-6LR10-0AG0**
1000 labeling strips DIN A4, light gray, card, for inscription with laser printer	**6ES7193-6LA10-0AA0**
1000 labeling strips DIN A4, yellow, card, for inscription with laser printer	**6ES7193-6LA10-0AG0**

© Siemens AG 2026

Overview

Optionally, one equipment labeling plate each can be plugged onto head-end stations, BusAdapters, BaseUnits, and I/O modules. Equipment labeling plates are supplied in packs of 10 sheets with 16 labels each. The labels can be printed with thermal transfer card printers or plotters, or stickers can be attached to them. Advantages compared to labels that are attached directly:

- The inscription on the front is not covered
- Simple label replacement when replacing a module
- No parallax errors when marking the BaseUnits on the mounting plate

The size of the labels is 14.8 x 10.5 mm (W x H)

Selection and ordering data

Equipment labeling plate 10 sheets of 16 labels	**6ES7193-6LF30-0AW0**

Overview

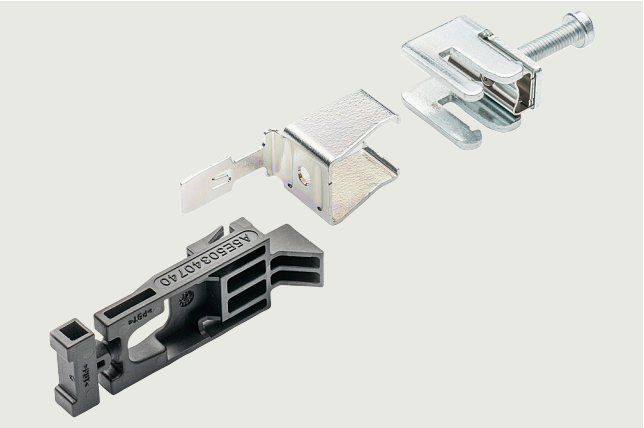
The ET 200SP system can be operated with any number of slot gaps (BU slot without inserted I/O module). Applications for this include:

- Partial commissioning
- Prewired but unequipped options

To protect against damage, such slot gaps must be covered by a BU cover.

Within the BU cover, an equipment labeling plate for identification of the I/O module planned for this slot can be stored.

Versions:



- For BaseUnits with a width of 15 mm (pack containing 5 BU covers)
- For BaseUnits with a width of 20 mm (pack containing 5 BU covers)

Selection and ordering data

BU cover	
for covering empty slots (gaps); 5 units	
• 15 mm wide	**6ES7133-6CV15-1AM0**
• 20 mm wide	**6ES7133-6CV20-1AM0**

Overview

The shield connection permits the low-cost connection of cable shields. Compared to external shield supports, the system offers the following advantages:

- Quick installation without tools by plugging the shield connection element onto the BaseUnit
- Automatic low-impedance connection to the functional grounding (mounting rail)
- Optimized EMC properties by separating the signal lines from the supply voltage lines
- Short unshielded cable lengths
- Requires little space

Selection and ordering data

Shield connection 5 shield supports including support foot and shield terminals each for plugging onto BaseUnits with automatic low-impedance connection to functional grounding	**6ES7193-6SC20-1AM0**

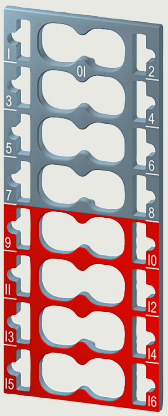
Overview



- For PROFINET push-pull plug, e.g. at BA 2xM12 BusAdapter
- Enables unlatching of the plug without disassembly of the BusAdapter

Selection and ordering data

Unlatching strap 10 units, for push-pull PROFINET plug, e. g. when using the BA 2xM12 BusAdapter	**6ES7193-6DL00-2AA0**

© Siemens AG 2026

Overview

The I/O modules that are plugged onto the BaseUnits determine the potentials connected at the process terminals. The +/- potentials can optionally be identified using module-specific color-coded labels. The potentials of the AUX and add-on terminals can also be marked using color-coded labels. Advantages of the color-coded labels:

- Quick installation (one label for marking 16 terminals)
- Printed terminal numbers
- Avoidance of wiring errors
- Simple detection of potentials during servicing

Selection and ordering data

Module-specific color-coded labels	
Color code CC00, for 16 process terminals, BU type A0, A1, gray (terminals 1 to 8), red (terminals 9 to 16)

Technical specifications

Article number	6AG1193-6PA00-7AA0 SIPLUS ET 200SP Servermodul
General information	
Product type designation	Server module
Installation type/mounting	
Mounting	Mounting rail 7.5 mm and 15 mm
Ambient conditions	
Ambient temperature during operation	
• min.	-40 °C; = Tmin
• max.	70 °C; = Tmax
Altitude during operation relating to sea level	
• Installation altitude above sea level, max.	5 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m) // Tmin ... (Tmax - 10 K) at 795 hPa ... 658 hPa (+2 000 m ... +3 500 m) // Tmin ... (Tmax -20 K) at 658 hPa ... 540 hPa (+3 500 m ... +5 000 m)
Relative humidity	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; RH incl. condensation / frost (no commissioning in bedewed state), horizontal installation
Resistance	
- Coolants and lubricants	
- Resistant to commercially available coolants and lubricants	Yes; Incl. diesel and oil droplets in the air
- Use in stationary industrial systems	
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust, *
- Against mechanical environmental conditions acc. to EN 60721-3-3	Yes; Class 3M8 using the SIPLUS Mounting Kit ET 200SP (6AG1193-6AA00-0AA0)
- Use on ships/at sea	
- to biologically active substances according to EN 60721-3-6	Yes; Class 6B2 mold and fungal spores (excluding fauna); Class 6B3 on request
- to chemically active substances according to EN 60721-3-6	Yes; Class 6C3 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-6	Yes; Class 6S3 incl. sand, dust; *
- Against mechanical environmental conditions acc. to EN 60721-3-6	Yes; Class 6M4 using the SIPLUS Mounting Kit ET 200SP (6AG1193-6AA00-0AA0)
- Usage in industrial process technology	
- Against chemically active substances acc. to EN 60654-4	Yes; Class 3 (excluding trichlorethylene)
- Environmental conditions for process, measuring and control systems acc. to ANSI/ISA-71.04	Yes; Level GX group A/B (excluding trichlorethylene; harmful gas concentrations up to the limits of EN 60721-3-3 class 3C4 permissible); level LC3 (salt spray) and level LB3 (oil)
- Remark	
- Note regarding classification of environmental conditions acc. to EN 60721, EN 60654-4 and ANSI/ISA-71.04	* The supplied plug covers must remain in place over the unused interfaces during operation!
Conformal coating	
• Coatings for printed circuit board assemblies acc. to EN 61086	Yes; Class 2 for high reliability
• Protection against fouling acc. to EN 60664-3	Yes; Type 1 protection
• Military testing according to MIL-I-46058C, Amendment 7	Yes; Discoloration of coating possible during service life
• Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies according to IPC-CC-830A	Yes; Conformal coating, Class A

Overview

The Spacing Modules can be used instead of a SIPLUS BaseUnit with BU cover if a blank space is required. For example, empty spaces are required for some modules for operation at 70 °C.

Selection and ordering data

SIPLUS Spacing Module (Extended temperature range and exposure to environmental substances) With conformal coating, no terminals, bridged to the left, WxH: 15 mm x 117 mm	**6AG1193-6BN00-7BA0**
SIPLUS ET 200SP Spacing Module RAIL With conformal coating, -40...+70 °C, no terminals, bridged to the left, WxH: 15 mm x 117 mm	**6AG2193-6BN00-4BA0**

Overview

The operation of selected modules requires an electronic coding element that is always included in the scope of delivery of the I/O module. Apart from the mechanical coding function, this contains a re-writable memory for the redundant storage of module-specific configuration data (e.g. F target address for fail-safe modules or parameter data in the case of the IO-Link master). In this way, this data is automatically backed up during a module replacement. This saves the user from having to set addresses manually or back up data when replacing modules.

At present, there are two types of electronic coding element:

- e-coding element (Type H), which can be used in the I/O modules:
  - CM IO-Link master
  - F-CM AS-i Safety
- e-coding element (Type F), which can be used in the I/O modules:
  - F-DI 8x24VDC HF
  - F-DQ 4x24VDC/2A PM HF
  - F-PM-E 24VDC/8A PPM ST

Overview

ET 200SP HA with redundant interface module, standard modules, Ex modules and D-SUB terminal block.

Compact design, flexible connection possibilities and high system availability with redundant PROFINET connections: the SIMATIC ET 200SP HA distributed I/O system is perfectly suited to the requirements of the process industry. The new design allows up to 56 I/O modules per station. An impressively high concentration of up to 32 channels on a module that is only 22.5 mm wide allows for maximum economy in the control cabinet.

Redundant PROFINET connections allow the connection of high-availability controllers via two independent networks, with a choice of copper or fiber-optic cables. The system can be scaled and extended in small steps using a variety of available modules, for example with digital and analog I/Os as well as NAMUR, HART, and other protocols. All 24 V standard signals are connected via an identical terminal block type, which allows a high degree of standardization for the control cabinets.

SIMATIC ET 200SP HA is designed for use in the control cabinet as well as for hazardous areas up to hazardous zone 2. The extended temperature range from -40 to +70 °C and the conformal coating of all components allow direct installation in the field.

Overview

IM 155-6 PN HA

IM 155-6 PN HA interface module

The IM 155-6 PN HA together with the IM carrier module and the BusAdapter forms the interface of the ET 200SP HA. The interface is used for communication between the CPU and the connected ET 200SP HA I/O modules over PROFINET.

Selection and ordering data

Interface module	
PROFINET IM 155-6 PN interface module Max. 56 I/O modules, multi hot swap, no server module	**6DL1155-6AU00-0PM0**
Accessories	
IM cover Slot cover for interface module slots, to protect vacant slots Width 50 mm, 5 units	**6DL1133-6CV50-0AM0**

Accessories

Slot cover, labeling strips

A slot cover is inserted in a terminal block:

- When slots do not contain I/O modules
- If slots are reserved for future expansion (empty)

You can insert a labeling strip for the planned I/O module in the front of the slot cover. The labeling strips can be ordered as accessories:

- For thermal transfer printers on a roll
- For laser printers as A4 sheets

Color-coding system

Color-coded labels facilitate cable assignment and identification of the potentials of an I/O module. A color code (for example CC01) is printed on each color coding label and I/O module. The color code can be read straight off the I/O module to determine which color-coded label you need for the terminal block.

The reference identification labels in accordance with EN 81346 can be attached to interface modules, BusAdapters and I/O modules. With the standard markings for printing, the reference identification label is suitable for automatic labeling with E-CAD systems.

• Monitoring the supply voltage	Yes; module-wise	Yes; module-wise	Yes		Yes
- parameterizable	Yes	Yes			Yes
• Monitoring of encoder power supply	Yes				Yes
• Wire break	Yes; Channel-by-channel, optional protective circuit for preventing wire-break diagnostics in the case of simple encoder contacts: 15 kOhm to 18 kOhm	Yes; Channel-by-channel, optional protective circuit for preventing wire-break diagnostics in the case of simple encoder contacts: 15 kOhm to 18 kOhm	Yes; channel by channel		Yes
• Short-circuit		No			Yes
• Short-circuit to ground	Yes; Encoder supply to M, channel by channel				
• Group error			Yes		Yes
• Changeover contact error					Yes
Diagnostics indication LED					
• MAINT LED	Yes; Yellow LED	Yes; Yellow LED	Yes; Yellow LED	Yes; Yellow LED	Yes; Yellow LED
• Monitoring of the supply voltage (PWR-LED)	Yes; green PWR LED	Yes; green PWR LED	Yes; green PWR LED		Yes; green PWR LED
• Channel status display	Yes; green LED	Yes; green LED	Yes; green LED	Yes; green LED	Yes; green LED
• for channel diagnostics	Yes; red LED	No	Yes; red LED		Yes; red LED
• for module diagnostics	Yes; green/red LED	Yes; green/red DIAG LED	Yes; green/red DIAG LED	Yes; green/red DIAG LED	Yes; green/red DIAG LED
Potential separation					
Potential separation channels					
• between the channels and backplane bus	Yes	Yes	Yes	Yes	Yes
Ambient conditions					
Ambient temperature during operation					
• horizontal installation, min.	-40 °C	-40 °C	-40 °C	-40 °C	-40 °C
• horizontal installation, max.	70 °C	70 °C	70 °C	70 °C	70 °C
• vertical installation, min.	-40 °C	-40 °C	-40 °C	-40 °C	-40 °C
• vertical installation, max.	60 °C	60 °C	60 °C	60 °C	60 °C
Dimensions					
Width	22.5 mm	22.5 mm	22.5 mm	22.5 mm	22.5 mm

Technical specifications (continued)

Article number	6DL1132-6BF20-0PK0 ET 200SP HA, DQ 8x24VDC/2A HA	6DL1132-6BH00-0PH1 ET 200SP HA, DQ 16X24VDC/0,5A	6DL1132-6BL00-0PH1 ET 200SP HA, DQ 32X24VDC/0,5A	6DL1132-6HD50-0PK0 ET 200SP HA, RQ 4X120VDC-230VAC/5A CO
Operating mode				
• DQ	Yes	Yes	Yes	
• DQ with energy-saving function		No	No	
• PWM		No	No	
• Oversampling		No	No	
• MSO		No		
Supply voltage				
Rated value (DC)	24 V	24 V	24 V	24 V
Reverse polarity protection	Yes	Yes	Yes	Yes
Digital outputs				
Number of digital outputs	8	16	32	4
Current-sinking	No	No	No	
Current-sourcing	Yes	Yes	Yes	
Digital outputs, parameterizable		Yes	Yes	
Short-circuit protection	Yes; Clocked electronically	Yes; Ensure sufficient low-resistance cable routing to the sensor/actuator in order to attain the response threshold. Depending on the cable cross-section used, there may be constraints regarding the usable length of cable.	Yes; Clocked electronically	
Open-circuit detection	No	Yes; 0.7 mA test current for wire-break diagnostics; this value is doubled in the case of IO redundancy	No	
Overload protection	Yes	Yes	Yes	
Limitation of inductive shutdown voltage to	-27 V	L+ -(37 to 41V)	Typ. L+ (-53 V)	
Controlling a digital input	Yes	Yes	Yes	
Switching capacity of the outputs				
• with resistive load, max.	2 A	0.5 A	0.5 A	
• with inductive load, max.	2 A			
• on lamp load, max.	10 W	5 W	5 W	
Load resistance range				
• lower limit	12 Ω	48 Ω	48 Ω	
• upper limit	4 kΩ	12 kΩ	4 kΩ	
Output current				
• for signal "1" rated value	2 A	0.5 A	0.5 A	
• for signal "0" residual current, max.	0.1 mA	0.7 mA; Test current for wire-break diagnostics; this value is doubled in the case of IO redundancy	0.1 mA	
Output delay with resistive load				
• "0" to "1", typ.	80 µs	50 µs	54 µs	
• "1" to "0", typ.	300 µs	100 µs	48 µs	
Parallel switching of two outputs				
• for uprating	No	No	No	
• for redundant control of a load	No	Yes	Yes; only outputs of the same group	
Switching frequency				
• with resistive load, max.	100 Hz	100 Hz	100 Hz	2 Hz
• with inductive load, max.		2 Hz	2 Hz	0.5 Hz
• with inductive load (acc. to IEC 60947-5-1, DC13), max.	0.2 Hz			
• on lamp load, max.	10 Hz	10 Hz	10 Hz	2 Hz
Total current of the outputs

Overview

- AI 8×U/I/TC/4×RTD 2-/4-wire HA analog input module
  8 analog inputs
  Measuring range: Voltage: 1 ... 5 V, 0 ... 10 V, ±50 mV, ±80 mV, ±250 mV, ±500 mV, ±1 V, ±2.5 V, ±5 V, ±10 V; current: 4 ... 20 mA (2-/4-wire); und 0 ... 20 mA (4-wire), ±20 mA (4-wire); TC elements: B, C, N, E, R, S, J, L, T, K, U, TXK; RTD elements: Pt100, Pt200, Pt500, Pt1000, Ni100, Ni120, Ni200, Ni500, Ni1000, Cu10, LG-Ni1000 | resistance areas: 150, 300, 600, 3000, 6000 Ohm | PTC
- AI 16×I 2-wire HA analog input module
  16 analog inputs
  Measuring range 4 ... 20 mA; 0 ... 10 mA; 0 ... 20 mA
- AI 16×I 2-wire HART HA analog input module
  16 analog inputs
  Measuring range 0 to 20 mA, 0 to 10 mA, 4 to 20 mA, 4 to 20 mA with HART
- AI 16×TC/8×RTD 2-/3-/4-wire HA analog input module
  16 analog inputs for thermocouples; alternatively 8 analog inputs for thermistors
- AI 16×I 2-wire HA analog input module
  16 analog inputs
  Measuring range 0 to 20 mA, 0 to 10 mA, 4 to 20 mA
- AI 16×I 2-wire HA analog input module
  8 analog inputs for voltage measurements. current measurements, thermocouples, alternatively 4 analog inputs for thermistors
- AQ 8×I HART HA analog output module
  8 analog outputs
  Power output in the output ranges 0 to 10 mA, 0 to 20 mA, 4 to 20 mA and 4 to 20 mA HART
- AI 4XI 2-/4-wire HART ISOL analog input module
  4 galvanically isolated analog inputs (2-/4-wire)
- Analog output module AQ 4XI HART ISOL
  4 galvanically isolated analog outputs (2-wire)

Selection and ordering data

AI 8×U/I/TC/4×RTD 2-/4-wire HA analog input module 8 analog inputs Measuring ranges: • Voltage: 1 ... 5 V, 0 ... 10 V, ±50 mV, ±80 mV, ±250 mV, ±500 mV, ±1 V, ±2.5 V, ±5 V, ±10 V • Current: 4 ... 20 mA (2-/4-wire); und 0 ... 20 mA (4-wire), ±20 mA (4-wire) • TC elements: B, C, N, E, R, S, J, L, T, K, U, TXK • RTD elements: Pt100, Pt200, Pt500, Pt1000, Ni100, Ni120, Ni200, Ni500, Ni1000, Cu10, LG-Ni1000 | resistance areas: 150, 300, 600, 3000, 6000 Ohm | PTC Color code CC00, for terminal block type H1, N0 and H0, channel diagnostics, 16-bit	**6DL1134-6AF00-0PH1**
AI 16×I 2-wire HA analog input module 16 analog inputs Measuring range 4 ... 20 mA; 0 ... 10 mA; 0 ... 20 mA Color code CC01, for terminal block type H1 and P1, channel diagnostics, 16-bit	**6DL1134-6GH00-0PH1**
AI 16×I 2-wire HART HA analog input module 16 analog inputs Measuring range 0 to 20 mA, 0 to 10 mA, 4 to 20 mA, 4 to 20 mA with HART Color code CC01, for terminal block type H1 and M1, channel diagnostics, 16-bit	**6DL1134-6TH00-0PH1**
AI 16×TC/8×RTD 2-/3-/4-wire HA analog input module 16 analog inputs for thermocouples, alternatively 8 analog inputs for thermistors Color code CC00, for terminal block type H1 and M1, channel diagnostics, 16-bit	**6DL1134-6JH00-0PH1**
AQ 8×I HART HA analog output module 8 analog outputs Power output in the output ranges 0 to 10 mA, 0 to 20 mA, 4 to 20 mA and 4 to 20 mA HART Color code CC00, for terminal block type H1 and M1, channel diagnostics, 16-bit	**6DL1135-6TF00-0PH1**
AI 4XI 2-/4-wire HART ISOL analog input module 14 analog inputs Color code CC01, for terminal block type K0, L0, channel diagnostics, 16-bit, +/-0.1%	**6DL1134-6UD00-0PK0**
Analog output module AQ 4XI HART ISOL 4 analog outputs Color code CC00, for terminal block type K0, L0, channel diagnostics, 16-bit, +/-0.1%	**6DL1135-6UD00-0PK0**
Accessories	
Labeling strips For labeling the I/O modules	
• Roll, light gray (with a total of 500 labeling strips), 1 unit	**6DL1193-6LR00-0AA0**
• DIN A4 sheet, light gray, 10 items per packing unit, 45 labeling strips per sheet (450)	**6DL1193-6LA00-0AA0**
• DIN A4 sheet, yellow, 10 items per packing unit, 45 labeling strips per sheet (450)	**6DL1193-6LA00-0AG0**
Color-coded labels For push-in terminals	
• Color code CC00, 10 units gray (terminals 1 to 32)	**6DL1193-6CP00-2HH1**
• Color code CC01, 10 units gray (terminals 1 to 16), red (terminals 17 to 32)	**6DL1193-6CP01-2HH1**
Equipment labeling plates 10 sheets with 16 labels each	**6ES7193-6LF30-0AW0**
TM cover Slot cover for I/O modules, to protect vacant I/O slots Width 22.5 mm, 5 units	**6DL1133-6CV22-0AM0**

Analog value generation for the inputs					
Integration and conversion time/resolution per channel					
• Resolution with overrange (bit including sign), max.	16 bit	16 bit; 15 bit at 0 ... 10 mA and 60 Hz interference suppression	16 bit	16 bit; 15 bit at 0 ... 10 mA and 60 Hz interference suppression	16 bit; 14 bit at 60 Hz (0 ... 10 mA), 16 bit at 10 Hz, 15 bit at 50 Hz and 15 bit at 60 Hz interference suppression
• Integration time, parameterizable	Yes; Channel-by-channel, results from the selected interference frequency suppression	Yes; channel by channel	Yes; Channel-by-channel, results from the selected interference frequency suppression	Yes; channel by channel	
• Integration time (ms)		16.6 / 20 / 100 ms			
• Interference voltage suppression for interference frequency f1 in Hz	10 / 50 / 60 / 400 Hz		16.6 / 50 / 60 Hz, channel-by-channel		
• Conversion time (per channel)	Channel-by-channel, results from the selected interference frequency suppression		60 ms; 180 / 50 ms, results from the selected interference frequency suppression		
Smoothing of measured values					
• Parameterizable	Yes; none, weak, medium, strong, channel-by-channel	Yes; none, weak, medium, strong, channel-by-channel	Yes; none, weak, medium, strong, channel-by-channel	Yes; none, weak, medium, strong, channel-by-channel	Yes; none, weak, medium, strong, channel-by-channel
Encoder					
Connection of signal encoders					
• for voltage measurement	Yes				
• for current measurement as 2-wire transducer	Yes	Yes		Yes	Yes
- Burden of 2-wire transmitter, max.	820 Ω				
• for current measurement as 4-wire transducer	Yes				
• for resistance measurement with two-wire connection	Yes; all measuring ranges incl. PTC				
• for resistance measurement with three-wire connection	Yes; All measuring ranges except PTC; internal compensation of the cable resistances				
• for resistance measurement with four-wire connection	Yes; All measuring ranges except PTC				
Errors/accuracies					
Basic error limit (operational limit at 25 °C)					
• Voltage, relative to input range, (+/-)	0.1 %		0.05 %		
• Current, relative to input range, (+/-)	0.1 %	0.3 %		0.1 %	0.1 %
• Resistance, relative to input range, (+/-)	0.1 %		0.05 %		
Interference voltage suppression for f = n x (f1 +/- 1 %), f1 = interference frequency					
• Series mode interference (peak value of interference < rated value of input range), min.	60 dB		70 dB		
• Common mode voltage, max.	15 V		60 V		
• Common mode interference, min.	90 dB		90 dB

Overview

The I/O module AI-DI 16/DQ16×24VDC HART HA is available in the following versions:

- DI 16/DQ16x24VDC HA in digital-only mode
- AI-DI 16/DQ 16x24VDC HART HA as digital/analog module in mixed mode

Time stamping is available with configuration in mixed mode. High-precision time stamping (SoE: Sequence of Events) with a precision of 1 ms is available with configuration in digital-only mode.

In mixed mode, the 16 inputs can also be set channel by channel as either digital inputs or analog inputs with or without HART. HART is only available in mixed mode and with configuration in a measuring range of 4 to 20 mA.

Selection and ordering data

AI-DI 16/DQ16×24VDC HART HA input/output module 16 channels, each with digital output and digital/analog input Color code CC01, for terminal block type H1 and M1	**6DL1133-6EW00-0PH1**
Accessories	
Labeling strips For labeling the I/O modules	
• Roll, light gray (with a total of 500 labeling strips), 1 unit	**6DL1193-6LR00-0AA0**
• DIN A4 sheet, light gray, 10 items per packing unit, 45 labeling strips per sheet (450)	**6DL1193-6LA00-0AA0**
• DIN A4 sheet, yellow, 10 items per packing unit, 45 labeling strips per sheet (450)	**6DL1193-6LA00-0AG0**
Color-coded labels For push-in terminals	
• Color code CC01, 10 units gray (terminals 1 to 16), red (terminals 17 to 32)	**6DL1193-6CP01-2HH1**
Equipment labeling plates 10 sheets with 16 labels each	**6ES7193-6LF30-0AW0**
Slot cover for I/O modules 22.5 mm wide	**6DL1133-6CV22-0AM0**

• PCS 7 configurable/integrated from version	V9.0
• PCS neo can be configured/integrated from version	V3.0
• PROFINET from GSD version/GSD revision	GSDML V2.3
Operating mode	
• DI	Yes
• Counter	Yes
• DQ	Yes
• DQ with energy-saving function	No
• PWM	No
• Oversampling	No
• MSI	No
• MSO	No
Supply voltage	
Rated value (DC)	24 V
Reverse polarity protection	Yes
Encoder supply	
Number of outputs	16
Short-circuit protection	Yes; per channel, electronic
Digital inputs	
Number of digital inputs	16
Digital inputs, parameterizable	Yes
Sourcing/sinking input	Yes; P-reading
Input characteristic curve in accordance with IEC 61131, type 1	Yes
Input characteristic curve in accordance with IEC 61131, type 2	No
Input characteristic curve in accordance with IEC 61131, type 3	Yes
Pulse extension	Yes; off, 50 ms, 100 ms, 200 ms, 500 ms, 1 s, 2 s
Time stamp	Yes; Resolution 10 ms
Time stamp (with precision of 1 ms)	Yes; Resolution 1ms
Digital input functions, parameterizable	
• Gate start/stop	Yes; Partner channel of n+8 counter
• Freely usable digital input	Yes; Parameterizable input filter
• Counter	Yes; Incl. frequency measurement
Input voltage	
• Rated value (DC)	24 V
• for signal "0"	-30 to +5 V
• for signal "1"	+11 to +30V
Input current	
• for signal "1", typ.	2.5 mA
Input delay (for rated value of input voltage)	
- for standard inputs	
- parameterizable	Yes; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms (in each case + delay of 30 to 500 µs, depending on line length)
Digital outputs	
Number of digital outputs	16
Current-sinking	No
Current-sourcing	Yes
Digital outputs, parameterizable	Yes
Short-circuit protection	Yes; Response threshold 0.7 A to 1.3 A
Open-circuit detection	Yes
Overload protection	Yes
Limitation of inductive shutdown voltage to	L+ -(37 to 41V)

Technical specifications (continued)

Article number	6DL1133-6EW00-0PH1 ET 200SP HA, AI-DI16/DQ16X24VDC HART
Controlling a digital input	Yes
Switching capacity of the outputs	
• with resistive load, max.	0.5 A
• on lamp load, max.	5 W
Load resistance range	
• lower limit	48 Ω
• upper limit	12 kΩ
Output current	
• for signal "1" rated value	0.5 A
• for signal "0" residual current, max.	0.7 mA
Output delay with resistive load	
• "0" to "1", typ.	50 µs
• "1" to "0", typ.	100 µs
Parallel switching of two outputs	
• for uprating	No
• for redundant control of a load	Yes
Switching frequency	
• with resistive load, max.	100 Hz
• on lamp load, max.	10 Hz
Total current of the outputs	
• Current per channel, max.	0.5 A
• Current per module, max.	2 A
Analog inputs	
Number of analog inputs	16
permissible input current for current input (destruction limit), max.	30 mA
Input ranges (rated values), currents	
• 0 to 10 mA	Yes
• 0 to 20 mA	Yes; 16 bit incl. sign
• 4 mA to 20 mA	Yes; 16 bit incl. sign
Analog value generation for the inputs	
Integration and conversion time/resolution per channel	
• Resolution with overrange (bit including sign), max.	16 bit; Resolution with overrange (bit including sign), max. 16 bits, exception: 15 bits at 60 Hz interference suppression and 0 to 10 mA
• Integration time, parameterizable	Yes; channel by channel
Smoothing of measured values	
• Parameterizable	Yes; none, weak, medium, strong, channel-by-channel
Encoder	
Connection of signal encoders	
• for current measurement as 2-wire transducer	Yes
Connectable encoders	
• 2-wire sensor	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA
Errors/accuracies	
Basic error limit (operational limit at 25 °C)	
• Current, relative to input range, (+/-)	0.1 %
Interrupts/diagnostics/status information	
Diagnostics function	Yes
Substitute values connectable	Yes
Alarms	
• Diagnostic alarm	Yes
• Maintenance interrupt	Yes
• Limit value alarm	Yes; two upper and two lower limit values in each case
• Hardware interrupt	Yes; Parameterizable, channels 0 to 15, rising/falling edge
Diagnoses

Overview

ET 200SP HA Fast Multi IO & Counter

- Analog/digital module, input/output, counter, speed measurement
- 8 analog outputs (up to 800 Hz)
  Measuring range: 4x 0/4-20 mA, ±20 mA, ±50 mA and 4x ±10 V
- 4 analog inputs
  Measuring ranges: 0/4-20 mA, ±20 mA, ±30 mA, ±10 V, 0-20 V, -20-0 V
- Sensor supply: ±50 mA via digital output
- 4 digital inputs 24 V
- 3 counters up to 70 kHz
  Counter functions: up/down, once/periodic, gate control, 32-bit
- 6 combined digital inputs and outputs (DI/DQ)

ET 200SP HA vibration protection

Overview (continued)

- Analog/digital module, input/output, vibration protection
- Vibration protection for rotating machinery (e.g. drives, compressors, gears, fans)
- 4 analog inputs (up to 50 kHz signal frequency)
  Measuring ranges: 0/4-20 mA, ±20 mA, ±30 mA, ±10 V, 0-20 V, -20-0 V
  Suitable for electrodynamic and piezoelectric vibration sensors
- Sensor supply: ±50 mA
- Integrated signal processing:
  10 configurable function sequences for calculation of vibration-specific performance characteristics (simultaneous use 8 function sequences per module)
- 4 analog inputs
  Measuring ranges: 0/4-20 mA, ±20 mA, ±30 mA, ±10 V, 0-20 V, -20-0 V
- 8 analog outputs (up to 800 Hz)
  Measuring range: 4x 0/4-20 mA, ±20 mA, ±50 mA and 4x ±10 V
- Sensor supply: ±50 mA via digital output
- 4 digital inputs 24 V
- 6 combined digital inputs and outputs (DI/DQ)

Analog value generation for the outputs		
Integration and conversion time/resolution per channel		
• Resolution with overrange (bit including sign), max.	16 bit	16 bit
Encoder		
Connection of signal encoders		
• for voltage measurement	Yes	Yes
• for current measurement as 2-wire transducer	Yes	Yes
• for current measurement as 4-wire transducer		Yes
Connectable encoders		
• Single contact / changeover contact unconnected	Yes	Yes
• 2-wire sensor	Yes	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA	1.5 mA
Interrupts/diagnostics/status information		
Diagnostics function	Yes	Yes
Substitute values connectable	Yes	Yes
Alarms		
• Diagnostic alarm	Yes	Yes
Diagnoses		
• Monitoring the supply voltage	Yes	Yes
• Wire break	Yes; AI 4 ... 20 mA, AQ, DQ, DI 0 ... 3	Yes; AI 4 ... 20 mA, AQ, DQ, DI 0 ... 3
• Short-circuit to ground	Yes; Encoder supply to M, channel by channel	Yes; Encoder supply to M, channel by channel
• Short-circuit to L+	Yes; Analog inputs	Yes; Analog inputs
• Group error	Yes	Yes
• Overflow/Underflow	Yes	Yes
Diagnostics indication LED		
• RUN LED	Yes; green LED	Yes; green LED
• MAINT LED	Yes; Yellow LED	Yes; Yellow LED
• Monitoring of the supply voltage (PWR-LED)	Yes; green PWR LED	Yes; green PWR LED
• for module diagnostics	Yes; green/red DIAG LED	Yes; green/red DIAG LED
Integrated Functions		
Frequency measurement	Yes; Speed measurement	
Counting functions		
• Continuous counting	Yes	
• Counter response parameterizable	Yes	
• Hardware gate via digital input	Yes	
• Software gate	Yes	
Measuring functions		
• Dynamic measurement period adjustment	Yes; Speed measurement	
- Measuring range		
- Frequency measurement, min.	0.1 Hz	
- Frequency measurement, max.	70 kHz; 70 kHz for DI; 7 kHz for DI/DQ; each for P/M encoder and 50 m cable length; 10 kHz for DI; 0.7 kHz for DI/DQ; each for P encoder and 50 m cable length	
Potential separation		
Potential separation channels		
• between the channels and backplane bus	Yes	Yes
Ambient conditions		
Ambient temperature during operation		
• horizontal installation, min.	-40 °C	-40 °C
• horizontal installation, max.	70 °C; Observe derating	70 °C; Observe derating
• vertical installation, min.	-40 °C	-40 °C
• vertical installation, max.	60 °C	60 °C
Altitude during operation relating to sea level		
• Installation altitude above sea level, max.	3 500 m	3 500 m

Overview

Fail-safe I/O modules permit safety-oriented monitoring and thus, when required, bringing the plant to the defined safe state. The communication and integration into the process control system is enabled with the proven technology SIMATIC Safety Integrated. The fail-safe I/O modules for DI, DQ and AI correspond to the size of the standard modules and are certified by the German Technical Inspectorate up to SIL 3 per channel. All fail-safe I/O modules can be set up in redundant configuration guaranteeing not only fail-safe operation but also highest availability. SIMATIC ET 200SP HA is perfectly adapted for demanding fail-safe and standard applications in the manufacturing and process industries when high availability and PROFINET R1 redundancy are imperative.

Technical specifications

Article number	6DL1136-6AA00-0PH1 ET 200SP HA, F-AI 8xI 2-/4-wire HART HA
General information	
Product type designation	F-AI 8xI 2-/4-wire HART HA
Engineering with	
• STEP 7 TIA Portal configurable/integrated from version	V21
• STEP 7 configurable/integrated from version	V5.6 SP2 (with S7 F Systems V6.4)
• PCS 7 configurable/integrated from version	V9.0 SP3 + UC04 (with F Systems V6.4)
• PROFINET from GSD version/GSD revision	GSDML V2.42 2023.01
Supply voltage	
Rated value (DC)	24 V
Reverse polarity protection	Yes
Encoder supply	
Number of outputs	8
Short-circuit protection	Yes
Analog inputs	
Number of analog inputs	
• For current measurement	8
permissible input current for current input (destruction limit), max.	35 mA
Input ranges (rated values), currents	
• 0 to 20 mA	Yes
• 4 mA to 20 mA	Yes
HART communication	
• Primary Master	Yes
• Secondary Master	No
• input resistance (with HART communication)	150 Ω; for operation with an external secondary master (e.g. communicator), an external load may be necessary to achieve a total impedance of 230 - 600 Ω.
Cable length	
• shielded, max.	1 000 m; shielded, twisted pair
Analog value generation for the inputs	
Integration and conversion time/resolution per channel	
• Resolution with overrange (bit including sign), max.	16 bit
• Integration time, parameterizable	Yes
• Integration time (ms)	20 ms (at 50 Hz); 16.66 ms (at 60 Hz)
• Interference voltage suppression for interference frequency f1 in Hz	50 / 60 Hz
Smoothing of measured values	
• Parameterizable	Yes; in 4 stages (1, 4, 16, 64 conversion cycles), channel-by-channel
Encoder	
Connection of signal encoders	
• for current measurement as 2-wire transducer	Yes
• for current measurement as 4-wire transducer	Yes
Errors/accuracies	
safety-relevant accuracy	
• up to 40 °C, max.	0.6 %; (0.7% in vertical installation)
• up to 70 °C, max.	0.9 %
Influence of a HART signal modulated on the input signal in relation to input range	
• error at 16.6 ms integration time	0.11 %
• error at 20 ms integration time	0.11 %
Interference voltage suppression for f = n x (f1 +/- 1 %), f1 = interference frequency	
• Series mode interference (peak value of interference < rated value of input range), min.	40 dB
• Common mode voltage, max.	35 V
• Common mode interference, min.	80 dB
Protocols	
HART protocol	Yes
• Protocol version	up to Revision 7

Overview

ET200SP_Ex_IO_withPM

The intrinsically safe ET 200SP HA Ex I/O modules extend the SIMATIC ET 200SP HA and SIMATIC ET 200SP distributed I/O systems with the option of integrating devices located in hazardous areas (intrinsically safe sensors, actuators and HART field devices) into the system.

The ET 200SP HA Ex I/O modules with device protection according to intrinsic safety "i" offer channel outputs in Zone 0 or 1. 2-channel HART analog input and output modules and 2/4-channel digital input and output modules with different characteristic curves as well as a power module for intrinsically safe power supply of the modules.

Separate Ex isolators with correspondingly complex wiring and high space requirements are no longer required. The I/O modules can be installed up to ATEX Zone 2 and offer intrinsically safe circuits in Ex ia design for field devices up to Zone 0.

The Ex modules offer channel diagnostics and Configuration in Run and are approved for ambient temperatures from -40 to +70 °C.

Selection and ordering data

Ex digital modules SIMATIC ET 200SP HA	
Digital Ex-i input module, Ex-DI 4xNAMUR Suitable for BaseUnit Type X1, channel diagnostics	**6DL1131-6TD00-0HX1**
Digital Ex-i output module, Ex-DQ 2x23,1VDC/20 mA Suitable for BaseUnit Type X1, channel diagnostics	**6DL1132-6EB00-0HX1**
Digital Ex-i output module, Ex-DQ 2x17,4VDC/27 mA Suitable for BaseUnit Type X1, channel diagnostics	**6DL1132-6CB00-0HX1**
Ex analog modules SIMATIC ET 200SP HA	
Analog Ex-i HART input module, Ex-AI 2xI 2-wire HART Suitable for BaseUnit Type X1, channel diagnostics, 16 bits, +/-0.3%	**6DL1134-6TB00-0HX1**
Analog Ex-i input module, Ex-AI 4xTC/2xRTD 2-/3-/4-wire Suitable for BaseUnit Type X1, channel diagnostics, 16 bits, +/-0.05%	**6DL1134-6JD00-0HX1**
Analog Ex-i HART output module, Ex-AQ 2xI HART HF Suitable for BaseUnit Type X1, channel diagnostics, 16 bits, +/-0.3%	**6DL1135-6TB00-0HX1**
Power module and BaseUnits	
Power module Ex-PM E 24 V 0.8 A, W x H: 50 mm x 117 mm, suitable for BaseUnit Type W0	**6DL1133-6PX00-0HW0**
BU Type X1 for I/O modules Push-in terminals, W x H: 20 mm x 117 m	**6DL1193-6BP00-0BX1**
BU Type W0 for Ex power module PM-E W x H: 50 mm x 117 mm	**6DL1193-6BP00-0DW0**

• PROFINET from GSD version/GSD revision	GSDML V2.35	GSDML V2.35
Operating mode		
• MSI	Yes	Yes
Analog inputs		
Number of analog inputs	2; Differential inputs	
• For current measurement	2	
• For voltage measurement		4
• For resistance/resistance thermometer measurement		2
• For thermocouple measurement		4
Constant measurement current for resistance-type transmitter, typ.		0.5 mA
Cycle time (all channels), min.	3 ms	
Technical unit for temperature measurement adjustable		Yes; °C/°F/K
Input ranges (rated values), voltages		
• -1 V to +1 V		Yes; 16 bit incl. sign
• -250 mV to +250 mV		Yes; 16 bit incl. sign
• -50 mV to +50 mV		Yes; 16 bit incl. sign
• -80 mV to +80 mV		Yes; 16 bit incl. sign
Input ranges (rated values), currents		
• 0 to 20 mA	Yes	
• 4 mA to 20 mA	Yes; 15 bit + sign	
Input ranges (rated values), thermocouples		
• type B		Yes; 16 bit incl. sign
• type C		Yes; 16 bit incl. sign
• Type E		Yes; 16 bit incl. sign
• Type J		Yes; 16 bit incl. sign
• Type K		Yes; 16 bit incl. sign
• Type L		Yes; 16 bit incl. sign
• Type N		Yes; 16 bit incl. sign
• Type R		Yes; 16 bit incl. sign
• Type S		Yes; 16 bit incl. sign
• Type T		Yes; 16 bit incl. sign
• Type U		Yes; 16 bit incl. sign
• Type TXK/TXK(L) to GOST		Yes; 16 bit incl. sign
Input ranges (rated values), resistance thermometer		
• Cu 10		Yes; 16 bit incl. sign
• Ni 100		Yes; 16 bit incl. sign
• LG-Ni 1000		Yes; 16 bit incl. sign
• Ni 120		Yes; 16 bit incl. sign
• Ni 200		Yes; 16 bit incl. sign
• Ni 500		Yes; 16 bit incl. sign
• Pt 100		Yes; 16 bit incl. sign
• Pt 1000		Yes; 16 bit incl. sign
• Pt 200		Yes; 16 bit incl. sign
• Pt 500		Yes; 16 bit incl. sign

Input ranges (rated values), resistors		
• 0 to 150 ohms		Yes; 15 bit
• 0 to 300 ohms		Yes; 15 bit
• 0 to 600 ohms		Yes; 15 bit
• 0 to 3000 ohms		Yes; 15 bit
• 0 to 6000 ohms		Yes; 15 bit
• PTC		Yes; 15 bit
Thermocouple (TC)		
- Temperature compensation		
- Parameterizable		Yes
Cable length		
• shielded, max.	500 m; Ex characteristic values must be observed	200 m; Ex characteristic values must be observed; line resistance at RTD (simple) max. 25 ohm; loop resistance at TC max. 8 kOhm
• unshielded, max.	300 m; Ex characteristic values must be observed	
Analog value generation for the inputs		
Integration and conversion time/resolution per channel		
• Resolution with overrange (bit including sign), max.	16 bit	16 bit
• Integration time, parameterizable	Yes; channel by channel	Yes; Channel-by-channel, results from the selected interference frequency suppression
• Interference voltage suppression for interference frequency f1 in Hz	10 / 50 / 60 Hz	16.6 / 50 / 60 Hz, channel-by-channel
• Conversion time (per channel)		180 / 60 / 50 ms, results from the selected interference frequency suppression
Smoothing of measured values		
• Number of smoothing levels	4; None; 4/8/16 times	
• Parameterizable	Yes	Yes; none, weak, medium, strong, channel-by-channel
Encoder		
Connection of signal encoders		
• for current measurement as 2-wire transducer	Yes	
- Burden of 2-wire transmitter, max.	750 Ω; At 20 mA input current	
Errors/accuracies		
Basic error limit (operational limit at 25 °C)		
• Voltage, relative to input range, (+/-)		0.05 %
• Current, relative to input range, (+/-)	0.2 %	
• Resistance, relative to input range, (+/-)		0.05 %
Interference voltage suppression for f = n x (f1 +/- 1 %), f1 = interference frequency		
• Series mode interference (peak value of interference < rated value of input range), min.	60 dB	70 dB
• Common mode voltage, max.		60 V; Applicable for use in non-hazardous areas; no common mode voltage permissible in hazardous areas
• Common mode interference, min.		90 dB
Protocols		
HART protocol	Yes	
Interrupts/diagnostics/status information		
Diagnostics function	Yes	Yes
Alarms		
• Diagnostic alarm	Yes	Yes
• Limit value alarm	Yes	Yes; two upper and two lower limit values in each case
Diagnoses		
• Monitoring the supply voltage	Yes	Yes
• Wire break	Yes; channel by channel	Yes; channel by channel

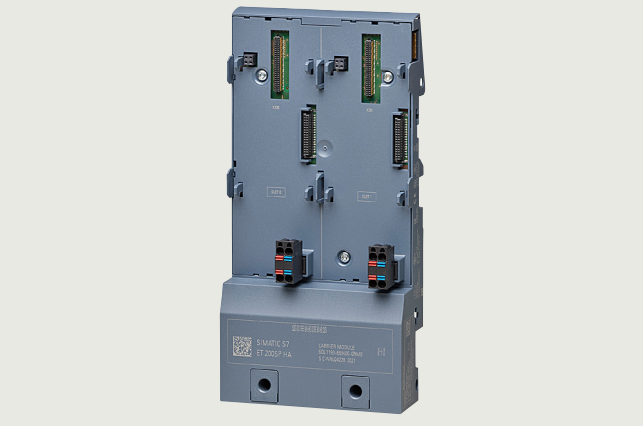
Overview



DIN rails

The DIN rail is required for fitting an ET 200SP HA station in the control cabinet. The IM carrier modules for interface modules, the carrier modules for the I/O modules and the server module are attached to the DIN rail.

The DIN rails are available in lengths of 482 mm (for installation in a 19-inch rack) and 1 500 mm (for maximum configuration and vertical installation in a cabinet).

IM single carrier module

IM redundant carrier module

IM carrier modules for interface modules

Two variants of the IM carrier modules for interface modules are available:

- IM single carrier module for 1 interface module, for single connection to PROFINET
- IM redundant carrier module for 2 interface modules, for redundant connection to PROFINET

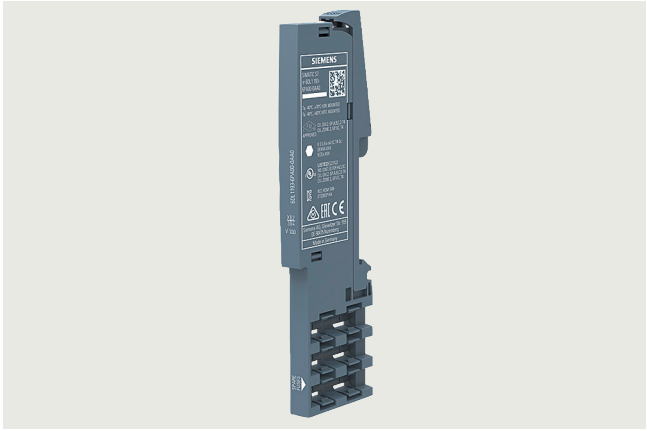
The IM carrier modules connect the interface module to the backplane bus. They enable data exchange with the I/O modules.

Overview (continued)

Carrier module for I/O modules, 8-slot

Carrier module for I/O modules, 2-slot

Carrier modules for I/O modules



The slots for the I/O modules are created by the connection of these carrier modules to the terminal blocks.

Carrier modules for I/O modules are available in the following variants:

- Carrier module, 2-slot, with 2 slots for I/O modules
- Carrier module, 8-slot, with 8 slots for I/O modules
- Carrier module, 8-slot, with 8 slots for I/O modules, without power bus function

© Siemens AG 2026

Overview (continued)

ET 200SP HA, server module

Server module

Server module and power bus cover complete the design of the ET 200SP HA. A server module and a power bus cover are supplied with each IM carrier module for the interface module.

Selection and ordering data

Mounting rails for ET 200SP HA	
482 mm (approx. 19") mounting rail Including grounding screw and integrated DIN rail for fitting small components such as clamps, miniature circuit-breakers and relays	**6DL1193-6MC00-0AA0**
1 500 mm (approx. 59") mounting rail Including grounding screw and integrated DIN rail for fitting small components such as clamps, miniature circuit-breakers and relays	**6DL1193-6MD00-0AA0**
Grounding screw For connecting PE to the mounting rail; essential for 1 500 mm mounting rail 20 units per packing unit	**6ES7590-5AA00-0AA0**
IM carrier modules for interface modules Note: A server module and a power bus cover are supplied with each IM carrier module for the interface module.	
IM single carrier module Support for one SIMATIC ET 200SP HA interface module for single connection to PROFINET	**6DL1193-6BH00-0SM0**
IM redundant carrier module Support for two SIMATIC ET 200SP HA interface modules for redundant connection to PROFINET	**6DL1193-6BH00-0RM0**
IM single carrier module Support for one interface module of the ET 200SP HA, including a server module	**6DL1193-6BH01-0SM0**
IM redundant carrier module Support for two interface modules of the ET 200SP HA, including a server module	**6DL1193-6BH01-0RM0**
Carrier modules for I/O modules	
Carrier module, 2x Support for two SIMATIC ET 200SP HA I/O modules	**6DL1193-6GA00-0NN0**
Carrier module 8x Support for eight SIMATIC ET 200SP HA I/O modules	**6DL1193-6GC00-0NN0**
Carrier module 8x Support without Power Bus, can only be operated with light-gray or black terminal blocks, for holding eight I/O modules of the SIMATIC ET 200SP HA	**6DL1193-6GC00-8NN0**
Spare parts	
Server module (spare part) for ET 200SP HA	**6DL1193-6PA00-0AA0**

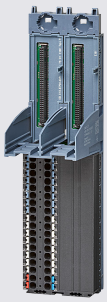
Overview



The slots for the I/O modules are created by connecting carrier modules and terminal blocks. The terminal blocks contain the process terminals for connecting sensors, actuators and other devices.

Select the terminal block for the slot of an I/O module based on the following dependencies:

- Definition of I/O modules associated with a potential group
- Requirement for design with redundant I/O modules (redundant partner in adjacent slot)
- Requirement for design with potential distributors (e.g. when using 32-channel I/O modules)

The following table illustrates the terminal block / I/O module assignment (x = standard):

I/O modules in 24 V range (with push-in terminal blocks)

I/O module	TB type H1	TB type M1 (IO-RED)	TB type F1 (F-AI IO-RED)	TB type P0 (32x L+)	TB type N0 (32x M)

No power bus			Black	Black

Potential groups/color type of the terminal blocks

To help you distinguish between potential groups on an ET 200SP HA station, the terminal blocks come in different colors:

- Light gray terminal blocks are for feeding in and start a new potential group.
- Dark gray terminal blocks forms a contact with the supply voltage of the terminal block to its left, thus extending the potential group.
- Black terminal blocks do not support any potential groups and must be fed in manually. Dark gray terminal blocks must not be inserted to the right of them.

Note the maximum permissible load current depending on the number of I/O modules:

Number of terminal blocks	Permissible load current in amperes
4	10 A
5	8 A
6	7 A
7	6 A
8	5 A
10	4 A
15	3 A
20	2 A

Selection and ordering data

Terminal blocks 24 V DC (push-in)

Terminal block type H1 light gray For starting a new potential group, with 32 push-in terminals, width 22.5 mm, with temperature compensation	**6DL1193-6TP00-0DH1**
Terminal block type H1 dark gray For forwarding a potential group, with 32 push-in terminals, width 22.5 mm, with temperature compensation	**6DL1193-6TP00-0BH1**
Terminal block type M1 light gray For starting a new potential group, with 32 push-in terminals, width 45 mm, for redundant configurations, with temperature compensation	**6DL1193-6TP00-0DM1**
Terminal block type M1 dark gray For forwarding a potential group, with 32 push-in terminals, width 45 mm, for redundant configurations, with temperature compensation	**6DL1193-6TP00-0BM1**
Terminal block, type F1, F-AI, IO-RED 32 push-in terminals, width 45 mm, for redundant configuration with fail-safe analog module F-AI, no power bus	**6DL1193-6TP00-0DF1**
Terminal block type P0 light gray For starting a new potential group, with 32 push-in terminals, additional 32 push-in terminals with encoder supply, width 45 mm, specifically for use with DI 32x24 V DC (6DL1131-6BL00-0PH1)	**6DL1193-6TP00-0DP0**
Terminal block type P0 dark gray For forwarding a potential group, with 32 push-in terminals, additional 32 push-in terminals with encoder supply, width 45 mm, specifically for use with DI 32x24 V DC (6DL1131-6BL00-0PH1)	**6DL1193-6TP00-0BP0**
Terminal block type N0 light gray For starting a new potential group, with 32 push-in terminals, additional 32 push-in terminals for ground connection, width 45 mm, for use with DQ 32x 24 V DC (6DL1132-6BL00-0PH1) and other modules	**6DL1193-6TP00-0DN0**
Terminal block type N0 dark gray For forwarding a new potential group, with 32 push-in terminals, additional 32 push-in terminals for ground connection, width 45 mm, for use with DQ 32x 24 V DC (6DL1132-6BL00-0PH1) and other modules	**6DL1193-6TP00-0BN0**

Terminal blocks 24 V DC (D-sub)

Terminal block, type H0, D-sub D-sub plug 37-pin, 24 V infeed per TB, width 22.5 mm, no power bus	**6DL1193-6TC00-0DH0**
Terminal block, type M0, D-sub, IO-RED D-sub plug 37-pin, 2 slots for I/O redundancy, 24 V infeed per slot, width 45 mm	**6DL1193-6TC00-0DM0**
Terminal block, type F0, D-sub, F-AI, IO-RED D-sub plug 37-pin, for fail-safe analog input, 2 slots for I/O redundancy, 24 V infeed per slot, width 45 mm	**6DL1193-6TC00-0DF0**
Terminal block, type S0, D-sub, ISOL D-sub plug 37-pin, 24 V infeed per TB, width 22.5 mm	**6DL1193-6TC00-0DS0**
Terminal block, type R0, D-sub, ISOL, IO-RED D-sub plug 37-pin, 2 slots for I/O redundancy, 24 V infeed per slot, width 45 mm	**6DL1193-6TC00-0DR0**

Selection and ordering data (continued)

Terminal blocks insulated (24 V DC / 125 V DC / 230 V AC)

Terminal block type K0 light gray For starting a new potential group, with 16 push-in terminals, width 22.5 mm	**6DL1193-6TP00-0DK0**
Terminal block type K0 dark gray For forwarding a potential group, with 16 push-in terminals, width 22.5 mm	**6DL1193-6TP00-0BK0**
Terminal block type L0 light gray For starting a new potential group, with 16 push-in terminals, width 45 mm	**6DL1193-6TP00-0DL0**

Accessories

Shield connection for terminal block 5 shield supports including support foot and shield terminals each for plugging onto BaseUnits with automatic low-impedance connection to functional grounding	**6ES7193-6SC20-1AM0**

Overview

BA 2×RJ45, 2×FC and 2×LC BusAdapters

BusAdapters

A BusAdapter as a separate component allows a free choice of connection technology:

- BA 2×RJ45: 2 electrical connections for bus cable with standard RJ45 connector
- BA 2×FC: 2 electrical connections for direct connection of FastConnect bus cable
- BA 2×LC: 2 optical ports for fiber-optic cables
- BA LC/RJ45: 1 optical connection and 1 electrical connection for bus cable with standard RJ45 connector
- BA LC/FC: 1 optical connection and 1 electrical connection for direct connection of FastConnect bus cable
- BA 2×RJ45 (VD): 2 electrical connections for using PROFINET via existing PROFIBUS cables

Selection and ordering data

BusAdapters	
2×RJ45 BusAdapter 2 × RJ45 sockets for PROFINET (standard Ethernet socket)	**6DL1193-6AR00-0AA0**
2×FC BusAdapter 2 × FastConnect (FC) connections for PROFINET	**6DL1193-6AF00-0AA0**
2×LC BusAdapter 2 × glass fiber-optic connections for PROFINET	**6DL1193-6AG00-0AA0**
BA LC/RJ45 BusAdapter 2 × glass fiber-optic connections	**6DL1193-6AG20-0AA0**
BA LC/FC BusAdapter 2 × glass fiber-optic connections	**6DL1193-6AG40-0AA0**
BA 2×RJ45 (VD) BusAdapter 2 × electrical connections for Ethernet communication via 2, 4 or 8-wire copper cables and distances up to 500 m	**6GK5991-2VA00-8AA2**
BA 2xLC-LD BusAdapter 2 × LC-LD port, for single-mode glass fiber-optic, up to max. 20 km	**6ES7193-6AG50-0AA0**
BA LC-LD/RJ45 BusAdapter 1 × LC-LD port, for single-mode fiber-optic, up to max. 20 km, 1 × RJ45 port	**6ES7193-6AG60-0AA0**

Overview

Extending the SIMATIC ET 200SP HA system with specific additional I/O modules from the SIMATIC ET 200SP system gives you more options and flexibility.

When these I/O modules are used, the following aspects need to be considered:

- Special slot rules apply (see System Manual for the SIMATIC ET 200SP HA)
- Module redundancy is not supported for the additional I/O modules
- Attention must be paid to the specific properties of the additional I/O modules, such as ambient temperature, painting, insulation protection. These are usually limited compared to the ET 200SP HA I/O modules
- Before use, check whether (Library) Support is already available for the desired purpose

Note:

Product partners are external companies outside Siemens AG and its associated companies. Information and descriptions of products made by product partners are non-binding, and are the responsibility of the product partners. These products are manufactured independently and under the responsibility of the respective product partner, and are sold and supplied by it under its terms of business and delivery.

Unless compulsory by law, Siemens assumes no liability or warranty for these products or for connection with these products of the product partners.

Selection and ordering data

CM PtP communications module	
For serial communication connections with RS232, RS422, RS485 interfaces, BU type A0, color code CC00	
• CM PtP communications module (V2)	**6ES7137-6AA01-0BA0**
Analog input module	
• AI Energy Meter CT HF, for 1 A or 5 A current transformers, with network analysis functions, channel diagnostics; BU type U0	**6ES7134-6PA01-0CU0**
• AI Energy Meter RC HF, for Rogowski coils or 333 mV current/voltage transformers, with network analysis functions, channel diagnostics; BU type U0	**6ES7134-6PA21-0CU0**
TM SIWAREX WP321 weighing module	**7MH4138-6AA00-0BA0**
Single-channel, for platform scales or hopper scales with analog load cells (1 - 4 mV/V), 1 × LC, 1 × RS 485.	
TM SIWAREX WP351 HF weighing module	
SIMATIC ET 200SP, TM SIWAREX WP351 HF, legal-for-trade weighing module for automatic dosing, filling and checking scales and totalizing weighing instruments	**7MH4138-6BA00-0CU0**
Motor starters	
Direct starter	
• Adjustment range 0.1 ... 0.4 A	**3RK1308-0AA00-0CP0**
• Adjustment range 0.3 ... 1 A	**3RK1308-0AB00-0CP0**
• Adjustment range 0.9 ... 3 A	**3RK1308-0AC00-0CP0**
• Adjustment range 2.8 ... 9 A	**3RK1308-0AD00-0CP0**
• Adjustment range 4 ... 12 A	**3RK1308-0AE00-0CP0**
Reversing starter	
• Adjustment range 0.1 ... 0.4 A	**3RK1308-0BA00-0CP0**
• Adjustment range 0.3 ... 1 A	**3RK1308-0BB00-0CP0**
• Adjustment range 0.9 ... 3 A	**3RK1308-0BC00-0CP0**
• Adjustment range 2.8 ... 9 A	**3RK1308-0BD00-0CP0**
• Adjustment range 4 ... 12 A	**3RK1308-0BE00-0CP0**
SITRANS FCT070	
Transmitter for ET 200SP	**7ME4138-6AA00-0BB1**
AirLINE SP valve terminal type 8647 for integration into ET 200SP HA	
For more detailed information about the AirLINE SP, type 8647 (e.g. data sheet, operating manual) please contact Bürkert directly: https://www.burkert-usa.com/en/type/8647

Overview

ET 200SP HA with Bürkert valve terminal AirLINE SP

- For pneumatic control of actuators with ET 200SP HA
- Can be used together with system and IO components of the ET 200SP HA distributed I/O system
- Product of the product partners Bürkert Fluid Control Systems, and can only be obtained from Bürkert Fluid Control Systems

Note:

Product partners are external companies outside Siemens AG and its associated companies. Information and descriptions of products made by product partners are non-binding, and are the responsibility of the product partners. These products are manufactured independently and under the responsibility of the respective product partner, and are sold and supplied by it under its terms of business and delivery.

Unless compulsory by law, Siemens assumes no liability or warranty for these products or for connection with these products of the product partners. Refer also to the note on disclaimer of liability/use of hyperlinks*).

Benefits

- High degree of process safety by using non-return valves and pneumatic infeed modules with pressure monitoring
- System-wide detailed diagnostics in plain text, and also locally on an LC display
- Quick and easy valve change during operation (hot swapping)
- Reduced number of components in the control cabinet (enabling compact control cabinet)
- Easy and fast installation thanks to full hardware integration: Physical interfaces of pneumatic and I/O components are fully compatible
- Fast and error-free configuration and diagnostics thanks to full software integration into the Siemens ecosystem (STEP 7 Classic, PCS 7, PCS neo, TIA Portal): The Bürkert pneumatic modules are handled like Siemens I/O modules in configuration and programming

Application

Valve terminals are widely used in industrial automation, and serve as pilot valves for controlling actuators in the food, pharmaceutical and water treatment industries. In combination with the AirLINE SP, type 8647 from Bürkert Co., ET 200SP HA forms a universal interface between process and plant control, and enables the flexible, modular structure of pilot valves and I/O modules.

More information

For more detailed information about the AirLINE SP, type 8647 (e.g. data sheet, operating manual) please contact Bürkert directly at this link.

Overview

SIMATIC ET 200MP video

SIMATIC ET 200MP is a modular and scalable I/O system with degree of protection IP20 for universal use, and offers the same system advantages as SIMATIC S7-1500. SIMATIC ET 200MP permits extremely short bus cycle times and very fast response times, even with large quantity structures.

SIMATIC ET 200MP consists of the following components:

- Interface modules for connecting the S7-1500 I/O modules to PROFINET, Ethernet/IP, Modbus TCP and PROFIBUS; up to 30 modules can be connected to one interface module (up to 12 modules for PROFIBUS).
- S7-1500 I/O modules for connecting digital and analog signals, safety modules, technology modules and communications modules and processors.
- Load current supply (PM) for feeding the input and output circuit (load circuits) as well as the sensors and actuators.
- Optional system power supplies (PS) for converting AC or DC line voltages into the required operating voltages for the internal electronics of the SIMATIC S7-1500 I/O system if the power supply of the interface module is not sufficient
- U-connector for connecting the individual modules or active backplane bus for even higher performance and the option of removing and inserting modules during operation (HotSwap)
- S7-1500 mounting rail for securely fastening the I/O system in the control cabinet
- Additional accessories such as universal front connectors, cable grips and shielding sets, SIMATIC TOP connect to reduce cabling effort and variants with increased resistance to external influences (SIPLUS variants)
- Adapter solution for easy migration of S7-300 modules to S7-1500 IO (details on request)

The SIMATIC ET 200MP distributed I/O system is particularly easy to install, wire, and commission.

With its extended ambient conditions, SIMATIC ET 200MP can be used almost anywhere. Many modules can be operated in a temperature range from -30°C to +60°C and at altitudes up to

Overview (continued)

5,000 m as standard. A wide range of SIPLUS modules is available for requirements beyond this.

Highlights:

- Modular I/O system with degree of protection IP20 for PROFINET, Ethernet/IP, Modbus TCP, or alternatively for PROFIBUS
- Compact dimensions and high channel density
- High degree of user-friendliness due to the following design features:
  - High channel density through 35 mm wide modules with up to 64 digital and 16 analog channels
  - Standardized 40-pin front connector simplifies ordering, logistics, and stock-keeping
  - Standardized pin assignment per module type simplifies wiring and helps avoid errors
  - Integrated potential bridges simplify wiring and allow flexible subsequent modification of potential groups
  - The cable storage space grows along with the requirements and allows a uniform appearance even with insulated conductors with a large core cross-section and/or thick insulation
  - The prewiring position for the front connector allows convenient wiring during both first commissioning and when making changes during operation
  - The DIN rail integrated in the S7-1500 mounting rail allows snapping-on of many standard components such as additional terminals, miniature circuit breakers or small relays
  - The 1:1 assignment of channel status and diagnostics LED, terminal and inscription allows fast location and elimination of errors. Assistance is provided by the cabling diagram printed on the inside of the front doors
  - The integrated shielding concept for analog input and technology modules allows reliable and rugged operation, in particular with High Speed applications. Installation does not require any tools
  - Particularly space-saving and simple design with slim 25 mm modules and high-density modules;
    the maximum possible station configuration with power supply (PS), interface module (IM) and 30 I/O modules can be accommodated on a 830 mm wide S7-1500 mounting rail
- Extensive product portfolio comprising digital and analog input and output modules (incl. HART protocol for analog modules and connection of NAMUR encoders for digital input modules), technology modules, communications modules for IO-Link and point to point communication as well as F-modules up to SIL3.
  - Integrated technological functions in selected modules, such as counting, pulse width modulation (PWM) or integrated switching cycle counters, make cost-effective and convenient solutions possible.
  - Selected digital output modules enable safety-related load group shutdown in accordance with SIL 2 via an external safety relay.

© Siemens AG 2026

Overview (continued)

- Extensive system functions
  - Integrated system diagnostics when operated with S7-1500 and TIA Portal
  - Integrated switching cycle counter for relay modules enables preventive maintenance
  - Integrated operating cycles counter at 24 V DC High Feature and TRIAC modules for preventive maintenance of connected actuators, e.g. solenoid valves or other mechanical switchgear
  - Suitable for simple counting tasks with digital input modules with up to 20 kHz.
  - Consistent use of identification and maintenance data IM0 to IM3 for fast electronic and unambiguous identification of individual modules (Article No., serial number, etc.)
  - ID-Link on the side of the module for fast identification using a smart phone.
  - Uniform firmware update for the interface module and all I/O modules for subsequent function extensions (investment security)
  - Bus cycle time ≥ 250 µs and coupling to the isochronous task permit implementation of applications with high performance requirements with PROFINET
  - Up to 30 I/O modules (PROFINET) or 12 I/O modules (PROFIBUS) within a station save on interface modules and installation time
  - MMC not required with PROFINET; automatic address assignment via LLDP or manually via TIA Portal or PST tool
  - Shared device on up to two (IM 155-5 PN BA and IM 155-5 PN ST) or four (IM 155-5 MF HF) IO controllers
  - Module shared input/module shared output as system function for all S7-1500 I/O modules
- High plant availability:
  - Increased communication availability by means of Media Redundancy Protocol (MRP, MRPD) on PROFINET as well as operation of the IM 155-5 MF HF on an S7-1500 R/H using S2 redundancy;
    in addition, the IM 155-5 MF HF High Feature interface modules can be operated on an S7-400H. Configuration is carried out with STEP 7 V5.5 SP3 and a GSDML file. The IM 155-5 MF HF also supports operation on an S7-400H CPU (system redundancy).
  - Increased plant availability due to the active backplane bus for up to 12 I/O modules per station; allows reaction-free pulling and plugging of I/O modules in operation without a CPU STOP; allows holding of reserves (empty slots) for plant expansion at a later time.

Overview

- Interface modules for connecting ET 200MP via PROFINET, Ethernet/IP, Modbus TCP or PROFIBUS
- These handle data exchange with the I/O controller in the controller
- Width 35 mm

Selection and ordering data

Interface module IM 155-5 Degree of protection IP20, module width 35 mm, installation on S7-1500 mounting rail	
SIMATIC ET 200MP, MultiFieldbus interface module IM 155-5 MF HF PROFINET, flexible ports via pluggable SIMATIC BusAdapters (sold separately), max. 30 I/O modules, multi hot swap with active backplane sold separately), IRT with 250 µs, isochronous mode, shared device with 4 controllers (1440 bytes each), 256 bytes per I/O module, MRP, MRPD, S2 redundancy, PN Security Class 1, optional cable grip (sold separately)	**6ES7155-5MU00-0CN0**
SIMATIC ET 200MP PROFINET IO device interface module IM 155-5 PN BA For ET 200MP electronic modules; up to 12 IO modules; integrated 2-port switch; RJ45 shared device on 2 IO controllers; MRP; FW update; I&M0...3	**6ES7155-5AA00-0AA0**
SIMATIC ET 200MP, PROFINET IO device interface module IM 155-5 PN ST For ET 200MP electronic modules; up to 12 IO modules without PS; up to 30 IO modules with additional PS; integrated 2-port switch; RJ45 shared device; MRP; IRT >=0.25 ms; isochronous mode FW update; I&M0...3; FSU with 500 ms	**6ES7155-5AA01-0AB0**
SIMATIC ET 200MP, PROFIBUS IO device interface module IM 155-5 DP ST PROFIBUS interface module for max. 12 S7-1500 modules, incl. PROFIBUS connection plug (6ES7972-0BB70-0XA0)	**6ES7155-5BA00-0AB0**
Accessories	
SIMATIC BA 2xRJ45 BusAdapter For PROFINET interface modules, Standard function class or above; max. cable length 50 m	**6ES7193-6AR00-0AA0**
SIMATIC BA 2xFC BusAdapter For PROFINET interface modules, Standard function class or above; for increased vibration and EMC loads; max. cable length 50 m	**6ES7193-6AF00-0AA0**
BA 2xM12 BusAdapter For IM 155-6PN ST, HF; 2 x M12 push-pull sockets, D-coding, also suitable for standard M12. For PROFINET	**6ES7193-6AM00-0AA0**
SIMATIC ET 200MP, spare part front door for IM 155-5 (6ES7155-5AA00-0AB0) 5 units per packing unit	**6ES7528-0AA70-7AA0**
SIMATIC S7-1500 mounting rail Fixed lengths, with grounding elements	
SIMATIC S7-1500, mounting rail 160 mm (approx. 6.3 inches) Incl. grounding screw, integrated DIN rail for mounting small items such as terminals, circuit breakers and relays	**6ES7590-1AB60-0AA0**
SIMATIC S7-1500, mounting rail 245 mm (approx. 9.6 inches) Incl. grounding screw, integrated DIN rail for mounting small items such as terminals, circuit breakers and relays	**6ES7590-1AC40-0AA0**
SIMATIC S7-1500, mounting rail 482.6 mm (approx. 19 inches) Incl. grounding screw, integrated DIN rail for mounting small items such as terminals, circuit breakers and relays	**6ES7590-1AE80-0AA0**
SIMATIC S7-1500, mounting rail 530 mm (approx. 20.9 inches) Incl. grounding screw, integrated DIN rail for mounting small items such as terminals, circuit breakers and relays	**6ES7590-1AF30-0AA0**

© Siemens AG 2026

Selection and ordering data (continued)

SIMATIC S7-1500, mounting rail 830 mm (approx. 32.7 inches) Incl. grounding screw, integrated DIN rail for mounting small items such as terminals, circuit breakers and relays For cutting to length by customer, without drill holes; grounding elements must be ordered separately	**6ES7590-1AJ30-0AA0**
SIMATIC S7-1500, mounting rail 2000 mm (approx. 78.7 inches) Without grounding screw, integrated DIN rail for mounting small items such as terminals, circuit breakers and relays for cutting to length by customer, grounding screw (6ES7590-5AA00-0AA0, 20 units) must be ordered separately	**6ES7590-1BC00-0AA0**
SIMATIC S7-1500, grounding screw For connecting PE to the S7-1500 mounting rail; essential for 2000 mm mounting rail; 20 units per packing unit	**6ES7590-5AA00-0AA0**
Strain relief For ET 200MP interface module IM 155-5 MF HF on SIMATIC BusAdapter; 5 units	**6ES7590-5DA00-0AA0**
System power supply For supplying the S7-1500 backplane bus	
SIMATIC S7-1500, system power supply PS 25 W 24 V DC Supplies operating voltage to the backplane bus of the S7-1500	**6ES7505-0KA00-0AB0**
SIMATIC S7-1500, system power supply PS 60 W 24/48/60 V DC Supplies operating voltage to the backplane bus of the S7-1500	**6ES7505-0RA00-0AB0**
SIMATIC S7-1500, system power supply with buffer functionality PS 60 W 24/48/60 V DC HF Supplies operating voltage to the backplane bus of the S7-1500 and enables non-volatile retention of the work memory (data) by the CPU	**6ES7505-0RB00-0AB0**
SIMATIC S7-1500, system power supply PS 60 W 120/230 V AC/DC Supplies operating voltage to the backplane bus of the S7-1500	**6ES7507-0RA00-0AB0**
SIMATIC S7-1500 spare part, connector for system power supply modules (PS) and load current supply modules (PM) 10 units per packing unit	**6ES7590-8AA00-0AA0**
Load current supply	
SIMATIC PM 1507 24 V/3 A Stabilized power supply for SIMATIC S7-1500 Input: 120/230 V AC Output: 24 V DC/3 A	**6EP1332-4BA00**
SIMATIC PM 1507 24 V/8 A Stabilized power supply for SIMATIC S7-1500 Input: 120/230 V AC Output: 24 V DC/8 A	**6EP1333-4BA00**
Power supply connector Spare part; for connecting the 24 V DC supply voltage	
Connector, socket, 2x2-pin, ET 200SP, interface module, KP32F, PN-PN coupler Grid size 5.08 mm spring-loaded terminals, internally bridged, color-coded, 10 units per packing unit	**6ES7193-4JB00-0AA0**
SIMATIC S7-1500 / ET 200MP; active backplane bus 12 slots For plugging S7-1500 I/O modules for hot swapping; for use in the ET 200MP with IM 155-5 PN HF (from FW V4.4.1); please order S7-1500 mounting rail and slot covers separately	**6ES7590-0BL00-0AA0**
PROFIBUS FastConnect RS485 bus connector with 90° cable outlet	

Selection and ordering data (continued)

SIMATIC DP, connection plug for PROFIBUS up to 12 Mbps 90° cable outlet, 15.8 x 72.2 x 36.4 mm (WxHxD), FastConnect insulation displacement method Without PG socket	**6ES7972-0BA70-0XA0**
SIMATIC DP, connection plug for PROFIBUS up to 12 Mbps 90° cable outlet, 15.8 x 72.2 x 36.4 mm (WxHxD), FastConnect insulation displacement method With PG socket	**6ES7972-0BB70-0XA0**
SIMATIC S7-1500 / ET 200MP; slot cover For the active backplane bus of the S7-1500 for protection against ESD as well as for mechanical fixation on the S7-1500 mounting rail. Unused slots must be provided with a slot cover! 5 units per packing unit	**6ES7590-0CA00-0AA0**
PROFIBUS FastConnect stripping tool Stripping tool for fast stripping of the PROFIBUS FastConnect bus cable	**6GK1905-6AA00**
PROFIBUS FastConnect bus cable	
• Standard type with special design for quick mounting, 2-wire, shielded, sold by the meter, max. delivery unit 1000 m, minimum order quantity 20 m	**6XV1830-0EH10**
• 20 m	**6XV1830-0EN20**
• 50 m	**6XV1830-0EN50**
• 100 m	**6XV1830-0ET10**
• 200 m	**6XV1830-0ET20**
• 500 m	**6XV1830-0ET50**
• 1000 m	**6XV1830-0EU10**
FC robust cable Bus cable with PUR sheath for use under ambient conditions of extreme mechanical stress or aggressive chemicals, 2-wire, shielded, sold by the meter, max. delivery unit 1 000 m, minimum order quantity 20 m	**6XV1830-0JH10**
FC flexible cable PROFIBUS bus cable, flexible, with special design for quick mounting, 2-wire, shielded, sold by the meter, max. delivery unit 1 000 m, minimum order quantity 20 m	**6XV1831-2K**
FC trailing cable PROFIBUS trailing cable, at least 3 million bending cycles, min. bending radius approx. 120 mm, 2-wire, shielded, sold by the meter, max. delivery unit 1 000 m, minimum order quantity 20 m	**6XV1830-3EH10**
FC bus cable PROFIBUS Food bus cable with PE sheath for use in the food and beverages industry, 2-wire, shielded, sold by the meter, max. delivery unit 1 000 m, minimum order quantity 20 m	**6XV1830-0GH10**
FC underground cable PROFIBUS underground cable, 2-wire, shielded, sold by the meter, max. delivery unit 1 000 m, minimum order quantity 20 m	**6XV1830-3FH10**
FC FRNC cable PROFIBUS bus cable, flame-retardant and halogen-free, with copolymer sheath FRNC, sold by the meter, max. delivery unit 1000 m, minimum order quantity 20 m	**6XV1830-0LH10**
FC trailing cable	**6XV1831-2L**
IE FC RJ45 plug 180 180° cable outlet	

© Siemens AG 2026

Selection and ordering data (continued)

Industrial Ethernet FastConnect RJ45 plug 180 2x 2 RJ45 plug-in connector (10/100 Mbps), with rugged metal enclosure and FC connection technology, for IE FC cable 2x 2; 180° cable outlet 1 pack = 1 unit.	**6GK1901-1BB10-2AA0**
Industrial Ethernet FastConnect RJ45 plug 180 2x 2 RJ45 plug-in connector (10/100 Mbps), with rugged metal enclosure and FC connection technology, for IE FC cable 2x 2; 180° cable outlet 1 pack = 10 units.	**6GK1901-1BB10-2AB0**
Industrial Ethernet FastConnect RJ45 plug 180 2x 2 RJ45 plug-in connector (10/100 Mbps), with rugged metal enclosure and FC connection technology, for IE FC cable 2x 2; 180° cable outlet 1 pack = 50 units.	**6GK1901-1BB10-2AE0**
Industrial Ethernet FC TP standard cable, GP 2x2 (PROFINET type A) TP installation cable for connection to IE FC RJ45 2x2, for universal use, 4-wire, shielded Cat5e, sold by the meter, delivery unit maximum length of 4000 m minimum order quantity 20 m.	**6XV1840-2AH10**
Industrial Ethernet FC TP trailing cable, 2x2 (PROFINET type C) TP installation cable for connection to FC outlet RJ 45, for use in cable carriers, 4-wire, shielded, Cat5e, sold by the meter (4 million bending cycles), delivery unit max. 2000 m, minimum order quantity 20 m.	**6XV1840-3AH10**
Industrial Ethernet FC TP marine cable TP installation cable for connection to FC outlet RJ45, marine certified, 4-wire, shielded, Cat5e, sold by the meter, delivery unit maximum length of 1000 m, minimum order quantity 20 m.	**6XV1840-4AH10**
Industrial Ethernet FastConnect stripping tool Stripping tool for fast stripping of insulation from the IE FastConnect cables.	**6GK1901-1GA00**

Overview

SIMATIC ET 200MP IM 155-5 MF HF

ET 200MP IM 155-5 PN BA interface module

- Interface modules for connecting ET 200MP via PROFINET, Ethernet/IP, Modbus TCP or PROFIBUS
- These handle data exchange with the I/O controller in the controller
- Width 35 mm

Note:

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the corresponding standard products. SIPLUS extreme-specific information was added.

Selection and ordering data

SIPLUS IM 155-5 PN interface module (Extended temperature range and exposure to environmental substances) IP20 degree of protection, module width 35 mm, installation on S7-1500 mounting rail IM 155-5 PN ST, standard version	**6AG1155-5AA01-7AB0**
SIPLUS ET 200MP, IM155-5 MF MultiFieldbus interface module (Extended temperature range and exposure to environmental substances) For up to 30 I/O modules, S2 redundancy for operation on S7-400H	**6AG1155-5MU00-7CN0**
Accessories	See SIMATIC ET 200MP, IM 155-5 interface module

Article number	6AG1155-5AA01-7AB0 SIPLUS ET 200MP IM 155-5 PN ST	6AG1155-5MU00-7CN0 SIPLUS ET 200MP IM155-5 MF HF
General information		
Product type designation	IM 155-5 PN ST	IM 155-5 MF HF
Product function		
• I&M data	Yes; I&M0 to I&M3	Yes; I&M0 to I&M4
• Module swapping during operation (hot swapping)	No	Yes; In combination with active backplane bus
• Isochronous mode	Yes	Yes
• IRT	Yes	Yes
• Tool changer	No	Yes; Docking station
• Local coupling, IO data	No	Yes
- Number of coupling modules		6; 1x output + max. 5x input
Engineering with		
• STEP 7 TIA Portal configurable/integrated from version	see entry ID: 109746275	see entry ID: 109746275
• PROFINET from GSD version/GSD revision	GSDML V2.3	GSDML V2.45
Supply voltage		
Rated value (DC)	24 V	24 V
Reverse polarity protection	Yes	Yes
Short-circuit protection	Yes	Yes
Input current		
Current consumption (rated value)	0.2 A	0.16 A; at 24 V DC and without load
Address area		
Address space per station		
• Address space per station, max.	512 byte; per input / output	1 440 byte; For input and output data respectively
Hardware configuration		
Integrated power supply	Yes; 14 W	Yes; 16 W
Rack		
• Modules per rack, max.	30; I/O modules	30; I/O modules
Submodules		
• Number of submodules per station, max.	256; 9 per I/O module	256; 9 per I/O module
Interfaces		
Transmission procedure	100BASE-TX	100BASE-TX
Number of PROFINET interfaces	1; 2 ports (switch)	1; 2 ports (switch)
1. Interface		
Interface types		
• RJ 45 (Ethernet)	Yes	Yes; with BusAdapter
• Number of ports	2	2; with BusAdapter
• integrated switch	Yes	Yes
• BusAdapter (PROFINET)	No	Yes; BA 2x RJ45, BA 2x FC, BA 2x M12
Protocols		
• PROFINET IO device	Yes	Yes
• Open IE communication	Yes	Yes
• Media redundancy	Yes; PROFINET MRP client	Yes; PROFINET MRP client / HRP client
PROFINET IO Device		
- Services		
- IRT	Yes; 250 µs to 4 ms in 125 µs frame	Yes; 250 µs to 4 ms in 125 µs frame
- Dynamic Frame Packing (DFP)	No	No
- PROFIenergy	No	No
- Prioritized startup	Yes	No
- Shared device	Yes	Yes
- Number of IO Controllers with shared device, max.	2	4; for multi-fieldbus mixed operation: 2x PN controller + 2x EtherNet/IP scanner + 10x Modbus TCP master
Interface types		
RJ 45 (Ethernet)

• Transmission procedure	PROFINET with 100 Mbit/s full duplex (100BASE-TX)	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
• 100 Mbps	Yes	Yes
• Autonegotiation	Yes	Yes
• Autocrossing	Yes	Yes
Protocols		
Supports protocol for PROFINET IO	Yes	Yes
PROFIsafe	Yes	Yes
PROFIBUS	No	No
EtherNet/IP	No	Yes
Modbus TCP	No	Yes
Redundancy mode		
• PROFINET system redundancy (S2)	No	Yes; NAP S2
• PROFINET system redundancy (R1)	No	No
• H-Sync forwarding	No	Yes
- Media redundancy		
- MRP	Yes	Yes
- MRPD	No	Yes
EtherNet/IP		
- Services		
- CIP Implicit Messaging		Yes
- CIP Explicit Messaging		Yes
- CIP Safety		No
- Configuration control via Explicit Messaging		No
- Shared device		Yes; for multi-fieldbus mixed operation: 2x PN controller + 2x EtherNet/IP scanner + 10x Modbus TCP master
- Number of scanners with shared device, max.		2
- Updating times		
- Requested Packet Interval (RPI)		2 ms
- Address area		
- Address space per module, max.		256 byte; 246 byte outputs / 256 byte inputs
- ForwardOpen (Class1 & 32 bit Header)		500 byte; (246 byte outputs / 500 byte inputs)
- LargeForwardOpen (Class3)		4 002 byte
- Connections		
- Number of rack connections		2
Modbus TCP		
- Services		
- read coils (code=1)		Yes
- read discrete inputs (code=2)		Yes
- Read Holding Registers (Code=3)		Yes
- write single coil (code=5)		Yes
- write multiple coils (code=15)		Yes
- Write Multiple Registers (Code=16)		Yes
- Parameter change by master		Yes
- Modbus TCP Security Protocol		No
- Address space per station		
- Address space per station, max.		500 byte; (246 byte outputs / 500 byte inputs)
- Access-consistent address space		250 byte; (246 byte outputs / 250 byte inputs)
- Updating time		
- I/O request interval		2 ms
- Connections		
- number of connections per device		9; (1x inputs / 2x outputs / 4x volatile registers / 2x Device Info)

Overview

- Interface module for linking the ET 200MP to PROFIBUS
- Handles data exchange with the PROFIBUS device in the PLC
- Max. 12 I/O modules
- Automatic detection of baud rate 9.6 kBd ... 12 MBd
- PROFIBUS addresses 1 ... 125; adjustable using DIP switches
- Identification and maintenance data IM0 ... IM3

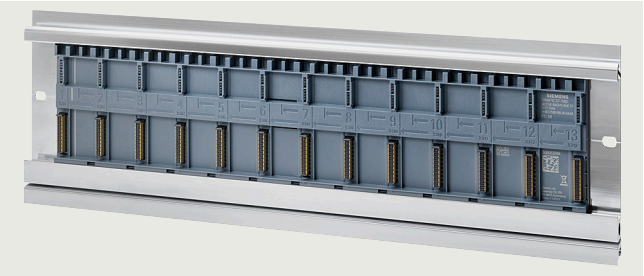
Overview



I/O modules constitute the interface of SIMATIC ET 200MP to the process:

- Digital and analog modules provide exactly the inputs/outputs required for each task
- Technology modules for SIMATIC S7-1500 and ET 200MP
  - With integrated functions for high-speed counting and position detection
  - With integrated inputs and outputs for tasks at the process level and short response times
- Communications modules for SIMATIC S7-1500 and ET 200MP
  - For data exchange using point-to-point coupling
  - For connecting to PROFIBUS
  - For connecting to Industrial Ethernet
- Connection system for user-friendly, low-overhead wiring of the S7-1500 and ET 200MP modules

I/O modules for SIMATIC ET 200MP can also be used for SIMATIC S7-1500 and are described there.

© Siemens AG 2026

Overview

Active backplane bus in S7-1500 DIN rail

- Considerably enhances system availability:
  - Reaction-free hot swapping of I/O modules during operation; system remains in RUN mode when replacing one or more I/O modules
  - Reserve capacity (= gaps in system configuration) for later use
- Can also be used exclusively with ET 200MP and PROFINET
- Can be inserted in the ET 200MP standard DIN rail, replaces the U connectors
- The comprehensive system functions of ET 200MP can still all be used
- Can be used with all PROFINET IO controllers by configuring via GSD file and PROFINET

Selection and ordering data

Active backplane bus With 12 slots for ET 200MP I/O modules for hot swapping; for insertion in the S7-1500 DIN rail. Please order the S7-1500 DIN rail and slot covers separately.	
• 4 slots	**6ES7590-0BD00-0AA0**
• 8 slots:	**6ES7590-0BH00-0AA0**
• 12 slots	**6ES7590-0BL00-0AA0**
Accessories	
Slot cover for active backplane bus To protect against electrostatic discharge as well as provide mechanical stability on the S7-1500 DIN rail; 5 units per packing unit	**6ES7590-0CA00-0AA0**

SIMATIC BA 2xRJ45 BusAdapter

SIMATIC BA 2xM12 BusAdapter push-pull sockets

SIMATIC BA 2xFC BusAdapter

Overview (continued)

- SIMATIC BusAdapter
  For free choice of the connection system (plug-in or direct connection) of PROFINET to devices with a SIMATIC BusAdapter interface.
  One further advantage of the SIMATIC BusAdapter: only the adapter needs to be replaced for subsequent conversion to the rugged FastConnect technology or to repair defective RJ45 sockets.

Selection and ordering data

BA 2xRJ45 BusAdapter For IM 155-6 PN ST, HF, R1	**6ES7193-6AR00-0AA0**
BA 2xFC BusAdapter For IM 155-6 PN ST, HF; R1; for increased resistance to vibration and EMC loads	**6ES7193-6AF00-0AA0**
BA 2xM12 BusAdapter For IM 155-6 PN ST, HF; R1; 2 x M12 push-pull sockets, D-coding, also suitable for standard M12. For PROFINET	**6ES7193-6AM00-0AA0**

Overview

Active backplane bus in S7-1500 DIN rail

- Considerably enhances system availability:
  - Reaction-free hot swapping of I/O modules during operation; system remains in RUN mode when replacing one or more I/O modules
  - Reserve capacity (= gaps in system configuration) for later use
- Can also be used exclusively with ET 200MP and PROFINET
- Can be inserted in the ET 200MP standard DIN rail, replaces the U connectors
- The comprehensive system functions of ET 200MP can still all be used
- Can be used with all PROFINET IO controllers by configuring via GSD file and PROFINET

Note:
SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

Selection and ordering data

Active backplane bus	
SIPLUS S7-1500 act. backplane 8 slot with conformal coating -40...+70°C, With 8 slots for inserting S7-1500 I/O modules for hot swapping for use in the ET 200MP mit IM 155-5 PN HF (from FW V4.4.1); Please order S7-1500 mounting rail and slot covers separately	**6AG1590-0BH00-7AA0**
SIPLUS S7-1500 act. backpl. 12 slot With 12 slots for inserting S7-1500 I/O modules for hot swapping; with conformal coating -40 ... +70 °C, for use in the ET 200MP. Please order S7-1500 mounting rail and slot covers separately	**6AG1590-0BL00-7AA0**

Overview

SIMATIC ET 200BL

SIMATIC ET 200BL is a cost-optimized, distributed I/O system with degree of protection IP20. Via an interface module it can exchange I/O data of the connected I/O modules with a higher-level controller. The following interface module is available for this purpose:

- PROFINET: IM 155-8 PN

The following I/O modules enable flexible connection of sensors and actuators:

- Digital input modules (DI), with removable terminal block
- Digital output modules (DQ), with removable terminal block
- Analog input modules (AI), with removable terminal block
- Analog output modules (AQ), with removable terminal block
- Communications modules (CM), with removable terminal block

Compact design

- Modular configuration with up to 16 modules
- System-integrated power bus
- 15 mm I/Os for maximum functionality in a minimum of space
- Up to 16 channels per module

Flexible connection options, reduced complexity

- Push-in terminals for conductor cross-sections up to 1.5 mm² with end sleeve, without end sleeve up to 2.5 mm²
- Optimal accessibility due to spring release and measuring tap directly on the conductor connection
- One-slice design reduces system complexity and facilitates handling

Communication standards

- PROFINET IO
- Point-to-point (RS422, RS485)
- Freeport
- Modbus RTU (master/device)

Overview (continued)

Labeling of I/O modules

- Meaningful labeling on the front of the I/O modules:
  - Module type in plain text
  - Article No.
  - Integrated ID link
  - Hardware functional status and firmware version
  - Color code of the suitable color-coding plate
  - Connection diagram

Overview of ET 200BL components

Basic components	Function
PROFINET IO interface module (IM 115-8 PN)	The interface module • Is used as I/O device on PROFINET IO • Connects ET 200BL to the I/O controller • Exchanges data with the I/O modules via the backplane bus
I/O modules	I/O modules are subdivided into the following module types: • DI (digital input) • DQ (digital output) • AI (analog input) • AQ (analog output) • CM (communications module)
End cover	The end cover closes off the rear backplane bus. It is included in the scope of supply of the interface modules.
Labeling strips	Optionally, the interface modules can be provided with labeling strips (13 x 31 mm). The labeling strips can be inscribed mechanically. The labeling strips are available in light gray: • 500 strips on the roll, for printing on thermal transfer printers. Core diameter 40 mm, outer diameter 70 mm, width 62 mm. • 10 DIN A4 sheets with 100 strips each, card 180 g/mm², perforated, for printing with a laser printer direct from TIA Portal or via print templates.
Equipment labeling plates	Optionally, one equipment labeling plate each can be attached to interface modules and I/O modules. Equipment labeling plates are supplied in packs of 10 sheets with 16 labels each. The labels can be printed with thermal transfer card printers or plotters, or stickers can be attached to them. Advantages compared to labels that are attached directly: • The inscription on the front is not covered • Simple label replacement when replacing a module The size of the inscribable area of the labels is 14.8 x 10.5 mm (W x H).
Color-coded labels	The +/- potentials can optionally be identified using module-specific color-coded labels. Color-coded labels are supplied in packs of 10 or 50 labels. Advantages of the color-coded labels: • Quick installation (one label for marking up to 16 terminals) • Avoidance of wiring errors • Simple detection of potentials during servicing

Overview

SIMATIC ET 200BL interface module

Data exchange between I/O modules and the higher-level PLCs takes place via the ET 200BL interface module.
The following interface variant is available for this purpose:

- IM 155-8 PN: PROFINET with integrated 2-port switch

The interface module

- can be used as an IO Device on PROFINET IO
- connects ET 200BL to the I/O controller
- exchanges data with the IO modules via the backplane bus

The end cover for the backplane bus is included in the scope of supply of the interface module.

Selection and ordering data

Overview

- CM PtP RS422/485 communications module;
  Module for serial communication connections with the RS422 and RS485 interfaces for the Freeport, Modbus RTU protocols, max. 115.2 kbps, 1 KB frame length, 2 KB receive buffer.
- Supported protocols
  - Freeport:
    user-parameterizable frame format for universal communication (ASCII frame)
  - Modbus RTU master (requires instructions in the CPU)
  - Modbus RTU device (requires instructions in the CPU)
- Interface properties
  - RS422 for full-duplex connections
  - RS485 for half-duplex and multi-point connections
  - Transfer rates from 300 to 115200 bps
- Frame lengths
  - In universal operation: 1 KB each in send and receive direction
  - In performance-optimized operation: 30 bytes in send direction, 24 bytes in receive direction
- LED display for errors, operation, and supply voltage
- Communication display for sending and receiving
- Clear labeling on front of module
  - Plain text identification of the module type
  - ID-Link
  - Hardware and firmware version
  - Complete Article No.
- Optional labeling accessories
  - Equipment labeling plate

Overview

The ET 200iSP is a modular, intrinsically safe I/O system with IP30 degree of protection which can be operated in gas and dust atmospheres at ambient temperatures from -20 to +70 °C. It is optimized for use with SIMATIC PCS 7 and PCS neo, but can also be integrated in other systems such as SIMATIC S5 by means of GSD/GSDML file.

In accordance with ATEX directive 2014/34/EU, the ET 200iSP remote I/O stations can be installed directly in the hazardous zones 1 and 2 as well as in non-hazardous areas. The intrinsically safe sensors, actuators and HART field devices can also be located in zone 0 or 20 if necessary.

The modular design of the ET 200iSP makes it possible to optimally adapt the remote I/O stations to the respective automation task through individual configuration and flexible expansion. To increase plant availability, the pressure-encapsulated power supply and the intrinsically safe PROFINET or PROFIBUS DP connection of the stations can also be of redundant design. The intrinsically safe, optical PROFINET connection allows redundancy functions S2 and R1 as well as the setup of fail-safe MRP rings.

The modern architecture with hardwiring and automatic slot coding supports pre-wiring without the electronic modules, simple and reliable hot swapping of individual modules without a fire certificate as well as configuration in run (CiR).

In addition to analog and digital I/O modules for the automation of technological functions of the process (Basic Process Control), the range of electronic modules also includes fail-safe I/O modules for implementing safety applications. The various types of electronic module can be arranged mixed within a station. Comprehensive diagnostic options facilitate commissioning and troubleshooting.

Technical specifications

ET 200iSP – general		
Degree of protection	IP30	
Ambient temperature		
• Horizontal mounting position	-20 ... +70 °C	
• Other mounting positions	-20 ... +50 °C	
Exposure to environmental substances	According to ISA-S71.04 severity level G1; G2; G3 (except for NH3, only level G2 in this case)	
EMC	Electromagnetic compatibility according to NE21	
Vibration resistance	0.5 g continuously, 1 g periodically	
Approvals, standards		
• ATEX	II 2 G (1) GD I M2	Ex db eb [ia/ib] IIC T4 Ex db eb [ia/ib] I

Overview

An ET 200iSP power supply unit consists of a TM-PS terminal module (A or B) and a PS power supply module which is plugged onto this. Terminal modules and power supply modules can be ordered separately.

The power supply modules are suitable for both individual operation (standard) and redundant operation. Depending on the operating mode, they must be combined with the terminal modules as follows:

- Standard: 1 × PS on TM-PS-A UC
- Redundancy: 1 × PS on TM-PS-A UC (left) plus 1 × PS on TM-PS-B UC (right)

Power supply modules are available for supplies of 24 V DC and 120/230 V AC.

The operating state of the power supply modules is indicated by two LEDs on the IM 152 interface module (one for each module).

Selection and ordering data

PS 24 V DC power supply module for ET 200iSP	**6ES7138-7EA01-0AA0**

Overview

The IM 152 interface module realizes the connection of the ET 200iSP to a PROFINET network with an intrinsically safe multimode glass fiber-optic cable up to 100 Mbps or to PROFIBUS DP with intrinsically safe RS 485-iS transmission technology for transfer rates of up to 1.5 Mbps. A redundant connection is also possible. In this case, the ET 200iSP is connected via two interface modules to two redundant segments of a high-availability automation system (PROFINET R1 redundancy or PROFIBUS redundancy). Alternatively, the S2 redundancy function and the setup of fail-safe MRP rings is possible with PROFINET.

The IM 152 is plugged onto a special terminal module (to be ordered separately). The following terminal modules are available:

- TM-IM/IM terminal module for two interface modules (for device redundancy)
- TM-IM/EM60 terminal module for one interface module and one watchdog, reserve or electronic module (except 2 DQ relay)
  - with blue screw-type or spring-loaded terminals for hazardous environments
  - with black screw-type terminals for non-hazardous environments

Overview (continued)

Tasks of the IM 152-1PN interface module

- Connection of ET 200iSP to the intrinsically safe, optical PROFINET network
- Autonomous communication with the host automation system
- Preparation of data for the fitted electronic modules
- Backup of electronic module parameters
- Time stamping of digital process signals with an accuracy of 20 ms

Tasks of the IM 152-1DP interface module

- Connection of ET 200iSP to the intrinsically safe PROFIBUS DP
- Autonomous communication with the host automation system
- Preparation of data for the fitted electronic modules
- Backup of electronic module parameters
- Time stamping of digital process signals with an accuracy of 20 ms

The maximum address space of the interface module is 244 bytes for inputs, and 244 bytes for outputs.

Overview

Digital input modules

- 8-channel digital input module DI NAMUR EEx i, for evaluation of NAMUR sensors, connected and non-connected contacts, as well as for use as counter or frequency meter

  Parameterizable connections:

  - NAMUR sensor on/off
  - NAMUR changeover contact
  - Single contact connected (mechanical NO contact)
  - Changeover contact connected (mechanical changeover contact)
  - Single contact non-connected (mechanical NO contact with single contact)
  - Changeover contact non-connected (mechanical changeover contact)
  - Counting function: optional use of 2 channels for recording counter pulses or for frequency measurement
  - Short-circuit and wire-break monitoring

Digital output modules

- 4-channel digital output modules DQ EEx i, 23.1 V DC/20 mA, 17.4 V DC/27 mA, 17.4 V DC/40 mA or 25.5 V DC/22 mA, with external actuator switch-off via High or Low signal (H/L switch-off)
  - Load-free switching of outputs via external intrinsically safe signal
  - Power boosting through parallel connection of two outputs for one actuator with 4 DQ 17.4 V DC/27 mA or 4 DQ 17.4 V DC/40 mA
  - Short-circuit and wire-break monitoring
- 2-channel digital output module DQ Relay EEx e, e.g. for switching solenoid valves, DC contactors or signaling lamps
  - Can be plugged onto TM-RM/RM terminal module
  - Output current up to 2 A with 60 V UC for each of the two relay outputs
  - Installation up to Ex zone 1
  - Intrinsically safe and non-intrinsically safe signals can be mixed in a station

Overview (continued)

Extra functions

Actuator shutdown function of the 4 DQ EEx i modules

The 4 DQ EEx i modules are equipped with a shutdown function. This permits implementation of an external actuator switch-off independent of the automation system (controller).

As soon as the intrinsically safe switch-off signal (High or Low) is present at the actuator switch-off input of the electronic module, its outputs are deactivated.

You can also combine several DQ modules into a switch-off group. The intrinsically safe power supply for the switch-off device is either via the watchdog module or a separate intrinsically safe source.

Overview

Analog input modules

- 4-channel analog input module AI 2 WIRE HART EEx i for current measurement in the range 4 to 20 mA, suitable for connection of 2-wire transmitters (with/without HART functionality)
  - Resolution 12 bit + sign
  - Max. load of transmitter 750 Ω
  - Short-circuit and wire break monitoring
- 4-channel analog input module AI 4 WIRE HART EEx i for current measurement in the range 0/4 to 20 mA, suitable for connection of 4-wire transmitters (with/without HART functionality)
  - Resolution 12 bit + sign
  - Max. load of transmitter 750 Ω
  - Wire break monitoring
- 4-channel analog input module AI RTD EEx i for resistance testing and for temperature measurement by Pt100/Ni100 resistance thermometer
  - Resolution 15 bit + sign
  - 2, 3, or 4-wire connection possible
  - Resistance measurements 600 Ω absolute and 1 000 Ω absolute
  - Wire break monitoring
- 4-channel analog input module AI TC EEx i for thermoelectric EMF measurements and for temperature measurement by thermocouple, type B, E, N, J, K, L, S, R, T, U
  - Resolution 15 bit + sign
  - Internal temperature compensation possible using TC sensor module (included in scope of delivery of module)
  - External temperature compensation by means of a temperature value acquired at an analog module of the same ET 200iSP station
  - Wire break monitoring

Overview (continued)

Analog output modules

- 4-channel analog output module AO I HART EEx i for output of current signals in the range 0/4 to 20 mA to field devices (with/without HART functionality)
  - Resolution 14 bit
  - Parameterizable substitute value in case of CPU failure
  - Short-circuit and wire break monitoring

Extra functions

Temperature compensation

A TC sensor module for internal temperature compensation is provided with the 4 AI TC module, and is fitted on the corresponding terminals of the associated terminal module.

External temperature compensation is possible via a Pt100 on a 4 AI RTD module.

General information	
Product type designation	4AQ I HART
Analog outputs	
Number of analog outputs	4
Cycle time (all channels) max.	3.6 ms
Output ranges, current	
• 0 to 20 mA	Yes
• 4 mA to 20 mA	Yes
Connection of actuators	
• for current output two-wire connection	Yes
Load impedance (in rated range of output)	
• with current outputs, max.	750 Ω
Cable length	
• shielded, max.	500 m
Analog value generation for the outputs	
Integration and conversion time/resolution per channel	
• Resolution with overrange (bit including sign), max.	14 bit
Settling time	
• for resistive load	4 ms
• for capacitive load	40 ms
• for inductive load	40 ms
Errors/accuracies	
Basic error limit (operational limit at 25 °C)	
• Current, relative to output range, (+/-)	0.1 %
Interrupts/diagnostics/status information	
Substitute values connectable	Yes
Alarms	
• Diagnostic alarm	Yes
Diagnoses	
• Diagnostic information readable	Yes
• Wire break	Yes; I load > 1 mA
• Short-circuit	Yes; I load > 1 mA
Diagnostics indication LED	
• Group error SF (red)	Yes
Ex(i) characteristics	
maximum values for connecting terminals for gas group IIC	
• Uo (no-load voltage), max.	27.6 V
• Io (short-circuit current), max.	88.2 mA
• Po (power output), max.	0.61 mW
• Co (permissible external capacity), max.	83 nF
• Lo (permissible external inductivity), max.	3 mH
Potential separation	
Potential separation analog outputs	
• between the channels and backplane bus	Yes
Standards, approvals, certificates	
CE mark	CE 0344
UKCA mark	DEKRA 21UKEX0091 Importer UK: Siemens plc Manchester M20 2UR
Use in hazardous areas

Overview

The electronic modules of the SIMATIC ET 200iSP distributed I/O system equipped with safety functions can be used together with the safety-related automation systems (controllers) for the implementation of safety applications. The input modules record the process signals, evaluate them, and prepare them for additional processing by the automation system. The output modules convert the safety-related signals output by the automation systems so that they are suitable for controlling the connected actuators.

F-digital input modules

- 8 F-DI Ex NAMUR

  Safety-related digital input module for evaluating the signals from IEC 60947-5-6/NAMUR sensors and connected/non-connected mechanical contacts in hazardous and non-hazardous areas

  - SIL3/Cat.3/PLe with 8 inputs (1-channel/1oo1 evaluation) or 4 inputs (2-channel/1oo2 evaluation)
  - 8 short-circuit-proof sensor supplies (8 V DC) for 1 channel each
  - Inputs and sensor supplies electrically isolated from power bus and backplane bus
  - Diagnostics evaluation (deactivated for non-connected mechanical contacts)
  - Internal diagnostics buffer
  - Programmable diagnostics interrupt
  - Supports time stamping
  - Channel-selective passivation
  - Firmware update using HW Config possible
  - Exclusively for safety mode
  - LED displays for safety mode, group errors and channel status/fault

Overview (continued)

F-digital output modules

- 4 F-DO Ex DC 17.4 V/40 mA

  Safety-related digital output module for controlling actuators in hazardous and non-hazardous areas, e.g. solenoid valves, DC current relays or indicator lights

  - SIL3/Cat.3/PLe with 4 outputs, switching to P/P potential
  - Electrical isolation from power bus and backplane bus
  - Rated load voltage 17.4 V DC
  - Max. output current 40 mA
  - Performance enhancement through parallel connection of two digital outputs for one actuator
  - Short-circuit, overload and wire-break monitoring
  - Configurable diagnostics
  - Internal diagnostics buffer
  - Programmable diagnostics interrupt
  - Channel-selective passivation
  - Firmware update using HW Config possible
  - Exclusively for safety mode
  - LED displays for safety mode, group errors and channel status/fault

F-analog input modules

- 4 F-AI Ex HART (0 ... 20 mA or 4 ... 20 mA)

  Safety-related digital input module for evaluating the signals from current simulators in hazardous and non-hazardous areas, e.g. 2-wire transmitters and HART field devices

  - SIL3/Cat.3/PLe with 4 inputs of one module (1-channel/1oo1 evaluation) or 4 inputs of two modules (2-channel/1oo2 evaluation)
  - Measuring ranges: 0 ... 20 mA or 4 ... 20 mA
  - Resolution 15 bit + sign
  - HART communication in measuring range 4 ... 20 mA
  - 4 short-circuit-proof sensor supplies (min. 12 V DC; max. 26 V DC) for 1 channel each
  - Inputs and sensor supplies electrically isolated from backplane bus
  - Configurable diagnostics
  - Programmable diagnostics interrupt
  - Internal diagnostics buffer
  - Firmware update using HW Config possible
  - Exclusively for safety mode
  - LED displays for safety mode, group errors, channel faults and HART status per channel

Overview

The watchdog module has two fundamental functions:

- Monitoring of the ET 200iSP remote I/O station for hardware failures (hardware lifebeat); external, applicative failure monitoring is also possible via an I/O address area of the module
- Intrinsically-safe power supply for external actuator switch-off

The watchdog module must be plugged onto a terminal module (order separately). The following terminal modules are suitable for this:

- TM-IM/EM60 terminal modules for one interface module and one watchdog, reserve or electronics module (for versions, see Interface module section)
- TM-EM/EM60 terminal modules with two slots for watchdog module, reserve module or electronics modules (except 2 DO relay):
  - with blue screw-type or spring-loaded terminals for hazardous environments
  - with black screw-type terminals for non-hazardous environments

The first slot directly next to the interface module is provided for the watchdog module.

Overview

Tasks of the RS 485-iS coupler

- Conversion of the electrical PROFIBUS DP RS 485 transmission technology into the intrinsically-safe RS 485-iS transmission technology with a transmission rate of 1.5 Mbps
- Required to connect intrinsically-safe PROFIBUS DP stations, e.g. ET 200iSP or devices from other vendors with Ex i DP connection
- Acts as a safety barrier
- Additional use as a repeater in the hazardous area
- Passive bus station (no configuration necessary)
- Certified according to ATEX 100a

Selection and ordering data

Design

ET 200iSP modules can also be installed in stainless steel wall boxes designed to meet more exacting degree of protection requirements. The enclosures are available in various sizes. They comply with degree of protection IP65/66 and can be used in Ex zones 1 and 21 (including hazardous zones 2 and 22).

Depending on requirements, delivery is possible as an empty enclosure with ATEX component certificate or including installations with ATEX device certificate.

Send your request to: cabinets.industry@siemens.com

Selection and ordering data

	Article No.
Stainless steel enclosure IP65/IP66 for SIMATIC ET 200iSP	**6DL2804-**
	● ● ● ● ●
Enclosure	
Ex enclosure, stainless steel 1.4404, IP65/IP66, with mounting plate and PA rail, empty enclosure prepared for installation of ET 200iSP components[1], including ATEX component certificate	**0**
Ex device, IP65/IP66, consisting of stainless steel enclosure 1.4404 with built-in ET 200iSP components[2], including ATEX Ex device certificate	**1**
Ex device, IP65/IP66, consisting of stainless steel enclosure 1.4404 with built-in ET 200iSP and pneumatic components[2], including ATEX Ex device certificate	**2**
Device group	
Device group II, up to zone 1 (including zone 2)	**A**
Device group II, up to zone 1 and zone 21 (including zone 2 and zone 22)	**D**
Enclosure dimensions W × H × D (in mm)	
650 × 450 × 230, for up to 14 ET 200iSP modules (IM/EM), with redundant power supply up to 12 ET 200iSP modules (IM/EM)	**D**
950 × 450 × 230, for up to 24 ET 200iSP modules (IM/EM), with redundant power supply up to 22 ET 200iSP modules (IM/EM)	**E**
Cable entries/number	
M16 cable entries for signals, 3 rows, 39 or 66 units[3], 2 × M32 for supply voltage, 4 × M20 for bus cables	**3**
M20 cable entries for signals, 3 rows, 36 or 57 units[3], 2 × M32 for supply voltage, 4 × M20 for bus cables	**4**
M16 cable entries for signals, 5 rows, 65 or 110 units[3], 2 × M32 for supply voltage, 4 × M20 for bus cables	**5**
M20 cable entries for signals, 5 rows, 60 or 95 units[3], 2 × M32 for supply voltage, 4 × M20 for bus cables	**6**
Degree of protection, material cable entries, material air breather glands	
IP65, cable entries polyamide black, breather glands polyamide	**0**
IP66, cable entries nickel-plated brass, breather glands stainless steel 1.4404	**1**
IP65, cable entries polyamide blue, breather glands polyamide	**2**

1) The supplied certificate is only valid for the empty enclosure.
2) The supplied certificate is valid for the supplied enclosure, including the installed components.
3) Number of cable entries/signals depends on enclosure dimensions

Overview

SIMATIC ET 200pro video

- SIMATIC ET 200pro distributed I/O system with degree of protection IP65/67 for cabinet-free use at the machine
- Small, multifunctional complete solution: Digital inputs/outputs, fail-safe modules, motor starters up to 5.5 kW, etc.
- Communication over PROFIBUS or PROFINET
- Mixed arrangement of fail-safe and standard modules in the same station
- Freely selectable connection technology: M12 7/8", M12 M12-L, direct, ECOFAST, push pull (CU, FO)
- Power module for easy implementation of load groups
- Module replacement during operation (hot swap)
- Easy installation as well as permanent wiring
- Transfer rate for PROFIBUS DP up to 12 Mbps
- Extensive diagnostics: module-specific or channel-specific
- Intelligent motor starters for starting and protection of motors and loads up to 5.5 kW
  - Versions: direct and reversing starters - Standard and High Feature
- Safety motor starters
- Fail-safe modules with safety-related signal processing according to PROFIsafe
- Frequency converters
- RFID communications modules
- Pneumatic interface modules
- IO-Link master

Technical specifications

General technical specifications	
Electronic modules	• Digital inputs/outputs • Analog inputs • Analog outputs
Connections	M12 and M8 round connector with standard assignment for actuator/sensor
Transmission rate, max.	12 Mbps (PROFIBUS DP), 100 Mbps (PROFINET IO)
Supply voltage	24 V DC
Current consumption of ET 200pro (internal and sensor supply, non-switched voltage), up to 55 °C, max.	≤ 5 A
Load current for ET 200pro per incoming supply (IM, PM, switched voltage), up to 55 °C, max.	10 A
For overall configuration with looping through (multiple ET 200pros), up to 55 °C, max.	16 A (with terminal module, directly)
Degree of protection	IP65/66/IP67 for interface, digital and analog modules
Material	Thermoplastic (reinforced with glass fiber)
Ambient conditions	
Temperature	From -25 °C/0 °C to +55 °C
Relative humidity	From 5 to 100%
Air pressure	From 795 to 1080 hPa
Mechanical stress	
• Vibration	Vibration test according to IEC 60068, Part 2-6 (sinusoidal) • Constant acceleration 5 g, occasionally 10 g for interface, digital and analog modules • 2 g motor starters
• Shock	• Shock test according to IEC 680068 Part 2-27, half-sine, 30 g, 18 ms duration for interface, digital and analog modules • 15 g, 11 ms duration for motor starters
Approvals	UL, CSA or cULus

Overview

Interface modules for communication between ET 200pro and higher-level master via PROFIBUS DP.

Selection and ordering data

IM154-1 interface module For ET 200pro; for communication between ET 200pro and higher-level masters over PROFIBUS DP.	**6ES7154-1AA01-0AB0**
IM154-2 DP High Feature interface module For ET 200pro; for communication between ET 200pro and higher-level masters over PROFIBUS DP; supports PROFIsafe.	**6ES7154-2AA01-0AB0**
Accessories	
CM IM DP ECOFAST connection module For connecting PROFIBUS DP and the 24 V power supply to PROFIBUS interface modules, 2 ECOFAST Cu connections.	**6ES7194-4AA00-0AA0**
CM IM DP direct connection module For connecting PROFIBUS DP and the 24 V power supply directly to PROFIBUS interface modules, up to six M20 cable glands.	**6ES7194-4AC00-0AA0**
CM IM DP M12, 7/8" connection module For connecting PROFIBUS DP and the 24 V power supply to PROFIBUS interface modules, 2 x M12 and 2 x 7/8".	**6ES7194-4AD00-0AA0**
Accessories for CM IM DP ECOFAST	
PROFIBUS ECOFAST hybrid cable, preassembled With 2 ECOFAST connectors, trailable cable with 2 x Cu 0.64 mm²and 4 x Cu 1.5 mm², in various lengths:	
1.5 m	**6XV1830-7BH15**
3.0 m	**6XV1830-7BH30**
5.0 m	**6XV1830-7BH50**
10 m	**6XV1830-7BN10**
15 m	**6XV1830-7BN15**
20 m	**6XV1830-7BN20**
PROFIBUS ECOFAST hybrid cable GP, preassembled With 2 ECOFAST connectors, trailable cable with 2 x Cu 0.64 mm²and 4 x Cu 1.5 mm², in various lengths:	
1.5 m	**6XV1860-3PH15**
3.0 m	**6XV1860-3PH30**
5.0 m	**6XV1860-3PH50**
10 m	**6XV1860-3PN10**
15 m	**6XV1860-3PN15**
20 m	**6XV1860-3PN20**
PROFIBUS ECOFAST hybrid cable, unassembled Trailable cable with 2 x Cu 0.64 mm²and 4 x Cu 1.5 mm², sold by the meter, minimum order quantity 20 m, maximum order quantity 1 000 m.	**6XV1830-7AH10**
PROFIBUS ECOFAST hybrid connector 180 ECOFAST Cu, 2 x Cu, 4 x 1.5 mm², HANBRID connector	
• With pin insert, 5-pack	**6GK1905-0CA00**
• With socket insert, 5-pack	**6GK1905-0CB00**
PROFIBUS ECOFAST hybrid connector angular ECOFAST Cu, 2 x Cu, 4 x 1.5 mm², HANBRID connector	
• With pin insert, 5-pack	**6GK1905-0CC00**
• With socket insert, 5-pack	**6GK1905-0CD00**
Accessories for CM IM DP direct

Selection and ordering data (continued)

PROFIBUS trailing cable Max. acceleration 4 m/s², at least 3000000 bending cycles, bending radius at least 60 mm, 2-wire shielded, sold by the meter, minimum order quantity 20 m, maximum order quantity 1000 m.	**6XV1830-3EH10**
PROFIBUS FC food bus cable With PE sheath for use in the food, beverages and tobacco industries, 2-wire, shielded, sold by the meter, minimum order quantity 20 m, maximum order quantity 1 000 m.	**6XV1830-0GH10**
PROFIBUS FC robust bus cable With PUR sheath for use in environments subject to harsh chemicals and extreme mechanical stress, 2-wire, shielded, sold by the meter, minimum order quantity 20 m, maximum order quantity 1 000 m.	**6XV1830-0JH10**
Power cable 5-wire, 5 x 1.5 mm², trailable, sold by the meter, minimum order quantity 20 m, maximum order quantity 1000 m.	**6XV1830-8AH10**
Accessories for CM IM DP M12, 7/8"	
PROFIBUS M12 connecting cable Preassembled with two M12 plugs, 5-pin, in various lengths:	
1.5 m	**6XV1830-3DH15**
2.0 m	**6XV1830-3DH20**
3.0 m	**6XV1830-3DH30**
5.0 m	**6XV1830-3DH50**
10 m	**6XV1830-3DN10**
15 m	**6XV1830-3DN15**
7/8" connecting cable to power supply 5-wire, 5 x 1.5 mm², trailable, preassembled with two 7/8" connectors, 5-pin, in various lengths:	
1.5 m	**6XV1822-5BH15**
2.0 m	**6XV1822-5BH20**
3.0 m	**6XV1822-5BH30**
5.0 m	**6XV1822-5BH50**
10 m	**6XV1822-5BN10**

Overview

Interface module for processing the communication between ET 200pro and a higher-level controller over PROFINET IO.

Selection and ordering data

IM 154-3 PN High Feature interface module For communication between ET 200pro and higher-level controllers via PROFINET IO; supports PROFIsafe. Connection module 6ES7194-4AK00-0AA0 must be ordered separately.	**6ES7154-3AB00-0AB0**
IM 154-4 PN High Feature interface module For communication between ET 200pro and higher-level controllers via PROFINET IO; supports PROFIsafe. Order connection module 6ES7194-4A .00-0AA0 separately.	**6ES7154-4AB10-0AB0**
Accessories	
Connection modules for IM 154-3 PN High Feature	
• **CM IM PN M12 connection module 7/8" S** for connecting PROFINET PN and 24 V power supply to PROFINET interface modules, 2 x M12 and 2 x 7/8"	**6ES7194-4AK00-0AA0**
• **CM IM PN M12 connection module M12-L S** for connecting PROFINET PN and 24 V power supply to PROFINET interface modules, 2x M12-D and 2x M12-L	**6ES7194-4AL00-0AA0**
Connection modules for IM 154-4 PN High Feature	
• **CM IM PN M12 connection module, 7/8"** for connecting PROFINET PN and 24 V power supply to PROFINET interface modules, 2 x M12 and 2 x 7/8"	**6ES7194-4AJ00-0AA0**
• **CM IM PN 2xRJ45 connection module** for connecting PROFINET PN and 24 V power supply to PROFINET interface modules, 2 x RJ45 and 2 x push-pull power connector	**6ES7194-4AF00-0AA0**
• **CM IM PN 2xSCRJ FO connection module** for connecting PROFINET PN and 24 V power supply to PROFINET interface modules, 2 x SCRJ FO and 2 x push-pull power connector	**6ES7194-4AG00-0AA0**
M12 sealing cap For protection of unused M12 connections with ET 200pro.	**3RX9802-0AA00**
IE M12 connecting cables Preassembled with two M12 plugs, up to 85 m, in various lengths:	
0.3 m	**6XV1870-8AE30**
0.5 m	**6XV1870-8AE50**
1.0 m	**6XV1870-8AH10**
1.5 m	**6XV1870-8AH15**
2.0 m	**6XV1870-8AH20**
3.0 m	**6XV1870-8AH30**
5.0 m	**6XV1870-8AH50**
10 m	**6XV1870-8AN10**
15 m	**6XV1870-8AN15**
20 m	**6XV1870-8AN20**
30 m	**6XV1870-8AN30**
40 m	**6XV1870-8AN40**
50 m	**6XV1870-8AN50**
7/8" sealing caps 1 pack = 10 units	**6ES7194-3JA00-0AA0**
7/8" connecting cable to power supply 5-wire, 5 x 1.5 mm², trailable, preassembled with two 7/8" connectors, 5-pin, up to 50 m, in various lengths:

Selection and ordering data (continued)

1.5 m	**6XV1822-5BH15**
2.0 m	**6XV1822-5BH20**
3.0 m	**6XV1822-5BH30**
5.0 m	**6XV1822-5BH50**
10 m	**6XV1822-5BN10**
15 m	**6XV1822-5BN15**
Power cable 5-wire, 5 x 1.5 mm², trailable, sold by the meter, minimum order quantity 20 m, maximum order quantity 1000 m.	**6XV1830-8AH10**
7/8" connection plug For ET 200eco, with axial cable outlet	
• With pin insert, 5-pack	**6GK1905-0FA00**
• With socket insert, 5-pack	**6GK1905-0FB00**
Industrial Ethernet FastConnect installation cables	
• **IE FC TP standard cable GP 2 x 2**; sold by the meter, max. delivery unit 1000 m; minimum order quantity 20 m.	**6XV1840-2AH10**
• **IE FC TP trailing cable 2 x 2**; sold by the meter, max. delivery unit 1000 m; minimum order quantity 20 m.	**6XV1840-3AH10**
• **IE FC TP trailing cable GP 2 x 2**; sold by the meter, max. delivery unit 1000 m; minimum order quantity 20 m.	**6XV1870-2D**
• **IE TP torsion cable GP 2 x 2**; sold by the meter, max. delivery unit 1000 m; minimum order quantity 20 m.	**6XV1870-2F**
• **IE FC TP marine cable 2 x 2**; sold by the meter, max. delivery unit 1000 m; minimum order quantity 20 m.	**6XV1840-4AH10**
IE RJ45 plug PRO RJ45 plug connector in degree of protection IP65/IP67 for on-site assembly, plastic enclosure, insulation displacement connection system, for SCALANCE X-200IRT PRO and ET 200pro: 1 pack = 1 unit.	**6GK1901-1BB10-6AA0**
IE SC RJ POF plug PRO SC RJ plug connector for POF fibers in degree of protection IP65/IP67, for on-site assembly, plastic enclosure, for SCALANCE X-200IRT PRO and ET 200pro 1 pack = 1 unit	**6GK1900-0MB00-6AA0**
IE SC RJ PCF plug PRO SC RJ plug connector for PCF fibers in degree of protection IP65/IP67, for on-site assembly, plastic enclosure, for SCALANCE X-200IRT PRO 1 pack = 1 unit.	**6GK1900-0NB00-6AA0**
Power plug PRO 5-pin power plug connector for 2 x 24 V power supply in degree of protection IP65/67, for on-site assembly, plastic enclosure, for SCALANCE X-200IRT and ET 200pro 1 pack = 1 unit.	**6GK1907-0AB11-6AA0**
IE panel feedthrough Control cabinet bushing for converting M12 D-coded connection system (IP65) to RJ45 connection system (IP20)	
• 1 pack = 5 units	**6GK1901-0DM20-2AA5**
Push-pull connection plug For 1L+/ 2L+, unassembled	**6GK1907-0AB11-6AA0**
Cover caps for push-pull RJ45 sockets 5 items per pack	**6ES7194-4JD50-0AA0**

Selection and ordering data (continued)

Cover caps for push-pull sockets power (1L+, 2L+) 5 units	**6ES7194-4JA50-0AA0**
General accessories	
ET 200pro module rack	
• Narrow, for interface, electronics and power modules	
- 500 mm	**6ES7194-4GA00-0AA0**
- 1000 mm	**6ES7194-4GA60-0AA0**
- 2000 mm, can be cut to length	**6ES7194-4GA20-0AA0**

Overview

- Expansion modules with digital inputs/outputs for connection of actuators/sensors
- With scalable diagnostics
  - Standard modules with module-specific diagnostics
  - High Feature module with channel-specific diagnostics and parameterizable input delay or hardware interrupts
- Double or single assignment can be implemented for each M12 in the case of the 8 DI and 8 DO module by selecting CM IO 4 x M12 or CM IO 8 x M12
- IO connection modules are available in metal and plastic versions

Selection and ordering data

8 DI digital input module 24 V DC, with module-specific diagnostics, including bus module. Connection module must be ordered separately	**6ES7141-4BF00-0AA0**
8 DI High Feature digital input module 24 V DC, with channel-specific diagnostics, including bus module. Connection module must be ordered separately	**6ES7141-4BF00-0AB0**
16 DI digital input module 24 V DC, with module-specific diagnostics, including bus module. Connection module 6ES7194-4CB50-0AA0 must be ordered separately	**6ES7141-4BH00-0AA0**
4 DQ digital output module 24 V DC, 2 A, with module-specific diagnostics, including bus module. Connection module must be ordered separately	**6ES7142-4BD00-0AA0**
4 DQ High Feature digital output module 24 V DC, 2 A, with channel-specific diagnostics, including bus module. Connection module must be ordered separately	**6ES7142-4BD00-0AB0**
8 DQ digital output module 24 V DC, 0.5 A, with module-specific diagnostics, including bus module. Connection module must be ordered separately	**6ES7142-4BF00-0AA0**
4 DI/4 DQ digital input and output module 24 V DC, 0.5 A, with module-specific diagnostics, including bus module. Connection module must be ordered separately	**6ES7143-4BF50-0AA0**
4 DIQ/4 DQ digital input and output module 24 V DC, 0.5 A, with module-specific diagnostics, including bus module. Connection module must be ordered separately	**6ES7143-4BF00-0AA0**
Accessories	
CM IO 4 x M12 connection module 4 M12 sockets for connecting digital or analog sensors or actuators to ET 200pro	**6ES7194-4CA00-0AA0**
CM IO 4 x M12 inverse connection module 4 M12 sockets for connection of digital actuators to ET 200pro (4 DQ and 4 DQ HF); 2 x M12 single assignment, 2 x M12 double assignment	**6ES7194-4CA50-0AA0**
CM IO 4 x M12 P connection module 4 M12 sockets for connecting digital sensors/actuators to ET 200pro; plastic version	**6ES7194-4CA10-0AA0**
CM IO 8 x M12 connection module 8 M12 sockets for connecting digital sensors or actuators to ET 200pro	**6ES7194-4CB00-0AA0**
CM IO 8 x M12 P connection module 8 M12 sockets for connecting digital sensors or actuators to ET 200pro; plastic version	**6ES7194-4CB10-0AA0**
CM IO 8 x M12D connection module 8 M12 sockets for connecting digital sensors or actuators to ET 200pro	**6ES7194-4CB50-0AA0**
CM IO 8 x M8 connection module 8 sockets M8 for connection of digital sensors or actuators to ET 200pro	**6ES7194-4EB00-0AA0**
CM IO 2 x M12 connection module 2 M12 8-pin sockets; for use with: EM 8 DI, 24 V DC and 8 DQ, 24 V DC/0.5 A	**6ES7194-4FB00-0AA0**

© Siemens AG 2026

Selection and ordering data (continued)

CM IO 1 x M23 connection module 1 M23 socket; for use with: EM 8 DI, 24 V DC and 8 DQ, 24 V DC/0.5 A	**6ES7194-4FA00-0AA0**
Module identification labels For color coding of the CM IOs in the colors of white, red, blue and green; pack with 100 units each	**6ES7194-4HA00-0AA0**
M12 sealing cap For protection of unused M12 connections with ET 200pro	**3RX9802-0AA00**
M12 Y circular connector For double connection of sensors via a single cable, 5-pin; cannot be used for F-DI 4/8	**6ES7194-1KA01-0XA0**
M12 Y-cable For double connection of I/O by means of a single cable to ET 200, 5-pin	**6ES7194-6KA00-0XA0**
M8 sealing cap For IP67 modules	**3RK1901-1PN00**

Overview

- Expansion modules with analog inputs and outputs for connecting sensors/actuators
- With diagnostic functionality, limit values and substitute values

Selection and ordering data

4AI U analog input module High Feature, ±10 V; ±5 V; 0 to 10 V; 1 to 5 V, channel-specific diagnostics, including bus module. Connection module must be ordered separately	**6ES7144-4FF01-0AB0**
4AI I analog input module High Feature, ±20 mA; 0 to 20 mA; 4 to 20 mA, channel-specific diagnostics, including bus module. Connection module must be ordered separately	**6ES7144-4GF01-0AB0**
4AI RTD analog input module High Feature; resistances: 150, 300, 600 and 3000 Ohm; resistance thermometer: Pt100, 200, 500, 1000, Ni100, 120, 200, 500 and 1000; channel-specific diagnostics, incl. bus module. Connection module must be ordered separately	**6ES7144-4JF00-0AB0**
4AI TC analog input module High Feature; thermocouples: Type B, E, J, K, L, N, R, S, T; voltage measurement ±80 mV; channel diagnostics, including bus module. Connection module must be ordered separately	**6ES7144-4PF00-0AB0**
4AO U analog output module High Feature, ±10 V; 0 to 10 V; 1 to 5 V, channel-specific diagnostics, including bus module. Connection module must be ordered separately	**6ES7145-4FF00-0AB0**
4AO I analog output module High Feature, ±20 mA; 0 to 20 mA; 4 to 20 mA, channel-specific diagnostics, including bus module. Connection module must be ordered separately	**6ES7145-4GF00-0AB0**
Accessories	
CM IO 4 x M12 connection module 4 M12 sockets for connecting digital or analog sensors or actuators to ET 200pro	**6ES7194-4CA00-0AA0**
M12 compensation connectors With integral Pt100 for cold junction compensation when connecting thermocouples	**6ES7194-4AB00-0AA0**
Module identification labels For color coding of the CM IOs in the colors of white, red, blue and green; pack with 100 units each	**6ES7194-4HA00-0AA0**
M12 sealing cap For protection of unused M12 connections with ET 200pro	**3RX9802-0AA00**

Supply voltage				
Rated value (DC)	24 V	24 V	24 V	24 V
Reverse polarity protection	Yes; against destruction	Yes; against destruction	Yes; against destruction	Yes; against destruction
Input current				
from supply voltage 1L+, max.	40 mA; Typical	40 mA; Typical	27 mA; Typical	34 mA; Typical
from backplane bus 3.3 V DC, max.	12 mA; Typical	12 mA; Typical	10 mA; Typical	20 mA; Typical
Encoder supply				
Number of outputs	4	4		
Short-circuit protection	Yes; per module, electronic to frame	Yes; per module, electronic to frame		
Output current				
• up to 55 °C, max.	1 A	1 A		
Analog inputs				
Number of analog inputs	4	4	4	4
permissible input voltage for voltage input (destruction limit), max.	35 V			20 V
permissible input current for current input (destruction limit), max.		40 mA		
Constant measurement current for resistance-type transmitter, typ.			1.25 mA; 1.25 / 0.5 mA depending on measuring range	
Cycle time (all channels) max.	5 ms	10 ms	83 ms; 83 ms at 50 Hz; 69 ms at 60 Hz	Number of active channels per module x basic conversion time
Technical unit for temperature measurement adjustable			Yes; Degrees Celsius/degrees Fahrenheit	Yes; °C/°F/K
Input ranges (rated values), voltages				
• 0 to +10 V	Yes			
• 1 V to 5 V	Yes			
• -10 V to +10 V	Yes			
• -5 V to +5 V	Yes			
• -80 mV to +80 mV				Yes
Input ranges (rated values), currents				
• 0 to 20 mA		Yes		
• -20 mA to +20 mA		Yes		
• 4 mA to 20 mA		Yes		
Input ranges (rated values), thermocouples				
• type B				Yes
• Type E				Yes
• Type J				Yes
• Type K				Yes
• Type L				Yes
• Type N				Yes
• Type R				Yes
• Type S				Yes
• Type T				Yes
Input ranges (rated values), resistance thermometer				
• Cu 10			No	
• Ni 100			Yes	
• Ni 1000			Yes	
• Ni 120			Yes	
• Ni 200			Yes	
• Ni 500			Yes	
• Pt 100			Yes	
• Pt 1000			Yes

Overview

- 2-channel position detection module for ET 200pro, incl. bus module
- For connecting gray and dual-coded SSI absolute encoders to ET 200pro
- SSI interface with clock and data for RS422 differential signals
- 24 V encoder supply, short-circuit-proof
- Parameterizable input filters for suppressing interferences at encoder inputs
- Supports SSI absolute encoder with a frame length of 10 to 40 bits, of which up to 25 bits position value
- Width 45 mm

Selection and ordering data

SIMATIC DP, electronic module for ET 200pro EM 2xSSI Position detection for 2 SSI absolute encoders incl. bus module, SSI CM connection module 6ES7194-4CC00-0AA0 must be ordered separately	**6ES7147-4BB00-0AA0**
Accessories	
SIMATIC DP SSI CM connection module For technology module ET 200pro EM 2xSSI 2xM12	**6ES7194-4CC00-0AA0**
AS-Interface accessory M12 cover For IP67 modules, 15 mm outer diameter, with O-ring	**3RK1901-1KA00**
AS-Interface accessory M12 cover For IP67 modules, tamper-proof version, 15 mm outer diameter, with O-ring	**3RK1901-1KA01**
AS-Interface accessory M12 cover For IP67 modules, 12 mm outer diameter, without O-ring	**3RX9802-0AA00**
Device identification labels, for SIRIUS devices 20x7 mm, titanium gray, package contents: 17 sheets with 20 labels each	**3RT2900-1SB20**
SIMATIC DP, module labels for ET 200 PRO For color-coding of the IO connection modules; Pack of 100 20x7 labels in the colors red, green, blue, white, yellow	**6ES7194-4HA00-0AA0**
SIMATIC DP, slim module rack for ET 200 PRO I/O modules Length 500 mm	**6ES7194-4GA00-0AA0**
SIMATIC DP, slim module rack for ET 200 PRO I/O modules Sold by the meter for self-configuration, length 2000 mm	**6ES7194-4GA20-0AA0**
SIMATIC DP, slim module rack for ET 200 PRO I/O modules Length 1000 mm, new drilling pattern	**6ES7194-4GA60-0AA0**
SIMATIC DP, module rack wide version for I/O modules and motor starter ET 200 PRO Length 500 mm	**6ES7194-4GB00-0AA0**
SIMATIC DP, module rack wide version for I/O modules and motor starter ET 200 PRO Sold by the meter for self-configuration, length 2000 mm	**6ES7194-4GB20-0AA0**
SIMATIC DP, module rack wide version for I/O modules and motor starter ET 200 PRO Length 1000 mm, new drilling pattern	**6ES7194-4GB60-0AA0**
SIMATIC DP, compact module rack for ET 200 PRO I/O modules Sold by the meter for self-configuration, length 2000 mm	**6ES7194-4GC20-0AA0**
SIMATIC DP, compact module rack for ET 200 PRO I/O modules Length 1000 mm, new drilling pattern	**6ES7194-4GC60-0AA0**
SIMATIC DP, compact module rack for ET 200 PRO I/O modules Length 500 mm, new drilling pattern	**6ES7194-4GC70-0AA0**
SIMATIC DP, module rack compact, wide version for I/O modules and motor starter ET 200 PRO Length 500 mm	**6ES7194-4GD00-0AA0**
SIMATIC DP, module rack compact, wide version for I/O modules and motor starter ET 200 PRO Length 1000 mm	**6ES7194-4GD10-0AA0**
SIMATIC DP, module rack compact wide version for I/O modules and motor starter ET 200 PRO Sold by the meter for self-configuration, length 2000 mm	**6ES7194-4GD20-0AA0**

Overview

- 2-channel counter module for ET 200pro, incl. bus module
- For the connection of 24 V incremental encoders to ET 200pro
- For counting tasks with incremental encoders or incremental position encoder with 24 V signals
- 24 V encoder supply, short-circuit-proof
- Parameterizable input filters for suppressing interferences at encoder inputs
- 25-bit counting width
- Width 45 mm

Selection and ordering data

SIMATIC DP, electronic module For ET 200pro EM 2 Count 24V Counter module for 2 24 V incremental encoders, Incl. bus module; ET 200pro Count 2 x M12 CM connection module, 6ES7194-4CC10-0AA0, order separately	**6ES7147-4AB00-0AA0**
Accessories	
SIMATIC DP, COUNT 2 x M12 CM connection module For technology module ET 200pro EM 2 Count 24V	**6ES7194-4CC10-0AA0**
AS-Interface accessory M12 cover For IP67 modules, 15 mm outer diameter, with O-ring	**3RK1901-1KA00**
AS-Interface accessory M12 cover For IP67 modules, tamper-proof version, 15 mm outer diameter, with O-ring	**3RK1901-1KA01**

Overview

- 45 mm wide 4 IO-Link HF electronic module
- 4 IO-Link ports according to IO-Link specification V1.1
- Port Class B
- The IO-Link parameters are configured using the Port Configuration Tool (S7-PCT), version V3.4 and higher

Selection and ordering data

4 IO-Link HF electronic module 4 IO-Link ports according to IO-Link specification V1.1, port Class B; High Feature, channel-specific diagnostics, including bus module. Connection module must be ordered separately	**6ES7147-4JD00-0AB0**
Accessories	
CM IO-Link 4 x M12 P connection module 4 M12 sockets for connecting IO-Link devices to ET 200pro electronic module 4 IO-Link HF	**6ES7194-4CA20-0AA0**
Module identification labels For color coding of the CM IOs in the colors of white, red, blue and green; pack with 100 units each	**6ES7194-4HA00-0AA0**
M12 sealing cap For protection of unused M12 connections with ET 200pro	**3RX9802-0AA00**

Overview

Fail-safe digital inputs/outputs with degree of protection IP65/66/67 for cabinet-free application on the machine level.

Fail-safe digital inputs

- For fail-safe reading of sensor information (1 or 2 channels)
- Provide integral discrepancy evaluation for 2-out-of-2 signals
- Internal sensor supplies (incl. test function) available

Fail-safe digital outputs

- Fail-safe 2-channel activation (sinking/sourcing output) by actuators
- Actuators can be controlled up to 2 A

All modules are certified up to SIL 3 (IEC 61508) and feature detailed diagnostics.

The modules support PROFIsafe in both PROFIBUS and PROFINET configurations. They can be used with IM151-7 F-CPU, CPU31xF-2 DP, CPU31xF-2 PN/DP and CPU416F-2.

Selection and ordering data

8/16 F-DI PROFIsafe fail-safe digital input module 24 V DC, including bus module. Terminal module must be ordered separately	**6ES7148-4FA00-0AB0**
Fail-safe digital input/output module 4/8 F-DI, 4 F-DO 2 A 24 V DC, including bus module. Terminal module must be ordered separately	**6ES7148-4FC00-0AB0**
Fail-safe electronic module F-Switch PROFIsafe Three fail-safe outputs switching to PP potential for safe switching of the rear panel busbar (2L+, F0, F1); two fail-safe digital inputs, 45 mm; usable up to SIL3 (IEC 61508)	**6ES7148-4FS00-0AB0**
Accessories	
Terminal module For the fail-safe electronic module F-Switch PROFIsafe	**6ES7194-4DA00-0AA0**
Terminal module For the fail-safe electronic module 4/8 F-DI/4 F-DO, 24 V DC/2 A	**6ES7194-4DC00-0AA0**
Terminal module For the fail-safe electronic module 8/16 F-DI, 24 V DC	**6ES7194-4DD00-0AA0**
PROFIBUS DP IM154-2 interface module Including termination module	**6ES7154-2AA01-0AB0**
PROFINET IM154-4 PN interface module Including termination module	**6ES7154-4AB10-0AB0**
M12 sealing cap For protection of unused M12 connections with ET 200pro	**3RX9802-0AA00**

Overview

• PM-E DC 24 V power module

Selection and ordering data

PM-E DC 24 V power module For backfeed and group formation of the 24 V DC load voltage for electronic modules within an ET 200pro station.	**6ES7148-4CA00-0AA0**
Accessories	
CM PM-E ECOFAST connection module For backfeed of 24 V load voltage, 1 ECOFAST Cu connection	**6ES7194-4BA00-0AA0**
CM PM-E direct connection module For backfeed of 24 V load voltage, up to 2 M20 screwed cable glands	**6ES7194-4BC00-0AA0**
CM PM-E 7/8" connection module For backfeed of 24 V load voltage, 1 x 7/8"	**6ES7194-4BD00-0AA0**
CM PM-E PP connection module For supplying 24 V load voltage, 2 x push-pull, with spare fuse	**6ES7194-4BE00-0AA0**
PM-E M12-L connection module For backfeed of 24 V load voltage, 1x M12-L	**6ES7194-4BL00-0AA0**
Spare fuse 12.5 A quick-response, for interface and power modules, 10 items per package unit	**6ES7194-4HB00-0AA0**
PROFIBUS ECOFAST hybrid cable, copper Trailable cable (PUR sheath), with two shielded Cu wires for PROFIBUS DP plus four Cu wires of 1.5 mm^2, sold by the meter, minimum order quantity 20 m, maximum order quantity 1 000 m Preassembled with ECOFAST plug and socket, fixed length	**6XV1830-7AH10**
• 1.5 m	**6XV1830-7BH15**
• 3 m	**6XV1830-7BH30**
• 5 m	**6XV1830-7BH50**
• 10 m	**6XV1830-7BN10**
• 15 m	**6XV1830-7BN15**
• 20 m	**6XV1830-7BN20**
PROFIBUS ECOFAST hybrid cable GP Trailable cable with 4 x copper cores and 2 x copper cores, shielded, with UL approval Preassembled with ECOFAST plug and socket	
• 1.5 m	**6XV1860-3PH15**
• 3 m	**6XV1860-3PH30**
• 5 m	**6XV1860-3PH50**
• 10 m	**6XV1860-3PN10**
• 15 m	**6XV1860-3PN15**
• 20 m	**6XV1860-3PN20**
ECOFAST connection plug, for user assembly Socket; ordering unit 5 items	**6GK1905-0CB00**
PROFIBUS ECOFAST hybrid plug, angled With 2 x shielded copper cores and 4 x 1.5 mm2 copper cores; 5 items; with assembly instructions; socket insert	**6GK1905-0CD00**
Push-pull connection plug For 1L+/ 2L+, unassembled	**6GK1907-0AB11-6AA0**
Cover caps for push-pull sockets 5 units	**6ES7194-4JA50-0AA0**
Accessories for CM PM-E direct

Overview

The SIMATIC RF170C is a communications module for connecting the SIMATIC identification systems to the ET 200pro distributed I/O system. The readers of all RFID systems as well as the MV400 optical readers and MV300 optical handheld readers can be operated on the RF170C. In addition, the RF170C provides a universal RS232/ RS422 interface for connecting devices using the Freeport protocol.

Thanks to the high degree of protection and ruggedness, ET 200pro is particularly suitable for machine-level use. The modular structure with PROFIBUS and PROFINET connection systems allows it to be used in all applications. The uniform plug-in connection system ensures rapid commissioning.

Overview

Power supply for ET200pro:

• 3-phase, 24 V DC/8 A

The SIMATIC ET200pro PS power supply unit with IP67 degree of protection is used as the electronics/encoder supply and load voltage supply of the new SIMATIC ET 200pro distributed I/O system for use close to the machine without a cabinet. With a second connector for looping the input voltage.

Product highlights

• 3-phase, 24 V DC/8 A

• Wide-range input, input voltage 340 ... 550 V

• Up to 88% efficiency

• With signaling contact for "24 V OK" and "Overtemperature"

• Status indicator on the device by means of LED (green = "24 V OK")

• Temperature range from -25 °C to +55 °C

Selection and ordering data

SIMATIC ET 200pro PS Stabilized power supply in distributed I/O system design, permitting the loop-through of energy to further modules; with degree of protection IP67; Input: 400-480 V 3 AC Output: 24 V DC/8 A	**6ES7148-4PC00-0HA0**

Overview

ET 200pro motor starters in I/O system ET 200pro

SIMATIC ET 200pro is the modular I/O system with high degree of protection IP65/IP66/IP67 for local, cabinet-free use. The ET 200pro motor starters with the high degree of protection IP65 are an integral part of ET 200pro.

ET 200pro motor starter: Isolator module, Standard starter and High Feature starter mounted on a wide module rack

More information

Homepage, **see** www.siemens.com/sirius-motor-starter-et200pro

SiePortal, **see** www.siemens.com/product_catalog_siep?ET200pro

Decision support for motor start - Starting and operating three-phase asynchronous motors efficiently, **see** www.siemens.com/motorstart-guide

Catalog IC 10, **see** www.siemens.com/ic10

Further components in the ET 200pro distributed I/O system:
- Interface modules, central processing units, I/O modules, ET 200pro PS, see Catalog ST 70
- ET 200pro FC-2 frequency converters, see Catalog D 31.2

ET 200pro motor starters

- Only two versions up to 5.5 kW
- All settings can be configured via bus
- Comprehensive diagnostic messages
- Support for PROFIenergy
- Overload can be acknowledged by remote RESET
- Current asymmetry monitoring
- Stall protection
- EMERGENCY-START function on overload
- Current value transmission by bus
- Current limit monitoring
- Full support of acyclic services
- Direct-on-line or reversing starters
- Power bus connection can be plugged in using the new Han Q4/2 plug-in connectors
- Motor feeder with Han Q8/0 connector
- Conductor cross-sections up to 6 x 4 mm²
- 25 A per segment (power looped through using jumper plug)
- In the Standard and High Feature versions (with 4 DI on-board)
- Electromechanical switching and electronic switching
- Electronic direct-on-line starter or with integrated soft starter function
- Optionally available with 400 V AC brake contact
- Temperature sensor can be connected (Thermoclick or PTC type A)
- Provision of the motor current in PROFIenergy format to higher-level systems, motor current shutdown in dead times using PROFIenergy

ET 200pro isolator modules

The isolator module with switch disconnector function is used for safe disconnection of the 400 V operational voltage during repair work in the plant and provides an integrated group fusing function (i.e. additional group short-circuit protection for all subsequently supplied motor starters).

Depending on the power distribution concept, all stations can be equipped with an isolator module as an option.

Safety applications

PROFIsafe Safety Solution

With the PROFIsafe Safety modules

- F-Switch and
- 400 V disconnecting module

with an appropriate connection, safety levels SIL 3 (according to IEC 62061) or PL e (according to ISO 13849-1) can also be reached.

Functionality

With the ET 200pro motor starters, any three-phase loads can be protected and switched.

The ET 200pro motor starters are available with mechanical as well as electronic contacts.

The ET 200pro electromechanical starters are offered as direct-on-line starters (DSe) and reversing starters (RSe) in **Standard** and **High Feature** versions. There are device versions with or without control for externally supplied brakes with 400 V AC.

Compared with the Standard motor starters, the **High Feature, mechanical** motor starter also has:

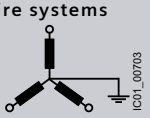
- Four digital inputs
- Advanced parameterization options

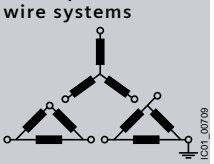
The ET 200pro electronic starters are offered as direct-on-line starters (sDSSte/sDSte) and reversing starters (sRSSte/sRSte) in the High Feature version.

Compared with the High Feature mechanical motor starters, the **High Feature electronic** motor starter also has:

- Soft starting and smooth ramp-down function
- Deactivated soft start function as an electronic starter for applications with a high switching frequency
- Advanced parameterization options

As a result of the protection concept with solid-state overload evaluation and the use of SIRIUS switching devices, size S00, additional advantages are realized on the Standard and High Feature motor starters – advantages that soon make themselves positively felt particularly in manufacturing processes with high plant stoppage costs:





© Siemens AG 2026

Overview (continued)

- Plant configuration is made easier and flexibility is increased by the fine modular structure with ET 200pro. When using the ET 200pro motor starters, the bill of materials per load feeder is reduced to two main items: the bus module and the motor starter. This makes the ET 200pro ideal for modular machine concepts or solutions for conveyor systems and in machine-tool construction.
- Expansions are easily possible through the subsequent adding of modules. The innovative plug-in technology also does away with the wiring needed up to now. Through the hot swapping function (disconnection and connection during operation), a motor starter can be replaced within seconds if necessary, without having to shut down the ET 200pro station and with it the process in the plant. The motor starters are therefore recommendable in particular for applications with special demands on availability. Storage costs are also optimized by the low level of variance (two units up to 5.5 kW).
- With four locally acting inputs available on the High Feature motor starter, autonomous special functions can be implemented that operate independently of the bus and the higher-level control system, e.g. as a quick stop on slide valve controls or end position disconnections. In parallel with this, the states of these inputs are signaled to the control system.

Voltage data

The data for 3-phase systems according to IEC 60947-4-1 are valid for the following line system configurations:

Voltage U_e	Line system configurations	
	Three-phase four-wire systems 	Three-phase three-wire systems 
V	V	V
230	--	230
400	230/400	400
440	260/440	440
500	--	500

Benefits

ET 200pro motor starters provide the following advantages:

- High flexibility thanks to a modular and compact design
- Little variance among all motor starter versions (two units up to 5.5 kW)
- Extensive parameterization using STEP 7 HW-Config
- Increase of plant availability through fast replacement of units (easy mounting and plug-in technology)
- Extensive diagnostics and information for preventive maintenance
- Parameterizable inputs for on-site control functions (High Feature)
- Cabinet-free construction thanks to high degree of protection IP65

Application

The SIMATIC ET 200pro motor starters are ideal for the use of several spatially concentrated distributed drive solutions in which several motors, or digital or analog sensors and actuators are addressed from a distributed station. They are perfectly suited for protecting and switching any AC loads.

Application areas

The SIMATIC ET 200pro motor starters are suitable for numerous sectors of industry, e.g. machinery and plant engineering or conveying applications.

1) Only functions when used together with the backplane bus module and the wide module rack. The backplane bus module and the wide module rack must be ordered separately (see Accessories for ET 200pro motor starters)

2) The electronic motor starters can be used not only as electronic motor starters with a high level of switching frequency but also as full-fledged soft starters for soft starting and stopping. The changeover from motor starter to soft starter takes place through reparameterization in HW Config.
Depending on the setting, this results in the following current ranges:
- Parameterization as electronic motor starter: 0.15 to 2 A and 1.5 to 9 A (4 kW).
- Parameterization as soft starter: 0.15 to 2 A and 1.5 to 12 A (5.5 kW).

Overview

The isolator module with integrated group fusing function (i.e. additional group short-circuit protection for all subsequently supplied motor starters) and switch disconnector function is used for safe disconnection of the 400 V operational voltage during repair work in the plant.

Depending on the power distribution concept, all stations can be equipped with an isolator module as an option.

The following properties apply to the isolator module:

- Increase of plant availability through fast replacement of units (easy mounting and plug-in technology)
- Cabinet-free design thanks to high degree of protection IP65

Overview

PROFIsafe Safety Solution

With the PROFIsafe Safety modules

- F-Switch and
- 400 V disconnecting module

with an appropriate connection, safety levels SIL 3 (according to IEC 62061) or PL e (according to ISO 13849-1) can be achieved.

PROFIsafe F-Switch

Fail-safe digital inputs/outputs in degrees of protection IP65 to IP67 for cabinet-free use near the machine.

Fail-safe digital inputs

- For the fail-safe reading in of sensor information (1-/2-channel)
- Including integrated discrepancy evaluation for 2v2 signals
- Internal sensor supplies (including testing) available

Fail-safe digital outputs

- Three fail-safe PP-switching outputs for safe switching of the backplane busbars

The F-Switch is certified up to SIL 3/PL e and has detailed diagnostics.

It supports PROFIsafe in PROFIBUS configurations as well as in PROFINET configurations.

Note:

Safety characteristics, see https://support.industry.siemens.com/cs/ww/en/view/109739348

Functionality

The PROFIsafe F-Switch is a fail-safe electronic module for PROFIsafe Safety applications. It has two fail-safe inputs and outputs for safe switching of the 24 V supply over backplane busbars. In combination with the 400 V disconnecting module, fail-safe shutdown of ET 200pro motor starters is possible in PROFIsafe applications up to SIL 3/PL e.

400 V disconnecting module

The 400 V disconnecting module enables the safe disconnection of an operational voltage of 400 V up to SIL 3/PL e. For operation in a PROFIsafe Safety application it functions only in combination with the F-Switch.

Functionality

The 400 V disconnecting module can be used together with the F-Switch for PROFIsafe Safety applications. It contains two contactors connected in series for safety-related disconnection of the main circuit. The auxiliary circuit supply of the device is provided via a safety power rail in the backplane bus module. The 400 V disconnecting module can be used in conjunction with the F-Switch for safety applications up to SIL 3/PL e.

1 Power feeder plug
2 Power connection plug
3 Power jumper plug
4 Motor connection plug
5 Motor plug
6 Motor plug with EMC suppressor circuit
7 Power loop-through plug

Basic design of an ET 200pro version with (from the left) connection module for IM, interface module for communication (IM), RSM isolator module, two ET 200pro motor starters (MS), and connections for energy

8 Power connection cable
10 Motor cable

Infeed on the ET 200pro motor starter

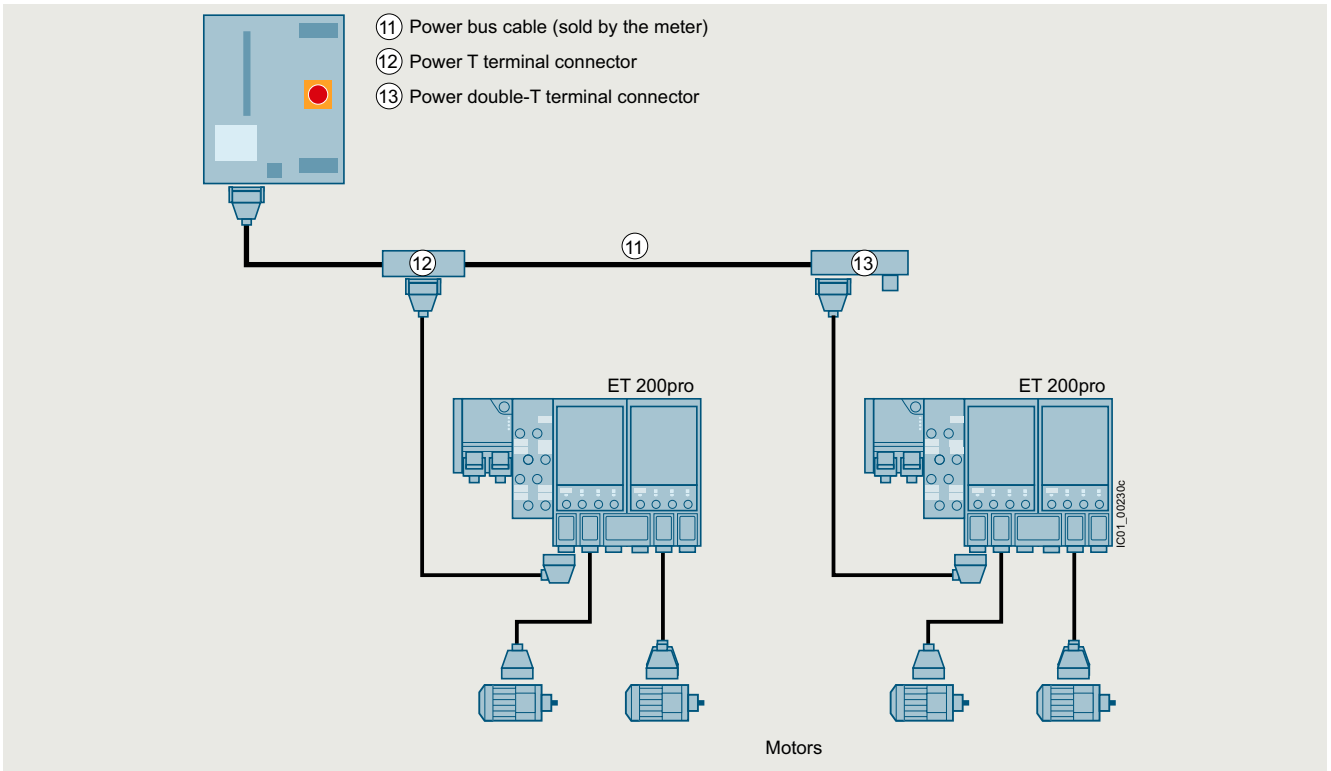
9 Power connection cable for isolator module

Infeed on the RSM isolator module

Power bus

The power supply to the field devices (ET 200pro motor starters) is provided via the power bus, in which the power T terminal connectors or power double-T terminal connectors are connected by power bus cables.

Feeders



From the terminal connectors, spur lines with Han Q4/2 plugs lead to the field devices, from which the motors are supplied with power via motor connection cables.

© Siemens AG 2026

Overview (continued)

Interruption-free thanks to power terminal connectors

In finger-safe connection technology the power T terminal connectors and power double-T terminal connectors connect the components of a feeder to the power bus. They ensure interruption-free operation, i.e. the power bus is not interrupted when the components are unplugged.

Power supply to the motors via the power bus with power T and double-T terminal connectors linked by power bus cables, spur lines to the field devices (motor starters), and power loop-through connections to the motors via motor connection cables

Motor control via PROFIBUS

The interface modules (IM) for PROFIBUS can be combined with two different connection modules for connecting PROFIBUS DP and the power supply:

- Direct connection with cable gland
- M12, 7/8" connection
  - with M12 connecting cable and M12 plugs for data transmission with PROFIBUS DP
  - with 7/8" connecting cable and 7/8" plugs for the power supply

For connection modules with the relevant accessories, see IM 154-1 and IM 154-2 interface modules.

Motor control via PROFINET

For connection modules with the relevant accessories, see IM 154-3 PN and IM 154-4 PN interface modules.

Overview

SIMATIC ET 200pro FC-2 frequency converter

The SIMATIC ET 200pro FC-2 frequency converter has the design of a SIMATIC ET 200pro module. It supplements the SIMATIC ET 200pro system range with distributed, speed-controlled drives. It is suitable for the open-loop and closed-loop control of asynchronous (induction) motors in a wide range of industrial applications. It is predestined for conveyor technology applications using drives networked via PROFIBUS and PROFINET, in particular in distributed designs without control cabinet with high degree of protection (IP65), when combining several drives. The modular, service-friendly concept is ideally suited to manufacturing processes with high plant standstill costs.

Reasons for using distributed drive systems

- Modular drive solutions – therefore standardized mechatronic elements that can be individually tested
- A control cabinet is not required, resulting in a smaller space requirement and lower cooling requirements
- Long motor cables between converter and motor are not required
  - Less power losses
  - Reduced noise radiation
  - Reduced costs for shielded cables
  - No additional filters
- Distributed configurations offer considerable benefits for conveyor systems with their extensive coverage (e.g. in the automotive and logistics sectors)

Siemens family of distributed drives

Siemens offers an innovative portfolio of frequency converters to optimally implement distributed drive solutions. The strengths of the individual members of the drive family permit simple adaptation to the widest range of application demands:

- Identical connection systems
- User-friendly commissioning and configuration tools

Products from the family of distributed drives:

- SINAMICS G115D distributed converters
- SINAMICS G120D frequency converters
- SIMATIC ET 200pro FC-2 frequency converters
- SIRIUS M200D motor starters

Overview (continued)

Safety Integrated

The distributed SIMATIC ET 200pro FC-2 frequency converters are already equipped with the integrated STO (Safe Torque Off) safety function, certified in accordance with IEC 61508 SIL 2 as well as ISO 13849-1 PL d and Category 3. It can be activated locally via the F-RSM or by means of PROFIsafe.

STARTER commissioning tool

The STARTER commissioning tool (V4.4 and higher) plus the corresponding SINAMICS Support Package (SSP) supports the commissioning and maintenance of SIMATIC ET 200pro FC-2 frequency converters.

The operator guidance combined with comprehensive, user-friendly functions for the relevant drive solution allow you to commission the device quickly and easily.

Engineering Framework STEP7 classic (V5.5 and higher)

Hardware Support Packages (HSP) are available to integrate SIMATIC ET 200pro FC-2 in STEP7 classic.

Engineering Framework TIA Portal (as from V13 SP1)

TIA Portal is a powerful engineering framework providing full access to the whole digitized automation.

Hardware Support Packages (HSP) are available to integrate SIMATIC ET 200pro FC-2 in TIA Portal.

Accessories

IOP-2 Handheld Intelligent Operator Panel

IOP-2 Handheld for mobile use

The IOP-2 Handheld Intelligent Operator Panel is a very user-friendly and powerful operator panel for commissioning and diagnostics as well as local operator control and monitoring of SINAMICS G120D and SIMATIC ET 200pro FC-2 distributed converters.

The IOP-2 Handheld supports both newcomers and drive experts. Thanks to the membrane keyboard with a central sensor control field, the high-contrast color displays, the menu-based operation and the application wizards, it is easy to commission standard drives. A drive can be essentially commissioned without having to use a printed parameter list – as the parameters are displayed in plain text, and explanatory help texts and a parameter filtering function are provided.

Application wizards interactively guide you when commissioning important applications such as conveyor technology, pumps, fans and compressors. There is a basic commissioning wizard for general commissioning.

Up to two process values can be graphically visualized and up to four process values can be numerically visualized on the status screen/display. Process values can also be displayed in technological units.

The IOP-2 Handheld supports series commissioning of identical drives. For this purpose, a parameter list can be copied from a frequency converter into the IOP-2 Handheld and downloaded into other drive units of the same type as required.

In addition to the IOP-2, the IOP-2 Handheld includes a housing with rechargeable batteries, a charging unit, an RS232 connecting cable, and a USB cable. The charging unit is supplied with connector adapters for Europe, the US and UK. When the batteries are fully charged, the operating time is up to 10 hours.

To connect the IOP-2 Handheld to SINAMICS G120D and SIMATIC ET 200pro FC-2, the RS232 connecting cable with optical interface is required in addition.

Updating the IOP-2 Handheld

The IOP-2 Handheld can be updated and expanded using the integrated USB interface.

Data to support future drive systems can be transferred from the PC to the IOP-2 Handheld. Further, the USB interface allows user languages and wizards that will become available in the future to be subsequently downloaded and the firmware to be updated for the IOP-2 Handheld [1].

[1] Information on updates for the IOP-2 Handheld is available at https://support.industry.siemens.com/cs/document/67273266

Accessories (continued)

Description	Article No.
IOP-2 Handheld For use with SINAMICS G120 SINAMICS G120C SINAMICS G120P SINAMICS G120D SIMATIC ET 200pro FC-2 Included in the scope of delivery: • IOP-2 • Handheld housing • Rechargeable batteries (4 × AA) • Charging unit (international) • RS232 connecting cable 3 m (9.84 ft) long, can be used in combination with SINAMICS G120 SINAMICS G120C SINAMICS G120P • USB cable 1 m (3.28 ft) long	**6SL3255-0AA00-4HA1**
RS232 connecting cable 2.5 m (8.20 ft) long, with optical interface for connecting the IOP-2 Handheld to SINAMICS G120D SIMATIC ET 200pro FC-2	**3RK1922-2BP00**

	IOP-2 Handheld 6SL3255-0AA00-4HA1
Display	High-contrast color display, a variety of display options
• Resolution	320 × 240 pixels
Operator panel	Membrane keyboard with central sensor control field
Operating languages	English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Finnish, Russian, Czech, Polish, Turkish, Chinese Simplified
Ambient temperature	
• During transport and storage	-20 ... +55 °C (-4 ... +131 °F)
• During operation	0 ... 40 °C (32 ... 104 °F)
Humidity	Relative humidity < 95 %, non-condensing
Degree of protection	IP20
Dimensions (H × W × D)	195.04 × 70 × 37.58 mm (7.68 × 2.76 × 1.48 in)
Weight, approx.	0.724 kg (1.6 lb)
Compliance with standards	CE, UKCA, RCM, cULus, EAC, KC-REM-S49-SINAMICS

Memory cards

SINAMICS SD memory card

The parameter settings of the converter and the firmware can be stored on the optional SINAMICS SD memory card. When service is required, the data are automatically downloaded from the memory card in the converter and the system is ready for use again without further interventions.

© Siemens AG 2026

Accessories (continued)

- Parameter settings can be written from the memory card to the converter or saved from the converter to the memory card.
- Up to 100 parameter sets can be stored.
- The memory card supports series commissioning without the use of the Intelligent Operator Panel IOP-2 Handheld or the STARTER commissioning tool.
- If firmware is stored on the memory card and a Control Unit is installed, the firmware can be upgraded/downgraded during power-up [1)]

Note:

The memory card is optional, but it facilitates converter replacement.

1) You can find more information about firmware upgrades/downgrades on the internet at https://support.industry.siemens.com/cs/document/67364620

Technical specifications

Distributed frequency converter	SIMATIC ET 200pro FC-2
Selection features	
Integrated safety functions acc. to IEC 61508 SIL 2 and ISO 13849-1 PL d and Category 3	• Safe Torque Off (STO) • Control of the integrated safety function via the Safety Local isolator module F-RSM or via F-Switch PROFIsafe
Electrical specifications	
Line voltage	380 ... 480 V 3 AC ±10 %
Power	
• With an ambient temperature of 0 ... 55 °C (32 °F ... 131 °F)	1.1 kW
• With an ambient temperature of 0 ... 45 °C (32 °F ... 113 °F)	1.5 kW
Rated input current/output current	
• With an ambient temperature of 0 ... 55 °C (32 °F ... 131 °F)	2 A/3.5 A
• With an ambient temperature of 0 ... 45 °C (32 °F ... 113 °F)	2.5 A/3.9 A
Line frequency	47 ... 63 Hz
Overload capability	• Overload current 1.5 x rated output current (i.e. 150 % overload) for 60 s, cycle time 300 s • Overload current 2 x rated output current (i.e. 200 % overload) for 3 s, cycle time 300 s
Output frequency	0 ... 550 Hz
Pulse frequency	4 kHz (standard), 4 ... 16 kHz (in 2-kHz increments)
Standard SCCR (Short Circuit Current Rating)	10 kA
Skipped frequency range	1, parameterizable
Converter efficiency	95 ... 97 %
Interfaces	• Connection to PROFIBUS and PROFINET over the SIMATIC ET 200pro backplane bus • Mini USB interface for commissioning via PC (as from STARTER V4.4 plus SSP) • Optical interface for commissioning via the IOP-2 Handheld • Slot for an optional memory card (SD) for uploading or downloading parameter settings. Facilitates easy device replacement. • PTC, bimetal, KTY84, Pt1000 interface for motor temperature monitoring
Functions	
Open-loop/closed-loop control methods	• V/f control – linear ($M \sim n$) with/without flux current control (FCC), quadratic ($M \sim n^2$) or parameterizable • Vector control – sensorless • Closed-loop torque control
Operating functions	• Jogging • BICO technology • Automatic restart following interruptions in operation due to a power failure • Smooth connection of converter to rotating motor
Braking functions	• Integrated regenerative feedback functionality • Control of an electromagnetic holding brake Integrated brake control supplies DC power supply to the brake Line voltage: 380 V AC / 400 V AC / 440 V AC / 480 V AC Rectified brake voltage: 171 V DC / 180 V DC / 198 V DC / 216 V DC Recommended brake coil voltage for Siemens motors: 170 ... 200 V DC / 170 ... 200 V DC, 184 ... 218 V DC / 184 ... 218 V DC / 184 ... 218 V DC Disconnection on the DC side permits "fast" braking.
Protection functions	• Undervoltage • Overvoltage • Ground fault • Short-circuit • Stall protection • Thermal motor protection (I^2t or sensor) • Converter overtemperature • Motor blocking protection • Phase failure detection
Connectable motors	• Low-voltage asynchronous (induction) motors • Motor cable lengths: max. 15 m (49 ft) (shielded)
Mechanical specifications	
Degree of protection	IP65
Operating temperature	0 ... 55 °C (32 ... 131 °F)

Overview

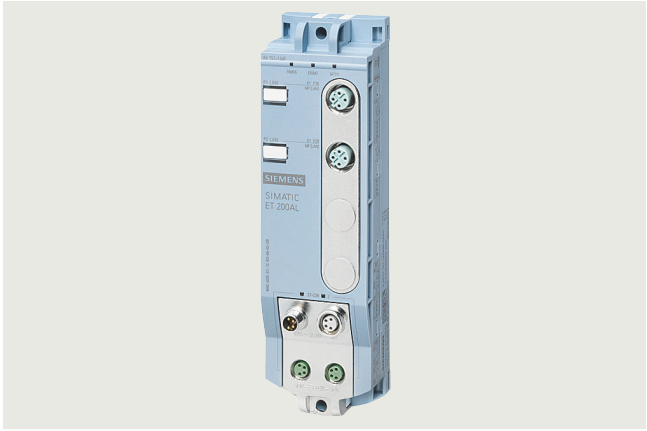
SIMATIC ET 200AL video

- Modular, distributed I/O system with compact I/O modules in IP65/67.
- Especially easy and flexible installation, even in extremely confined spaces.
- Easy wiring
- Easy commissioning
- SIMATIC ET 200AL consists of the following components:
  - Interface module for communication with IO controllers using the Ethernet-based protocols PROFINET, EtherNet/IP and Modbus TCP (MultiFieldbus).
  - Interface module for communication with IO controllers on PROFINET.
  - Interface module for communication with all masters on the PROFIBUS.
  - BusAdapter for connection to the ET 200SP I/O system.
  - Various I/O modules, 30 mm and 45 mm wide.
  - IO-Link I/O modules for connection to IO-Link Master
- Maximum configuration of an ET 200AL station:
  - Up to 32 I/O modules with PROFINET or PROFIBUS in any combination
  - Up to 16 I/O modules at the ET 200SP I/O system in any combination
- Connection of the modules via an internal backplane bus established using bus cables (ET connection).



Overview (continued)

Highlights

- Compact dimensions
- Low weight
- Safety-related collective shutdown of the outputs
- High degree of user-friendliness due to the following design features:
  - Flexible mounting in all positions possible due to screw fastening through the front or side
  - Direct installation on even surfaces or aluminum DIN rails
  - Labels for the identification of channels, modules and slots
  - Integrated cable tie opening
  - Clear and CAx-compliant interface designations
  - Uniform coloring of the system interfaces and system cables
  - 1:1 assignment of LED channel state, I/O socket and labeling strip
  - Pin assignment on the side
- I/O module portfolio comprising digital and analog modules, digital fail-safe module, IO-Link communications module and IO-Link I/O modules
- Range of ambient temperature from -30 °C/-25 °C to +55 °C
- Extensive system functions
  - All interface and I/O modules support firmware update
  - Configuration control (option handling) via user software
  - System support of PROFIenergy for energy savings purposes
  - Consistent use of identification and maintenance data IM0 to IM3/4 (electronic rating plate) for fast electronic and unambiguous identification of individual modules (Article No., serial number, etc.).

© Siemens AG 2026

Overview

- Multi-protocol capability:

Operation of the ET 200AL interface module on Ethernet controllers via the PROFINET, EtherNet/IP and Modbus TCP protocols

- Max. 32 I/O modules can be connected
- Max. data volume of 1440 bytes, for input and output data respectively (depends on protocol)
- Shortest bus cycle time 250 µs (depends on protocol)
- Automatic startup by means of topology discovery (depends on protocol)
- Shared device:

Simultaneous access from different controllers via different Ethernet protocols PROFINET, EtherNet/IP and Modbus TCP

- Local data links:

Deterministic, easy-to-configure data exchange between controllers, also via different Ethernet protocols PROFINET, EtherNet/IP and Modbus TCP

- S2 system redundancy
- Support for the MRP (media redundancy protocol) and MRPD (media redundancy with planned duplication) functions
- Identification and maintenance data IM0 ... IM4
- Autocrossover
- Firmware update
- Configuration management (option handling)
- PROFIenergy
- Security functions

Technical specifications

Article number	6ES7157-1MA00-0AB0 ET 200AL, IM 157-1 MF
General information	
Product type designation	IM 157-1 MF
Product function	
• I&M data	Yes; I&M0 to I&M4
• Isochronous mode	No
• IRT	Yes
Engineering with	
• STEP 7 TIA Portal configurable/integrated from version	STEP 7 V19 or higher
• STEP 7 configurable/integrated from version	from V5.6
• PROFINET from GSD version/GSD revision	GSDML V2.4.x
• Multi Fieldbus Configuration Tool (MFCT)	from V1.5
Supply voltage	
Load voltage 1L+	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction
Input current	
Current consumption (rated value)	80 mA
from load voltage 1L+ (unswitched voltage)	4 A; Maximum value
from load voltage 2L+, max.	4 A; Maximum value
Address area	
Address space per station	
• Address space per station, max.	1 440 byte
Hardware configuration	
Submodules	
• Number of submodules per station, max.	125
Interfaces	
Number of PROFINET interfaces	1; 2 ports (switch)
1. Interface	
Interface type	PROFINET
Interface types	
• M12 port	Yes; 2x M12 D-coded
• integrated switch	Yes
Protocols	
• PROFINET IO Device	Yes
• Open IE communication	Yes
PROFINET IO Device	
- Services	
- IRT	Yes
- Prioritized startup	Yes
- Shared device	Yes

Technical specifications (continued)

Article number	6ES7157-1MA00-0AB0 ET 200AL, IM 157-1 MF
Interface types	
M12 port	
• Transmission procedure	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
• 100 Mbps	Yes; PROFINET with 100 Mbit/s full duplex (100BASE-TX)
• Autonegotiation	Yes
• Autocrossing	Yes
Protocols	
Supports protocol for PROFINET IO	Yes
PROFIsafe	No
PROFIBUS	No
EtherNet/IP	Yes
Modbus TCP	Yes
PROFINET IO Device	
- Services	
- IRT	Yes; 250 µs, 500 µs, 1 ms, 2 ms, 4 ms, 8 ms, 16 ms, 32 ms, 64 ms, 128 ms
- PROFIenergy	Yes
- Shared device	Yes
- Number of IO Controllers with shared device, max.	14; 4x PN controller + 2x EtherNet/IP scanner + 10x Modbus TCP master
Redundancy mode	
• PROFINET system redundancy (S2)	Yes
• PROFINET system redundancy (R1)	No
• H-Sync forwarding	Yes
- Media redundancy	
- MRP	Yes
- MRPD	Yes
EtherNet/IP	
- Services	
- CIP Implicit Messaging	Yes
- CIP Explicit Messaging	Yes
- CIP Safety	No
- Configuration control via Explicit Messaging	No
- Shared device	Yes; 4x PN controller + 2x EtherNet/IP scanner + 10x Modbus TCP master
- Number of scanners with shared device, max.	2
- Updating times	
- Requested Packet Interval (RPI)	2 ms
- Redundancy mode	
- DLR (Device Level Ring)	No
- Address area	
- Address space per module, max.	264 byte
- ForwardOpen (Class1 & 32 bit Header)	500 byte
- LargeForwardOpen (Class3)	4 002 byte
Modbus TCP	
- Services	
- read coils (code=1)	Yes
- read discrete inputs (code=2)	Yes
- Read Holding Registers (Code=3)	Yes
- Read Input Register (Code=4)	Yes
- write single coil (code=5)	Yes
- Write Single Register (Code=6)	Yes
- write multiple coils (code=15)	Yes
- Write Multiple Registers (Code=16)	Yes
- Read/Write Multiple Registers (Code=23)	Yes
- Parameter change by master	Yes

Technical specifications (continued)

Article number	6ES7157-1MA00-0AB0 ET 200AL, IM 157-1 MF
- Modbus TCP Security Protocol	No
- Address space per station	
- Address space per station, max.	500 byte; (246 byte outputs / 500 byte inputs)
- Access-consistent address space	250 byte; (246 byte outputs / 250 byte inputs)
- Updating time	
- I/O request interval	2 ms
- Connections	
- number of connections per device	9; (1x inputs / 2x outputs / 4x volatile registers / 2x Device Info)
Open IE communication	
• TCP/IP	Yes
• SNMP	Yes
• LLDP	Yes
• ARP	Yes
Interrupts/diagnostics/status information	
Diagnostics function	Yes
Alarms	
• Diagnostic alarm	Yes
Diagnostics indication LED	
• RUN LED	Yes; green LED
• ERROR LED	Yes; red LED
• MAINT LED	Yes; Yellow LED
• NS LED	Yes; green/red LED
• MS LED	Yes; green/red LED
• IO LED	Yes; red/green/yellow LEDs
• Connection display LINK TX/RX	Yes; 2x green LED
Degree and class of protection	
IP degree of protection	IP65/67
Standards, approvals, certificates	
Suitable for safety-related tripping of standard modules	Yes; from FS01
Highest safety class achievable for safety-related tripping of standard modules	
• Performance level according to ISO 13849-1	PL d
• Category according to ISO 13849-1	Cat. 3
• SIL acc. to IEC 62061	SIL 2
Security	
PROFINET Security Class	1
signed firmware update	Yes
Secure Boot	Yes
safely removing data	Yes
data integrity	Yes
Ambient conditions	
Ambient temperature during operation	
• min.	-30 °C
• max.	55 °C
Altitude during operation relating to sea level	
• Ambient air temperature-barometric pressure-altitude	Up to max. 5 000 m, at installation height > 2 000 m additional restrictions
Connection method	
Design of electrical connection for supply voltage	M8, 4-pole
ET-Connection	
• ET-Connection	M8, 4-pin, shielded
Dimensions	
Width	45 mm
Height	159 mm
Depth	40 mm

Overview

- Interface module for connecting ET 200AL to PROFINET
- Handles data exchange with the PROFINET I/O controller in the PLC
- Max. 32 I/O modules can be connected
- Max. data volume of 1430 bytes, for input and output data respectively
- Shortest bus cycle time 250 µs
- Automatic startup by means of topology discovery
- Autocrossover
- Shared device on up to 4 I/O controllers
- Support for the MRP (media redundancy protocol) and MRPD (media redundancy with planned duplication) functions
- Identification and maintenance data IM0 ... IM4
- Firmware update
- Configuration management (option handling)
- PROFIenergy

Selection and ordering data

IM 157-1 PN interface module	**6ES7157-1AB00-0AB0**
For connecting ET 200AL to PROFINET	
Accessories	
Bus cable for backplane bus (ET connection)	
4-pin, shielded	
Pre-assembled at both ends, 2 M8 connectors	
0.19 m	**6ES7194-2LH02-0AA0**
0.3 m	**6ES7194-2LH03-0AA0**
1 m	**6ES7194-2LH10-0AA0**
2 m	**6ES7194-2LH20-0AA0**
5 m	**6ES7194-2LH50-0AA0**
10 m	**6ES7194-2LN10-0AA0**
15 m	**6ES7194-2LN15-0AA0**
Pre-assembled at both ends, 2 M8 connectors, angled	
0.3 m	**6ES7194-2LH03-0AB0**

Overview

- Interface module for connecting ET 200AL to PROFIBUS
- As DPV1 slave it handles the data exchange with the PROFIBUS master in the PLC
- Max. 32 I/O modules can be connected
- Max. data volume of 244 bytes, for input and output data respectively
- Automatic detection of baud rate 9.6 kBd ... 12 MBd
- PROFIBUS addresses 1 ... 99; can be set by means of rotary switch
- Identification and maintenance data IM0 ... IM3
- Firmware update
- Configuration management (option handling)

Technical specifications

Article number	6ES7141-5BF00-0BA0 ET 200AL, DI 8x24VDC, 8xM8	6ES7141-5AF00-0BA0 ET 200AL, DI 8x24VDC, 4xM12	6ES7141-5AH00-0BA0 ET 200AL, DI 16x24VDC, 8xM12
General information			
Product type designation	DI 8x24VDC	DI 8x24VDC	DI 16x24VDC
Product function			
• I&M data	Yes; I&M0 to I&M3	Yes; I&M0 to I&M3	Yes; I&M0 to I&M3
Engineering with			
• STEP 7 TIA Portal configurable/integrated from version	STEP 7 V13 SP1 or higher	STEP 7 V13 SP1 or higher	STEP 7 V13 SP1 or higher
• STEP 7 configurable/integrated from version	From V5.5 SP4 Hotfix 3	V5.5 SP4 Hotfix 7 or higher	V5.5 SP4 Hotfix 7 or higher
• PROFIBUS from GSD version/GSD revision	GSD as of Revision 5	GSD as of Revision 5	GSD as of Revision 5
• PROFINET from GSD version/GSD revision	GSDML V2.3.1	GSDML V2.3.1	GSDML V2.3.1
Supply voltage			
Load voltage 1L+			
• Rated value (DC)	24 V	24 V	24 V
• Reverse polarity protection	Yes; Against destruction; encoder power supply outputs applied with reversed polarity	Yes; Against destruction; encoder power supply outputs applied with reversed polarity	Yes; Against destruction; encoder power supply outputs applied with reversed polarity
Input current			
Current consumption (rated value)	25 mA; without load	25 mA; without load	30 mA; without load
from load voltage 1L+ (unswitched voltage)	4 A; Maximum value	4 A; Maximum value	4 A; Maximum value
from load voltage 2L+, max.	4 A; Maximum value	4 A; Maximum value	4 A; Maximum value
Encoder supply			
Number of outputs	8	4	8
Digital inputs			
Number of digital inputs	8	8	16
Sourcing/sinking input	P-reading	P-reading	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes	Yes	Yes
Number of simultaneously controllable inputs			
- all mounting positions			
- up to 55 °C, max.	8	8	16
Input voltage			
• Rated value (DC)	24 V	24 V	24 V
• for signal "0"	-30 to +5 V	-30 to +5 V	-30 to +5 V
• for signal "1"	+11 to +30V	+11 to +30V	+11 to +30V
Input current			
• for signal "1", typ.	3.2 mA	3.2 mA	3.2 mA
Encoder			
Connectable encoders			
• 2-wire sensor	Yes	Yes	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA	1.5 mA	1.5 mA
Interrupts/diagnostics/status information			
Alarms			
• Diagnostic alarm	Yes; Parameterizable	Yes; Parameterizable	Yes; Parameterizable
Diagnoses			
• short-circuit	Yes; Sensor supply to M; module by module	Yes; Sensor supply to M; module by module	Yes; Sensor supply to M; module by module
Diagnostics indication LED			
• Channel status display	Yes; green LED	Yes; green LED	Yes; green LED
• for module diagnostics	Yes; green/red LED	Yes; green/red LED	Yes; green/red LED
Potential separation			
between the load voltages	Yes	Yes	Yes
Potential separation channels			
• between the channels	No	No	No
• between the channels and backplane bus	Yes	Yes	Yes

• Reverse polarity protection	Yes; Against destruction; encoder power supply outputs applied with reversed polarity, loads pick up	Yes; Against destruction; encoder power supply outputs applied with reversed polarity, loads pick up	Yes; against destruction	Yes; Against destruction; encoder power supply outputs applied with reversed polarity, loads pick up
Load voltage 2L+				
• Rated value (DC)	24 V	24 V	24 V	24 V
• Reverse polarity protection	Yes; against destruction; load increasing	Yes; against destruction; load increasing	Yes; Against destruction; encoder power supply outputs applied with reversed polarity, loads pick up	Yes; Against destruction; encoder power supply outputs applied with reversed polarity, loads pick up
Input current				
Current consumption (rated value)	40 mA; 40 mA (1L+) / 20 mA (2L+); without load	40 mA; 40 mA (1L+) / 20 mA (2L+); without load	20 mA; 20 mA (1L+) / 40 mA (2L+); without load	60 mA; 60 mA (1L+) / 40 mA (2L+); without load
from load voltage 1L+ (unswitched voltage)	4 A; Maximum value	4 A; Maximum value	4 A; Maximum value	4 A; Maximum value
from load voltage 2L+, max.	4 A; Maximum value	4 A; Maximum value	4 A; Maximum value	4 A; Maximum value
Encoder supply				
Number of outputs	4	4	8	8
Digital inputs				
Number of digital inputs	4; Parameterizable as DIQ	4; Parameterizable as DIQ	8; Parameterizable as DIQ	16; Parameterizable as DIQ
Sourcing/sinking input	P-reading	P-reading	P-reading	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes	Yes	Yes	Yes
Number of simultaneously controllable inputs				
- all mounting positions				
- up to 55 °C, max.	4	4	8	16
Digital input functions, parameterizable				
• Freely usable digital input				Yes
• Counter				Yes
Input voltage				
• Rated value (DC)	24 V	24 V	24 V	24 V
• for signal "0"	-3 to +5V	-3 to +5V	-3 to +5V	-3 to +5V
• for signal "1"	+11 to +30V	+11 to +30V	+11 to +30V	+11 to +30V
Input current				
• for signal "1", typ.	3.2 mA	3.2 mA	2.4 mA	3 mA
Input delay (for rated value of input voltage)				
- for standard inputs				
- parameterizable				Yes
- for technological functions				
- parameterizable				Yes
Digital outputs				
Number of digital outputs	8; 4 DQ fixed, 4 DIQ parameterizable	8; 4 DQ fixed, 4 DIQ parameterizable	8	16; Parameterizable as DIQ
• in groups of	4; 2 load groups for 4 outputs each	4; 2 load groups for 4 outputs each		8; 2 load groups for 8 outputs each
Current-sourcing	Yes	Yes	Yes	Yes
output type acc. to IEC 61131, type 0.5	Yes	Yes	Yes	Yes
Short-circuit protection	Yes; per channel, electronic	Yes; per channel, electronic	Yes; per channel, electronic	Yes; per channel, electronic
Limitation of inductive shutdown voltage to	2L+ (-47 V)	2L+ (-47 V)	2L+ (-47 V)	L+ (-53 V)
Digital output functions, parameterizable				
• Switching tripped by comparison values				Yes
• Freely usable digital output				Yes
Switching capacity of the outputs				
• on lamp load, max.	5 W	5 W	5 W	5 W

Overview

- 30 mm wide module with parameters and diagnostic functions
- For connecting analog actuators and sensors without additional amplifiers
- 4-channel analog input modules with M12 connection
- 4-channel analog output module with M12 connection

Selection and ordering data

Analog input modules	
AI 4xU/I/RTD, 4XM12	**6ES7144-5KD00-0BA0**

Technical specifications

Article number	6ES7144-5KD00-0BA0 ET 200AL, AI 4xU/I/RTD, 4xM12	6ES7144-5KD50-0BA0 ET 200AL, AI 4xRTD/TC, 4xM12
General information		
Product type designation	AI 4xU/I/RTD	AI 4xRTD/TC
Product function		
• I&M data	Yes; I&M0 to I&M3	Yes; I&M0 to I&M3
Engineering with		
• STEP 7 TIA Portal configurable/integrated from version	STEP 7 V13 SP1 or higher	STEP 7 V16 or higher
• STEP 7 configurable/integrated from version	From V5.5 SP4 Hotfix 3	V5.5 SP4 and higher
• PROFIBUS from GSD version/GSD revision	GSD as of Revision 5	GSD as of Revision 5
• PROFINET from GSD version/GSD revision	GSDML V2.3.1	GSDML V2.34
Supply voltage		
Load voltage 1L+		
• Rated value (DC)	24 V	24 V
• Reverse polarity protection	Yes; against destruction	Yes; against destruction
Input current		
Current consumption (rated value)	35 mA; without load	30 mA; without load
from load voltage 1L+ (unswitched voltage)	4 A; Maximum value	4 A; Maximum value
from load voltage 2L+, max.	4 A; Maximum value	4 A; Maximum value
Encoder supply		
Number of outputs	4	
Analog inputs		
Number of analog inputs	4	4
Constant measurement current for resistance-type transmitter, typ.		230 ... 300 µA
Cycle time (all channels), min.	8 ms	90 ms
Technical unit for temperature measurement adjustable	Yes; Degrees Celsius / degrees Fahrenheit / Kelvin	Yes; Degrees Celsius / degrees Fahrenheit / Kelvin
Input ranges (rated values), voltages		
• 0 to +10 V	Yes	
• 1 V to 5 V	Yes	
• -80 mV to +80 mV		Yes; 16 bit incl. sign
Input ranges (rated values), currents		
• 0 to 20 mA	Yes	
• 4 mA to 20 mA	Yes	
Input ranges (rated values), thermocouples		
• type B		Yes; 16 bit incl. sign
• type C		Yes; 16 bit incl. sign
• Type E		Yes; 16 bit incl. sign
• Type J		Yes; 16 bit incl. sign
• Type K		Yes; 16 bit incl. sign
• Type L		Yes; 16 bit incl. sign
• Type N		Yes; 16 bit incl. sign
• Type R		Yes; 16 bit incl. sign
• Type S		Yes; 16 bit incl. sign
• Type T		Yes; 16 bit incl. sign
• Type U		Yes; 16 bit incl. sign
Input ranges (rated values), resistance thermometer		
• Ni 100	Yes; Standard/climate	Yes; Standard/climate
• Ni 1000		Yes; Standard/climate
• Pt 100	Yes; Standard/climate	Yes; Standard/climate
• Pt 1000		Yes; Standard/climate
Input ranges (rated values), resistors		
• 0 to 150 ohms	Yes	Yes
• 0 to 300 ohms	Yes	Yes
Thermocouple (TC)		
- Temperature compensation		
- Parameterizable		Yes

Technical specifications (continued)

Article number	6ES7144-5KD00-0BA0 ET 200AL, AI 4xU/I/RTD, 4xM12	6ES7144-5KD50-0BA0 ET 200AL, AI 4xRTD/TC, 4xM12
Cable length		
• shielded, max.	30 m	30 m
Analog value generation for the inputs		
Integration and conversion time/resolution per channel		
• Resolution with overrange (bit including sign), max.	16 bit	16 bit
• Integration time, parameterizable	Yes; channel by channel	Yes; channel by channel
• Integration time (ms)	0,3 / 16,7 / 20 / 60	16.7 / 20 / 60
• Basic conversion time, including integration time (ms)		18 / 21 / 61 ms
• Interference voltage suppression for interference frequency f1 in Hz	3 600 / 60 / 50 / 16.7	60 / 50 / 16.7
• Conversion time (per channel)	2 / 18 / 21 / 61 ms	
Smoothing of measured values		
• Parameterizable	Yes	Yes
Encoder		
Connection of signal encoders		
• for voltage measurement	Yes	
• for current measurement as 2-wire transducer	Yes	
• for current measurement as 4-wire transducer	Yes	
• for resistance measurement with two-wire connection	Yes	Yes
• for resistance measurement with three-wire connection	Yes	Yes
• for resistance measurement with four-wire connection		Yes
Errors/accuracies		
Temperature error of internal compensation		±4 °C
Basic error limit (operational limit at 25 °C)		
• Voltage, relative to input range, (+/-)	0.25 %	0.25 %
• Current, relative to input range, (+/-)	0.25 %	
• Resistance, relative to input range, (+/-)	0.15 %	0.15 %
• Resistance thermometer, relative to input range, (+/-)	0.15 %	0.15 %
• Thermocouple, relative to input range, (+/-)		0.25 %
Interference voltage suppression for f = n x (f1 +/- 0.5 %), f1 = interference frequency		
• Series mode interference (peak value of interference < rated value of input range), min.	40 dB	40 dB
Interrupts/diagnostics/status information		
Alarms		
• Diagnostic alarm	Yes; Parameterizable	Yes; Parameterizable
• Limit value alarm	Yes; Parameterizable	Yes; Parameterizable
Diagnoses		
• Wire break	Yes; at 4 mA to 20 mA and 1 V to 5 V	Yes; Not for ±80 mV
• short-circuit	Yes; Encoder supply to M, channel by channel	
• Overflow/Underflow	Yes	Yes
Diagnostics indication LED		
• Channel status display	Yes; green LED	Yes; green LED
• for module diagnostics	Yes; green/red LED	Yes; green/red LED
Potential separation		
between the load voltages	Yes	Yes
Potential separation channels		
• between the channels	No	No
• between the channels and backplane bus	Yes	Yes
• between the channels and the power supply of the electronics	No	No
Degree and class of protection		
IP degree of protection	IP65/67	IP65/67
Standards, approvals, certificates		
Suitable for safety-related tripping of standard modules	Yes; From FS02	Yes; from FS01

Overview

The ET 200AL fail-safe I/O module expands the ET 200AL PN system family. It is incorporated seamlessly into the Safety Integrated concept of SIMATIC. It also supports safety-related communication via PROFIsafe. The functional safety is certified in accordance with IEC 61508. It is designed for safety-related use up to SIL 3 according to IEC 62061 and PL e according to ISO 13849.
The following fail-safe I/O module with 4x digital inputs and 2x digital outputs with 45 mm width is available:

- F-DI 4+F-DQ 2x24VDC/2A, 4xM12 PROFIsafe

Selection and ordering data

Fail-safe digital input/output modules	
F-DI 4+F-DQ 2x24VDC/2A, 4xM12	**6ES7146-5FF00-0BA0**
Accessories	
M12 Y-cable	
For connection of single-channel sensors (1oo1 evaluation), 5-pin	**6ES7194-6KB00-0XA0**
For joint connection of an F-DQ and an F-DI channel by means of an 8-pin M12 socket	**6ES7194-6KC00-0XA0**
E-coding plug (metal) for fail-safe ET 200 distributed I/O, IP65/67	**6ES7194-6KB01-0AA0**
Bus cable for backplane bus (ET connection)	
4-pin, shielded	
Pre-assembled at both ends, 2 M8 plugs	
0.19 m	**6ES7194-2LH02-0AA0**
0.3 m	**6ES7194-2LH03-0AA0**
1 m	**6ES7194-2LH10-0AA0**
2 m	**6ES7194-2LH20-0AA0**
5 m	**6ES7194-2LH50-0AA0**
10 m	**6ES7194-2LN10-0AA0**
15 m	**6ES7194-2LN15-0AA0**
Pre-assembled at both ends, 2 M8 plugs, angled	
0.3 m	**6ES7194-2LH03-0AB0**
1 m	**6ES7194-2LH10-0AB0**
2 m	**6ES7194-2LH20-0AB0**

Technical specifications

Article number	6ES7146-5FF00-0BA0 ET 200AL, F-DI 4+F-DQ 2x24VDC/2A, 4xM12
General information	
Product type designation	F-DI 4+F-DQ 2x24VDC/2A, 4xM12
Product function	
• I&M data	Yes; I&M0 to I&M3
Engineering with	
• STEP 7 TIA Portal configurable/integrated from version	STEP 7 V17 or higher
Operating mode	
• DI	Yes
• DQ	Yes
Supply voltage	
Rated value (DC)	24 V
Load voltage 1L+	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction
Load voltage 2L+	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction; outputs applied with reversed polarity for loads connected between M-switch and 2L+ will conduct
Input current	
Current consumption (rated value)	55 mA (1L+) / 40 mA (2L+); without load
from load voltage 1L+ (unswitched voltage)	4 A; Maximum value
from load voltage 2L+, max.	4 A; Maximum value
Encoder supply	
Number of outputs	2
Digital inputs	
Number of digital inputs	4
Input characteristic according to IEC 61131	Type 1
Number of simultaneously controllable inputs	
- all mounting positions	
- up to 55 °C, max.	4
Input voltage	
• Rated value (DC)	24 V
• for signal "0"	-30 to +5 V
• for signal "1"	+15 to +30 V
Input current	
• for signal "1", typ.	4.85 mA
Input delay (for rated value of input voltage)	
- for standard inputs	
- Parameterizable	Yes
Digital outputs	
Number of digital outputs	2
• in groups of	2
Short-circuit protection	Yes; per channel, electronic
Open-circuit detection	Yes; per channel, only detects when output is off
Overload protection	Yes
Limitation of inductive shutdown voltage to	P-switch: -26 V DC referenced to 2M, M-switch: +48 V DC referenced to 2M
Switching capacity of the outputs	
• on lamp load, max.	10 W
Load resistance range	
• lower limit	12 Ω
• upper limit	2 kΩ
Output voltage	
• for signal "1", min.	L+ (-2.0 V), P-switch is L+ (-1.5 V), M-switch is 0.5 V
Output current	
• for signal "1" rated value	2 A

Article number	6ES7146-5FF00-0BA0 ET 200AL, F-DI 4+F-DQ 2x24VDC/2A, 4xM12
• for signal "0" residual current, max.	0.5 mA
Switching frequency	
• with resistive load, max.	30 Hz
• with inductive load, max.	0.1 Hz
• on lamp load, max.	10 Hz
Total current of the outputs	
• Current per group, max.	4 A
Encoder	
Connectable encoders	
• 2-wire sensor	No
- permissible quiescent current (2-wire sensor), max.	0.5 mA
Interrupts/diagnostics/status information	
Substitute values connectable	No
Alarms	
• Diagnostic alarm	Yes; Parameterizable
Diagnoses	
• Monitoring the supply voltage	Yes
• Wire break	Yes; outputs when off
• short-circuit	Yes; inputs, outputs, encoder supply
Diagnostics indication LED	
• Channel status display	Yes; green LED
• for channel diagnostics	Yes; red LED
• for module diagnostics	Yes; green/red LED
• For load voltage monitoring	Yes; green LED
Potential separation	
between the load voltages	Yes
Potential separation channels	
• between the channels, in groups of	4 DI channels are isolated from 2 DQ channels
• between the channels and backplane bus	Yes
• between the channels and the power supply of the electronics	DI channels are non-isolated from supply voltage 1L+ and DQ channels are isolated from the supply voltage 1L+
Degree and class of protection	
IP degree of protection	IP65/67
Standards, approvals, certificates	
Highest safety class achievable in safety mode	
• Performance level according to ISO 13849-1	PLd (DI single-channel), PLe (DI two-channel, DQ)
• SIL acc. to IEC 61508	SIL 2 (DI single-channel), SIL 3 (DI two-channel, DQ)
Ambient conditions	
Ambient temperature during operation	
• min.	-30 °C
• max.	55 °C
Connection method	
Design of electrical connection for the inputs and outputs	M12, 5-pole
Design of electrical connection for supply voltage	M8, 4-pin
ET-Connection

Overview

- 30 mm or 45 mm wide CM IO-Link communications modules
- For connecting up to 4 or 8 IO-Link devices according to IO-Link Specification V1.0 and V1.1 and port Class B, or port Class A and port Class B
- The IO-Link parameters are configured using the S7-PCT Port Configuration Tool, V3.5 SP4 Update 1 and higher.

Selection and ordering data

CM IO-Link	
CM 4X IO-Link, 4XM12; for the connection of up to 4 IO-Link devices according to IO-Link Specification V1.0 and V1.1 and port Class B	**6ES7147-5JD01-0BA0**
CM 8x IO-Link, 8x M12; for the connection of up to 8 IO-Link devices according to IO-Link Specification V1.0 and V1.1, 6x port Class A and 2x port Class B	**6ES7147-5JJ00-0BA0**
Accessories	
Bus cable for backplane bus (ET connection)

Overview

The IO-Link communication standard enables and standardizes communication between machine and plant PLCs, on the one hand, and sensors, actuators and other field devices, on the other hand.

The IO-Link I/O modules enable the simple connection of binary standard sensors and actuators, whereby the signals and energy supply are transferred via IO-Link (IO-Link master).

The IO-Link I/O modules can be connected to any IO-Link masters and, in this way, fieldbus-independent and distributed I/O units can be formed. The universal usage of the IO-Link DIQ I/O modules enables additional flexibility here.

With the ET 200AL IO-Link I/O modules, a comprehensive portfolio of digital input, output and input/output modules with the design and system features of the ET 200AL is available.

Selection and ordering data

IO-Link digital input modules	
Degree of protection IP67	
• DI 8x 24VDC, 8x M8	**6ES7141-5BF00-0BL0**
• DI 16x 24VDC, 8x M12	**6ES7141-5AH00-0BL0**
IO-Link digital output modules	
Degree of protection IP67	
• DQ 8x 24VDC/2A, 8x M12	**6ES7142-5AF00-0BL0**
IO-Link digital input/output modules	
Degree of protection IP67	
• DIQ 4+DQ 4x 24VDC/0.5A, 8x M8	**6ES7143-5BF00-0BL0**
• DIQ 16x24VDC/0.5A, 8x M12	**6ES7143-5AH00-0BL0**
Accessories	
Control connecting cable 5 x 0.25 Flexible IO-Link cable with 5 copper cores (0.25 mm²) for connecting IO-Link sensors/actuators (IO-Link port class B); sold by the meter; max. delivery unit 1 000 m minimum order quantity 20 m	**6XV1801-2C**
M12 circular connector Can be assembled, for connecting actuators or sensors, 5-pin, screw terminal, max. 0.75 mm2, A-coded, max. 4 A	
• Straight	**3RK1902-4BA00-5AA0**
• Angled	**3RK1902-4DA00-5AA0**
Control line Preassembled on one side with 1 x M12 plug angled, 5-pin, 5 x 0.34 mm2, A-coded, max. 4 A, PUR casing, black	
• 1.5 m	**3RK1902-4HB15-5AA0**
• 5 m	**3RK1902-4HB50-5AA0**
• 10 m	**3RK1902-4HC01-5AA0**
M12-180/M12-180 control connecting cable Flexible 5-core cable, preassembled with A-coded, 5-pin M12 plug and A-coded, 5-pin M12 socket, both ends with a straight cable outlet, for connection of IO-Link sensors/actuators	
• 0.5 m	**6XV1801-2CE50**
• 1.0 m	**6XV1801-2CH10**
• 1.5 m	**6XV1801-2CH15**
• 2.0 m	**6XV1801-2CH20**
• 3.0 m	**6XV1801-2CH30**
• 5.0 m	**6XV1801-2CH50**
• 10 m	**6XV1801-2CN10**
• 15 m	**6XV1801-2CN15**
Power M12 cable connector PRO Connection socket for 24 V DC supply voltage, 4-pin, L-coded, with installation instructions, 1 unit	**6GK1906-0EB00**
M12 sealing cap For protection of unused M12 connections with ET 200pro	**3RX9802-0AA00**
M12 sealing cap for IP67 modules 15 mm outer diameter, with O-ring, 10 units	**3RK1901-1KA00**
M8 sealing cap For IP67 modules	**3RK1901-1PN00**
M12 Y-cable For double connection of I/O by means of a single cable to ET 200, 5-pin	**6ES7194-6KA00-0XA0**

Selection and ordering data (continued)

Energy cable 4 x 1.5 Trailable power cable, with 4 copper cores (1.5 mm2) for connecting to M12 plug-in connector; sold by the meter; max. delivery unit 1000 m, minimum order quantity 20 m	**6XV1801-2B**
M12-180/M12-180 **M12 power connecting cable** Flexible 4-core power connecting cable, preassembled with L-coded, 4-pin M12 plug and L-coded, 4-pin M12 socket to supply terminal devices with 24 V DC Length:	
• 0.5 m	**6XV1801-6DE50**
• 1.0 m	**6XV1801-6DH10**
• 1.5 m	**6XV1801-6DH15**
• 2.0 m	**6XV1801-6DH20**
• 3.0 m	**6XV1801-6DH30**
• 5.0 m	**6XV1801-6DH50**
• 10 m	**6XV1801-6DN10**
• 15 m	**6XV1801-6DN15**
M12-90/M12-90 **M12 power connecting cable** Flexible 4-core power connecting cable, preassembled with L-coded, 4-pin M12 plug and L-coded, 4-pin M12 socket, both sides angled 90°, to supply terminal devices with 24 V DC Length:	
• 0.5 m	**6XV1801-6GE50**
• 1.0 m	**6XV1801-6GH10**
• 1.5 m	**6XV1801-6GH15**
• 2.0 m	**6XV1801-6GH20**
• 3.0 m	**6XV1801-6GH30**
• 5.0 m	**6XV1801-6GH50**
• 10 m	**6XV1801-6GN10**
• 15 m	**6XV1801-6GN15**
Labels 10 x 5 mm, RAL 9016; 5 frames with 40 labels each	**6ES7194-2BA00-0AA0**

General information		
Product type designation	IO-Link DI 8x24VDC	IO-Link DI 16x24VDC
Engineering with		
• IODD file	Yes	Yes
Supply voltage		
Load voltage 1L+		
• Rated value (DC)	24 V; Supply from 1Us+ of the IO-Link master	24 V; Supply from 1Us+ of the IO-Link master
• Reverse polarity protection	Yes; Against destruction; encoder power supply outputs applied with reversed polarity	Yes; Against destruction; encoder power supply outputs applied with reversed polarity
Input current		
Current consumption (rated value)	15 mA; without load	20 mA; without load
Encoder supply		
Number of outputs	8; Supply from 1Us+ of the IO-Link master	8; Supply from 1Us+ of the IO-Link master
Digital inputs		
Number of digital inputs	8	16
Sourcing/sinking input	P-reading	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes	Yes
Number of simultaneously controllable inputs		
- all mounting positions		
- up to 55 °C, max.	8	16
Input voltage		
• Rated value (DC)	24 V	24 V
• for signal "0"	-30 to +5 V	-30 to +5 V
• for signal "1"	+11 to +30V	+11 to +30V
Input current		
• for signal "1", typ.	3 mA	3 mA
Encoder		
Connectable encoders		
• 2-wire sensor	Yes	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA	1.5 mA
IO-Link		
IO-Link protocol 1.1	Yes	Yes
Transmission rate	38.4 kBd (COM2)	38.4 kBd (COM2)
Cycle time, min.	2.1 ms	2.5 ms
Size of process data, input per module	1 byte	2 byte
Size of process data, output per module	0 byte	0 byte
Supported IO-Link profiles	common profile	common profile
Cable length unshielded, max.	20 m	20 m
Connection of IO-Link devices		
• Port type A	Yes	Yes
Interrupts/diagnostics/status information		
Alarms		
• Diagnostic alarm	Yes; Parameterizable	Yes; Parameterizable
Diagnoses		
• short-circuit	Yes; Sensor supply to M; module by module	Yes; Sensor supply to M; module by module
Diagnostics indication LED		
• Channel status display	Yes; green LED	Yes; green LED
• for module diagnostics	Yes; green/red LED	Yes; green/red LED
Potential separation		
Potential separation channels		
• between the channels	No	No
• between the channels and the power supply of the electronics	No	No
Degree and class of protection		
IP degree of protection	IP65/67	IP65/67

Supply voltage		
Load voltage 1L+		
• Rated value (DC)	24 V; Supply from 1Us+ of the IO-Link master	24 V; Supply from 1Us+ of the IO-Link master
• Reverse polarity protection	Yes; against destruction	Yes; against destruction
Load voltage 2L+		
• Rated value (DC)	24 V; Supply from 2UA+ of the IO-Link master	24 V; Supply from 2UA+ of the IO-Link master
• Reverse polarity protection	Yes; Against destruction; encoder power supply outputs applied with reversed polarity, loads pick up	Yes; Against destruction; encoder power supply outputs applied with reversed polarity, loads pick up
Input current		
Current consumption (rated value)	15 mA; without load	20 mA; without load
from load voltage 2L+, max.	4 A; Maximum value	4 A; Maximum value
Encoder supply		
Number of outputs	8; Supply from 2UA+ of the IO-Link master	8; Supply from 2UA+ of the IO-Link master
Digital inputs		
Number of digital inputs	4; Parameterizable as DIQ	16; Parameterizable as DIQ
Sourcing/sinking input	P-reading	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes	Yes
Number of simultaneously controllable inputs		
- all mounting positions		
- up to 55 °C, max.	4	16
Input voltage		
• Rated value (DC)	24 V	24 V
• for signal "0"	-3 to +5V	-3 to +5V
• for signal "1"	+11 to +30V	+11 to +30V
Input current		
• for signal "1", typ.	3 mA	3 mA
Digital outputs		
Number of digital outputs	8; 4 DQ fixed, 4 DIQ parameterizable	16; Parameterizable as DIQ
Current-sourcing	Yes	Yes
output type acc. to IEC 61131, type 0.5	Yes	
Short-circuit protection	Yes; per channel, electronic	Yes; per channel, electronic
Limitation of inductive shutdown voltage to	2L+ (-50 V)	2L+ (-50 V)
Switching capacity of the outputs

Overview

- Pre-assembled cables in various designs and lengths:
  - For connecting the interface modules and I/O modules via the internal backplane bus (ET connection).
  - For power supply.

Selection and ordering data

Bus cable for backplane bus (ET connection)	
4-pin, shielded	
Pre-assembled at both ends, 2 M8 connectors	
0.19 m	**6ES7194-2LH02-0AA0**

Overview

The PD 24VDC Power Distributor simplifies the power supply to an ET 200AL station. The power distributor distributes the supplied 2x 15 A between 4 different load groups, each with 2x 4 A, which can be used to supply the interface and I/O modules. The load groups are electronically protected against short-circuit.

Selection and ordering data

SIMATIC ET 200AL, PD 24VDC Power Distributor 1xM12-L, 4xM8, degree of protection IP67	**6ES7194-2CA00-0AA0**

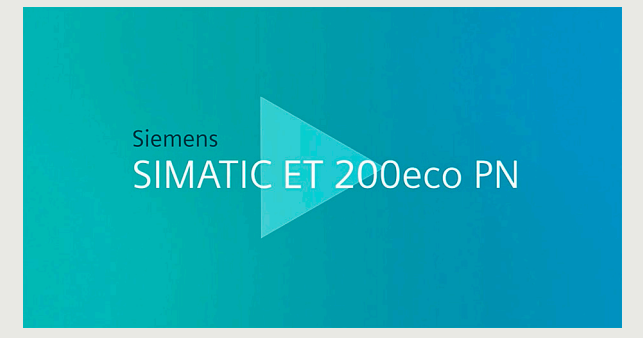
Technical specifications

Article number	6ES7194-2CA00-0AA0 ET 200AL, Power Distributor 24VDC
General information	
Product type designation	PD 24 V DC
Product description	voltage distributor for the distribution of centrally supplied supply voltage to 4x M8 sockets with integrated electronic short-circuit protection
Suitability for use	for supplying the ET 200AL modules with 1L+ and 2L+ voltages
Supply voltage	
Load voltage 1L+	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes
Load voltage 2L+	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes
Output current	
Output current, max.	15 A; each for 1L+ and 2L+
per output	4 A; each for 1L+ and 2L+
Short-circuit protection	Yes; Electronic
Interrupts/diagnostics/status information	
LED status display	green LED "1L" and "2L" for input and output voltage
Potential separation	
between the load voltages	Yes
Degree and class of protection	
IP degree of protection	IP65/67
Standards, approvals, certificates	
Suitable for safety functions	No
Suitable for safety-related tripping of standard modules	Yes; from FS01
Highest safety class achievable for safety-related tripping of standard modules	
• Performance level according to ISO 13849-1	PL d
• Category according to ISO 13849-1	Cat. 3
• SIL acc. to IEC 62061	SIL 2
• remark on safety-oriented shutdown	https://support.industry.siemens.com/cs/de/en/view/39198632
Ambient conditions	
Ambient temperature during operation	
• min.	-30 °C
• max.	55 °C
Altitude during operation relating to sea level	
• Ambient air temperature-barometric pressure-altitude	Up to max. 5 000 m, at installation height > 2 000 m additional restrictions, see manual for details
Connection method	
Design of electrical connection at output	4x M8 socket, 4-pin
Type of electrical connection for mains supply line	1x M12 plug, L-coded, 4-pin
• connectable cable cross-section for mains supply line, max.	2.5 mm²
Dimensions	
Width	45 mm
Height	159 mm
Depth	45 mm
Weights	
Weight, approx.	200 g

© Siemens AG 2026

Overview



- Labels for the identification of channels, modules and slots of ET 200AL components
- Can be used for interface modules and I/O modules

Selection and ordering data

Labels 10 x 5 mm, RAL 9016; 5 frames with 40 labels each	**6ES7194-2BA00-0AA0**

Overview

SIMATIC ET 200eco PN video

- Compact block I/O for processing digital, fail-safe digital, analog and IO-Link signals for connecting to bus systems with Ethernet-based protocols PROFINET, EtherNet/IP and Modbus TCP
- Cabinet-free installation in degree of protection IP65/67/69K with M12 connection method
- Extremely rugged and resistant metal enclosure
- Housing type of the I/O devices with 2x M12 L-coded power connectors
  - 45 mm x 200 mm x 48 mm (W x H x D) with 8 x M12 for digital signals and IO-Link
- Fieldbus connection: 2 x M12 D-coded and automatic PROFINET addressing
- Shared device
- MSI/MSO
- Monitoring of supply voltage 1L+ and load voltage 2L+
- Fast startup
- Channel-specific diagnostics, identification and maintenance data IM0 ... IM3
- Firmware update
- Range of ambient temperature -40 °C to 60 °C
- Can be used in hazardous areas in zones 2 and 22
- Can be used outdoors

Overview (continued)

- Increase in communication availability due to Media Redundancy Protocol (MRP) on PROFINET as well as operation on S7-1500 R/H or S7-400H by means of S2 redundancy
- Variants of the I/O devices with M12 L-coded power connectors:
  - DI 8
  - DI 16
  - DQ 8 (0.5 A)
  - DQ 8 (2 A)
  - DIQ 16 (0.5A/2A)
  - 8 IO-Link + DI 4
  - 8 IO-Link + DIQ 8
  - 4 IO-Link + DIQ 12
  - AI 8 (TC, RTD)
  - AIQ 8 (U, I)
  - TM PosInput 2

© Siemens AG 2026

Overview

- Digital I/O devices with 2x M12 L-coded power connectors and 45 mm width
  - 8 digital input signals with 8xM12 connection
  - 16 digital input signals with 8xM12 connection
  - 8 digital output signals 8-channel digital output module 0.5 A with 8xM12 connection
  - 8 digital output signals 2 A with 8xM12 connection
  - 16 digital input/output signals 0.5A/2A with 8xM12 connection

Selection and ordering data

Article number	6ES7141-6BG00-0BB0 ET 200eco PN, DI 8x24VDC, M12-L	6ES7141-6BH00-0BB0 ET 200eco PN, DI 16x24VDC, M12-L
General information		
Product function		
• Isochronous mode	Yes	Yes
• IRT	Yes	Yes
• Prioritized startup	Yes	Yes
Engineering with		
• STEP 7 TIA Portal configurable/integrated from version	STEP 7 V17 or higher with HSP 0363	STEP 7 V17 or higher with HSP 0363
• PROFINET from GSD version/GSD revision	GSDML V2.4.x	GSDML V2.4.x
• Multi Fieldbus Configuration Tool (MFCT)	from V1.3 SP1	from V1.3 SP1
Operating mode		
• DI	Yes	Yes
• Counter	No	No
• MSI	Yes	Yes
Supply voltage		
Load voltage 1L+		
• Rated value (DC)	24 V	24 V
• Reverse polarity protection	Yes; Against destruction; encoder power supply outputs applied with reversed polarity	Yes; Against destruction; encoder power supply outputs applied with reversed polarity
Input current		
Current consumption (rated value)	85 mA; without load	90 mA; without load
from load voltage 1L+ (unswitched voltage)	12 A; Maximum value	12 A; Maximum value
from load voltage 2L+, max.	12 A; Maximum value	12 A; Maximum value
Encoder supply		
Number of outputs	8	8
Digital inputs		
Number of digital inputs	8	16
Digital inputs, parameterizable	Yes	Yes
Sourcing/sinking input	P-reading	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes	Yes
Number of simultaneously controllable inputs		
- all mounting positions		
- up to 60 °C, max.	8	16
Input voltage		
• Rated value (DC)	24 V	24 V
• for signal "0"	-30 to +5 V	-30 to +5 V
• for signal "1"	+11 to +30V	+11 to +30V
Input current		
• for signal "1", typ.	2.4 mA	2.4 mA
Input delay (for rated value of input voltage)		
- for standard inputs		
- Parameterizable	Yes; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms	Yes; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms
Encoder		
Connectable encoders		
• 2-wire sensor	Yes	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA	1.5 mA
Interfaces		
Transmission procedure	100BASE-TX	100BASE-TX
Number of PROFINET interfaces	1	1
1. Interface		
Interface type	PROFINET with 100 Mbit/s full duplex (100BASE-TX)	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
Interface types		
• M12 port	Yes; 2x M12, 4-pin, D-coded	Yes; 2x M12, 4-pin, D-coded
• Number of ports	2	2
• integrated switch	Yes	Yes

Article number	6ES7141-6BG00-0BB0 ET 200eco PN, DI 8x24VDC, M12-L	6ES7141-6BH00-0BB0 ET 200eco PN, DI 16x24VDC, M12-L
Protocols		
• PROFINET IO device	Yes	Yes
• Open IE communication	Yes	Yes
PROFINET IO Device		
- Services		
- IRT	Yes; 250 µs to 4 ms in 125 µs frame	Yes; 250 µs to 4 ms in 125 µs frame
- Prioritized startup	Yes	Yes
- Shared device	Yes	Yes
Interface types		
M12 port		
• Autonegotiation	Yes	Yes
• Autocrossing	Yes	Yes
• Transmission rate, max.	100 Mbit/s	100 Mbit/s
Protocols		
Supports protocol for PROFINET IO	Yes	Yes
PROFIsafe	No	No
EtherNet/IP	Yes	Yes
Modbus TCP	Yes	Yes
Redundancy mode		
• PROFINET system redundancy (S2)	Yes	Yes
• PROFINET system redundancy (R1)	No	No
• H-Sync forwarding	Yes	Yes
- Media redundancy		
- MRP	Yes	Yes
- MRPD	No	No
EtherNet/IP		
- Services		
- CIP Implicit Messaging	Yes	Yes
- CIP Explicit Messaging	Yes	Yes
- CIP Safety	No	No
- Shared device	Yes; 2x EtherNet/IP Scanner	Yes; 2x EtherNet/IP Scanner
- Number of scanners with shared device, max.	2	2
- Updating times		
- Requested Packet Interval (RPI)	2 ms	2 ms
- Redundancy mode		
- DLR (Device Level Ring)	No	No
- Address area		
- Address space per module, max.	20 byte	20 byte
- LargeForwardOpen (Class3)	No	No
Modbus TCP		
- Services		
- read coils (code=1)	Yes	Yes
- read discrete inputs (code=2)	Yes	Yes
- Read Holding Registers (Code=3)	Yes	Yes
- write single coil (code=5)	Yes	Yes
- write multiple coils (code=15)	Yes	Yes
- Write Multiple Registers (Code=16)	Yes	Yes
- Parameter change by master	No	No
- Modbus TCP Security Protocol	No	No
- Address space per station		
- Address space per station, max.	20 byte	20 byte
- Access-consistent address space	2 byte	2 byte
- Updating time		
- I/O request interval	2 ms	2 ms
- Connections

Technical specifications (continued)

Article number	6ES7141-6BG00-0BB0 ET 200eco PN, DI 8x24VDC, M12-L	6ES7141-6BH00-0BB0 ET 200eco PN, DI 16x24VDC, M12-L
- number of connections per device	12	12
Open IE communication		
• TCP/IP	Yes; (only EtherNet/IP or Modbus TCP)	Yes; (only EtherNet/IP or Modbus TCP)
• SNMP	Yes	Yes
• LLDP	Yes	Yes
• ARP	Yes	Yes
Isochronous mode		
Equidistance	Yes	Yes
shortest clock pulse	250 µs	250 µs
max. cycle	4 ms	4 ms
Interrupts/diagnostics/status information		
Alarms		
• Diagnostic alarm	Yes; Parameterizable	Yes; Parameterizable
• Maintenance interrupt	Yes; Parameterizable	Yes; Parameterizable
• Hardware interrupt	Yes; Parameterizable	Yes; Parameterizable
Diagnoses		
• Diagnostic information readable	Yes	Yes
• Monitoring the supply voltage	Yes	Yes
- Parameterizable	Yes	Yes
• Wire break	Yes; DI, input current < 0.3 mA, per channel	Yes; DI, input current < 0.3 mA, per channel
• Short-circuit encoder supply	Yes; Per channel group	Yes; Per channel group
Diagnostics indication LED		
• RUN LED	Yes; green LED	Yes; green LED
• ERROR LED	Yes; red LED	Yes; red LED
• MAINT LED	Yes; Yellow LED	Yes; Yellow LED
• NS LED	Yes; green/red LED	Yes; green/red LED
• MS LED	Yes; green/red LED	Yes; green/red LED
• IO LED	Yes; red/green/yellow LEDs	Yes; red/green/yellow LEDs
• Channel status display	Yes; green LED	Yes; green LED
• for channel diagnostics	Yes; red LED	Yes; red LED
• Connection display LINK TX/RX	Yes; green LED, only link	Yes; green LED, only link
Potential separation		
between the load voltages	Yes	Yes
between Ethernet and electronics	Yes	Yes
Potential separation channels		
• between the channels	No	No
• between the channels and the power supply of the electronics	No	No
Degree and class of protection		
IP degree of protection	IP65/67/69K	IP65/67/69K
Standards, approvals, certificates		
Suitable for safety-related tripping of standard modules	Yes; from FS01	Yes; from FS01
Highest safety class achievable for safety-related tripping of standard modules		
• Performance level according to ISO 13849-1	PL d	PL d
• Category according to ISO 13849-1	Cat. 3	Cat. 3
• SIL acc. to IEC 62061	SIL 2	SIL 2
Use in hazardous areas		
• Explosion protection category for gas	ATEX, UKEX, IECEx, CCCEx for Zone 2	ATEX, UKEX, IECEx, CCCEx for Zone 2
• Explosion protection category for dust	ATEX, UKEX, IECEx, CCCEx for Zone 22	ATEX, UKEX, IECEx, CCCEx for Zone 22
Security		
signed firmware update	Yes	Yes
safely removing data	Yes	Yes
Ambient conditions		
Ambient temperature during operation		
• min.	-40 °C	-40 °C

• max.	60 °C	60 °C
Altitude during operation relating to sea level		
• Ambient air temperature-barometric pressure-altitude	Up to max. 5 000 m, at installation height > 2 000 m additional restrictions	Up to max. 5 000 m, at installation height > 2 000 m additional restrictions
Connection method		
Design of electrical connection	4/5-pin M12 circular connectors	4/5-pin M12 circular connectors
Design of electrical connection for the inputs and outputs	M12, 5-pin, A-coded	M12, 5-pin, A-coded
Design of electrical connection for supply voltage	M12, 4-pin, L-coded	M12, 4-pin, L-coded
Dimensions		
Width	45 mm	45 mm
Height	200 mm	200 mm
Depth	48 mm	48 mm
Weights		
Weight, approx.	780 g	780 g

Article number	6ES7142-6BG00-0BB0 ET 200eco PN, DQ 8x24VDC/0,5A, M12-L	6ES7142-6BR00-0BB0 ET 200eco PN, DQ 8x24VDC/2A, M12-L
General information		
Product function		
• Isochronous mode	Yes	Yes
• IRT	Yes	Yes
• Prioritized startup	Yes	Yes
Engineering with		
• STEP 7 TIA Portal configurable/integrated from version	STEP 7 V17 or higher with HSP 0363	STEP 7 V17 or higher with HSP 0363
• PROFINET from GSD version/GSD revision	GSDML V2.4.x	GSDML V2.4.x
• Multi Fieldbus Configuration Tool (MFCT)	from V1.3 SP1	from V1.3 SP1
Operating mode		
• DQ	Yes	Yes
• MSO	Yes	Yes
Supply voltage		
Load voltage 1L+		
• Rated value (DC)	24 V	24 V
• Reverse polarity protection	Yes	Yes
Load voltage 2L+		
• Rated value (DC)	24 V	24 V
• Reverse polarity protection	Yes; against destruction; load increasing	Yes; against destruction
Input current		
Current consumption (rated value)	65 mA; without load	65 mA; without load
from load voltage 1L+ (unswitched voltage)	12 A; Maximum value	12 A; Maximum value
from load voltage 2L+, max.	12 A; Maximum value	12 A; Maximum value
Digital outputs		
Number of digital outputs	8	8
Current-sourcing	Yes	Yes
output type acc. to IEC 61131, type 0.5	Yes	
output type acc. to IEC 61131, type 2		Yes
Short-circuit protection	Yes; per channel, electronic	Yes; per channel, electronic
Limitation of inductive shutdown voltage to	Typ. 2L+ (-52 V)	Type -14 V
Controlling a digital input	Yes	Yes
Switching capacity of the outputs		
• with resistive load, max.	0.5 A	2 A
• with inductive load, max.	0.5 A	2 A
• on lamp load, max.	5 W	10 W
Load resistance range		
• lower limit	48 Ω	12 Ω
• upper limit	4 kΩ	4 kΩ

• DI	Yes
• Counter	No
• DQ	Yes
• MSI	Yes
• MSO	Yes
Supply voltage	
Load voltage 1L+	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; Against destruction; encoder power supply outputs applied with reversed polarity, loads pick up
Load voltage 2L+	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction
Input current	
Current consumption (rated value)	90 mA; without load
from load voltage 1L+ (unswitched voltage)	12 A; Maximum value
from load voltage 2L+, max.	12 A; Maximum value
Encoder supply	
Number of outputs	8
Digital inputs	
Number of digital inputs	16; Parameterizable as DIQ
• in groups of	8
Digital inputs, parameterizable	Yes
Sourcing/sinking input	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes
Number of simultaneously controllable inputs	
- all mounting positions	
- up to 60 °C, max.	16
Input voltage	
• Rated value (DC)	24 V
• for signal "0"	-3 to +5V
• for signal "1"	+11 to +30V
Input current	
• for signal "1", typ.	2.4 mA
Input delay (for rated value of input voltage)	
- for standard inputs	
- parameterizable	Yes; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms
Digital outputs	
Number of digital outputs	16; Parameterizable as DIQ
• in groups of	8; 2 load groups for 8 outputs each
Current-sourcing	Yes
output type acc. to IEC 61131, type 0.5	Yes
output type acc. to IEC 61131, type 2	Yes
Short-circuit protection	Yes; per channel, electronic
Limitation of inductive shutdown voltage to	0.5 A: Type 1L+ (-70 V) / 2 A: Type (-18 V)
Controlling a digital input	Yes
Switching capacity of the outputs	
• with resistive load, max.	0.5 A / 2 A
• with inductive load, max.	0.5 A / 2 A
• on lamp load, max.	0.5 A: 5 W / 2 A 10 W

Technical specifications (continued)

Article number	6ES7143-6BH00-0BB0 ET 200eco PN, DIQ 16x24VDC/2A, M12-L
• Connection display LINK TX/RX	Yes; green LED, only link
Potential separation	
between the load voltages	Yes
between Ethernet and electronics	Yes
Potential separation channels	
• between the channels	Yes
• between the channels, in groups of	8
• between the channels and the power supply of the electronics	8 channels are non-isolated and 8 channels are isolated from supply voltage 1L+
Degree and class of protection	
IP degree of protection	IP65/67/69K
Standards, approvals, certificates	
Suitable for safety-related tripping of standard modules	Yes; from FS01
Highest safety class achievable for safety-related tripping of standard modules	
• Performance level according to ISO 13849-1	PL d
• Category according to ISO 13849-1	Cat. 3
• SIL acc. to IEC 62061	SIL 2
Use in hazardous areas	
• Explosion protection category for gas	ATEX, UKEX, IECEx, CCCEx for Zone 2
• Explosion protection category for dust	ATEX, UKEX, IECEx, CCCEx for Zone 22
Security	
signed firmware update	Yes
safely removing data	Yes
Ambient conditions	
Ambient temperature during operation	
• min.	-40 °C
• max.	60 °C
Altitude during operation relating to sea level	
• Ambient air temperature-barometric pressure-altitude	Up to max. 5 000 m, at installation height > 2 000 m additional restrictions
Connection method	
Design of electrical connection	4/5-pin M12 circular connectors
Design of electrical connection for the inputs and outputs	M12, 5-pin, A-coded
Design of electrical connection for supply voltage	M12, 4-pin, L-coded
Dimensions	
Width	45 mm
Height	200 mm
Depth	48 mm
Weights	
Weight, approx.	780 g

© Siemens AG 2026

Overview

Analog distributed I/O devices with 2x M12 L-coded power connectors and 45 mm width

- 8 analog input signals RTD/TC with 8xM12 connection
- 6 analog input signals U/I and 2 analog input or output signals U/I with 8xM12 connection

Selection and ordering data

ET 200eco PN analog input modules	
• 8 AI RTD/TC; 8 x M12-L, degree of protection IP67	**6ES7144-6JF00-0BB0**
ET 200eco PN analog input/output modules	
• 6 AI U/I, 2 AI/AQ U/I, 8 x M12, degree of protection IP67	**6ES7146-6HF00-0BB0**
Accessories	
• PD voltage distributor, 24 V DC; 1 X 7/8", 4 X M12	**6ES7148-6CB00-0AA0**
• Terminal block for ET 200eco PN, 10 A insulation displacement terminals	**6ES7194-6CA00-0AA0**
• Spare fuses for terminal block, 10 units	**6ES7194-6HB00-0AA0**
• Mounting rail 0.5 m	**6ES7194-6GA00-0AA0**
• Profile screw for mounting rail, 50 units	**6ES7194-6MA00-0AA0**
• Sealing cap M12 for IP67 modules, 12 mm outer diameter, without O-ring, 10 units	**3RX9802-0AA00**
• Sealing cap M12 for IP67 modules, 15 mm outer diameter, with O-ring, 10 units	**3RK1901-1KA00**
• Labels 10 mm x 7 mm Ti-grey, for I/O devices with 2x M12 A-coded power connectors; 5 frames with 40 labels each	**3RT2900-1SB10**
PROFINET M12 connection plug, for user assembly	
Connector for PROFINET, 4-core, shielded	**3RK1902-2DA00**
IE M12 plug PRO connector	
• 1 unit	**6GK1901-0DB10-6AA0**
• 8 units	**6GK1901-0DB10-6AA8**
IE FC M12 plug PRO connector, for user assembly	
• 1 unit	**6GK1901-0DB20-6AA0**
• 8 units	**6GK1901-0DB20-6AA8**
M12 connection plug for 24 V DC load power supply	
Connection socket for 24 V DC infeed; 4-pin, A-coded, 3 units	**6GK1907-0DC10-6AA3**
Connector for loop-through of 24 V DC; 4-pin, A-coded, 3 units	**6GK1907-0DB10-6AA3**
M12 circular connector	
Can be assembled, for connecting actuators or sensors, 5-pin, screw terminal, max. 0.75 mm^2, A-coded, max. 4 A	
• Straight	**3RK1902-4BA00-5AA0**
• Angled	**3RK1902-4DA00-5AA0**
M12 coupling socket	**3RK1902-4CA00-4AA0**
4-pin, screw terminal, max. 0.75 mm^2, A-coded, max. 4 A, angled	
PROFINET bus cable	
Preassembled on one side with 1 x M12, D-coded, 4-wire, shielded	
• 3 m	**3RK1902-2HB30**
• 5 m	**3RK1902-2HB50**
• 10 m	**3RK1902-2HC10**
IE connecting cable M12-90/M12-90	
Preassembled IE FC TP trailing cable GP 2 x 2 (PROFINET type C) with two 4-pin M12 plugs (D-coded) up to 85 m, degree of protection IP65/IP67, 90° cable outlet Length:	
• 0.3 m	**6XV1870-8GE30**
• 0.5 m	**6XV1870-8GE50**
• 1.0 m	**6XV1870-8GH10**
• 1.5 m	**6XV1870-8GH15**

© Siemens AG 2026

Selection and ordering data (continued)

• 2.0 m	**6XV1870-8GH20**
• 3.0 m	**6XV1870-8GH30**
• 5.0 m	**6XV1870-8GH50**
• 10 m	**6XV1870-8GN10**
• 15 m	**6XV1870-8GN15**
IE connecting cable M12-180/IE FC RJ45 plug-145 Preassembled IE FC TP trailing cable GP 2 x 2 (PROFINET type C) with M12 plug (D-coded) and IE FC RJ45 plug, degree of protection IP65/IP67 Length:	
• 2.0 m	**6XV1871-5TH20**
• 3.0 m	**6XV1871-5TH30**
• 5.0 m	**6XV1871-5TH50**
• 10 m	**6XV1871-5TN10**
• 15 m	**6XV1871-5TN15**
M12-180/M12-180 IE robust connecting cable Preassembled IE FC TP robust food cable 2 x 2 (PROFINET type C) with two 4-pin M12 plugs (D-coded), degree of protection IP69 Length:	
• 1.0 m	**6XV1881-5AH10**
• 2.0 m	**6XV1881-5AH20**
• 3.0 m	**6XV1881-5AH30**
• 5.0 m	**6XV1881-5AH50**
M12-90/M12-90 M12 power connecting cable Flexible 4-core power connecting cable, preassembled with A-coded, 5-pin M12 plug and A-coded, 5-pin M12 socket to supply the ET 200 with 24 V DC; 90° cable outlet Length:	
• 0.3 m	**6XV1801-5GE30**
• 0.5 m	**6XV1801-5GE50**
• 1.0 m	**6XV1801-5GH10**
• 1.5 m	**6XV1801-5GH15**
• 2.0 m	**6XV1801-5GH20**
• 3.0 m	**6XV1801-5GH30**
• 5.0 m	**6XV1801-5GH50**
• 10 m	**6XV1801-5GN10**
• 15 m	**6XV1801-5GN15**
M12-180/M12-180 M12 robust power connecting cable Flexible 4-core power connecting cable, preassembled with A-coded, 5-pin M12 plug and A-coded, 5-pin M12 socket to supply IP69 components with 24 V DC; Length:	
• 1.0 m	**6XV1801-5AH10**
• 2.0 m	**6XV1801-5AH20**
• 3.0 m	**6XV1801-5AH30**
• 5.0 m	**6XV1801-5AH50**

Technical specifications

Article number	6ES7144-6JF00-0BB0 ET 200eco PN, AI 8xRTD/TC, M12-L
General information	
Product function	
• Isochronous mode	No
• IRT	Yes
• Prioritized startup	Yes
• Measuring range scalable	Yes
Engineering with	
• STEP 7 TIA Portal configurable/integrated from version	STEP 7 V17 or higher with HSP 0369
• PROFINET from GSD version/GSD revision	GSDML V2.4.x
• Multi Fieldbus Configuration Tool (MFCT)	from V1.3 SP1
Operating mode	
• MSI	Yes
CiR - Configuration in RUN	
Calibration possible in RUN	Yes
Supply voltage	
Load voltage 1L+	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction
Input current	
Current consumption (rated value)	85 mA; without load
from load voltage 1L+ (unswitched voltage)	12 A; Maximum value
from load voltage 2L+, max.	12 A; Maximum value
Analog inputs	
Number of analog inputs	8
Constant measurement current for resistance-type transmitter, typ.	0.7 mA
Cycle time (all channels), min.	Sum of the basic conversion times and additional processing times (depending on the parameterization of the active channels); for line compensation in case of a three-wire connection, an additional cycle is necessary
Technical unit for temperature measurement adjustable	Yes; Degrees Celsius / degrees Fahrenheit / Kelvin
Input ranges (rated values), voltages	
• -80 mV to +80 mV	Yes; 16 bit incl. sign
Input ranges (rated values), thermocouples	
• type B	Yes; 16 bit incl. sign
• type C	Yes; 16 bit incl. sign
• Type E	Yes; 16 bit incl. sign
• Type J	Yes; 16 bit incl. sign
• Type K	Yes; 16 bit incl. sign
• Type L	Yes; 16 bit incl. sign
• Type N	Yes; 16 bit incl. sign
• Type R	Yes; 16 bit incl. sign
• Type S	Yes; 16 bit incl. sign
• Type T	Yes; 16 bit incl. sign
• Type U	Yes; 16 bit incl. sign
Input ranges (rated values), resistance thermometer	
• Ni 100	Yes; Standard/climate
• Ni 1000	Yes; Standard/climate
• Ni 120	Yes; Standard/climate
• Ni 200	Yes; Standard/climate
• Ni 500	Yes; Standard/climate
• Pt 100	Yes; Standard/climate
• Pt 1000	Yes; Standard/climate
• Pt 200	Yes; Standard/climate
• Pt 500	Yes; Standard/climate
Input ranges (rated values), resistors	
• 0 to 150 ohms	Yes

© Siemens AG 2026

Technical specifications (continued)

Article number	6ES7144-6JF00-0BB0 ET 200eco PN, AI 8xRTD/TC, M12-L
• 0 to 300 ohms	Yes
• 0 to 600 ohms	Yes
• 0 to 3000 ohms	Yes
• 0 to 6000 ohms	Yes
Thermocouple (TC)	
- Temperature compensation	
- Parameterizable	Yes
- internal temperature compensation	Yes
- external temperature compensation with compensations socket	Yes
- dynamic reference temperature value	Yes
- fixed reference temperature	Yes
Cable length	
• shielded, max.	30 m
Analog value generation for the inputs	
Analog value display	SIMATIC S7 format
Measurement principle	integrating
Integration and conversion time/resolution per channel	
• Resolution with overrange (bit including sign), max.	16 bit
• Integration time, parameterizable	Yes; channel by channel
• Integration time (ms)	0.84 / 16.7 (50) / 20 (60) / 60 (180)
• Basic conversion time, including integration time (ms)	4.50 / 21.5 (54) / 24 (64) / 64 (184)
• Interference voltage suppression for interference frequency f1 in Hz	none / 60 / 50 / 16.7
Smoothing of measured values	
• Parameterizable	Yes
Encoder	
Connection of signal encoders	
• for resistance measurement with two-wire connection	Yes
• for resistance measurement with three-wire connection	Yes
• for resistance measurement with four-wire connection	Yes
Errors/accuracies	
Linearity error (relative to input range), (+/-)	0.01 %; ±0.1 % for resistance thermometers and resistance
Temperature error (relative to input range), (+/-)	0.0009 %/K; ±0.005 % / K at thermocouple
Crosstalk between the inputs, max.	-70 dB
Repeat accuracy in steady state at 25 °C (relative to input range), (+/-)	0.008 %
Temperature error of internal compensation	±1,5 °C
Interference voltage suppression for f = n x (f1 +/- 0.5 %), f1 = interference frequency	
• Series mode interference (peak value of interference < rated value of input range), min.	100 dB; at basic conversion time 4.5 / 21.5 / 24 / 64 ms: 46 dB
Interfaces	
Transmission procedure	100BASE-TX
Number of PROFINET interfaces	1
1. Interface	
Interface type	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
Interface types	
• M12 port	Yes; 2x M12, 4-pin, D-coded
• Number of ports	2
• integrated switch	Yes
Protocols	
• PROFINET IO Device	Yes
• Open IE communication	Yes
PROFINET IO Device	
- Services	
- IRT	Yes; 250 µs to 4 ms in 125 µs frame
- Prioritized startup	Yes
- Shared device	Yes
- Number of IO Controllers with shared device, max.	2

© Siemens AG 2026

Technical specifications (continued)

Article number	6ES7144-6JF00-0BB0 ET 200eco PN, AI 8xRTD/TC, M12-L
Interface types	
M12 port	
• Autonegotiation	Yes
• Autocrossing	Yes
• Transmission rate, max.	100 Mbit/s
Protocols	
Supports protocol for PROFINET IO	Yes
PROFIsafe	No
EtherNet/IP	Yes
Modbus TCP	Yes
Redundancy mode	
• PROFINET system redundancy (S2)	Yes
• PROFINET system redundancy (R1)	No
• H-Sync forwarding	Yes
- Media redundancy	
- MRP	Yes
- MRPD	No
EtherNet/IP	
- Services	
- CIP Implicit Messaging	Yes
- CIP Explicit Messaging	Yes
- CIP Safety	No
- Shared device	Yes; 2x EtherNet/IP Scanner
- Number of scanners with shared device, max.	2
- Updating times	
- Requested Packet Interval (RPI)	2 ms
- Redundancy mode	
- DLR (Device Level Ring)	No
- Address area	
- Address space per module, max.	38 byte
- LargeForwardOpen (Class3)	No
Modbus TCP	
- Services	
- read coils (code=1)	Yes
- read discrete inputs (code=2)	Yes
- Read Holding Registers (Code=3)	Yes
- write single coil (code=5)	Yes
- write multiple coils (code=15)	Yes
- Write Multiple Registers (Code=16)	Yes
- Parameter change by master	No
- Modbus TCP Security Protocol	No
- Address space per station	
- Address space per station, max.	38 byte
- Access-consistent address space	2 byte
- Updating time	
- I/O request interval	2 ms
- Connections	
- number of connections per device	12
Open IE communication	
• TCP/IP	Yes; (only EtherNet/IP or Modbus TCP)
• SNMP	Yes
• LLDP	Yes
• ARP	Yes
Interrupts/diagnostics/status information	
Alarms

Technical specifications (continued)

Article number	6ES7144-6JF00-0BB0 ET 200eco PN, AI 8xRTD/TC, M12-L
• Diagnostic alarm	Yes; Parameterizable
• Maintenance interrupt	Yes; Parameterizable
• Limit value alarm	Yes; two upper and two lower limit values in each case
Diagnoses	
• Diagnostic information readable	Yes
• Monitoring the supply voltage	Yes
- Parameterizable	Yes
• Wire break	Yes; Not for ±80 mV
• Overflow/Underflow	Yes
Diagnostics indication LED	
• RUN LED	Yes; green LED
• ERROR LED	Yes; red LED
• MAINT LED	Yes; Yellow LED
• NS LED	Yes; green/red LED
• MS LED	Yes; green/red LED
• IO LED	Yes; red/green/yellow LEDs
• Channel status display	Yes; green LED
• for channel diagnostics	Yes; red LED
• Connection display LINK TX/RX	Yes; green LED, only link
Potential separation	
between the load voltages	Yes
between Ethernet and electronics	Yes
Potential separation channels	
• between the channels	No
• between the channels and the power supply of the electronics	Yes
Degree and class of protection	
IP degree of protection	IP65/67/69K
Standards, approvals, certificates	
Suitable for safety-related tripping of standard modules	Yes; from FS01
Suitable for applications according to AMS 2750	Yes; Declaration of Conformity, see online support entry 109757262
Suitable for applications according to CQI-9	Yes; based on AMS 2750 F
Highest safety class achievable for safety-related tripping of standard modules	
• Performance level according to ISO 13849-1	PL d
• Category according to ISO 13849-1	Cat. 3
• SIL acc. to IEC 62061	SIL 2
Use in hazardous areas	
• Explosion protection category for gas	ATEX, UKEX, IECEx, CCCEx for Zone 2
• Explosion protection category for dust	ATEX, UKEX, IECEx, CCCEx for Zone 22
Security	
signed firmware update	Yes
safely removing data	Yes
Ambient conditions	
Ambient temperature during operation	
• min.	-40 °C
• max.	60 °C
Altitude during operation relating to sea level	
• Ambient air temperature-barometric pressure-altitude	Up to max. 5 000 m, at installation height > 2 000 m additional restrictions
Connection method	
Design of electrical connection	4/5-pin M12 circular connectors
Design of electrical connection for the inputs and outputs	M12, 5-pin, A-coded
Design of electrical connection for supply voltage	M12, 4-pin, L-coded
Dimensions	
Width	45 mm
Height	200 mm

- Access-consistent address space	2 byte
- Updating time	
- I/O request interval	2 ms
- Connections	
- number of connections per device	12
Open IE communication	
• TCP/IP	Yes; (only EtherNet/IP or Modbus TCP)
• SNMP	Yes
• LLDP	Yes
• ARP	Yes
Interrupts/diagnostics/status information	
Substitute values connectable	Yes; channel by channel, parameterizable
Alarms	
• Diagnostic alarm	Yes; Parameterizable
• Maintenance interrupt	Yes; Parameterizable
• Limit value alarm	Yes; two upper and two lower limit values in each case
Diagnoses	
• Diagnostic information readable	Yes
• Monitoring the supply voltage	Yes
- Parameterizable	Yes
• Wire break	Yes; at 4 mA to 20 mA and 1 V to 5 V
• short-circuit	Yes; encoder and actuator supply module to ground, for output type voltage; channel by channel
• Overflow/Underflow	Yes
Diagnostics indication LED	
• RUN LED	Yes; green LED
• ERROR LED	Yes; red LED
• MAINT LED	Yes; Yellow LED
• NS LED	Yes; green/red LED
• MS LED	Yes; green/red LED
• IO LED	Yes; red/green/yellow LEDs
• Channel status display	Yes; green LED
• for channel diagnostics	Yes; red LED
• Connection display LINK TX/RX	Yes; green LED, only link
Potential separation	
between the load voltages	Yes
between Ethernet and electronics	Yes
Potential separation channels	
• between the channels	No
• between the channels and the power supply of the electronics	No
Degree and class of protection	
IP degree of protection	IP65/67/69K
Standards, approvals, certificates	
Suitable for safety-related tripping of standard modules	Yes; from FS01
Highest safety class achievable for safety-related tripping of standard modules	
• Performance level according to ISO 13849-1	PL d
• Category according to ISO 13849-1	Cat. 3
• SIL acc. to IEC 62061	SIL 2
Use in hazardous areas	
• Explosion protection category for gas	ATEX, UKEX, IECEx, CCCEx for Zone 2
• Explosion protection category for dust	ATEX, UKEX, IECEx, CCCEx for Zone 22

Overview

Technical properties

- Counter and position detection module for ET 200eco PN
- Interfaces:
  - Encoder signals A, B and N for RS 422 differential signals or 24 V signals
  - SSI interface with clock and data for RS422 differential signals
  - 24 V encoder supply, short-circuit-proof
  - 2 digital inputs for controlling the counting process, for saving or setting the counter or position value
  - 2 digital outputs for fast reactions depending on the counter reading, position value or measured value
- Counting frequency 1 MHz (4 MHz with fourfold evaluation)
- Counting range: +/- 31 bits
- Measurement function
- Parameterizable input filters for suppressing interferences at encoder and digital inputs

Supported types of encoders/signals

- Incremental encoders with and without N signal
- Pulse encoders with directional signal
- Pulse encoders without directional signal
- Pulse encoders for forward or reverse pulses
- SSI encoders with a frame length of 10 to 40 bits, of which up to 32 bits position value

Supported system functions

- Isochronous mode
- Firmware update
- Identification data I&M

Selection and ordering data

TM PosInput 2 counter and position detection module 2 channels, max. 1 MHz for RS-422 differential signals or SSI absolute encoders 200 kHz for 24 V count signals	**6ES7147-6AB00-0BB0**
Accessories	
• Mounting rail 0.5 m	**6ES7194-6GA00-0AA0**
• Profile screw for mounting rail, 50 units	**6ES7194-6MA00-0AA0**
• Sealing cap M12 for IP67 modules, 12 mm outer diameter, without O-ring, 10 units	**3RX9802-0AA00**
• Sealing cap M12 for IP67 modules, 15 mm outer diameter, with O-ring, 10 units	**3RK1901-1KA00**
• Labels 10 mm x 5 mm RAL9016, for I/O devices with 2x M12 L-coded power connectors; 5 frames with 40 labels each	**6ES7194-2BA00-0AA0**
PROFINET M12 connection plug, for user assembly	
Connector for PROFINET, 4-core, shielded	**3RK1902-2DA00**
IE M12 plug PRO connector	
• 1 unit	**6GK1901-0DB10-6AA0**
• 8 units	**6GK1901-0DB10-6AA8**
IE FC M12 plug PRO connector, for user assembly	
• 1 unit	**6GK1901-0DB20-6AA0**
• 8 units	**6GK1901-0DB20-6AA8**
Power M12 plug PRO Connector for 24 V DC supply voltage, with installation instructions, 4-pin, L-coded, 1 unit	**6GK1906-0EA00**
Power M12 cable connector PRO Connection socket for 24 V DC supply voltage, 4-pin, L-coded, with installation instructions, 1 unit	**6GK1906-0EB00**
M12 circular connector Can be assembled, for connecting actuators or sensors, 5-pin, screw terminal, max. 0.75 mm², A-coded, max. 4 A	
• Straight	**3RK1902-4BA00-5AA0**
• Angled	**3RK1902-4DA00-5AA0**
M12 coupling socket 4-pin, screw terminal, max. 0.75 mm², A-coded, max. 4 A, angled	**3RK1902-4CA00-4AA0**
PROFINET bus cable Preassembled on one side with 1 x M12, D-coded, 4-wire, shielded	
• 3 m	**3RK1902-2HB30**
• 5 m	**3RK1902-2HB50**
• 10 m	**3RK1902-2HC10**
M12-90/M12-90 IE connecting cable Preassembled IE FC TP trailing cable GP 2 x 2 (PROFINET type C) with two 4-pin M12 plugs (D-coded) up to 85 m, degree of protection IP65/IP67, 90° cable outlet Length:	
• 0.3 m	**6XV1870-8GE30**
• 0.5 m	**6XV1870-8GE50**
• 1.0 m	**6XV1870-8GH10**
• 1.5 m	**6XV1870-8GH15**
• 2.0 m	**6XV1870-8GH20**
• 3.0 m	**6XV1870-8GH30**
• 5.0 m	**6XV1870-8GH50**

© Siemens AG 2026

Selection and ordering data (continued)

• 10 m	**6XV1870-8GN10**
• 15 m	**6XV1870-8GN15**
M12-180/IE FC RJ45 plug-145 **IE connecting cable** Preassembled IE FC TP trailing cable GP 2 x 2 (PROFINET type C) with M12 plug (D-coded) and IE FC RJ45 plug, degree of protection IP65/IP67 Length:	
• 2.0 m	**6XV1871-5TH20**
• 3.0 m	**6XV1871-5TH30**
• 5.0 m	**6XV1871-5TH50**
• 10 m	**6XV1871-5TN10**
• 15 m	**6XV1871-5TN15**
M12-180/M12-180 **IE robust connecting cable** Preassembled IE FC TP robust food cable 2 x 2 (PROFINET type C) with two 4-pin M12 plugs (D-coded), degree of protection IP69 Length:	
• 1.0 m	**6XV1881-5AH10**
• 2.0 m	**6XV1881-5AH20**
• 3.0 m	**6XV1881-5AH30**
• 5.0 m	**6XV1881-5AH50**
M12 Y-cable For double connection of I/O by means of a single cable to ET 200, 5-pin	**6ES7194-6KA00-0XA0**
Control line Preassembled on one side with 1 x M12 plug angled, 5-pin, 5 x 0.34 mm², A-coded, max. 4 A, PUR casing, black	
• 1.5 m	**3RK1902-4HB15-5AA0**
• 5 m	**3RK1902-4HB50-5AA0**
• 10 m	**3RK1902-4HC01-5AA0**
Preassembled, 1 x M12 cable box straight, 1 x M12 plug, 3 x 0.34 mm², A-coded, max. 4 A, PUR casing, black	**3RK1902-4PB15-3AA0**
Energy cable 4 x 1.5 Trailable power cable, with 4 copper cores (1.5 mm2) for connecting to M12 plug-in connector; sold by the meter; max. delivery unit 1000 m, minimum order quantity 20 m	**6XV1801-2B**
M12-90/M12-90 **M12 power connecting cable** Flexible 4-core power connecting cable, preassembled with A-coded, 5-pin M12 plug and A-coded, 5-pin M12 socket to supply the ET 200 with 24 V DC; 90° cable outlet Length:	
• 0.3 m	**6XV1801-5GE30**
• 0.5 m	**6XV1801-5GE50**
• 1.0 m	**6XV1801-5GH10**
• 1.5 m	**6XV1801-5GH15**
• 2.0 m	**6XV1801-5GH20**
• 3.0 m	**6XV1801-5GH30**
• 5.0 m	**6XV1801-5GH50**
• 10 m	**6XV1801-5GN10**
• 15 m	**6XV1801-5GN15**

Selection and ordering data (continued)

M12-90/M12-90 **M12 power connecting cable** Flexible 4-core power connecting cable, preassembled with L-coded, 4-pin M12 plug and L-coded, 4-pin M12 socket, both sides angled 90°, to supply terminal devices with 24 V DC Length:	
• 0.5 m	**6XV1801-6GE50**
• 1.0 m	**6XV1801-6GH10**
• 1.5 m	**6XV1801-6GH15**
• 2.0 m	**6XV1801-6GH20**
• 3.0 m	**6XV1801-6GH30**
• 5.0 m	**6XV1801-6GH50**
• 10 m	**6XV1801-6GN10**
• 15 m	**6XV1801-6GN15**
M12-180/M12-180 **M12 power connecting cable** Flexible 4-core power connecting cable, preassembled with L-coded, 4-pin M12 plug and L-coded, 4-pin M12 socket to supply terminal devices with 24 V DC Length:	
• 0.5 m	**6XV1801-6DE50**
• 1.0 m	**6XV1801-6DH10**
• 1.5 m	**6XV1801-6DH15**
• 2.0 m	**6XV1801-6DH20**
• 3.0 m	**6XV1801-6DH30**
• 5.0 m	**6XV1801-6DH50**
• 10 m	**6XV1801-6DN10**
• 15 m	**6XV1801-6DN15**
M12-180/M12-180 **M12 robust power connecting cable** Flexible 4-core power connecting cable, preassembled with A-coded, 5-pin M12 plug and A-coded, 5-pin M12 socket to supply IP69 components with 24 V DC; Length:	
• 1.0 m	**6XV1801-5AH10**
• 2.0 m	**6XV1801-5AH20**
• 3.0 m	**6XV1801-5AH30**
• 5.0 m	**6XV1801-5AH50**

Technical specifications

Article number	6ES7147-6AB00-0BB0 ET 200eco PN, TM PosInput 2, M12-L
General information	
Number of channels	2
Product function	
• Isochronous mode	Yes
• IRT	Yes
• Fast startup	Yes
• Prioritized startup	Yes
Engineering with	
• STEP 7 TIA Portal configurable/integrated from version	STEP 7 V18 or higher with HSP
• PROFINET from GSD version/GSD revision	GSDML V2.4.x
• Multi Fieldbus Configuration Tool (MFCT)	V1.5 or higher
Supply voltage	
Rated value (DC)	24 V
Load voltage 1L+	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction; encoder power supply outputs applied with reversed polarity, loads conduct
Load voltage 2L+	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction
Input current	
Current consumption (rated value)	100 mA; without load
from load voltage 1L+ (unswitched voltage)	12 A; Maximum value
from load voltage 2L+, max.	12 A; Maximum value
Encoder supply	
Number of outputs	4; 1 per encoder connection
Digital inputs	
Number of digital inputs	4; 2 per channel
Digital inputs, parameterizable	Yes
Sourcing/sinking input	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes
Digital input functions, parameterizable	
• Gate start/stop	Yes; only for pulse and incremental encoders
• Capture	Yes
• Synchronization	Yes; only for pulse and incremental encoders
• Freely usable digital input	Yes
Input voltage	
• Type of input voltage	DC
• Rated value (DC)	24 V
• for signal "0"	-5 ... +5 V
• for signal "1"	+11 to +30V
• permissible voltage at input, min.	-30 V; -5 V continuous, -30 V brief reverse polarity protection
• permissible voltage at input, max.	30 V
Input current	
• for signal "1", typ.	2.5 mA
Input delay (for rated value of input voltage)	
- for standard inputs	
- Parameterizable	Yes; none / 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms
- for technological functions	
- Parameterizable	Yes
Digital outputs	
Type of digital output	Transistor
Number of digital outputs	4; 2 per channel
Current-sourcing	Yes
Digital outputs, parameterizable	Yes
Short-circuit protection	Yes; electronic/thermal

Technical specifications (continued)

Article number	6ES7147-6AB00-0BB0 ET 200eco PN, TM PosInput 2, M12-L
Limitation of inductive shutdown voltage to	2L+ (-39 V)
Controlling a digital input	Yes
Digital output functions, parameterizable	
• Switching tripped by comparison values	Yes
• Freely usable digital output	Yes
Switching capacity of the outputs	
• with resistive load, max.	0.5 A; Per digital output
• with inductive load, max.	0.5 A
Load resistance range	
• lower limit	48 Ω
• upper limit	12 kΩ
Output voltage	
• Type of output voltage	DC
• for signal "1", min.	23.2 V; 2L+ (-0,8 V)
Output current	
• for signal "1" rated value	0.5 A
• for signal "0" residual current, max.	0.5 mA
Parallel switching of two outputs	
• for uprating	No
Switching frequency	
• with resistive load, max.	10 kHz
• with inductive load, max.	0.5 Hz; According to IEC 60947-5-1, DC-13
Total current of the outputs	
• Current per module, max.	2 A; Supply from 2L+
Encoder	
Encoder signals, incremental encoder (symmetrical)	
• Input voltage	RS 422
• Input frequency, max.	1 MHz
• Counting frequency, max.	4 MHz; with quadruple evaluation
• Cable length, shielded, max.	30 m
• Signal filter, parameterizable	Yes
• Incremental encoder with A/B tracks, 90° phase offset	Yes
• Incremental encoder with A/B tracks, 90° phase offset and zero track	Yes
• pulse encoder	Yes
• Pulse encoder with direction	Yes
• pulse encoder with one impulse signal per count direction	Yes
Encoder signals, incremental encoder (asymmetrical)	
• Input voltage	24 V
• Input frequency, max.	200 kHz
• Counting frequency, max.	800 kHz; with quadruple evaluation
• Cable length, shielded, max.	30 m
• Signal filter, parameterizable	Yes
• Incremental encoder with A/B tracks, 90° phase offset	Yes
• Incremental encoder with A/B tracks, 90° phase offset and zero track	Yes
• pulse encoder	Yes
• pulse encoder with direction	Yes
• pulse encoder with one impulse signal per count direction	Yes
Encoder signals, absolute encoder (SSI)	
• Input signal	to RS-422
• Telegram length, parameterizable	10 ... 40 bit
• Clock frequency, max.	2 MHz; 125 kHz, 250 kHz, 500 kHz, 1 MHz, 1.5 MHz or 2 MHz
• Binary code	Yes
• Gray code	Yes
• Cable length, shielded, max.	30 m; Up to 500 kHz
• Parity bit, parameterizable	Yes

Technical specifications (continued)

Article number	6ES7147-6AB00-0BB0 ET 200eco PN, TM PosInput 2, M12-L
• Monoflop time	16, 32, 48, 64 µs & automatic
• Multiturn	Yes
• Singleturn	Yes
Interfaces	
Transmission procedure	100BASE-TX
Number of PROFINET interfaces	1
1. Interface	
Interface type	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
Interface types	
• M12 port	Yes; 2x M12, 4-pin, D-coded
• Number of ports	2
• integrated switch	Yes
Protocols	
• PROFINET IO device	Yes
• Open IE communication	Yes
PROFINET IO Device	
- Services	
- IRT	Yes; 500 µs to 4 ms at an interval of 125 µs
- Prioritized startup	Yes
- Shared device	Yes
- Number of IO Controllers with shared device, max.	2
Interface types	
M12 port	
• Autonegotiation	Yes
• Autocrossing	Yes
• Transmission rate, max.	100 Mbit/s
Protocols	
Supports protocol for PROFINET IO	Yes
PROFIsafe	No
EtherNet/IP	Yes
Modbus TCP	Yes
Redundancy mode	
• PROFINET system redundancy (S2)	Yes
• PROFINET system redundancy (R1)	No
• H-Sync forwarding	Yes
- Media redundancy	
- MRP	Yes
- MRPD	No
EtherNet/IP	
- Services	
- CIP Implicit Messaging	Yes
- CIP Explicit Messaging	Yes
- CIP Safety	No
- Shared device	Yes; 2x EtherNet/IP Scanner
- Number of scanners with shared device, max.	2
- Updating times	
- Requested Packet Interval (RPI)	2 ms
- Address area	
- Address space per module, max.	32 byte
- LargeForwardOpen (Class3)	No
Modbus TCP	
- Services	
- read coils (code=1)	Yes
- read discrete inputs (code=2)	Yes
- Read Holding Registers (Code=3)	Yes

Technical specifications (continued)

Article number	6ES7147-6AB00-0BB0 ET 200eco PN, TM PosInput 2, M12-L
- write single coil (code=5)	Yes
- write multiple coils (code=15)	Yes
- Write Multiple Registers (Code=16)	Yes
- Parameter change by master	No
- Modbus TCP Security Protocol	No
- Address space per station	
- Address space per station, max.	32 byte
- Access-consistent address space	2 byte
- Updating time	
- I/O request interval	2 ms
- Connections	
- number of connections per device	12
Open IE communication	
• TCP/IP	Yes; (only EtherNet/IP or Modbus TCP)
• SNMP	Yes
• LLDP	Yes
• ARP	Yes
Isochronous mode	
Equidistance	Yes
shortest clock pulse	500 µs
max. cycle	4 ms
Interrupts/diagnostics/status information	
Substitute values connectable	Yes
Alarms	
• Diagnostic alarm	Yes; Parameterizable
• Maintenance interrupt	Yes; Parameterizable
• Hardware interrupt	No
Diagnoses	
• Diagnostic information readable	Yes
• Monitoring the supply voltage	Yes
- Parameterizable	Yes
• Wire break	Yes
• short-circuit	Yes
• Short-circuit encoder supply	Yes
• A/B transition error at incremental encoder	Yes
• Telegram error at SSI encoder	Yes
Diagnostics indication LED	
• RUN LED	Yes; green LED
• ERROR LED	Yes; red LED
• MAINT LED	Yes; Yellow LED
• NS LED	Yes; green/red LED
• MS LED	Yes; green/red LED
• IO LED	Yes; red/green/yellow LEDs
• Channel status display	Yes; green LED
• for channel diagnostics	Yes; red LED
• For load voltage monitoring	Yes; green LED
• Connection display LINK TX/RX	Yes; green LED, only link
Integrated Functions	
Counter	Yes
• Number of counters	2
• Counting frequency, max.	4 MHz; with quadruple evaluation
Fast mode	No
Counting functions	
• Can be used with TO High_Speed_Counter	Yes; only for pulse and incremental encoders
• Continuous counting	Yes

Overview

The ET 200eco PN fail-safe I/O device expands the ET 200eco PN system family. It is incorporated seamlessly into the Safety Integrated concept like with ET 200MP / ET 200SP and ET200pro. It also supports safety-related communication via PROFIsafe. The functional safety is certified in accordance with IEC 61508. It is designed for safety-related use up to SIL 3 according to IEC 62061 and PL e according to ISO 13849.

The following fail-safe I/O devices are available:

- F-DI 8x24 V /F-DQ 3x24 V 2 A with 2x M12 A-coded power connectors and 60 mm width
- F-DI 4x24 V DC + F-DQ 2x24 V DC/2 A PM + DIQ 4x24 V DC + CM 1xIO-Link with 2x M12 L-coded power connector and 45 mm width

Selection and ordering data

ET 200eco PN fail-safe digital input/output modules	
• 8 F-DI 24 V DC/3 F-DQ 24 V DC/2 A; PROFIsafe, certified up to SIL 3 (IEC 61508), PL e (ISO 13849); 4 x M12/3 x M12, degree of protection IP65/67	**6ES7146-6FF00-0AB0**
• 4 F-DI 24 V DC + 2 F-DQ 24 V DC/2 A PM + 4 DIQ 24 V DC + 1 CM IO-Link; PROFIsafe, certified up to SIL 3 (IEC 61508), PL e (ISO 13849); M12-L; incl. eCoding connector	**6ES7146-6FF00-0BB0**
Accessories	
• PD 24VDC power distributor; 1 x 7/8", 4 x M12	**6ES7148-6CB00-0AA0**
• Terminal block for ET 200eco PN, 10 A insulation displacement terminals	**6ES7194-6CA00-0AA0**
• Spare fuses for terminal block, 10 units	**6ES7194-6HB00-0AA0**
• Mounting rail 0.5 m	**6ES7194-6GA00-0AA0**
• Profile screw for mounting rail, 50 units	**6ES7194-6MA00-0AA0**
• Sealing cap M12 for IP67 modules, 12 mm outer diameter, without O-ring, 10 units	**3RX9802-0AA00**
• Sealing cap M12 for IP67 modules, 15 mm outer diameter, with O-ring, 10 units	**3RK1901-1KA00**
• Labels 10 mm x 7 mm yellow, for I/O devices with 2x M12 A-coded power connectors; 17 frames with 48 labels each	**6ES7194-6HA00-0AA0**
PROFINET M12 connection plug, for user assembly	
Connector for PROFINET, 4-core, shielded	**3RK1902-2DA00**
IE M12 plug PRO connector	
• 1 unit	**6GK1901-0DB10-6AA0**
• 8 units	**6GK1901-0DB10-6AA8**
IE FC M12 plug PRO connector, for user assembly	
• 1 unit	**6GK1901-0DB20-6AA0**
• 8 units	**6GK1901-0DB20-6AA8**
M12 connection plug for 24 V DC load power supply	
Connection socket for 24 V DC infeed; 4-pin, A-coded, 3 units	**6GK1907-0DC10-6AA3**
Connector for loop-through of 24 V DC; 4-pin, A-coded, 3 units	**6GK1907-0DB10-6AA3**
M12 circular connector	
Can be assembled, for connecting actuators or sensors, 5-pin, screw terminal, max. 0.75 mm², A-coded, max. 4 A	
• Straight	**3RK1902-4BA00-5AA0**
• Angled	**3RK1902-4DA00-5AA0**
M12 coupling socket	**3RK1902-4CA00-4AA0**
4-pin, screw terminal, max. 0.75 mm², A-coded, max. 4 A, angled	
PROFINET bus cable	
Preassembled on one side with 1 x M12, D-coded, 4-wire, shielded	
• 3 m	**3RK1902-2HB30**
• 5 m	**3RK1902-2HB50**
• 10 m	**3RK1902-2HC10**
M12-90/M12-90 IE connecting cable	
Preassembled IE FC TP trailing cable GP 2 x 2 (PROFINET type C) with two 4-pin M12 plugs (D-coded) up to 85 m, degree of protection IP65/IP67, 90° cable outlet	
Length:	
• 0.3 m	**6XV1870-8GE30**

© Siemens AG 2026

Selection and ordering data (continued)

• 0.5 m	**6XV1870-8GE50**
• 1.0 m	**6XV1870-8GH10**
• 1.5 m	**6XV1870-8GH15**
• 2.0 m	**6XV1870-8GH20**
• 3.0 m	**6XV1870-8GH30**
• 5.0 m	**6XV1870-8GH50**
• 10 m	**6XV1870-8GN10**
• 15 m	**6XV1870-8GN15**
M12-180/IE FC RJ45 plug-145 IE connecting cable Preassembled IE FC TP trailing cable GP 2 x 2 (PROFINET type C) with M12 plug (D-coded) and IE FC RJ45 plug, degree of protection IP65/IP67 Length:	
• 2.0 m	**6XV1871-5TH20**
• 3.0 m	**6XV1871-5TH30**
• 5.0 m	**6XV1871-5TH50**
• 10 m	**6XV1871-5TN10**
• 15 m	**6XV1871-5TN15**
M12-180/M12-180 IE robust connecting cable Preassembled IE FC TP robust food cable 2 x 2 (PROFINET type C) with two 4-pin M12 plugs (D-coded), degree of protection IP69 Length:	
• 1.0 m	**6XV1881-5AH10**
• 2.0 m	**6XV1881-5AH20**
• 3.0 m	**6XV1881-5AH30**
• 5.0 m	**6XV1881-5AH50**
M12 Y-cable	
For connection of single-channel sensors (1oo1 evaluation), 5-pin	**6ES7194-6KB00-0XA0**
For joint connection of an F-DQ and an F-DI channel by means of an 8-pin M12 socket	**6ES7194-6KC00-0XA0**
E-coding plug (metal) for fail-safe ET 200 distributed I/O, IP65/IP67	**6ES7194-6KB01-0AA0**
Control line Preassembled on one side with 1 x M12 plug angled, 5-pin, 5 x 0.34 mm², A-coded, max. 4 A, PUR casing, black	
• 1.5 m	**3RK1902-4HB15-5AA0**
• 5 m	**3RK1902-4HB50-5AA0**
• 10 m	**3RK1902-4HC01-5AA0**
Preassembled, 1 x M12 cable box straight, 1 x M12 plug, 3 x 0.34 mm², A-coded, max. 4 A, PUR casing, black	**3RK1902-4PB15-3AA0**
IO-Link connecting cables Between IO-Link master and reader, on both sides with M12 plug, 4-pin	
• 5 m	**6GT2891-4MH50**
• 10 m	**6GT2891-4MN10**
M12-90/M12-90 M12 power connecting cable Flexible 4-core power connecting cable, preassembled with A-coded, 5-pin M12 plug and A-coded, 5-pin M12 socket to supply the ET 200 with 24 V DC; 90° cable outlet Length:	
• 0.3 m	**6XV1801-5GE30**
• 0.5 m	**6XV1801-5GE50**
• 1.0 m	**6XV1801-5GH10**

Selection and ordering data (continued)

• 1.5 m	**6XV1801-5GH15**
• 2.0 m	**6XV1801-5GH20**
• 3.0 m	**6XV1801-5GH30**
• 5.0 m	**6XV1801-5GH50**
• 10 m	**6XV1801-5GN10**

Technical specifications

Article number	6ES7146-6FF00-0AB0 ET 200eco PN, F-DI 8x24V /F-DQ 3x24V 2A	6ES7146-6FF00-0BB0 ET 200eco PN, F-DI+F-DQ+DIQ+IOL, M12-L
General information		
Product function		
• Isochronous mode	No	No
• IRT	No; module will participate within an IRT topology	No; module will participate within an IRT topology
• Fast startup	No	No
• Prioritized startup	No	No
Engineering with		
• STEP 7 TIA Portal configurable/integrated from version	V15 with HSP 204	STEP 7 V20 or higher with HSP0468
• PROFINET from GSD version/GSD revision	GSDML V2.34	GSDML V2.43 2025.05
Operating mode		
• DI	Yes	Yes
• Counter		No
• DQ	Yes	Yes
• MSI		No
• MSO		No
Supply voltage		
Rated value (DC)	24 V	24 V
Reverse polarity protection	Yes	Yes
Load voltage 1L+		
• Rated value (DC)	24 V	24 V
• Reverse polarity protection	Yes	Yes; Against destruction; encoder power supply outputs applied with reversed polarity
Load voltage 2L+		
• Rated value (DC)	24 V	24 V
• Reverse polarity protection	Yes	Yes; against destruction
Input current		
Current consumption (rated value)		100 mA 1L+ without load; 45 mA 2L+ without load
Current consumption, typ.	200 mA	
from supply voltage 1L+, max.	4 A	
from load voltage 1L+ (unswitched voltage)		12 A; Maximum value
from load voltage 2L+, max.	4 A	12 A; Maximum value
Encoder supply		
Number of outputs	2; Vs	6; Us0, Us1, Vs0 - Vs3
Actuator supply		
Number of outputs		3; Us2 - Us4
Digital inputs		
Number of digital inputs	8; 8 (one-channel); 4 (two-channel)	4 single-channel F-DI (SIL2) parameterizable as 2 two-channel (SIL3); 4 parameterizable as DIQ
Digital inputs, parameterizable	Yes	Yes
Sourcing/sinking input		P-reading
Input characteristic curve in accordance with IEC 61131, type 1	Yes	Yes; F-DI
Input characteristic curve in accordance with IEC 61131, type 3		Yes; DIQ
Number of simultaneously controllable inputs		
- all mounting positions		
- up to 60 °C, max.	8	8
Input voltage		
• Rated value (DC)	24 V	24 V
• for signal "0"	-30 V DC to +5 V DC	-3 to +5V
• for signal "1"	15 V DC to 30 V DC	+15 to +30 V F-DI; +11 to +30 V DIQ
Input current		
• for signal "1", typ.		3 to 6 mA F-DI; 2.5 mA DIQ
Input delay (for rated value of input voltage)		
- for standard inputs

Technical specifications (continued)

Article number	6ES7146-6FF00-0AB0 ET 200eco PN, F-DI 8x24V /F-DQ 3x24V 2A	6ES7146-6FF00-0BB0 ET 200eco PN, F-DI+F-DQ+DIQ+IOL, M12-L
- Parameterizable	Yes; 0.8 / 1.6 / 3.2 / 6.4 / 12.8 ms	Yes; 0.8 / 1.6 / 3.2 / 6.4 / 12.8 ms F-DI; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms DIQ
Digital outputs		
Number of digital outputs	3	7; 2 F-DQ; 1 parameterizable F-DQ or IO-LINK Class B (with or without safety-shutdown); 4 parameterizable as DIQ
• in groups of	3	3 F-DQ (2L+); 4 DIQ (1L+)
Short-circuit protection	Yes; Electronic	Yes; per channel, electronic
Limitation of inductive shutdown voltage to	PM-switching: Typ. -26 V to (-48 V)	Typ. -74 V (typ. -26 V P-switch; typ. +48 V M-switch) F-DQ; Typ. 1L+ (-70 V) DIQ
Controlling a digital input	No	No F-DQ; Yes DIQ
Switching capacity of the outputs		
• with resistive load, max.		2 A F-DQ; 0.5 A DIQ
• with inductive load, max.		2 A F-DQ; 0.5 A DIQ
• on lamp load, max.	10 W	10 W F-DQ; 5 W DIQ
Load resistance range		
• lower limit		12 Ohm F-DQ; 48 Ohm DIQ
• upper limit		2 kOhm F-DQ; 4 kOhm DIQ
Output voltage		
• for signal "1", min.		2L+ (-2 V) F-DQ (2L+ (-1.5 V) P-switch; 0.5 V M-switch); 1L+ (-0.8 V) DIQ
Output current		
• for signal "1" rated value	2 A	2 A F-DQ; 0.5 A DIQ
• for signal "0" residual current, max.	0.5 mA	0.5 mA F-DQ; 0.1 mA DIQ
Parallel switching of two outputs		
• for uprating	No	No
• for redundant control of a load	No	No F-DQ; Yes DIQ
Switching frequency		
• with resistive load, max.	30 Hz	30 Hz F-DQ; 100 Hz DIQ
• with inductive load, max.	0.1 Hz	0.1 Hz F-DQ; 0.5 Hz DIQ
• on lamp load, max.	10 Hz	30 Hz F-DQ; 100 Hz DIQ
Total current of the outputs (per group)		
- all mounting positions		
- up to 60 °C, max.	3.9 A	
Encoder		
Connectable encoders		
• 2-wire sensor	No	No F-DI; Yes DIQ
- permissible quiescent current (2-wire sensor), max.	0.5 mA	0.5 mA F-DI; 1.5 mA DIQ
IO-Link		
Number of ports		1
IO-Link protocol 1.0		Yes
IO-Link protocol 1.1		Yes
Transmission rate		4.8 kBd (COM1); 38.4 kBd (COM2)
Cycle time, min.		2 ms
Size of process data, input per port		33 byte
Size of process data, input per module		33 byte
Size of process data, output per port		32 byte
Size of process data, output per module		32 byte
Memory size for device parameter		2 kbyte
Master backup		Possible with function block IO_LINK_MASTER
Configuration without S7-PCT		Possible; autostart/manual function
Cable length unshielded, max.		20 m
Connection of IO-Link devices		
• Port type A		Yes; via 3-core cable

Article number	6ES7146-6FF00-0AB0 ET 200eco PN, F-DI 8x24V /F-DQ 3x24V 2A	6ES7146-6FF00-0BB0 ET 200eco PN, F-DI+F-DQ+DIQ+IOL, M12-L
• Port type B		Yes; additional device supply: max. 2 A; also available with integrated Safety Shutdown via F-DQ 2
Interfaces		
Transmission procedure	100BASE-TX	
Number of PROFINET interfaces	1	1
1. Interface		
Interface type		PROFINET with 100 Mbit/s full duplex (100BASE-TX)
Interface types		
• M12 port	Yes	Yes; 2x M12, 4-pin, D-coded
• Number of ports		2
• integrated switch	Yes	Yes
Protocols		
• PROFINET IO device	Yes	Yes
• Open IE communication	No	Yes
PROFINET IO Device		
- Services		
- IRT	No; module will participate within an IRT topology	No; module will participate within an IRT topology
- Prioritized startup	No	No
- Shared device	No	Yes
- Number of IO Controllers with shared device, max.		2
Interface types		
M12 port		
• Autonegotiation	Yes	Yes
• Autocrossing	Yes	Yes
• Transmission rate, max.	100 Mbit/s	100 Mbit/s
Protocols		
Supports protocol for PROFINET IO	Yes	Yes
PROFINET CBA	No	
PROFIsafe	Yes	Yes
EtherNet/IP	No	No
Modbus TCP	No	No
Redundancy mode		
• PROFINET system redundancy (S2)	Yes	Yes
• PROFINET system redundancy (R1)	No	No
• H-Sync forwarding	No	No
- Media redundancy		
- MRP	Yes	Yes
- MRPD	No	
Open IE communication		
• TCP/IP	No	No
• SNMP	Yes	Yes
• DCP	Yes	Yes
• LLDP	Yes	Yes
• ping	Yes	Yes
• ARP	Yes	Yes
Interrupts/diagnostics/status information		
Diagnostics function	Yes	
Substitute values connectable		Yes
Alarms		
• Diagnostic alarm	Yes	Yes; Parameterizable
• Maintenance interrupt		Yes; Parameterizable
• Hardware interrupt		Yes; Parameterizable

Diagnoses		
• Diagnostic information readable	Yes	Yes
• Monitoring the supply voltage	Yes; green "ON" LED	Yes
- Parameterizable		Yes
• Wire break		Yes; DI, input current < 0.3 mA, per channel
• Wire-break in actuator cable	Yes	Yes
• Wire-break in signal transmitter cable	Yes	
• short-circuit	Yes	Yes; F-DI, F-DQ, DIQ as output, encoder supply
• Short-circuit encoder supply	Yes	
• Group error	Yes; Red/yellow "SF/MT" LED	
Diagnostics indication LED		
• RUN LED		Yes; green LED
• ERROR LED		Yes; red LED
• MAINT LED		Yes; Yellow LED
• Monitoring of the supply voltage (PWR-LED)		Yes; green LED
• NS LED		No
• MS LED		No
• IO LED		Yes; red/green/yellow LEDs
• Channel status display		Yes; green LED
• for channel diagnostics		Yes; red LED
• For load voltage monitoring		Yes; green LED
• Connection display LINK TX/RX		Yes; green LED, only link
Potential separation		
between the load voltages	Yes	Yes
between load voltage and all other switching components	No	
between Ethernet and electronics	Yes	Yes
Potential separation channels		
• between the channels	No	Yes
• between the channels and the power supply of the electronics		4 F-DI / 4 DIQ / 1 IO-LINK are non-isolated and 3 F-DQ are isolated from supply voltage 1L+
Degree and class of protection		
IP degree of protection	IP65/67	IP65/67/69K
Standards, approvals, certificates		
Suitable for safety-related tripping of standard modules	No	No
Use in hazardous areas		
• Explosion protection category for gas		ATEX, UKEX, IECEx, CCCEx for Zone 2
• Explosion protection category for dust		ATEX, UKEX, IECEx, CCCEx for Zone 22
Security		
signed firmware update		Yes
safely removing data		Yes
Ambient conditions		
Ambient temperature during operation		
• min.	-25 °C	-25 °C
• max.	60 °C	60 °C
Altitude during operation relating to sea level		
• Ambient air temperature-barometric pressure-altitude		Up to max. 5 000 m, at installation height > 2 000 m additional restrictions
Connection method		
Design of electrical connection	4/5-pin M12 circular connectors	4/5-pin M12 circular connectors
Design of electrical connection for the inputs and outputs		M12, 5-pin, A-coded
Design of electrical connection for supply voltage		M12, 4-pin, L-coded
Dimensions		
Width	60 mm	45 mm

Overview

IO-Link master with 2x M12 L-coded power connectors and 45 mm width

- IO-Link communication modules for connecting up to 8 IO-Link devices
- Options: IO-Link master
  - with 4x Class A port and 4x Class B port as well as additional 4 digital inputs,
  - with 4x Port Class A and additional 12 digital inputs/outputs or
  - with 8x Port Class A and additional 8 digital inputs/outputs.
- The IO-Link specifications V1.0 and V1.1 are supported

IO-Link master with 2x M12 A-coded power connectors and 30 mm width

- IO-Link communication modules for connecting up to 4 IO-Link devices
- IO-Link master with 4x Class B port
- The IO-Link specifications V1.0 and V1.1 are supported

Overview (continued)

IO-Link master with 2x M12 A-coded power connectors and 60 mm width

- IO-Link communication modules for connecting up to 4 IO-Link devices
- IO-Link master with 4x Class A port and additional 8 digital inputs and 4 digital outputs
- The IO-Link specification V1.0 is supported

Selection and ordering data

ET 200eco PN IO-Link master	
• 8 IO-L + 4 DI 24 V DC; 8 x M12, degree of protection IP67, enclosure width 45 mm; for connecting up to 8 IO-Link devices according to IO-Link specification V1.0 and V1.1, 4x Class A port and 4 x Class B port, as well as 4 additional digital inputs	**6ES7148-6JG00-0BB0**
• 8 IO-L + 8 DIQ 24 V DC; 8 x M12, degree of protection IP67, enclosure width 45 mm; for connecting up to 8 IO-Link devices according to IO-Link specification V1.0 and V1.1, 8x Class A ports, as well as 8 additional digital inputs/outputs	**6ES7148-6JJ00-0BB0**
• 4 IO-L + 12 DIQ 24 V DC; 8 x M12, degree of protection IP67, enclosure width 45 mm; for connecting up to 4 IO-Link devices according to IO-Link specification V1.0 and V1.1, 4x Class A ports, as well as 12 additional digital inputs/outputs	**6ES7148-6JE00-0BB0**
Accessories	
• PD 24VDC power distributor; 1 x 7/8", 4 x M12	**6ES7148-6CB00-0AA0**
• Terminal block for ET 200eco PN, 10 A insulation displacement terminals	**6ES7194-6CA00-0AA0**
• Spare fuses for terminal block, 10 units	**6ES7194-6HB00-0AA0**
• Mounting rail 0.5 m	**6ES7194-6GA00-0AA0**
• Profile screw for mounting rail, 50 units	**6ES7194-6MA00-0AA0**
• Sealing cap M12 for IP67 modules, 12 mm outer diameter, without O-ring, 10 units	**3RX9802-0AA00**
• Sealing cap M12 for IP67 modules, 15 mm outer diameter, with O-ring, 10 units	**3RK1901-1KA00**
• Labels 10 mm x 5 mm RAL9016, for I/O devices with 2x M12 L-coded power connectors; 5 frames with 40 labels each	**6ES7194-2BA00-0AA0**
• Labels 10 mm x 7 mm Ti-grey, for I/O devices with 2x M12 A-coded power connectors; 5 frames with 40 labels each	**3RT2900-1SB10**
PROFINET M12 connection plug, for user assembly	
Connector for PROFINET, 4-core, shielded	**3RK1902-2DA00**
IE M12 plug PRO connector	
• 1 unit	**6GK1901-0DB10-6AA0**
• 8 units	**6GK1901-0DB10-6AA8**
IE FC M12 plug PRO connector, for user assembly	
• 1 unit	**6GK1901-0DB20-6AA0**
• 8 units	**6GK1901-0DB20-6AA8**
M12 connection plug for 24 V DC load power supply	
Connection socket for 24 V DC infeed; 4-pin, A-coded, 3 units	**6GK1907-0DC10-6AA3**
Connector for loop-through of 24 V DC; 4-pin, A-coded, 3 units	**6GK1907-0DB10-6AA3**
M12 circular connector	
Can be assembled, for connecting actuators or sensors, 5-pin, screw terminal, max. 0.75 mm², A-coded, max. 4 A	
• Straight	**3RK1902-4BA00-5AA0**
• Angled	**3RK1902-4DA00-5AA0**
M12 coupling socket	**3RK1902-4CA00-4AA0**
4-pin, screw terminal, max. 0.75 mm², A-coded, max. 4 A, angled	
PROFINET bus cable	
Preassembled on one side with 1 x M12, D-coded, 4-wire, shielded	
• 3 m	**3RK1902-2HB30**
• 5 m	**3RK1902-2HB50**
• 10 m	**3RK1902-2HC10**
M12-90/M12-90 IE connecting cable	
Preassembled IE FC TP trailing cable GP 2 x 2 (PROFINET type C) with two 4-pin M12 plugs (D-coded) up to 85 m, degree of protection IP65/IP67, 90° cable outlet	
Length:	
• 0.3 m	**6XV1870-8GE30**
• 0.5 m	**6XV1870-8GE50**
• 1.0 m	**6XV1870-8GH10**
• 1.5 m	**6XV1870-8GH15**
• 2.0 m	**6XV1870-8GH20**
• 3.0 m	**6XV1870-8GH30**
• 5.0 m	**6XV1870-8GH50**
• 10 m	**6XV1870-8GN10**
• 15 m	**6XV1870-8GN15**
M12-180/IE FC RJ45 plug-145 IE connecting cable	
Preassembled IE FC TP trailing cable GP 2 x 2 (PROFINET type C) with M12 plug (D-coded) and IE FC RJ45 plug, degree of protection IP65/IP67	
Length:	
• 2.0 m	**6XV1871-5TH20**
• 3.0 m	**6XV1871-5TH30**
• 5.0 m	**6XV1871-5TH50**
• 10 m	**6XV1871-5TN10**
• 15 m	**6XV1871-5TN15**
M12-180/M12-180 IE robust connecting cable	
Preassembled IE FC TP robust food cable 2 x 2 (PROFINET type C) with two 4-pin M12 plugs (D-coded), degree of protection IP69	
Length:	
• 1.0 m	**6XV1881-5AH10**
• 2.0 m	**6XV1881-5AH20**
• 3.0 m	**6XV1881-5AH30**
• 5.0 m	**6XV1881-5AH50**
M12 Y-cable	
For double connection of I/O by means of a single cable to ET 200, 5-pin	**6ES7194-6KA00-0XA0**
Control line	
Preassembled on one side with 1 x M12 plug angled, 5-pin, 5 x 0.34 mm², A-coded, max. 4 A, PUR casing, black	
• 1.5 m	**3RK1902-4HB15-5AA0**
• 5 m	**3RK1902-4HB50-5AA0**
• 10 m	**3RK1902-4HC01-5AA0**
Preassembled, 1 x M12 cable box straight, 1 x M12 plug, 3 x 0.34 mm², A-coded, max. 4 A, PUR casing, black	**3RK1902-4PB15-3AA0**
IO-Link connecting cables	
Between IO-Link master and reader, on both sides with M12 plug, 4-pin	
• 5 m	**6GT2891-4MH50**
• 10 m	**6GT2891-4MN10**

Technical specifications

Article number	6ES7148-6JG00-0BB0 ET 200eco PN, CM 8x IO-Link, M12-L
General information	
Product function	
• Isochronous mode	No
• IRT	Yes
• Prioritized startup	Yes
Engineering with	
• STEP 7 TIA Portal configurable/integrated from version	STEP 7 V17 or higher with HSP 0363
• PROFINET from GSD version/GSD revision	GSDML V2.4.x
• Multi Fieldbus Configuration Tool (MFCT)	from V1.3 SP1
Operating mode	
• IO-Link	Yes
• DI	Yes
• DQ	No
• MSI	No
• MSO	No
Supply voltage	
Load voltage 1L+	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction
Load voltage 2L+	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; Against destruction; encoder power supply outputs applied with reversed polarity
Input current	
Current consumption (rated value)	70 mA; without load
from load voltage 1L+ (unswitched voltage)	12 A; Maximum value
from load voltage 2L+, max.	12 A; Maximum value
Encoder supply	
Number of outputs	8
Digital inputs	
Number of digital inputs	4
Sourcing/sinking input	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes
Number of simultaneously controllable inputs	
- all mounting positions	
- up to 60 °C, max.	4
Input voltage	
• Rated value (DC)	24 V
• for signal "0"	-3 to +5V
• for signal "1"	+11 to +30V
Input current	
• for signal "1", typ.	2.5 mA
IO-Link	
Number of ports	8
• of which simultaneously controllable	8
IO-Link protocol 1.0	Yes
IO-Link protocol 1.1	Yes
Transmission rate	4.8 kBaud (COM1); 38.4 kBaud (COM2), 230 kBaud (COM3)
Cycle time, min.	2 ms
Size of process data, input per port	33 byte
Size of process data, input per module	264 byte
Size of process data, output per port	32 byte
Size of process data, output per module	256 byte
Memory size for device parameter	2 kbyte; for each port
Master backup	possible with LIOLink_Master function block
Configuration without S7-PCT	Possible; autostart/manual function

© Siemens AG 2026

Technical specifications (continued)

Article number	6ES7148-6JG00-0BB0 ET 200eco PN, CM 8x IO-Link, M12-L
Cable length unshielded, max.	20 m
Operating modes	
• IO-Link	Yes
• DI	Yes
• DQ	Yes; max. 100 mA
Connection of IO-Link devices	
• Port type A	Yes; via 3-core cable
• Port type B	Yes; additional device supply: max. 2 A per port, max. 6 A per module
• via three-wire connection	Yes
Interfaces	
Transmission procedure	100BASE-TX
Number of PROFINET interfaces	1
1. Interface	
Interface type	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
Interface types	
• M12 port	Yes; 2x M12, 4-pin, D-coded
• Number of ports	2
• integrated switch	Yes
Protocols	
• PROFINET IO Device	Yes
• Open IE communication	Yes
PROFINET IO Device	
- Services	
- IRT	Yes; 250 µs to 4 ms in 125 µs frame
- Prioritized startup	Yes
- Shared device	Yes
- Number of IO Controllers with shared device, max.	2
Interface types	
M12 port	
• Autonegotiation	Yes
• Autocrossing	Yes
• Transmission rate, max.	100 Mbit/s
Protocols	
Supports protocol for PROFINET IO	Yes
PROFIsafe	No
EtherNet/IP	Yes
Modbus TCP	Yes
Redundancy mode	
• PROFINET system redundancy (S2)	Yes
• PROFINET system redundancy (R1)	No
• H-Sync forwarding	Yes
- Media redundancy	
- MRP	Yes
- MRPD	No
EtherNet/IP	
- Services	
- CIP Implicit Messaging	Yes
- CIP Explicit Messaging	Yes
- CIP Safety	No
- Shared device	Yes; 2x EtherNet/IP Scanner
- Number of scanners with shared device, max.	2
- Updating times	
- Requested Packet Interval (RPI)	2 ms
- Redundancy mode

Technical specifications (continued)

Article number	6ES7148-6JG00-0BB0 ET 200eco PN, CM 8x IO-Link, M12-L
- DLR (Device Level Ring)	No
- Address area	
- Address space per module, max.	300 byte
- LargeForwardOpen (Class3)	No
Modbus TCP	
- Services	
- read coils (code=1)	Yes
- read discrete inputs (code=2)	Yes
- Read Holding Registers (Code=3)	Yes
- write single coil (code=5)	Yes
- write multiple coils (code=15)	Yes
- Write Multiple Registers (Code=16)	Yes
- Parameter change by master	No
- Modbus TCP Security Protocol	No
- Address space per station	
- Address space per station, max.	300 byte
- Access-consistent address space	2 byte
- Updating time	
- I/O request interval	2 ms
- Connections	
- number of connections per device	12
Open IE communication	
• TCP/IP	Yes; (only EtherNet/IP or Modbus TCP)
• SNMP	Yes
• LLDP	Yes
• ARP	Yes
Interrupts/diagnostics/status information	
Alarms	
• Diagnostic alarm	Yes; Parameterizable
• Maintenance interrupt	Yes; Parameterizable
Diagnoses	
• Diagnostic information readable	Yes
• Monitoring the supply voltage	Yes
- Parameterizable	Yes
• Wire break	Yes
• Short-circuit encoder supply	Yes; Per channel
Diagnostics indication LED	
• RUN LED	Yes; green LED
• ERROR LED	Yes; red LED
• MAINT LED	Yes; Yellow LED
• Monitoring of the supply voltage (PWR-LED)	Yes; green LED
• NS LED	Yes; green/red LED
• MS LED	Yes; green/red LED
• IO LED	Yes; red/green/yellow LEDs
• Channel status display	Yes; green LED
• for channel diagnostics	Yes; red LED
• For load voltage monitoring	Yes; green LED
• Connection display LINK TX/RX	Yes; green LED, only link
Potential separation	
between the load voltages	Yes
between Ethernet and electronics	Yes
Potential separation channels	
• between the channels	No
• between the channels and the power supply of the electronics	No

Technical specifications (continued)

Article number	6ES7148-6JG00-0BB0 ET 200eco PN, CM 8x IO-Link, M12-L
Degree and class of protection	
IP degree of protection	IP65/67/69K
Standards, approvals, certificates	
Suitable for safety-related tripping of standard modules	Yes; from FS01
Highest safety class achievable for safety-related tripping of standard modules	
• Performance level according to ISO 13849-1	PL d
• Category according to ISO 13849-1	Cat. 3
• SIL acc. to IEC 62061	SIL 2
Use in hazardous areas	
• Explosion protection category for gas	ATEX, UKEX, IECEx, CCCEx for Zone 2
• Explosion protection category for dust	ATEX, UKEX, IECEx, CCCEx for Zone 22
Security	
signed firmware update	Yes
safely removing data	Yes
Ambient conditions	
Ambient temperature during operation	
• min.	-40 °C
• max.	60 °C
Altitude during operation relating to sea level	
• Ambient air temperature-barometric pressure-altitude	Up to max. 5 000 m, at installation height > 2 000 m additional restrictions, see manual for details
Connection method	
Design of electrical connection	4/5-pin M12 circular connectors
Design of electrical connection for the inputs and outputs	M12, 5-pin, A-coded
Design of electrical connection for supply voltage	M12, 4-pin, L-coded
Dimensions	
Width	45 mm
Height	200 mm
Depth	48 mm
Weights	
Weight, approx.	780 g

Overview

- Aluminum mounting rail for installation of SIMATIC ET 200eco PN
- Securing the I/O devices via two profile screws
- Length of mounting rail 0.5 m

Selection and ordering data

Mounting rail for ET 200eco PN Length 0.5 m	**6ES7194-6GA00-0AA0**
Profile screw for mounting rail For fixing the I/O devices on the mounting rail; 50 units	**6ES7194-6MA00-0AA0**

Technical specifications

Article number	**6ES7194-6GA00-0AA0** **Mounting BAR for ET200eco PN**
Dimensions	
Width	500 mm
Height	203 mm
Depth	20 mm
Weights	
Weight, approx.	2.06 kg

Overview

- Stainless steel connector cover for ET 200ecoPN M12-L
- Optional use in hazardous area zone 2 / 22
- Can be used as protection against shocks and unintentional disconnection of cables

Selection and ordering data

Stainless steel connector cover, For using ET 200eco PN M12-L in hazardous area zone 2 / 22	**6ES7194-6JA00-0BB0**

Technical specifications

Article number	6ES7194-6JA00-0BB0 Connector cover for ET200ecoPN M12-L
General information	
Product type designation	connector cover
Product description	connector cover for ET200ecoPN M12-L
Suitability for use	accessories for use of the ET200ecoPN M12-L in hazardous area Zone 2/22
Degree and class of protection	
IP degree of protection	IP20
Ambient conditions	
Ambient temperature during assembly, min.	-40 °C
Ambient temperature during assembly, max.	80 °C
Ambient temperature during operation	
• min.	-40 °C
• max.	60 °C
Mechanics/material	
Material of housing	stainless steel with plastic edge protection
Material property	
• Silicone-free	Yes
Dimensions	
Width	50 mm
Height	200 mm
Depth	110 mm
Weights	
Weight, approx.	710 g

© Siemens AG 2026

Overview

- Compact I/O devices in hygienic design for processing digital and IO-Link signals
- For connection to bus systems with Ethernet-based protocols PROFINET, EtherNet/IP, and Modbus TCP
- Very robust and chemically resistant plastic enclosure in hygienic design
- Cabinet-free installation in degree of protection IP65/67/69K with M12 connection method
- Trapezoidal enclosure shape of the I/O devices:
  60/80 mm x 204 mm x 54 mm (W x H x D) with 8 x M12 for digital signals and IO-Link
- Range of ambient temperature -30 °C to 55 °C
- Operation on high-availability S7-1500 R/H or S7-400H controllers possible
- Channel-specific diagnostics
- Identification and maintenance data
- Firmware update
- Security functions
- QR code identification link (ID-Link) for unambiguous identification of the product
- I/O device variants:
  - DI 16x 24 V DC, 8x M12
  - DIQ 16x 24 V DC/0.5 A, 8x M12
  - CM 8x IO-Link + DIQ 4x 24 V DC, 8x M12

Overview

Digital I/O devices in hygienic design for connecting sensors/actuators:

- 16 digital input signals with 8 x M12 connection
- 16 digital input/output signals 0.5 A with 8 x M12 connection

Selection and ordering data

Digital input modules	
SIMATIC ET 200clean, DI 16x24 V DC 8x M12, dual assignment, input type 3 (IEC 61131), sinking input (PNP), input delay 0.05..20 ms, channel diagnostics for: wire break at the input, short-circuit encoder supply, 0.25 ms isochronous mode, MSI, MRP, S2 redundancy, I&M0...4, MultiFieldbus, PN IO, Ethernet IP, Modbus TCP, degree of protection IP69K	**6ES7141-7BH00-0BB0**
Digital input/output modules	
SIMATIC ET 200clean, DIQ 16x 24 V DC/0.5 A 8x M12, dual assignment, input type 3 (IEC 61131), sinking input (PNP), input delay 0.05..20 ms, sourcing output (PNP), substitute value output, channel diagnostics for: wire break at the input, short-circuit encoder supply, short-circuit at the output, MSI, MSO, MRP, S2 redundancy, I&M0...4, MultiFieldbus, PN IO, Ethernet IP, Modbus TCP, degree of protection IP69K	**6ES7143-7BH00-0BB0**

Technical specifications

Article number	6ES7141-7BH00-0BB0 ET 200clean, DI 16x24VDC
General information	
Product function	
• Isochronous mode	Yes
• IRT	Yes
• Prioritized startup	Yes
Engineering with	
• STEP 7 TIA Portal configurable/integrated from version	STEP 7 V19 or higher with HSP 0414
• PROFINET from GSD version/GSD revision	GSDML V2.4.x
• Multi Fieldbus Configuration Tool (MFCT)	V1.5.x or higher
Operating mode	
• DI	Yes
• Counter	No
• MSI	Yes
Supply voltage	
Load voltage 1L+	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; Against destruction; encoder power supply outputs applied with reversed polarity
Input current	
Current consumption (rated value)	85 mA; without load
from load voltage 1L+ (unswitched voltage)	12 A; Maximum value
from load voltage 2L+, max.	12 A; Maximum value
Encoder supply	
Number of outputs	8
Digital inputs	
Number of digital inputs	16
Digital inputs, parameterizable	Yes
Sourcing/sinking input	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes
Number of simultaneously controllable inputs	
- all mounting positions	
- up to 55 °C, max.	16
Input voltage	
• Rated value (DC)	24 V
• for signal "0"	-30 to +5 V
• for signal "1"	+11 to +30V
Input current	
• for signal "1", typ.	2.4 mA
Input delay (for rated value of input voltage)	
- for standard inputs	
- parameterizable	Yes; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms
Encoder	
Connectable encoders	
• 2-wire sensor	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA
Interfaces	
Number of PROFINET interfaces	1
1. Interface	
Interface type	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
Interface types	
• M12 port	Yes; 2x M12, 4-pin, D-coded
• Number of ports	2
• integrated switch	Yes
Protocols	
• PROFINET IO Device	Yes

© Siemens AG 2026

Technical specifications (continued)

Article number	6ES7141-7BH00-0BB0 ET 200clean, DI 16x24VDC
• Open IE communication	Yes
PROFINET IO Device	
- Services	
- IRT	Yes; 250 µs to 4 ms in 125 µs frame
- Prioritized startup	Yes
- Shared device	Yes
Interface types	
M12 port	
• Autonegotiation	Yes
• Autocrossing	Yes
• Transmission rate, max.	100 Mbit/s
Protocols	
Supports protocol for PROFINET IO	Yes
PROFIsafe	No
EtherNet/IP	Yes
Modbus TCP	Yes
Redundancy mode	
• PROFINET system redundancy (S2)	Yes
• PROFINET system redundancy (R1)	No
• H-Sync forwarding	Yes
- Media redundancy	
- MRP	Yes
- MRPD	No
EtherNet/IP	
- Services	
- CIP Implicit Messaging	Yes
- CIP Explicit Messaging	Yes
- CIP Safety	No
- Shared device	Yes; 2x EtherNet/IP Scanner
- Number of scanners with shared device, max.	2
- Updating times	
- Requested Packet Interval (RPI)	2 ms
- Redundancy mode	
- DLR (Device Level Ring)	No
- Address area	
- Address space per module, max.	20 byte
- LargeForwardOpen (Class3)	No
Modbus TCP	
- Services	
- read coils (code=1)	Yes
- read discrete inputs (code=2)	Yes
- Read Holding Registers (Code=3)	Yes
- write single coil (code=5)	Yes
- write multiple coils (code=15)	Yes
- Write Multiple Registers (Code=16)	Yes
- Parameter change by master	No
- Modbus TCP Security Protocol	No
- Address space per station	
- Address space per station, max.	20 byte
- Access-consistent address space	2 byte
- Updating time	
- I/O request interval	2 ms
- Connections	
- number of connections per device	12
Open IE communication

Technical specifications (continued)

Article number	6ES7141-7BH00-0BB0 ET 200clean, DI 16x24VDC
• TCP/IP	Yes; (only EtherNet/IP or Modbus TCP)
• SNMP	Yes
• LLDP	Yes
• ARP	Yes
Isochronous mode	
Equidistance	Yes
shortest clock pulse	250 µs
max. cycle	4 ms
Interrupts/diagnostics/status information	
Alarms	
• Diagnostic alarm	Yes; Parameterizable
• Maintenance interrupt	Yes; Parameterizable
• Hardware interrupt	Yes; Parameterizable
Diagnoses	
• Diagnostic information readable	Yes
• Monitoring the supply voltage	Yes
- Parameterizable	Yes
• Wire break	Yes; DI, input current < 0.3 mA, per channel
• Short-circuit encoder supply	Yes; Per channel group
Diagnostics indication LED	
• RUN LED	Yes; green LED
• ERROR LED	Yes; red LED
• MAINT LED	Yes; Yellow LED
• NS LED	Yes; green/red LED
• MS LED	Yes; green/red LED
• IO LED	Yes; red/green/yellow LEDs
• Channel status display	Yes; green LED
• for channel diagnostics	Yes; red LED
• Connection display LINK TX/RX	Yes; green LED, only link
Potential separation	
between the load voltages	Yes
between Ethernet and electronics	Yes
Potential separation channels	
• between the channels	No
• between the channels and the power supply of the electronics	No
Degree and class of protection	
IP degree of protection	IP65/67/69K
Standards, approvals, certificates	
Suitable for safety-related tripping of standard modules	Yes; from FS01
Highest safety class achievable for safety-related tripping of standard modules	
• Performance level according to ISO 13849-1	PL d
• Category according to ISO 13849-1	Cat. 3
• SIL acc. to IEC 62061	SIL 2
Security	
signed firmware update	Yes
safely removing data	Yes
Ambient conditions	
Ambient temperature during operation	
• min.	-30 °C
• max.	55 °C
Altitude during operation relating to sea level	
• Ambient air temperature-barometric pressure-altitude	Up to max. 5 000 m, at installation height > 2 000 m additional restrictions
Connection method	
Design of electrical connection	4/5-pin M12 circular connectors

Digital outputs	
Number of digital outputs	16; Parameterizable as DIQ
• in groups of	8; 2 load groups for 8 outputs each
Current-sourcing	Yes
output type acc. to IEC 61131, type 0.5	Yes
Short-circuit protection	Yes; per channel, electronic
Limitation of inductive shutdown voltage to	typ. L+ (-70 V)
Controlling a digital input	Yes
Switching capacity of the outputs	
• with resistive load, max.	0.5 A
• with inductive load, max.	0.5 A
• on lamp load, max.	5 W
Load resistance range	
• lower limit	48 Ω
• upper limit	4 kΩ
Output voltage	
• for signal "1", min.	1L+ (-0.8 V) / 2L+ (-0.8 V)
Output current	
• for signal "1" rated value	0.5 A
• for signal "0" residual current, max.	0.1 mA
Parallel switching of two outputs	
• for uprating	No
• for redundant control of a load	Yes
Switching frequency	
• with resistive load, max.	100 Hz
• with inductive load, max.	0.5 Hz
• on lamp load, max.	1 Hz
Total current of the outputs	
• Current per group, max.	4 A
• Current per module, max.	8 A
Encoder	
Connectable encoders	
• 2-wire sensor	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA

Overview

For use in systems with increased hygienic requirements, specific mounting accessories are available.

Material transitions and contact surfaces of the accessories are provided with a hygienic seal that prevents the accumulation of dirt, bacteria and other microorganisms when installed.

Sealing cap

Sealing cap M12 in hygienic design and with degree of protection IP69K, for sealing open M12 sockets of the ET 200clean I/O devices.

Fixing screw

Fixing screw M5x50mm as stainless steel version, for mounting the ET 200clean I/O devices on conductive surfaces.

Selection and ordering data

Sealing cap M12 for ET 200clean Plastic version, hygienic seal, for degree of protection IP69K, 10 units per packing unit	**6ES7194-7JA00-0AA0**
Fixing screw M5x50mm for ET 200clean Stainless steel version, hygienic seal, 10 units per packing unit	**6ES7194-7MA00-0AA0**

Overview

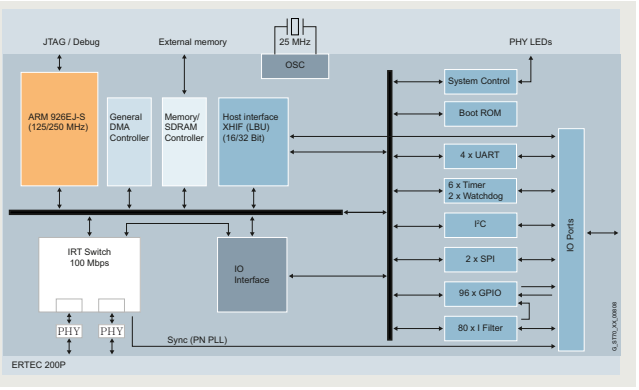
Innovative and well-proven

As a dedicated PI member, Siemens has been actively advancing the development of PROFINET from the beginning. Siemens technology components benefit from the accumulated know-how. They have been field-proven in countless products, provide maximum performance capability and can be scaled to exact requirements.

And that is not all. Siemens Competence Centers offer advice for choosing the right technology component for the device, training opportunities and support throughout the development process, up to and including successful certification.

ERTEC 200P-2 – Your path to the fastest PROFINET

The ERTEC 200P-2 (Enhanced Real-Time Controller) sets new standards for communication.
Designed for cycle times as low as 125 µs, the performance upgrade for PROFINET has been integrated in the ERTEC 200P-2. With its 250 MHz ARM9 CPU and integrated IRT (isochronous real-time) switch, field devices with demanding performance requirements can be implemented. The reduced chip size simplifies integration into compact field devices. The CPU also allows integration of a user's own applications, which makes an external host CPU unnecessary depending on the application.



Development kit for ERTEC 200P-2

The development kit includes an evaluation board with sample applications so that commissioning can be completed in minimum time. The PROFINET stack is delivered as source code and includes the eCos open source real-time operating system and all development tools, analysis programs and documentation. Field devices with RT (real-time) and IRT (isochronous real-time) can be implemented with the ERTEC ASICs. The integrated switch allows the construction of field devices with two ports.

Functions:

- Isochronous mode
- Shared device for 4 controllers
- S2 system redundancy
- PROFINET performance upgrade with a minimum cycle time of 125 µs.
- MRP/MRPD
- Regular, no-cost updates
- Current technology certificate

Overview (continued)

Internal structure of ERTEC 200P-2

Selection and ordering data

ERTEC 200P-2 ASIC for connection to switched Ethernet 100 Mbps, Ethernet controller with integrated 2-port switch, ARM 926 processor and integrated PHYs; recommended for new developments	
• 10 units (evaluation pack)	**6ES7195-0BH02-0XA0**
• 90 units (single tray)	**6ES7195-0BH12-0XA0**

PROFINET certification

For an efficient and successful development process, comprehensive consulting before the start of the development project is particularly important. The final step in field device development is certification. Siemens also offers you independent, accredited test labs for PROFINET, such as ComDeC in Germany, PIC in the USA, and ITEI in China, as well as a test lab in the Czech Republic.

Overview

With the development kits for PROFINET, compact or modular PROFINET field devices can be developed quickly and with little effort. Depending on the application, different development kits are available.

The development kits for the ASICs of the ERTEC family (Enhanced Real-Time Ethernet Controller) are suitable for the development of field devices with an integrated IRT switch (Isochronous Real-Time). The demand for real-time capability, linear topology capability, and for IT integration is therefore met perfectly.

With the help of the development kit for standard Ethernet controllers, PROFINET devices can be developed on the basis of a standard Ethernet controller. Devices with RT (Real-Time) can be implemented in the field device without special hardware.

The PROFIsafe starter kit permits the implementation of fail-safe devices. In so doing, the PROFIsafe stack applicatively builds on the PROFINET stack.

More information

More information is available on the internet under this link.

Licensing

All of the development kits contain a development license which authorizes the user to develop and test PROFINET devices on the basis of the stack provided.

For the production of series devices, one product line license with Article No. 6ES7195-3BC10-0YA0 must also be obtained for each product line.

For detailed information on the currently applicable licensing rules, contact our Competence Centers ComDeC and PIC.

Support

The competent and experienced staff at the PROFINET Competence Centers in Europe, China and the U.S. offer free telephone advice, as well as individual and agreed development and support on-site—from initial information all the way to conclusion of the development with certification.

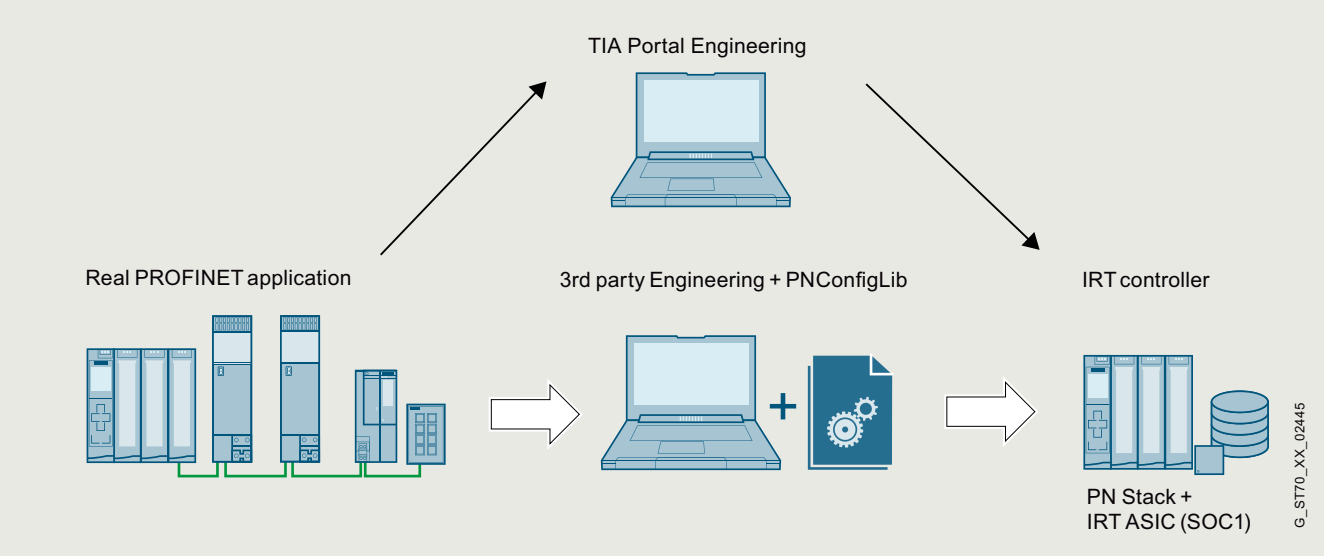
Overview

PROFINET driver for controllers



Reasonably priced components are a major competitive advantage, especially in series machine building. Here, users often develop in-house control software. For reasons of performance, flexibility and cost, the individual application is then implemented on standard PCs. The PROFINET driver supports this in-house development and requires no special hardware thanks to its conventional Ethernet interface.

Because the PROFINET driver is delivered as source code, proprietary solutions can be ported into various operating systems and hardware platforms. As a result, the PROFINET driver can also be optimally used in embedded systems for in-house controller solutions. Design and configuration is easy and takes place via an open XML interface without the need for engineering tools. The well-proven PROFINET stack from SIMATIC forms the centerpiece.

The PROFINET driver is suitable for both simple applications, such as individual PROFINET lines, as well as for complex machines. It supports PROFINET RT for cycle times starting from 1 ms via a standard Ethernet interface. Alternatively, PROFINET IRT can also be used for cycle times starting from 500 µs, in connection with the CP1625 controller development kit.

PROFINET ConfigLib

PROFINET networks must be planned. This can be carried out for the PROFINET driver using the TIA Portal. A license is not required. ConfigLib is a standalone API for generating PROFINET hardware configurations. It can be used to create RT and IRT projects, whereby ConfigLib takes over the planning algorithm.

PNConfigLib – Efficient creation of hardware configurations without the TIA Portal

CP1625 Controller Development Kit

Siemens SOC1 gives you the hardware support required to build an IRT controller. The CP1625 Controller Development Kit is suitable for both standalone and host modes.

- Stand-alone mode: PN stack and application run on the CP1625
- Host mode: Application runs on the PC or, for example, ARM. The stack runs on the CP1625

SIMATIC CP1625

For connecting distributed I/O and drives to user-specific control applications via PROFINET	
Development kit PROFINET controller and device for download; source code with example implementation, IRT controller in connection with CP1625 or CP1625 Dev (to be ordered separately); Consignee email address required for delivery	**6ES7195-3AA00-0YA1**
SIMATIC CP1625 Development Board; PCIe card for PROFINET IRT	**6ES7648-2CF10-1BA0**
Runtime licenses	
• 1 unit	**6ES7195-3AA05-0XA0**
• 10 units	**6ES7195-3AA10-0XA0**
• 50 units	**6ES7195-3AA20-0XA0**
• 200 units	**6ES7195-3AA30-0XA0**
• 500 units	**6ES7195-3AA40-0XA0**

More information

Support

The competent and experienced staff at the PROFINET Competence Centers in Europe, China and the U.S. offer free telephone advice, as well as individual and agreed development and support on-site—from initial information all the way to conclusion of the development with certification.

If you have any questions, your contact partner will be pleased to help:

Technical support

Technical information and assistance for development packages is provided by the support team:

Siemens Sanayi ve Ticaret A.Ş.
Office address:
Yakacık Caddesi No 111
34870 Istanbul, Turkey
Email: profinet.devkits.industry@siemens.com

PROFINET certification

For an efficient and successful development process, comprehensive consulting before the start of the development project is particularly important. The final step in field device development is certification. Siemens also offers you independent, accredited test labs for PROFINET, such as ComDeC in Germany, PIC in the USA, and ITEI in China, as well as a test lab in the Czech Republic.

Overview

- Used to terminate bus segments at transfer rates of 9.6 Kbps to 12 Mbps
- Power supply independent of the bus nodes

Designed for Industry

- End-device independent bus termination thanks to own power supply

Selection and ordering data

Active RS 485 terminating element for PROFIBUS For terminating bus segments at transmission rates of 9.6 kbps to 12 Mbps	**6ES7972-0DA00-0AA0**

Technical specifications

Article number	**6ES7972-0DA00-0AA0** **RS485 Termin. resistor f. PROFIBUS/MPI,**
Supply voltage	
Rated value (DC)	24 V
Input current	
Current consumption, typ.	30 mA
Power loss	
Power loss, max.	0.72 W
Interfaces	
PROFIBUS DP	
• Transmission rate, max.	12 Mbit/s; 9.6 kbit/s to 12 Mbit/s
Degree and class of protection	
IP degree of protection	IP20
Ambient conditions	
Ambient temperature during operation	
• min.	0 °C
• max.	60 °C
Ambient temperature during storage/transportation	
• min.	-40 °C
• max.	70 °C
Relative humidity	
• Operation, max.	95 %; at +25 °C
Connection method	
Design of electrical connection for supply voltage	Screw terminal block
Design of electrical connection for PROFIBUS cables	Screw terminal block
Dimensions	
Width	60 mm
Height	70 mm
Depth	43 mm
Weights	
Weight, approx.	95 g

Selection tools

Two tools, the SIMATIC NET Selection Tool and the TIA Selection Tool, are available to assist you in selecting the right cabling system for SIMATIC NET:

- this link or
- this link.

© Siemens AG 2026

Overview

- Automatic detection of transfer rates
- Transfer rates from 9.6 Kbps to 12 Mbps are possible, incl. 45.45 Kbps
- 24 V DC voltage display
- Indication of segment 1 and 2 bus activity
- The separation of segment 1 and segment 2 by means of switches is possible
- Separation of the right segment with an inserted terminating resistor
- Decoupling of segment 1 and segment 2 in the case of static interference

Designed for Industry

- For increasing the expansion
- Galvanic isolation of segments
- Commissioning support
  - Switches for separation of segments
  - Bus activity display
  - Segment separation in the case of an incorrectly inserted terminating resistor

In this context, please also note the diagnostic repeater that provides extensive diagnostics functions for physical line diagnostics in addition to the normal repeater functionality.

Selection and ordering data

RS 485 repeater for PROFIBUS Transfer rate up to max. 12 Mbps, 24 V DC, IP20 enclosure	**6ES7972-0AA02-0XA0**

© Siemens AG 2026

Technical specifications

Article number	6ES7972-0AA02-0XA0 Repeater RS485 f. PROFIBUS/MPI
Supply voltage	
Rated value (DC)	24 V
Input current	
Current consumption, max.	100 mA; 100 mA without loads at PG/OP socket; 130 mA load at PG/OP socket (5 V/90 mA); 200 mA load at PG/OP socket (24 V/100 mA)
Power loss	
Power loss, typ.	0.7 W
Interfaces	
PROFIBUS DP	
• Transmission rate, max.	12 Mbit/s; 9.6 kbit/s to 12 Mbit/s
Degree and class of protection	
IP degree of protection	IP20
Ambient conditions	
Ambient temperature during operation	
• min.	0 °C
• max.	60 °C
Ambient temperature during storage/transportation	
• min.	-40 °C
• max.	70 °C
Relative humidity	
• Operation, max.	95 %; at 25 °C
Connection method	
Design of electrical connection for supply voltage	Terminal module
Design of electrical connection for PROFIBUS cables	2 terminal blocks
Dimensions	
Width	45 mm
Height	128 mm
Depth	59.3 mm
Weights	
Weight, approx.	350 g

Selection and ordering data

SIPLUS active RS 485 terminating element for PROFIBUS	
To terminate bus segments at transfer rates of 9.6 kbps to 12 Mbps	
Extended temperature range and exposure to environmental substances	**6AG1972-0DA00-2AA0**

© Siemens AG 2026

Technical specifications

Article number	6AG1972-0DA00-2AA0 SIPLUS Profibus Terminator
Supply voltage	
Rated value (DC)	24 V
Input current	
Current consumption, typ.	30 mA
Interfaces	
PROFIBUS DP	
• Transmission rate, max.	12 Mbit/s; 9.6 kbit/s to 12 Mbit/s
Degree and class of protection	
IP degree of protection	IP20
Ambient conditions	
Ambient temperature during operation	
• min.	-25 °C; = Tmin (incl. condensation/frost)
• max.	60 °C; = Tmax
Ambient temperature during storage/transportation	
• min.	-40 °C
• max.	70 °C
Altitude during operation relating to sea level	
• Installation altitude above sea level, max.	5 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m) // Tmin ... (Tmax - 10 K) at 795 hPa ... 658 hPa (+2 000 m ... +3 500 m) // Tmin ... (Tmax -20 K) at 658 hPa ... 540 hPa (+3 500 m ... +5 000 m)
Relative humidity	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; RH incl. condensation/frost (no commissioning under condensation conditions)
Resistance	
- Use in stationary industrial systems	
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust, *
- Use on ships/at sea	
- to biologically active substances according to EN 60721-3-6	Yes; Class 6B2 mold and fungal spores (excluding fauna); Class 6B3 on request
- to chemically active substances according to EN 60721-3-6	Yes; Class 6C3 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-6	Yes; Class 6S3 incl. sand, dust; *
- Usage in industrial process technology	
- Against chemically active substances acc. to EN 60654-4	Yes; Class 3 (excluding trichlorethylene)
- Environmental conditions for process, measuring and control systems acc. to ANSI/ISA-71.04	Yes; Level GX group A/B (excluding trichlorethylene; harmful gas concentrations up to the limits of EN 60721-3-3 class 3C4 permissible); level LC3 (salt spray) and level LB3 (oil)
- Remark	
- Note regarding classification of environmental conditions acc. to EN 60721, EN 60654-4 and ANSI/ISA-71.04	* The supplied plug covers must remain in place over the unused interfaces during operation!
Conformal coating	
• Coatings for printed circuit board assemblies acc. to EN 61086	Yes; Class 2 for high reliability
• Protection against fouling acc. to EN 60664-3	Yes; Type 1 protection
• Military testing according to MIL-I-46058C, Amendment 7	Yes; Discoloration of coating possible during service life
• Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies according to IPC-CC-830A	Yes; Conformal coating, Class A
Connection method	
Design of electrical connection for supply voltage	Screw terminal block
Design of electrical connection for PROFIBUS cables	Screw terminal block
Dimensions	
Width	60 mm
Height	70 mm
Depth	43 mm

Overview

- Fast deterministic data exchange between CPUs with PROFINET controller, even beyond network boundaries
- Configuration with two PROFINET devices completely independent of the communication technology

Data transmission between two S7-1500 IO controllers beyond a PROFINET limit

- Very simple configuration of the data exchange via virtual IO modules or alternatively via data records for larger amounts of data
- Simultaneous data transfer to up to 3 CPUs on own network side and/or up to 4 CPUs on opposite network side
- Easy to integrate into any PROFINET network with 2 ports per network side
- Fieldbus connection via a SIMATIC BusAdapter; this allows free selection of the connection system (RJ45, FC cable direct connection) and connection hardware (copper, POF, PCF, fiberglass). FO-to-copper media conversion can also be realized economically and without external converters.

Additional functions

- Quantity structures
  - Cyclic transmission: Up to 1440 bytes each for input and output data
  - Data record transfer: Up to 4096 bytes per slot. Buffering of up to eight data records per slot
  - Maximum 16 input/output areas for data exchange
  - Max. 254 bytes of input and 253 bytes of output data per module
- Exchange of fail-safe data between two F-CPUs via F-SendDP and F_ReceiveDP
- Shared device with up to four IO controllers per network side
- Module-internal shared input / shared output (MSI/MSO)
- Device replacement without programming device
  - With topological configuration via proximity detection (LLDP)
  - Without topological configuration via redundant storage of the station name in the BusAdapter. A separate removable memory card is not required.
- Reset button for restoring the factory settings
- Redundant power supply
- Galvanic isolation between the two PROFINET IO subnets

© Siemens AG 2026

Overview (continued)

- Media redundancy (MRP and MRPD)
- I&M data
- Firmware update
- Support for Ethernet services (ping, arp, SNMP, MIP-2, LLDP)
- Comprehensive diagnostics via LED displays and interrupts
- Extensive compatibility with the PN/PN coupler up to firmware version V3.0

Selection and ordering data

SIMATIC PN/PN coupler For deterministic data exchange between max. 4 PN controllers per side, also beyond network boundaries, transfer of PROFIsafe, I/O, MSI, MSO and data record communication, redundant power supply, PN connection via SIMATIC BusAdapter (BA), supplied without BusAdapter	**6ES7158-3AD10-0XA0**
Accessories	
DIN rail 35 mm	
SIMATIC, DIN rail 35 mm Length: 483 mm for 19" cabinets	**6ES5710-8MA11**
SIMATIC, DIN rail 35 mm Length: 530 mm for 600 mm cabinets	**6ES5710-8MA21**
SIMATIC, DIN rail 35 mm Length: 830 mm for 900 mm cabinets	**6ES5710-8MA31**
SIMATIC, DIN rail 35 mm, length 2 m	**6ES5710-8MA41**
SIMATIC ET 200SP, BA 2xRJ45 BusAdapter 2 RJ45 sockets	**6ES7193-6AR00-0AA0**
SIMATIC ET 200SP, BA 2xFC BusAdapter 2x FastConnect connection	**6ES7193-6AF00-0AA0**
SIMATIC ET 200SP, BA 2xSCRJ BusAdapter 2 SCRJ FO connections	**6ES7193-6AP00-0AA0**
SIMATIC ET 200SP, BA SCRJ/RJ45 BusAdapter Media converter FOC-CU 1x SCRJ FO connection and 1x RJ45 connection	**6ES7193-6AP20-0AA0**
SIMATIC ET 200SP, BusAdapter: BA SCRJ/FC Media converter FOC-CU 1x SCRJ FO connection and 1x FastConnect (FC) connection	**6ES7193-6AP40-0AA0**
SIMATIC BA 2XLC BusAdapter 2x LC glass fiber-optic cable connections	**6ES7193-6AG00-0AA0**
SIMATIC BusAdapter: BA LC/RJ45 Media converter glass FOC/CU 1x LC FO connection and 1x RJ45 connection	**6ES7193-6AG20-0AA0**
SIMATIC BusAdapter: BA LC/FC Media converter glass FOC/CU 1x LC FO connection and 1x FastConnect (FC) connection	**6ES7193-6AG40-0AA0**
SIMATIC ET 200SP, 160 reference designation labels 10 sheets (160 labels), for BA, BU, IM and I/O modules	**6ES7193-6LF30-0AW0**
Labeling strips	
SIMATIC ET 200SP, 500 labeling strips light gray, roll with 500 strips	**6ES7193-6LR10-0AA0**
SIMATIC ET 200SP, 500 labeling strips yellow, roll with 500 strips	**6ES7193-6LR10-0AG0**
SIMATIC ET 200SP, 1000 labeling strips light gray, 10 sheets DIN A4, perforated, paper, 180 g/sqm	**6ES7193-6LA10-0AA0**
SIMATIC ET 200SP, 1000 labeling strips yellow gray, 10 sheets DIN A4, perforated, paper, 180 g/sqm	**6ES7193-6LA10-0AG0**
Spare parts	
Cover for BusAdapter interface 5 units	**6ES7591-3AA00-0AA0**
Power supply connector	

Selection and ordering data (continued)

Plug, socket, 2x2-pole, for ET 200SP, interface module, KP32F, PN-PN coupler, grid size 5.08 mm spring-loaded terminals, internally bridged, color-coded, 10 units per packing unit	**6ES7193-4JB00-0AA0**

Technical specifications

Article number	6ES7158-3AD10-0XA0 SIMATIC PN/PN Coupler
General information	
Product type designation	PN/PN coupler
Product function	
• I&M data	Yes; I&M0 to I&M3
• Isochronous mode	Yes; 500 µs
• Tool changer	Yes; Docking station and docking unit
• Local coupling, IO data	Yes
- Number of coupling modules	16; in non-isochronous mode, otherwise 3
- Number of coupling submodules per module	4; 1x write, 3x read in non-isochronous mode, otherwise see description in the manual
• Local coupling, data records	Yes; in non-isochronous mode
- Number of coupling modules	16
- Number of coupling submodules per module	4; 1x write, 3x read
- Record length, max.	4 096 byte
- FIFO depth in storage mode	8
Engineering with	
• STEP 7 TIA Portal configurable/integrated from version	V20 or higher
• STEP 7 configurable/integrated from version	V5.7 SP3
• PROFINET from GSD version/GSD revision	GSDML V2.4.x
Installation type/mounting	
Mounting	Mounting rail 7.5 mm and 15 mm
Supply voltage	
Rated value (DC)	24 V
Reverse polarity protection	Yes
Address area	
Address space per station	
• Address space per station, max.	1 440 byte; per input / output
Hardware configuration	
Submodules	
• Number of submodules per station, max.	116
Interfaces	
Number of PROFINET interfaces	2; via BusAdapter
Optical interface	Yes; Via SIMATIC BusAdapter
Transmission rate, max.	100 Mbit/s
1. Interface	
Interface types	
• Number of ports	2; via BusAdapter
• integrated switch	Yes
• BusAdapter (PROFINET)	Yes; Compatible BusAdapter: BA 2x RJ45, BA 2x FC, BA 2x SCRJ, BA SCRJ / RJ45, BA SCRJ / FC, BA 2x LC, BA LC / RJ45, BA LC / FC
Protocols	
• PROFINET IO Device	Yes
• Open IE communication	Yes
• Media redundancy	Yes; As MRP or MRPD client; max. 50 or 30 devices in the ring
PROFINET IO Device	
- Services	
- IRT	Yes
- Dynamic Frame Packing (DFP)	Yes
- Prioritized startup	Yes
- Shared device	Yes
2. Interface	
Interface types	
• Number of ports	2; via BusAdapter
• integrated switch	Yes
• BusAdapter (PROFINET)	Yes; Compatible BusAdapter: BA 2x RJ45, BA 2x FC, BA 2x SCRJ, BA SCRJ / RJ45, BA SCRJ / FC, BA 2x LC, BA LC / RJ45, BA LC / FC

Overview

- For data exchange between PROFINET and CAN Bus 2.0A/B or CANopen Manager or Slave (according to CiA 301 & 302)
- CANopen features:
  - Node / lifeguarding
  - Heartbeat
  - SYNC (producer / consumer)
- Configuration in TIA via HSP from TIA Portal V14 or integrated from TIA Portal V18
- PROFINET switch and 9-pin D-sub plug integrated for CAN
- Up to 126 CAN nodes
- 512 receiver/transmitter PDOs
- Galvanic isolation between the two networks
- Diagnostic interrupts
- Integrated data logger tool enables monitoring of CAN bus traffic
- Supported controllers: S7-1200, S7-1500, ET 200SP, Open Controller

Selection and ordering data

Overview

- For data exchange between PROFINET and CAN Bus 2.0A/B or CANopen Manager or Slave (according to CiA 301 & 302)
- CANopen features:
  - Node / lifeguarding
  - Heartbeat
  - SYNC (producer / consumer)
- Integrated in TIA via HSP, TIA Portal V14 or higher
- PROFINET switch and 9-pin SUB-D plug integrated for CAN
- Up to 126 CAN nodes
- 512 receiver/transmitter PDOs
- Galvanic isolation between the two networks
- Diagnostic interrupts
- Supported controllers: S7-1200, S7-1500, ET 200SP, Open Controller

Relative humidity	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; incl. condensation / frost permitted (no commissioning under condensation conditions)
Resistance	
- Coolants and lubricants	
- Resistant to commercially available coolants and lubricants	Yes; Incl. diesel and oil droplets in the air
- Use in stationary industrial systems	
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; in preparation
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust, *
- Use on ships/at sea	
- to biologically active substances according to EN 60721-3-6	Yes; Class 6B2 mold and fungal spores (excluding fauna); Class 6B3 on request
- to chemically active substances according to EN 60721-3-6	Yes; Class 6C3 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-6	Yes; Class 6S3 incl. sand, dust; *
- Usage in industrial process technology	
- Against chemically active substances acc. to EN 60654-4	Yes; Class 3 (excluding trichlorethylene)
- Environmental conditions for process, measuring and control systems acc. to ANSI/ISA-71.04	Yes; Level GX group A/B (excluding trichlorethylene; harmful gas concentrations up to the limits of EN 60721-3-3 class 3C4 permissible); level LC3 (salt spray) and level LB3 (oil)
- Remark	
- Note regarding classification of environmental conditions acc. to EN 60721, EN 60654-4 and ANSI/ISA-71.04	* The supplied plug covers must remain in place over the unused interfaces during operation!
Conformal coating	
• Coatings for printed circuit board assemblies acc. to EN 61086	Yes; Class 2 for high reliability
• Protection against fouling acc. to EN 60664-3	Yes; Type 1 protection
• Military testing according to MIL-I-46058C, Amendment 7	Yes; Discoloration of coating possible during service life

Overview

- For data exchange between PROFINET and SAE J1939 networks
- J1939 functions:
  - Broadcast Announce Message (BAM)
  - Connection Mode Data Transfer (CMDT)
  - PDU 1 & 2
- Integration into TIA via GSDML file in TIA Portal. No separate software required
- Integrated PROFINET switch with 9-pin SUB-D socket for J1939
- Up to 253 logical nodes
- Up to 30 addressable ECUs
- Galvanic isolation between the two networks
- Diagnostic interrupts
- Supported controllers: S7-1200, S7-1500, ET 200SP, Open Controller

Overview

Product phase-out of the SIMATIC PN/BACnet Link

As part of the further development of the product portfolio and in light of regulatory requirements, particularly the EU Cyber Resilience Act (CRA), the product phase-out of the SIMATIC PN/BACnet Link (6BK1621-0AA00-0AA0) is hereby announced effective October 1, 2026. Type cancellation will take place on October 1, 2027.

A functional replacement is available from our technology and product partner MBS GmbH at the following link.

You can find more information at the following link.

Overview

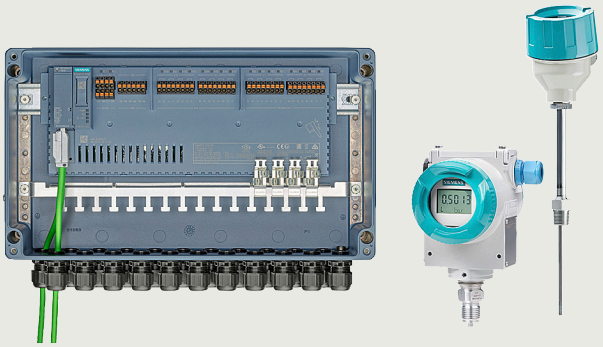
- For interconnecting two PROFIBUS DP networks
- The interchange of data between both DP networks takes place by internal copying in the coupler

Selection and ordering data

SIMATIC DP, DP/DP coupler Coupling module for connecting two PROFIBUS DP networks, redundant power supply	**6ES7158-0AD01-0XA0**



Note:
The manual is available free of charge on the Internet.

Technical specifications

DP/DP transceiver	
PROFIBUS transmission rate	max. 12 Mbit/s
Interfaces	
• PROFIBUS DP	9-pin Sub-D connector
Supply voltage	24 V DC
Current consumption typ.	150 mA
Mounting	Upright (DIP switches above)
Perm. environmental conditions	
• Operating temperature	
- horizontal mounting	0°C ... +60°C
- all other mounting positions	0°C ... +40°C
• Transport/storage temperature	-40 °C ... +70 °C
• Relative humidity	10-95 % at +25 °C
Design	
• Dimensions (W x H x D) in mm	40 x 127 x 117
• Weight	approx. 250 g
Degree of protection	IP20

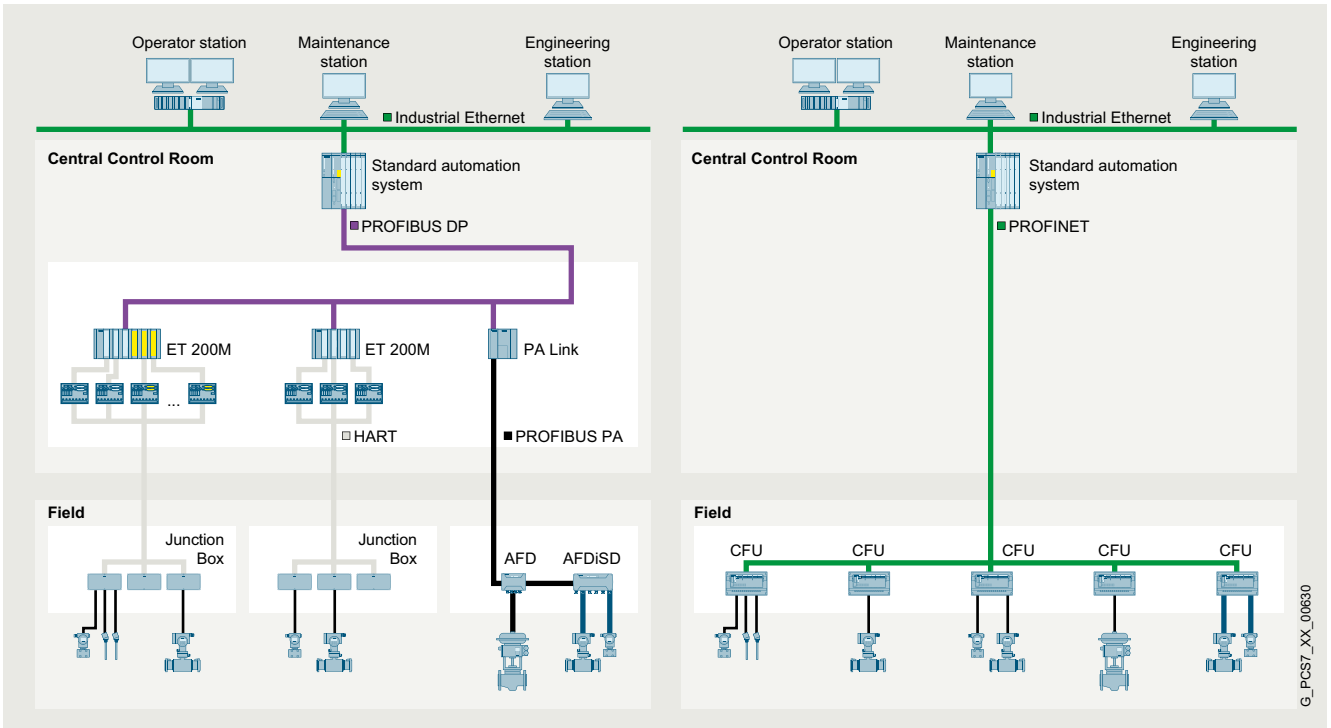
Overview

Smart Field Distributor – SIMATIC Compact Field Unit

With the new SIMATIC Compact Field Unit (CFU), we are re-interpreting the conventional approach to field device connection. The smart field distributor is installed at the process level and is connected via PROFINET, the world's leading Industrial Ethernet standard, directly to the automation system to form the foundation for digitalization in the field.



You benefit from greater flexibility and very simple handling coupled with maximum availability. This allows you to efficiently transfer your familiar system concept to the digital world.

Today's challenges for field device connection:

- High overhead for device integration and replacement
- Complicated, error-prone wiring and routing over multiple levels, making the hardware FAT very complex
- Extremely long copper cables and numerous terminal points in the field
- Multiple individual control cabinets
- Large numbers of different components and protocols necessitate costly spare parts inventories and training sessions
- High planning and documentation costs

SIMATIC CFU – The answer to these challenges

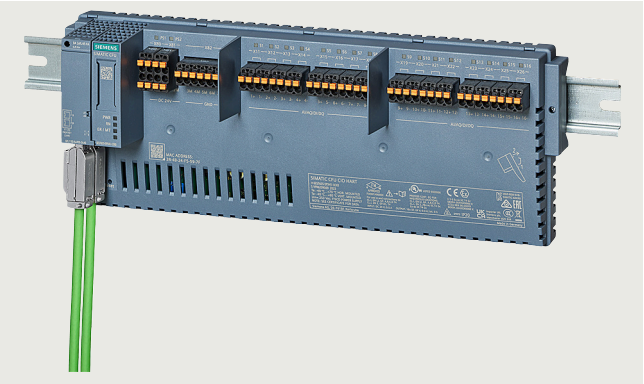
Mode of operation

Field device connection with previous technology (left) and with SIMATIC CFU (right)

The SIMATIC Compact Field Unit (CFU) is a real game-changer in field device connection and offers you entirely new prospects regarding simplicity, flexibility and standardization. The smart field distributor is installed at the process level and is connected via

© Siemens AG 2026

Overview (continued)



PROFINET directly to the automation system to form the foundation for digitalization in the field. Utilization of digital fieldbus communication considerably simplifies device interfacing compared to conventional 4 ... 20 mA engineering.

Greater flexibility thanks to consistent decentralization

Distributed installation of the SIMATIC CFU means that classic control cabinets are no longer required and you can make considerable savings in cabling and the number of terminal points, as well as reducing planning and documentation overheads. The high granularity (16 I/O per SIMATIC CFU) enables flexible assignment to the higher-level controllers.

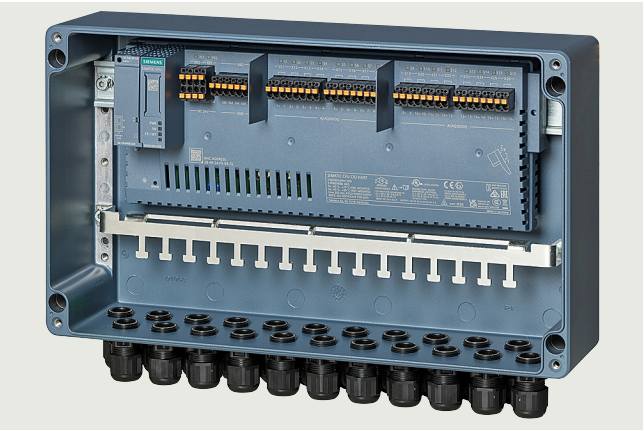
Overview

SIMATIC CFU CIO HART edition, in this case with BusAdapter, PROFINET bus cable and push-in terminals

SIMATIC CFU CIO HART edition



One device for all signal types

The SIMATIC CFU CIO HART is an innovative PROFINET device and offers the possibility of flexibly connecting all signal types to any channel. It is possible to process analog inputs (optionally with HART), analog outputs (optionally with HART), digital inputs and digital outputs. The corresponding signal types are configured conveniently using drag-and-drop in engineering. The SIMATIC CFU CIO HART thus offers a versatile solution for using the different signal types in your system with just one device.

16 freely configurable IO channels:

- Analog input/analog output:
  - 0-20 mA, 4-20 mA, 4-20 mA with HART
- Digital input/digital output:
  - Multiple modes available: Standard-DI, DI-Namur, DI Open-Collector
  - Counter up to 5 kHz
  - DI 24 V DC; DQ 24 V DC 0.5/2 A

Aluminum field enclosure

SIMATIC CFU CIO HART edition, aluminum field enclosure, open

Overview (continued)

SIMATIC CFU CIO HART edition, aluminum field enclosure, closed

The die-cast aluminum enclosure is suitable for use in zone 2/22 hazardous areas. The following are included in the enclosure scope of supply:

- 22 × M20 plastic cable glands (incl. blanking plugs)
- 35 mm DIN rail
- Rail for strain relief and shield support

The enclosure has an inspection window for LED diagnostics.

Selection and ordering data

SIMATIC CFU CIO HART with aluminum enclosure Comprising: • 1 × SIMATIC CFU CIO HART (6ES7655-5PX41-1XX0) • 1 × aluminum enclosure with cable glands, shield busbar, shield terminals pre-assembled and tested	**6ES7655-5PX41-1AX0**
SIMATIC CFU CIO HART SIMATIC Compact Field Unit CIO HART edition with 16 × freely configurable channels (AI; AQ; HART; DI 24 V DC; DI NAMUR; DQ 24 V DC 0.5/2 A; Counter) • Installation up to hazardous zone 2 • Channel diagnostics • PROFINET interface • Use of PROFINET BusAdapter • Configuration in RUN (CiR) • Media redundancy (MRP) • PROFINET system redundancy (S2) • Temperature range -40 ... +70 °C • Installation on a 35 mm DIN rail	**6ES7655-5PX41-1XX0**

Overview

SIMATIC CFU here with BusAdapter, PROFINET bus cable and push-in terminals

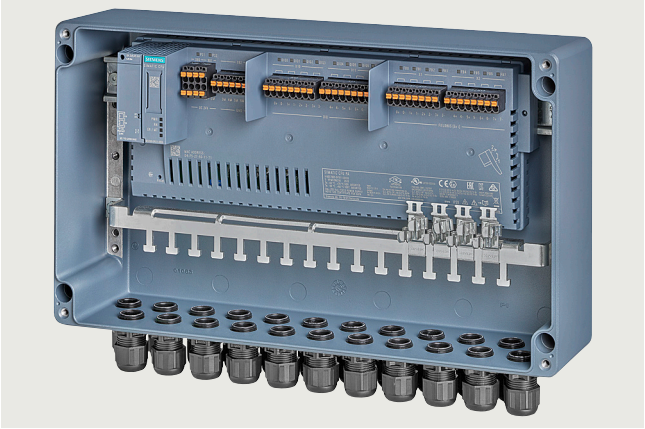
SIMATIC CFU PA edition

Plug-and-produce simplicity

Digitalization requires a digital infrastructure facilitating integrated digital communication right down to the sensors and actuators. You can use the established and proven PROFIBUS PA standard to achieve this. It is integrated into the PA edition of the SIMATIC CFU, thus combining ruggedness and easy handling with all the advantages of the PROFINET standard based on Industrial Ethernet. Connected devices are automatically addressed. The device is integrated via standardized communication profiles.

This innovative new implementation of the PROFIBUS PA concept makes it possible to combine the simplicity of a point-to-point wiring system with the scalability of digital PROFIBUS PA fieldbus communication. As with digital field devices, it is not necessary to know prior to connection whether the discrete field device is a sensor or actuator – This can be easily configured afterwards via software.

Combination of digital fieldbus and discrete I/Os



- 8 × digital fieldbus (PROFIBUS PA)
- 8 × digital inputs/outputs, freely configurable (1 x counter functionality / frequency measurement)

Easy to use

- Automatic addressing of PROFIBUS PA field devices
- System-supported detection and integration of PROFIBUS PA field devices into the process control system
  - Utilization of standardized PA profiles
  - Commissioning, device replacement and maintenance wizards
- Implementation of diagnostic messages according to NAMUR NE 107
- Installation on a 35 mm DIN rail

Overview (continued)

Aluminum field enclosure

CFU PA with RJ45 and push-in terminals, aluminum field enclosure, open

SIMATIC CFU aluminum field enclosure, closed

The die-cast aluminum enclosure is suitable for use in zone 2/22 hazardous areas. The following are included in the enclosure scope of supply:

- 22 × M20 plastic cable glands (incl. blanking plugs)
- 35 mm DIN rail
- Rail for strain relief and shield support

The enclosure has an inspection window for LED diagnostics.

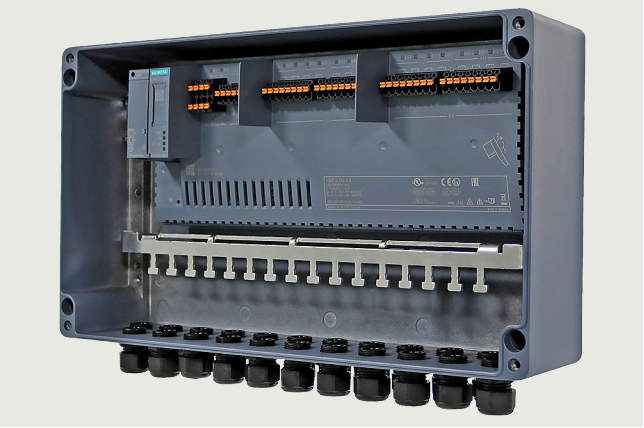
Overview

SIMATIC CFU DIQ edition



Individual, customer-specific solutions and flexible system/plant extensions are requirements that are becoming increasingly important in the process industry due to digitalization. SIMATIC CFU DIQ edition with 16 freely configurable digital IO channels offers a solution for the growing demands of distributed I/O.

SIMATIC CFU also has expansion functions for optional configuration. Two additional operating modes can be activated for selected digital inputs. "Counter" operating mode and "Frequency measurement" operating mode with a cut-off frequency of 1 kHz.

Actuator shutdown can be set for the digital outputs. The actuator shutdown of the SIMATIC CFU uses a monitoring channel (DI channel) to quickly set all digital outputs to a low digital level.

- 16 × digital inputs/outputs, freely configurable (2 x counter functionality / frequency measurement)

Aluminum field enclosure

SIMATIC CFU DIQ aluminum field enclosure, open

Overview (continued)

SIMATIC CFU aluminum field enclosure, closed

The die-cast aluminum enclosure is suitable for use in zone 2/22 hazardous areas. The following are included in the enclosure scope of supply:

- 22 × M20 plastic cable glands (incl. blanking plugs)
- 35 mm DIN rail
- Rail for strain relief and shield support

The enclosure has an inspection window for LED diagnostics.

- up to 60 °C, max.	16; Total current must be observed, see DQ	16; Total current must be observed, see DQ
Digital input functions, parameterizable		
• Counter	Yes	Yes
- Number, max.	2	2
- Counting frequency, max.	1 kHz	1 kHz
- Counting width	32 bit	32 bit
- Counting direction up/down	Yes; Up	Yes; Up
Input voltage		
• Rated value (DC)	24 V	24 V
• for signal "0"	-30 to +5 V	-30 to +5 V
• for signal "1"	+11 to +30V	+11 to +30V
Input current		
• for signal "1", typ.	2.5 mA; Typical	2.5 mA; Typical
Input delay (for rated value of input voltage)		
- for standard inputs		
- parameterizable	No	No
- at "0" to "1", max.	3.2 ms; for counter function 0,1 ms	3.2 ms; for counter function 0,1 ms
- at "1" to "0", max.	3.2 ms; for counter function 0,1 ms	3.2 ms; for counter function 0,1 ms
Cable length		
• shielded, max.	1 000 m	1 000 m
• unshielded, max.	600 m	600 m
Digital outputs		
Type of digital output	Transistor	Transistor
Number of digital outputs	16	16
Current-sinking	No	No
Current-sourcing	Yes	Yes
Short-circuit protection	Yes	Yes
• Response threshold, typ.	0.7 to 1.3 A	0.7 to 1.3 A
Open-circuit detection		Yes
Limitation of inductive shutdown voltage to	Typ. L+ (-50 V)	Typ. L+ (-50 V)
Controlling a digital input	Yes	Yes
Switching capacity of the outputs		
• with resistive load, max.		0.5 A
• on lamp load, max.	5 W	5 W
Load resistance range		
• lower limit	48 Ω	48 Ω
• upper limit	12 kΩ	12 kΩ
Output voltage		
• Type of output voltage	DC	DC
• for signal "1", min.	Ue minus 1 V	Ue minus 1 V
Output current		
• for signal "1" rated value	0.5 A	0.5 A
• for signal "0" residual current, max.	0.1 mA	0.1 mA
Output delay with resistive load		
• "0" to "1", max.	50 µs	50 µs
• "1" to "0", max.	100 µs	100 µs
Parallel switching of two outputs		
• for uprating	No	No
• for redundant control of a load	No	No
Switching frequency

Overview

BA 2×RJ45, 2×FC and 2×LC BusAdapter

BusAdapters

A BusAdapter as a separate component allows a free choice of SIMATIC CFU connection to PROFINET:

- BA 2×RJ45:
  2 electrical connections for bus cables with standard RJ45 connectors
- BA 2×FC:
  2 electrical connections for direct connection of FastConnect bus cable
- BA 2×LC:
  2 optical ports for fiber-optic cables
- BA 1×LC, 1×RJ45:
  Mixed BusAdapter 1 optical connection and 1 electrical connection standard RJ45
- BA 1×LC, 1×FC:
  Mixed BusAdapter 1 optical connection and 1 electrical connection for direct connection of FastConnect bus cable
- BA 2×RJ45 VD:
  2 electrical connections for Ethernet communication via 2-, 4- or 8-wire copper cables and distances up to 500 m

Overview

Software types

Every software subject to a license is assigned to a type.
The following software types are defined:

- Engineering software
- Runtime software

Engineering software

This includes all software products for creating (engineering) user software, e.g. for configuring, programming, parameterizing, testing, commissioning, or servicing. Data generated with Engineering software or executable programs can be duplicated for your own use or for use by third parties free-of-charge.

Runtime software

This includes all software products required for plant/machine operation, e.g. operating system, basic system, system expansions, drivers, etc.
The duplication of the Runtime software or executable programs created with the Runtime software for your own use or for use by third parties is subject to a charge. You can find information about license fees according to use in the ordering data (e.g. in the catalog). Examples of categories of use include per CPU, per installation, per channel, per instance, per axis, per control loop, per variable, etc.
Information about extended rights of use for parameterization/configuration tools supplied as integral components of the scope of delivery of the Runtime software can be found in the accompanying readme files.

License types

Siemens Digital Industries and Smart Infrastructure offers different types of licenses for software:

- Floating license
- Single license
- Rental license
- Rental floating license
- Trial license
- Demo license
- Demo floating license

Floating license

The software may be installed by the licensee for internal use on any number of devices. Only the concurrent user is licensed. The concurrent user is the person using the program. Use begins when the software is started. One license is required for each concurrent user.

Single license

Unlike the floating license, only one installation of the software is permitted per license. The type of use licensed is specified in the ordering data and in the Certificate of License (CoL). Types of use include, for example, per instance, per axis, per channel, etc.
One single license is required for each type of use defined.

Rental license

The rental license supports the "sporadic use" of Engineering software. Once the license key has been installed, the software can be used for a defined time (the operating hours do not have to be consecutive). One license is required for each installation of the software.

Rental floating license

The rental floating license corresponds to the rental license; however, a license is not required for each installation of the software. Instead, one license per object (e.g. user or device) is required.

Overview (continued)

Trial license

A trial license supports "short-term use" of the software in a non-productive context, e.g. for testing and evaluation purposes. It can be transferred to another license.

Demo license

A demo license supports "sporadic use" of the Engineering software in a non-productive context, e.g. for testing and evaluation purposes. It can be transferred to another license. Once the license key has been installed, the software can be used for a defined time (the operating hours do not have to be consecutive).
One license is required for each installation of the software.

Demo floating license

The demo floating license corresponds to the demo license; however, a license is not required for each installation of the software. Instead, one license per object (e.g. user or device) is required.

Certificate of License (CoL)

The CoL is the licensee's proof that the use of the software has been licensed by Siemens. A CoL is required for every type of use and must be kept in a safe place.

Downgrading

The licensee is permitted to use the software or an earlier version/release of the software, provided that the licensee owns such a version/release and its use is technically feasible.

Available versions

Software is constantly being updated. The delivery versions

- PowerPack
- Upgrade

can be used to access these updates.

Existing bug fixes are supplied with the ServicePack delivery version.

PowerPack

PowerPacks are conversion packages used to upgrade to more powerful software.

The licensee receives a new license agreement and Certificate of License (CoL) with the PowerPack. This CoL, together with the CoL for the original product, proves that the new software is licensed.
A separate PowerPack must be purchased for each original license of the software to be replaced.

Upgrade

An upgrade allows a newer, available version of the software to be used under the condition that a license for a previous version has already been acquired. The licensee receives a new license agreement and CoL with the upgrade. This CoL, together with the CoL for the previous version, proves that the new software is licensed.
A separate upgrade must be purchased for each original license of the software to be upgraded.

ServicePack

ServicePacks are used to debug existing products. ServicePacks may be duplicated for use as prescribed according to the number of existing original licenses.

License key

Siemens Digital Industries and Smart Infrastructure offers software products with and without license keys.
The license key serves as an electronic license stamp and is also the "switch" for activating the software (floating license, floating license, etc.)
The complete installation of software products requiring license keys includes the program to be licensed (the software) and the license key (which represents the license).

Software Update Service (SUS)

Within the framework of the SUS contract, you are provided with all software updates for the relevant product at no cost over a period of

© Siemens AG 2026

Overview (continued)

one year from the date of invoice. The contract is automatically extended by a further year unless canceled three months before expiration.

The prerequisite for agreeing to an SUS is the presence of the current version of the relevant software.

© Siemens AG 2026

Overview

- Service for automatic dispatch of all new software versions during contract lifetime
- Reduced logistics effort thanks to automatic contract extension
- Reduced costs as updates are provided free of charge

Ordering

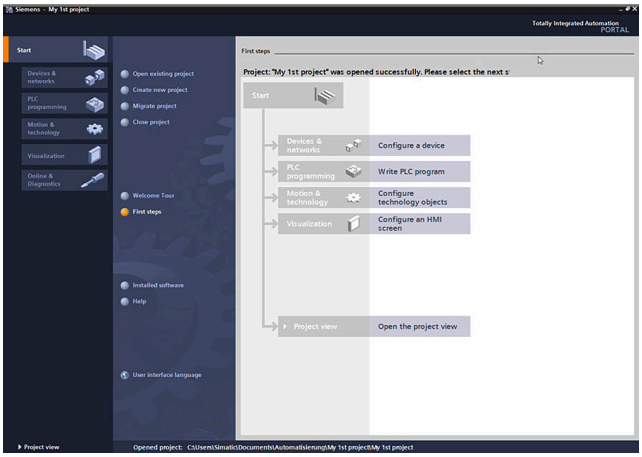
- The Software Update Service is ordered in the same way as any other product. The corresponding order number is given in the ordering information of the software product in question.
- You must own the current version of the software.
- One Software Update Service is ordered for each software license installed.
- The Software Update Service runs for 1 year from date of order.
- It is extended automatically by a further year in each case, as long as it is not canceled 3 months before it expires.
- An annual lump sum is invoiced per license.

Application

SIMATIC Software is continuously enhanced and improved. The **Software Update Service** (previously: software maintenance service) is the easiest way to regularly take advantage of these improvements. It ensures automatic delivery of all new software versions that are released after ordering the Software Update Service so that your software is always up to date.

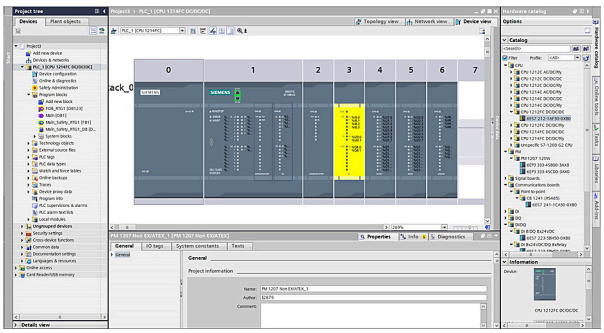
The Software Update Service

- Saves time and effort:
  Once it is ordered, the Software Update Service is automatically renewed every year.
- Lowers costs:
  The service pays for itself after the first update as it costs less than an individually ordered update.
- Makes budgeting easier:
  Software expenditures can be accounted for early in the budgeting process and they are easier to write off.



Design

Scope of supply



- All new software versions that are released after ordering the Software Update Service (usually several deliveries per year)
- CD-ROM SIMATIC Customer Support Knowledge Base with FAQs, tips & tricks and downloads (several times per year).

Overview

STEP 7 Basic V21 (TIA Portal), portal view

STEP 7 Basic V21 (TIA Portal), device view: Configuring and parameterizing in realistic photo-quality representation

Intuitive, efficient and future-oriented - the engineering software for programming SIMATIC Controllers

SIMATIC STEP 7 Basic V21 is the engineering system for the SIMATIC S7-1200.

STEP 7 Basic V21 is based on the Totally Integrated Automation Portal (TIA Portal) central engineering framework which offers users a uniform, efficient and intuitive solution to all automation tasks.

Overview (continued)

New with V21

- STEP 7 V21 provides an extended range of functions of SIMATIC SD (SIMATIC Source Documents). With this conversion format, engineering objects from TIA Portal in text format can be used platform-independently. As the boundaries between OT (operational technology) and IT (information technology) become increasingly blurred, SIMATIC SD offers decisive advantages. It makes mechanisms from industrial production usable in the world of software development. For the PLC program code, the conversion format opens up new possibilities:
  - Compatibility and versioning capability:
    The converted format ensures compatibility across different software versions (from TIA Portal V20 onwards) and makes it easier to track changes.
  - Integration into version control systems such as Git:
    SIMATIC SD supports teamwork and promotes a consistent development process by integrating common version control systems.
  - Automation of engineering workflows:
    The converted files can be opened with any text editor. This increases efficiency by automating recurring tasks and accelerating development processes.
  - Use of external comparison tools:
    The files in text format enable precise analyses, which supports the optimization of control projects.
- Global search - additional filters for program blocks:
  Additional filter options for code and interfaces simplify the search for variables and signals that are used in the code, for example. This simplifies signal tracking across block boundaries.
- The maximum number of lines that can be displayed in a data block has been increased from 40,000 to 60,000 lines.

More information on the new functions of STEP 7 V21 is available at this link.

Licensing

- STEP 7 Basic V21 is supplied with a floating license. The floating license allows the software to be used on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- With the STEP 7 Basic V21 license, the following products can also be used:
  - STEP 7 Safety Basic V21 for configuration and programming of the fail-safe S7-1200 controllers
  - S7-PLCSIM V21 for simulation of S7-1200 controllers
  - WinCC Unified Basic V21 for configuration of SIMATIC Unified Basic Panels
- Existing STEP 7 Basic licenses of versions V11-20 can be upgraded to V20. This requires an upgrade license.
- The STEP 7 Basic V20 license can be upgraded to a STEP 7 Professional V21 license with a PowerPack.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Software Update Service For a period of 12 months and for a fixed price, the customer is automatically provided with all upgrades and Service Packs for each installed software package. The contract is automatically extended by a further year unless canceled at least 3 months prior to expiration. Requires the current software version	
Software Update Service (Standard Edition)[2] The delivery is implemented according to the number of ordered SUS products (e.g. 10 upgrade packages with 10 USB flash drives, etc.)	
• STEP 7 Basic	**6ES7822-0AA00-0YL0**
Software Update Service (Compact Edition)[2] The delivery items are combined. For multiple contracts, only one package containing one USB flash drive with the respective installation media and the corresponding number of licenses, as well as the corresponding number of COLs, will be supplied. Delivery items to be combined must be ordered as one item.	
• STEP 7 Basic	**6ES7822-0AA00-0YM0**
Software Update Service (Download)[2] Upgrades and Service Packs are available for downloading. Consignee email address required for delivery	
• STEP 7 Basic	**6ES7822-0AE00-0YY0**

Selection and ordering data (continued)

[2] For more information see Software Update Service.

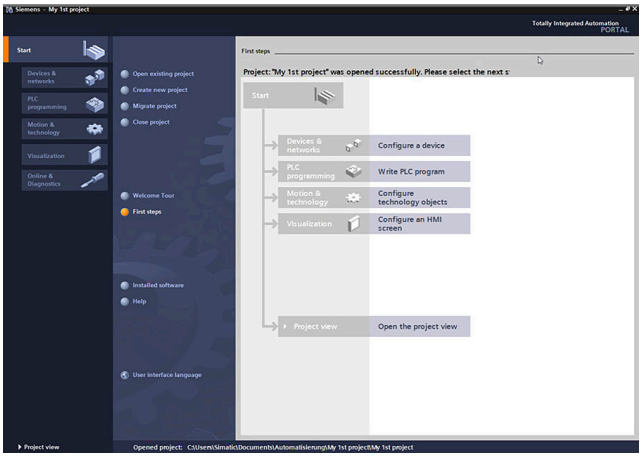
Technical specifications

	STEP 7 Basic V21 (TIA Portal)
Type of license	Floating license
Software class	A
Current version	V21
Target system	SIMATIC S7-1200, S7-1200 G2
Operating systems	Windows 10 (64-bit) • Windows 10 Enterprise 21H2/2021 LTSC Windows 11 (64-bit) • Windows 11 Home Version 24H2 (only for Basic edition) • Windows 11 Professional Version 24H2 • Windows 11 Enterprise 24H2 • Windows 11 Enterprise 24H2 LTSC • Windows 11 Enterprise 23H2 Windows Server (64-bit) • Windows Server 2022 Standard (full installation) • Windows Server 2025 Standard (full installation)
Recommended PC hardware	
Computer	SIMATIC IPC MD-57A (successor of the Field PG M6) or comparable PC
Processor	Intel® Core™ i5 -12600HE processor (16 threads, 18 MB cache, up to 4.50 GHz)
RAM	16 GB or more (min. 8 GB, 32 GB for large projects)
Hard disk	SSD with at least 50 GB storage space available
Network	1 Gbit (for multi-user)
Screen	15.6" Full HD display (1920 x 1080 or higher)

Compatibility with other products and operating systems

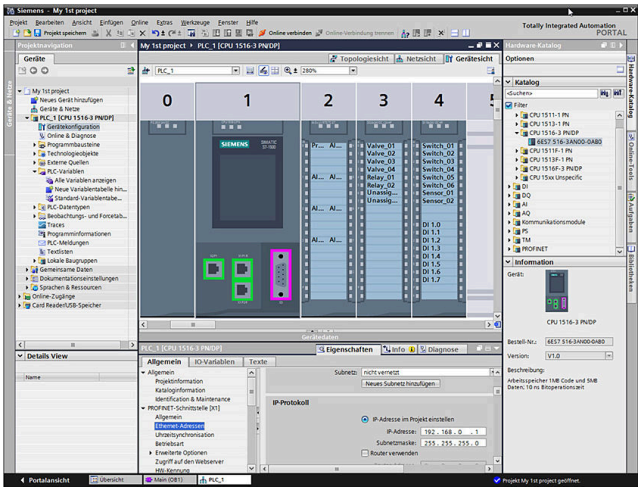
STEP 7 V21 can be installed on a PC in parallel with other versions of STEP 7 V13 SP2 to V20, STEP 7 V5.6 or higher. More information on compatibility is available at this link.

As of TIA Portal project version V14, projects can be directly upgraded to V21. Projects from versions V11 to V13 must first be upgraded to V13 SP1 or SP2 (last update recommended). After that, the projects can be upgraded to a project version (V14 - V20) that can be upgraded to V21.



Important note

TIA Portal project versions V14..V20 are upgraded to project version V21 with TIA Portal V21. If you need to edit a TIA Portal project version V11 .. V20, we recommend an additional installation of the corresponding software to TIA Portal V21. The license purchased for V21 is also valid for all older TIA Portal versions.



The migration of projects from STEP 7 V5.x (Classic), WinCC flexible, WinCC V7, and integrated projects is no longer supported by TIA Portal V21 (or later). To use a project with TIA Portal V21 (or later), you can migrate the project using Migration Tool and TIA Portal V20 (or earlier).

STEP 7 Professional V21 (TIA Portal), device view: Configuring and parameterizing in realistic photo-quality representation

Intuitive, efficient and future-oriented - the engineering software for programming the SIMATIC Controllers

SIMATIC STEP 7 Professional V21 is the engineering system for the SIMATIC S7-1200, S7-1500, S7-300, S7-400 Controllers, WinAC and Software Controllers.

STEP 7 V21 is based on the Totally Integrated Automation Portal (TIA Portal) central engineering framework which offers users a uniform, efficient and intuitive solution to all automation tasks.

Overview (continued)

New in V21

- STEP 7 V21 provides an extended range of functions of SIMATIC SD (SIMATIC Source Documents). With this conversion format, engineering objects from TIA Portal in text format can be used platform-independently. As the boundaries between OT (operational technology) and IT (information technology) become increasingly blurred, SIMATIC SD offers decisive advantages. It makes mechanisms from industrial production usable in the world of software development. For the PLC program code, the conversion format opens up new possibilities:
  - Compatibility and versioning capability:
    The converted format ensures compatibility across different software versions (from TIA Portal V20 onwards) and makes it easier to track changes.
  - Integration into version control systems such as Git:
    SIMATIC SD supports teamwork and promotes a consistent development process by integrating common version control systems.
  - Automation of engineering workflows:
    The converted files can be opened with any text editor. This increases efficiency by automating recurring tasks and accelerating development processes.
  - Use of external comparison tools:
    The files in text format enable precise analyses, which supports the optimization of control projects.
- Loading without reinitializing the actual values - even with structural changes to data blocks:
  When loading into the device, the "Preview Load" dialog now offers the "Keep actual values" action. The new action allows you to make structural changes to data blocks and load them into the device without reinitializing the actual values of all variables.
- Global search - additional filters for program blocks:
  Additional filter options for code and interfaces simplify the search for variables and signals that are used in the code, for example. This simplifies signal tracking across block boundaries.
- Named value data types:
  STEP 7 offers the following new features for programming named value data types:
  - The detail view now displays the contents of a selected named value data type
  - Variables can be controlled directly in watch tables using their descriptive values, the named values.
  - Named value data types can now be opened via the list of accessible participants (LifeList) and from a card reader (read-only).
  - Named value data types that are only available online can be opened directly from the online view of the CPU.
  - Comments on the named value data types used can be displayed in code and block interface.
  - When the name or namespace is changed, all uses in the PLC program can be updated automatically.
- The maximum number of lines that can be displayed in a data block has been increased from 40,000 to 60,000 lines.

© Siemens AG 2026

Overview (continued)

- Trace:
  - In addition to recording values over time, events on a Motion Control technology object can now also be recorded with a trace starting with version V9.0.
  - A long-term trace configuration can now be created directly from a long-term trace, a long-term trace measurement, a long-term project trace measurement, or a superimposed long-term trace measurement.
- PID Control:
  The new version V2.0 of the PID_Temp controller is now available.
- Name and instance label as new properties in ProDiag:
  A name and instance label can now be assigned to each monitoring function in ProDiag. This makes it easier to identify and assign monitoring functions. The new properties allow message texts to be made more informative and monitoring functions to be evaluated more specifically in MES systems.

More information on the new functions of STEP 7 V21 is available at this link.

Licenses

- STEP 7 Professional V21 is supplied with a STEP 7 Professional V21 floating license. The floating license allows the installation of the software on up to 10 computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- With the STEP 7 Professional V21 license, the following products can also be used:
  - STEP 7 Safety Basic V21 for configuration and programming of the fail-safe S7-1200 controllers
  - S7-PLCSIM V21 for the simulation of S7-1200 and S7-1500 controllers
  - WinCC Unified Basic V21 for configuration of SIMATIC Unified Basic Panels
- Existing STEP 7 Professional licenses of versions V11-20 can be upgraded to V21. This requires an upgrade license.
- The user receives a combo license when upgrading from STEP 7 V5.x. The combo license enables engineering to be performed both on the STEP 7 V5.x and the STEP 7 V21 platform.
- The STEP 7 Basic V21 license can be upgraded to a STEP 7 Professional V21 license with a PowerPack.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Selection and ordering data

STEP 7 Professional V21 **Target system:** SIMATIC S7-1200, S7-1200 G2, S7-1500, S7-300, S7-400, WinAC **Requirement:** Windows 10 (64-bit) • Windows 10 Enterprise 21H2/2021 LTSC Windows 11 (64-bit) • Windows 11 Professional Version 24H2 • Windows 11 Enterprise 24H2 • Windows 11 Enterprise 24H2 LTSC • Windows 11 Enterprise 23H2 Windows Server (64-bit) • Windows Server 2022 Standard (full installation) • Windows Server 2025 Standard (full installation) **Type of delivery:** 9 languages: en, de, zh included, fr, sp, it, ru, ja, ko as download

Software Update Service For a period of 12 months and for a fixed price, the customer is automatically provided with all upgrades and Service Packs for each installed software package. The contract is automatically extended by a further year unless canceled at least 3 months prior to expiration. Requires the current software version	
Software Update Service (Standard Edition) [2] The delivery is implemented according to the number of ordered SUS products (e.g. 10 upgrade packages, 10 USB flash drives, etc.)	
• STEP 7 Professional in the TIA Portal	**6ES7822-1AA00-0YL5**
• STEP 7 Professional and STEP 7 Professional in the TIA Portal	**6ES7810-5CC04-0YE2**
Software Update Service (Compact Edition) [2] The delivery items are combined. For multiple contracts, only one package containing one USB flash drive with the respective installation media and the corresponding number of licenses, as well as the corresponding number of COLs, will be supplied. Delivery items to be combined must be ordered as one item.	
• STEP 7 Professional in the TIA Portal	**6ES7822-1AA00-0YM5**
• STEP 7 Professional and STEP 7 Professional in the TIA Portal	**6ES7810-5CC00-0YM2**
Software Update Service (Download) [2] Upgrades and Service Packs are available for downloading. Consignee email address required for delivery	
• STEP 7 Professional V2x	**6ES7822-1AE00-0YY0**
• STEP 7 Professional and STEP 7 Professional in the TIA Portal	**6ES7810-5CC04-0YY2**
TIA Portal Cloud TIA Portal software packages for use in a virtual cloud environment without local installation. TIA Portal Cloud includes the main packages of the TIA Portal versions V15.1 and higher, as well as the most important option packages of these versions. Can only be ordered via SiePortal. Consignee email address required for delivery.	

Selection and ordering data (continued)

TIA Portal Cloud, pay-per-use (hourly). Only available via Industry Mall. Consignee email address required for delivery. For this service, the following T&Cs apply exclusively https://tiacloudservices.siemens.com/terms-and-conditions (i) Documentation and Supplemental Terms for the Subscription to free accessible services of Industry Premium Portal – Basic Services, (ii) Documentation and Supplemental Terms for the Subscription to the TIA Portal Cloud and (iii) Universal Customer Agreement.	**6ES7804-0CP41-3YA0**
TIA Portal Cloud, monthly subscription. Only available via Industry Mall. Consignee email address required for delivery. For this service, the following T&Cs apply exclusively https://tiacloudservices.siemens.com/terms-and-conditions (i) Documentation and Supplemental Terms for the Subscription to free accessible services of Industry Premium Portal – Basic Services (ii) Documentation and Supplemental Terms for the Subscription to the TIA Portal Cloud and (iii) Universal Customer Agreement.	**6ES7804-0CP41-2YA0**
TIA Portal Cloud and SITRAIN access, annual subscription. Your benefit: In addition to use of TIA Portal Cloud, you receive free access to SITRAIN access - the digital learning platform. Your engineering environment and know-how are always up to date, thanks to cloud technology anywhere at any time. Consignee email address required for delivery. The specific terms under https://tiacloudservices.siemens.com/terms-and-conditions apply exclusively	**6ES7804-0CP41-1YA0**
TIA Portal Cloud, 365-day subscription. You will receive a Certificate of Contract to unlock TIA Portal Cloud for 365 days, starting from the delivery date. This subscription ends automatically. Content: Certificate of Contract (CoC) Consignee email address required for delivery. The specific terms under https://tiacloudservices.siemens.com/terms-and-conditions apply exclusively	**6ES7804-0CP41-1YA8**

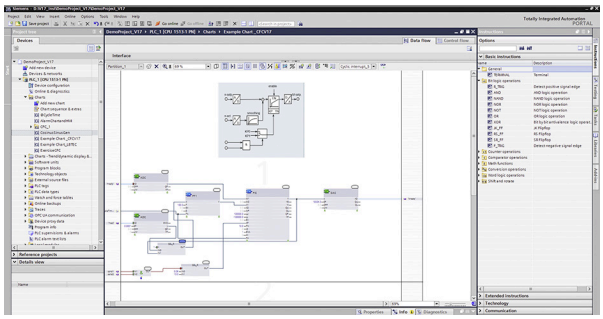
Technical specifications

	STEP 7 Professional V21 (TIA Portal)
Type of license	Floating license
Software class	A
Current version	V21
Target system	SIMATIC S7-1200, S7-1200 G2, S7-1500, S7-300, S7-400, WinAC, Software Controller
Operating systems	Windows 10 (64-bit) • Windows 10 Enterprise 21H2/2021 LTSC Windows 11 (64-bit) • Windows 11 Professional Version 24H2 • Windows 11 Enterprise 24H2 • Windows 11 Enterprise 24H2 LTSC • Windows 11 Enterprise 23H2 Windows Server (64-bit) • Windows Server 2022 Standard (full installation) • Windows Server 2025 Standard (full installation)
Recommended PC hardware	
Computer	SIMATIC IPC MD-57A (successor of the Field PG M6) or comparable PC
Processor	Intel® Core™ i5 -12600HE processor (16 threads, 18 MB cache, up to 4.50 GHz)
RAM	16 GB or more (32 GB for large projects)
Hard disk	SSD with at least 50 GB storage space available
Network	1 Gbit (for multi-user)
Screen	15.6" Full HD display (1920 x 1080 or higher)

Compatibility with other products and operating systems

STEP 7 V21 can be installed on a PC in parallel with other versions of STEP 7 V13 SP2 to V20 and STEP 7 V5.6. More information on compatibility is available at this link.

As of TIA Portal project version V14, projects can be directly upgraded to V21. Projects from versions V11 to V13 must first be upgraded to V13 SP1 or SP2 (last update recommended). After that, the projects can be upgraded to a previous version (V14-V20) that can be upgraded to V21.



Important note

TIA Portal project versions V14.. V20 are upgraded with TIA Portal V21 to the project version V21. If you need to edit a TIA Portal project version V11 .. V20, we recommend an additional installation of the corresponding software to TIA Portal V21. The license purchased for V21 is also valid for all older TIA Portal versions.

The migration of projects from STEP 7 V5.x (Classic), WinCC flexible, WinCC V7, and integrated projects is no longer supported by TIA Portal V21 (or later). To use a project with TIA Portal V21 (or later), you can migrate the project using Migration Tool and TIA Portal V20 (or earlier).

© Siemens AG 2026

Overview

- Creation of automation programs by drawing a technology chart
- Minimized outlay and reduced error susceptibility due to the interconnection of ready-made blocks
- Optimal integration in the TIA Portal automation world
- Released for the standard, T, TF and R/H CPUs of the SIMATIC S7-1500 automation system
- For more information on the supported hardware, see this link.

Licensing

- SIMATIC STEP 7 CFC requires an engineering license and a runtime license for each CPU.
- Engineering license: For configuration of CFC charts, a license key needs to be installed on the PC.
- Runtime licenses: A license key is required for each PLC.
  Depending on the number of instance data blocks created during configuration with CFC, a limited or unlimited license is required:
  - A limited license allows a limited number of instance DBs to be created and loaded into the PLC.
  - With an unlimited license, any number of instance DBs can be created and loaded.

Selection and ordering data

SIMATIC STEP 7 CFC V21	
Task: Graphic configuring and programming of automation applications in the form of technology charts **Target system:** SIMATIC S7-1500 **Requirement:** STEP 7 V21 or higher **Type of delivery:** Engineering software, electronic documentation and license key on USB flash drive	
Floating license	**6ES7658-1ET25-0YA5**
Floating license for download. Email address required for delivery[2]	**6ES7658-1ET25-0YH5**
Upgrade Advanced Engineering License V20.0 to V21.0	**6ES7658-1ET25-0YE5**
Upgrade Advanced Engineering License V20.0 to V21.0 For download. Email address required for delivery[2]	**6ES7658-1ET25-0YK5**
Runtime license for 100 objects; one runtime license is required per PLC	**6ES7658-1ET00-3YH5**
Runtime license for an unlimited number of objects; one runtime license is required per PLC	**6ES7658-1ET00-4YH5**
Software Update Service (requires current software version)[1]	**6ES7658-1ET00-0YV8**

Technical specifications

Engineering tool	**SIMATIC STEP 7 CFC**
Current version	V21.0
Software class	A
Application areas	
Can be used for	Graphical creation, interconnection and parameterization of (preconfigured) blocks and functions
Marketing message	Simply interconnect and configure instead of programming!
Advantages	• Can be used to optimum effect even during the design phase • Reduced configuration effort thanks to graphical interconnection • High degree of reusability of charts that have already been created • Quick and easy familiarization • Quick and transparent interconnection of preconfigured functions • Technological creation of the program as a whole • Clear representation of control loop structures • Comment fields with texts and images • Short commissioning time
Sectors	• Automobile engineering • Chemicals industry • Power engineering and supply • Rubber and plastics processing machines • Metalworking machines • Food and beverage machines • Petrochemicals • Rolling mills • Water industry • Coilers
Target systems	
Can be used in	S7-1500
System requirements	
Operating system	Windows 10 (64-bit) • Windows 10 Enterprise 2019 LTSC Windows 11 (64-bit) • Windows 11 Professional 22H2 and 23H2 Windows Server (64-bit) • Windows Server 2022 Standard (full installation)
Required software	SIMATIC STEP 7 V20 or higher
Properties	
Monitoring tags	Yes
Controlling tags	Yes
Single-step processing	-
Integration in CFC	Yes
Program runtimes	
With S7-1500 (typical)	Depending on the interconnected blocks
Supported standards	
IEC 61131-3	Based on the IEC standard
Status of PLCopen activities	-
Available versions/licenses	
Floating license	• 1 memory stick

Overview

STEP 7 Safety Advanced, configuration and programming

- For creating safety-related programs on the STEP 7 user interface
- For seamless and easy to use integration of safety-related functions into the standard automation
- All the required configuration and programming tools are integrated into the STEP 7 user interface and utilize a common project structure
- STEP 7 Safety Basic for parameter assignment and programming of the fail-safe S7-1200 Basic Controller. Included in STEP 7 license (no separate Safety license required)
- STEP 7 Safety Advanced option package for all fail-safe TIA SIMATIC controller classes (S7-1200, S7-1500, S7-1500 Software Controller, S7-1500V, S7-300, S7-400, WinAC)

Licensing

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- STEP 7 Safety Basic is a subset of STEP 7 Safety Advanced for programming the fail-safe S7-1200 F Basic Controller.
- Combo licenses allow you to choose between programming with the predecessor product S7 Distributed Safety and STEP 7 Safety Advanced.
- An upgrade to a combo license is offered for the latest version of S7 Distributed Safety.
- Software Update Service (SUS) contracts can be concluded for STEP 7 Safety Advanced.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Selection and ordering data

STEP 7 Safety Advanced V21	
Task: Engineering tool for configuring and programming fail-safe user programs for SIMATIC S7-1200 FC, S7-1500F, S7-1500F Software Controller, S7-300F, S7-400F, WinAC RTX F, ET 200SP F Controller and the fail-safe I/O ET 200SP, ET 200MP, ET 200S, ET 200M, ET 200iSP, ET 200pro and ET 200eco **Requirement:** STEP 7 Professional V21 Note: As of TIA Portal V16, the SIMATIC STEP 7 Safety software is an integral component of the SIMATIC STEP 7 product setup. The functionality of SIMATIC STEP 7 Safety is activated by means of the license key supplied in each case.	
Floating license for 1 user; license key on USB flash drive	**6ES7833-1FA25-0YA5**
Floating license for 1 user, license key for download[2]; Email address required for delivery	**6ES7833-1FA25-0YH5**

Overview

With SIMATIC S7-PLCSIM Advanced, digital twins can be used for simulation of SIMATIC controllers and for extensive function simulation.

The digital twins can also be tested and validated in conjunction with a plant/machine. An extensive API is available for interfacing plant/machine simulations.

Highlights of SIMATIC S7-PLCSIM Advanced V8.0

New CPU types

- The controllers of the new SIMATIC S7-1200 G2 series are now supported in addition to the S7-1500-based controllers.

Compatibility

S7-PLCSIM Advanced now supports TIA Portal projects of versions V14 to V21 and CPU firmware versions V1.8 – V4.1.

The user interface of S7-PLCSIM V21 is also intended for use with S7-PLCSIM Advanced V8.0.

Licensing

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license). For each license, the use of two simultaneously started S7-PLCSIM Advanced instances is permitted.
- Users of previous versions V1.0 ... V7.0 are offered an upgrade to version V8.0.
- It makes sense to benefit from the annual improvements by signing Software Update Service (SUS) contracts.
- In addition, it is possible to purchase the software as an annual subscription.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Technical specifications

Minimum requirements for use

Hardware / software	Requirements
Processor	• A modern multicore processor with sufficient performance • One core is occupied for each simulation instance started • At least one additional core for the operating system • For virtual machines: The required number of cores is physically required on the host system • At least one additional core for additional active applications
RAM	• At least 16 GB • Additional RAM work memory according to the requirements of the remaining active applications
Free hard disk space	20 GB
Operating systems (64-bit version)	As TIA Portal
Screen resolution	At least 1920 x 1080 (Full HD)

Compatibility with other products

- S7-PLCSIM Advanced V8.0 and S7-PLCSIM V21 can be installed and operated on the same PC or the same virtual machine. Communication between the two applications cannot be simulated.
- Compatible with TIA Portal projects from versions V14 to V21
- Support of the CPU firmware versions V1.8 to V4.1

© Siemens AG 2026

Overview

- For developing dynamically loadable function libraries for the S7-1500 Software Controllers and S7-1500 Advanced Controllers CPU 1518 MFP and PLCSIM Advanced:
  - Implementation of function libraries for the SIMATIC S7-1500 Software Controllers that are executed under Windows with the high-level languages C/C++, C# and VB
  - Implementation of function libraries for the PLCSIM Advanced that are executed under Windows with the high-level languages C/C++
  - Implementation of function libraries that are executed in real-time in the context of the user program of the CPU with the high-level language C++
  - Implementation of applications for the C++ runtime of the CPU 1518 MFP
- "Eclipse" development environment for real-time function libraries in the CPU user program and applications for the C++ runtime in the scope of delivery.
- Development of library functions under Windows with MS Visual Studio (optional)
- Easy introduction to development by using basic projects via templates
- Automatic creation of function blocks for calling the library functions
- Simple integration of the function blocks into STEP 7 by importing.
- Simple use of the library functions in the PLC without specific high-level language know-how.

Licensing

- ODK 1500S is supplied with a floating license. The floating license allows installation of the software on any number of computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously.
- The integrated development environment Eclipse, required for developing real-time libraries, is included in the scope of supply of ODK 1500S as well as templates for Visual Studio.
- SIMATIC ODK 1500S is available as a standalone product or in a bundle with SIMATIC Target 1500S™ for Simulink®.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Technical specifications

System requirements

The SIMATIC ODK 1500S can be used on PC platforms with the following requirements:

- Operating systems Windows 7/8.1/10
- Min. 3 GB hard disk memory
- Min. 4 GB work memory
- Mouse, keyboard, monitor

© Siemens AG 2026

Overview

SIMATIC Target™ is an add-on for the Simulink®software from The MathWorks. This makes it possible to also use model-based design with MATLAB® and Simulink for SIMATIC S7-1500 Controllers and Industrial Edge from Siemens. For this purpose, executable code for all ODK-compatible S7-1500 Controllers (S7-1500 Software Controllers, ET 200SP Open Controllers, CPU 1518 ODK/MFP and PLCSIM Advanced as of V3.0) or the LiveTwin Edge app is generated directly from Simulink via SIMATIC Target.

New with V6.0

- Support for Simulink External Mode for the LiveTwin Edge app: This allows the model behavior to be observed directly on the runtime. This enables a comparison of model behavior between Simulink simulation and real-time execution on LiveTwin. In addition, External Mode allows module parameters to be adjusted directly in the runtime, thus directly influencing the runtime behavior of the model.
- "Download in RUN" also for Simulink models: The handling of the Load and Unload ODK blocks is directly included in the generated PLC blocks. This eliminates the need for a RUN/STOP transition to run the updated model in an S7-1500.
- The web visualization of the Simulink model is now based on the new PLC Web API: This means that additional DBs are no longer created in the user program for the website. In addition, no special system function calls are required. Web visualization is also possible for up to four different Simulink models simultaneously.
- Support of TIA Portal Multiuser: Code generation from a Simulink model can now be done directly in a Local Session of a TIA Portal Multiuser project.

Licensing

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- SIMATIC Target™ for Simulink® V6.0 is available as a standalone product or in a bundle with the SIMATIC S7-1500 Software Controller Open Development Kit.
- An upgrade to latest versions is available for previous versions

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Overview

SIMATIC Safe Kinematics enables safe monitoring of the movement of predefined kinematics with up to 12 interpolating axes in Delta picker
multidimensional space. The following monitoring functions are available:

- Safe Speed Monitor:
  Safe speed monitoring can be used to monitor the Cartesian speed of individual points in the kinematics, e.g. at the tool center point or at joints.
- Safe Zone Monitor:
  Safe zone monitoring is used to monitor the position of the kinematics in the Cartesian space, e.g. to limit the traversing range of the kinematics or to monitor areas that can be entered by operating personnel.
- Safe Orientation Monitor:
  Safe orientation monitoring enables monitoring of the orientation of the flange on user-defined serial kinematics, e.g. a workpiece may only be machined if the tool is perpendicular to the floor.

The following kinematics are supported:

- Cartesian portal
- Roller picker (vertical and horizontal)
- Delta pickers
- SCARA
- Articulated arm
- User-defined serial kinematics

SIMATIC Safe Kinematics includes an engineering option package for the TIA Portal and must be subsequently installed via a setup in TIA Portal V21.
The product contains a fail-safe block library that can be integrated in the STEP 7 Safety Advanced programming environment and can be connected on the input and output side.
SIMATIC Safe Kinematics supports the following control platforms:

- S7-1500 F-CPUs
- Open Controller
- SIMATIC Drive Controller
- Software Controller
- SINUMERIK ONE

Overview (continued)

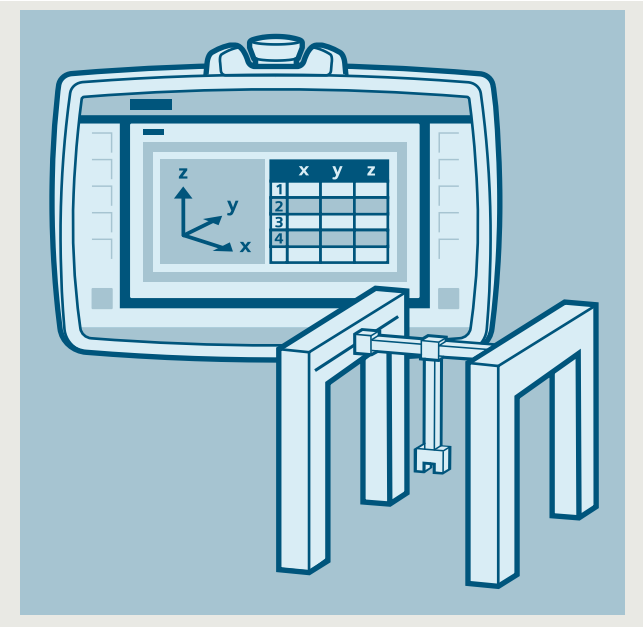
System requirements

- SIMATIC STEP 7 Professional (TIA Portal) V21
- STEP 7 Safety Advanced V21

SIMATIC Safe Kinematics requires as a subordinate drive system SINAMICS S120 with CU320-2 as of firmware V5.1 with Safety Integrated Advanced Functions.

Licensing

- The software is supplied with a Single Runtime License. A license is required for each F-CPU on which SIMATIC Safe Kinematics runs.
- The software can only be ordered via Online Software Delivery (OSD). The download contains one license certificate and the TIA Portal installation setup for SIMATIC Safe Kinematics.
- The following additional licenses are required to use SIMATIC Safe Kinematics:
  - SIMATIC STEP 7 Professional (TIA Portal) V21
  - STEP 7 Safety Advanced V21
  - SINAMICS Safety Integrated Advanced Functions (for each monitored axis of the kinematics)



Selection and ordering data

SIMATIC Safe Kinematics	
SIMATIC Safe Kinematics V19 single Runtime license download[1)] Includes license certificate and installation setup for the block library for safe monitoring of the movement of predefined kinematics with up to 12 interpolating axes. Runs on S7-1500 (T)F-CPU (CPU 1516 FW 4.0 or higher, CPU 1517, CPU 1518) Open Controller, Drive Controller (1507D TF), Software Controller and SINUMERIK ONE with TIA Portal V21 and STEP 7 Safety Advanced V21 Consignee email address required for delivery	**6ES7823-0FE04-1AA0**

Overview

With SIMATIC Kinematics Operate, kinematics can be configured, programmed and operated with up to 6 positioning axes with synchronous point-to-point control (sPTP).
The Plug & Play solution comprises a convenient user interface for programming, diagnostics and operation of the kinematics via HMI.

The SIMATIC Kinematics Operate V1.0 software solution consists of a TIA Portal project and an HMI project for TIA Portal as of V15.0.

SIMATIC Kinematics Operate V1.0 contains the following HMI configuration functions:

- Configuration of kinematics and additional axes;
  6 axes are available in total for multi-axis positioning with sPTP. The axes not used in the multi-axis group can be created as independent single axes.
- Axis configuration;
  The dynamic parameters, the axis limits and the homing of the different axes can be configured.
- Tag and I/O configuration;
  Bool and Real tags can be created. Logical step enabling conditions consisting of multiple inputs and tags can be combined into one Boolean tag. Digital inputs and outputs can be configured via the I/O address.
- Points table;
  By means of input or teaching of axis positions, path points can be defined that can be used for programming the kinematics.
- Zone configuration;
  Multiple restricted zones can be created in the workspace as protection zones. These are checked cyclically against both the target coordinates and the current axis values. A violation leads to a stop response of the axes

The program editor offers the following functions:

Overview (continued)

- Synchronous point-to-point commands;
  All axes are traversed synchronously with multi-axis positioning. The destination is specified either using the points table or by direct input with optional blending.
- Single axis commands;
  the additional axes can be homed, positioned, torque-limited or speed-controlled.
- Wait functions;
  Step enabling conditions, based on a digital input, a Bool tag or a wait time, can be programmed.
- Calculate tags and assign values;
  digital outputs can be set via an input mask. In addition, floating point tags can be calculated, incremented or assigned absolute values.
- Program control structures;
  Labels, branches, loops and parallel sequences allow flexible program design.

SIMATIC Kinematics Operate can be run on SIMATIC S7-1500 CPU S7-1511T-1 PN. Alternatively, SIMATIC S7-1500 CPU S7-1512C-1 PN or a faster CPU can be used. Please refer to the operating instructions for details on scalability and the configuration limits.

System requirements

- SIMATIC STEP 7 Professional (TIA Portal) as of V15
- SIMATIC WinCC Advanced ES as of V15

Licensing

- SIMATIC Kinematics Operate is available as Runtime option for TIA Portal. A license is required for each CPU on which SIMATIC Kinematics Operate runs.
- The product can only be ordered via Online Software Delivery (OSD). The download contains the license certificate. The software is downloaded via the Siemens Industry Online Support Portal.
- The following additional licenses are required to use SIMATIC Safe Kinematics:
  - SIMATIC STEP 7 Professional (TIA Portal) as of V15
  - SIMATIC WinCC Advanced ES as of V15

Selection and ordering data

Overview

The SIMATIC Motion Interpreter of the CPU S7-1500T can be used to create motion tasks for single axes, coordinated axes, and kinematics with up to six interpolating axes. The motion tasks that you want the Interpreter to perform are contained in an Interpreter program, which is part of the Motion Interpreter. The Interpreter program and the cyclic user program of the machine are separate from each other. This means that the technological production process can be implemented without interfering with the cyclical user program of the machine and can be changed during ongoing machine operation.

The Interpreter program can be validated and simulated with an integrated digital twin independently of the user program, enabling parallel development of a customer machine and a fast time-to-market.

Requirements

- TIA Portal V19 with STEP 7 Professional
- SIMATIC T-CPU (technology CPU) from FW version V3.1

Licenses

The SIMATIC Motion Interpreter is a product subject to licensing. A Runtime license is required for each technology CPU.

Selection and ordering data

SIMATIC Motion Interpreter	
Motion Interpreter basic Single Runtime license for 1 CPU Download contains license certificate without software and documentation. Executable under SIMATIC technology CPUs. TIA Portal V19 or higher is required for execution. Download product[1)] Consignee email address required for delivery	**6ES7823-0SJ00-1AA0**

© Siemens AG 2026

Overview

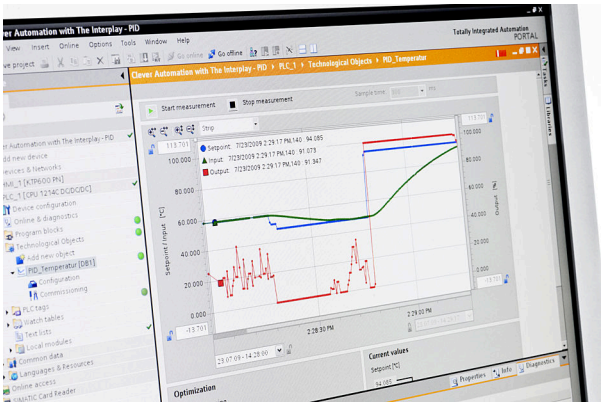
The SIMATIC S7-1500 Technology CPUs support kinematics with up to 4 interpolating axes, e.g. for handling tasks such as pick & place, assembly and palletizing.
With the Motion Control package "S7-1500T Motion Control KinPlus", this scope of functions is expanded so that kinematics with up to 6 interpolating axes can be controlled – e.g. for "oriented" handling of products by means of rotary and swivel axes.
The following additional kinematics are available with "S7-1500T Motion Control KinPlus":

- Predefined kinematics:
  - Cartesian portal 3D with 2 orientations
  - Delta picker 3D with 2 orientations
  - 6-axis articulated arm with central hand
  - 6-axis articulated arm with angular hand
- User-defined kinematics 3D with 3 orientations

Prerequisites:

- TIA Portal V18 with STEP 7 Professional
- From FW version V3.0: SIMATIC CPU 1518T(F)-4 PN/DP or CPU 1507D TF
- From FW version V4.0: SIMATIC CPU 1518T(F)-3 PN
- From FW version V4.1: SIMATIC CPU 1518T(F)-3 PN, 1517T(F)-3 PN, 1516T(F)-3 PN
- Required for each CPU:
  - Motion control package "S7-1500T Motion Control KinPlus" with up-to-date Motion Control firmware part
  - Special SIMATIC Memory Card of the type "S7-1500T Motion Control KinPlus" (available as 2 GB and as 32 GB variant)

The Motion Control package "S7-1500T Motion Control KinPlus" contains the complete Motion Control firmware part of a T-CPU and additionally the function extensions for up to 6 interpolating axes. This package must be copied to a SIMATIC Memory Card of the type "S7-1500T Motion Control KinPlus" and is loaded by the controller at runtime.



Selection and ordering data

Overview

- PID Professional combines the two option packages Modular PID Control and Standard PID Control in TIA Portal.
- Permits the simple integration of continuous PID Controllers, pulse controllers and step controllers in the application program
- Can be used for simple to complex closed-loop control tasks in SIMATIC S7-300 (CPU 313 or higher), S7-400, and WinAC.
- The engineering software for PID Professional is already included in the STEP 7 package in STEP 7 V13 or higher.
- Tuning functionality by means of PID Self-Tuner (part of STEP 7 as of V11 SP1).
- Reduces engineering costs thanks to time-saving parameterization and optimization of the controller

Licensing

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- The engineering software requires STEP 7 Professional. The software is part of the STEP 7 Professional DVD and/or the program download. A license key is required for activation.
- During runtime, each CPU requires its own runtime license.
- Upgrades to PID Professional (engineering license or Runtime single license) are offered for Standard PID Control/Modular PID Control from V11 onwards.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Overview

The SIMATIC Software option package, TPCamGen, is used to calculate optimized motion profiles for servo presses where the tool is connected to the drive axle via a connecting rod.

When calculating the profiles, TPCamGen takes into account various constraints, e.g.:

- Maximum eccentric speed
- Maximum ram speed
- Maximum acceleration
- etc.

It minimizes the drive load at the same time.

TPCamGen is the core of the SIMATIC SimaPressServo software package and can only be used suitably in conjunction with this application software.
The SIMATIC Open Controller platform (from TPCamGen V1.1) or a Windows 10 Industrial PC (IPC) with a SIMATIC S7-15xx technology CPU (from TPCamGen V1.2) serves as runtime environment.

System requirements:

- SIMATIC STEP 7 (TIA Portal) as of V17.
- ET 200 SP Open Controller: Technology CPU 1515SP PC2 T or 1515SP PC2 TF from V21.9
  or
  any SIMATIC S7-15xx technology CPU from V2.9/V21.9 in connection with Windows 10 Industrial PC.

Licensing

- The software can only be obtained as download via Online Software Delivery (OSD). The download includes a license certificate and a ZIP file containing the Windows Installation Setup, TPCamGen function blocks for TIA Portal and the Function Manual (DE/EN).
- The software purchase includes the license for a specific servo press configuration.
- The software is additionally delivered with a Floating Runtime License. It allows the installation of the software on any number of Open Controller CPUs.
- To use the TPCamGen, a signature is additionally required, which is provided in coordination with Siemens. This signature corresponds to a technical license key and is queried each time the software package is generated in the context of the specific press solution. The signature must be stored once in the implemented solution. You will find more information in the Siemens Industry Online Support at this link.
- Note:
  You may use one software license and the associated signature for any number of presses with identical design. For a press with changed design data you need a new license, which has to be ordered separately.

Selection and ordering data

Overview

The vendor- and platform-independent OPC Unified Architecture (UA) is the communication standard for Industry 4.0 and is the standard mechanism for accessing SIMATIC S7-1500 and S7-1200 data from non-Siemens devices.

SIMATIC S7-1200

OPC UA Server with the following functionality:

- OPC UA Data Access, Read/Write, Subscription
- OPC UA Methods for consistent data transmission
- Modeling of the server interface or companion specifications
- Support for modern OPC UA Security Profiles (signing and encryption)
- Openness support for easy handling, e.g., via SiOME
- Diagnostic buffer entries for OPC UA server and OPC UA diagnostics in the TIA Portal

S7-1500

OPC UA Server with the following functionality:

- OPC UA Data Access, Read/Write, Subscription
- OPC UA Methods for consistent data transmission
- Simple use of OPC UA with the standard SIMATIC interface
- Modeling of the server interface or companion specifications
- Alarms & Conditions in the OPC UA server of SIMATIC Alarms & Conditions at the standard SIMATIC interface
- Global Discovery Service (GDS) support for certificate management
- Support for modern OPC UA Security Profiles (signing and encryption)
- Access control with role management
- Openness support for easy handling, e.g., via SiOME
- Diagnostic buffer entries for OPC UA server and OPC UA diagnostics in the TIA Portal

OPC UA Client with the following functionality:

- PLCopen OPC UA Client function blocks for easy handling
- OPC UA Data Access, Read/Write
- OPC UA Methods for consistent data transmission

Licensing

An OPC UA Server or OPC UA Client is present on the target systems (CPUs), and the purchase of the necessary runtime licenses must be confirmed and proven.

Runtime licenses are offered in four levels for different target systems:

Target system	OPC UA S7-1200 Basic	OPC UA S7-1500 Small	OPC UA S7-1500 Medium	OPC UA S7-1500 Large
S7-1200 CPUs	Yes	No	No	No
ET 200SP CPU 1510SP/1512SP (Open Controller) S7-1500 CPU 1511/1513 CPU 1504D Drive Controller	No	Yes	Yes	Yes
1515SP (Open Controller), ET 200pro CPU 1516pro S7-1500 CPU 1515/1516 PLC 1507S software	No	No	Yes	Yes
S7-1500 CPU 1517/1518/1508S CPU 1507D Drive Controller S7-1517V (virtual PLC)	No	No	No	Yes

The runtime license contains the certificate for OPC UA (server and client) and can be executed on the respective target systems including F, C, T/TF, R, H.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

© Siemens AG 2026

Overview

TIA Portal Multiuser Engineering is a TIA Portal option for collaborative engineering of automation projects. It allows several engineers to work on one TIA Portal project at the same time. A separate server application manages the central project data. It runs flexibly alongside a TIA Portal installation. This architecture ensures data integrity during parallel work. The result is coordinated and efficient project development even during parallel processing.

Licensing

- The number of available licenses determines the number of TIA Portal computers on which the software can be used simultaneously (Floating License).
- The software is included in the STEP 7 / WinCC (TIA Portal) installation. A license key is required for use.
- Users of previous versions V14 to V20 can upgrade to version V21.
- A Software Update Service is optionally available.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your software licenses with the Automation License Manager under this link.

Overview

Software to support quality assurance of automation programs in the TIA Portal

Contains tools for checking the programming style and for creating test routines for software modules:

- Styleguide Checker:
  To ensure a unified programming style, rule sets with programming guidelines in the TIA Portal project can be defined as well as their compliance regularly checked.
- Application test:
  To check the correct processing of individual logic blocks or entire S7-1200 G2 and S7-1500 applications, test routines with function tests can be created in a TIA Portal project and subsequently executed and validated with help of SIMATIC S7-PLCSIM Advanced.
- System test:
  The system test allows the user to define and execute test cases for a PLC program using OPC UA server interfaces. The system test permits the following tests to be performed:
  - Hardware-in-the-loop tests with S7-1200 and S7-1500
  - Software-in-the-loop tests with S7-PLCSIM Advanced

New with V21

General:

- A new function authorization for user administration in the TIA Portal is available. The new role "Edit Test Suite Data" has been added to protect tests/rules within the TIA Portal Test Suite from unauthorized access. Without this new right, the user may only execute the test cases/rule sets and adjust the scope.

Application test:

- S7-PLCSIM Advanced V8 supports the S7-1200 G2 controller family. Therefore, TIA Portal Test Suite supports the execution of application tests for the S7-1500 and S7-1200 G2 controllers.

Licensing

- The software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- The application tests created with the Test Suite can only be executed in conjunction with SIMATIC S7-PLCSIM Advanced. An additional SIMATIC S7-PLCSIM Advanced license is only required in "ExternallyManagedPLCSIMInstance" mode.
- There is also the option of completing a Software Update Service.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Selection and ordering data

TIA Portal Test Suite Advanced V21 Software to support quality assurance of automation programs in the TIA Portal; Software can exclusively be used together with STEP 7 Professional / WinCC as of V21. To execute application tests, the SIMATIC S7-PLCSIM Advanced software must also be installed. Floating license, software, documentation and license key for download [1] Email address required for delivery	**6ES7823-1TE25-0AA5**

Overview

The TIA Portal Cloud Connector makes it possible to access the local PG/PC interface and the connected SIMATIC hardware from a TIA Portal engineering system in a cloud environment. Access can be made directly from TIA Portal Cloud or a private cloud via Remote Desktop.

Licensing

- The TIA Portal Cloud Connector installed locally on the machine requires a license. Exception: no license is required when using TIA Portal Cloud

Selection and ordering data

TIA Portal Cloud Connector	
Single license; software is component of STEP 7 / WinCC V14 and higher. Only the Certificates of License (CoL) are delivered with the license.	
• TIA Portal Cloud Connector V2.0 – USB flash drive - Single license. For use with separately licensed TIA Portal products; refer to entry ID 109739390, FAQ "What are the conditions for using the TIA Portal Cloud Connector?"; license key on USB flash drive; software and documentation see entry ID 109780755; Class A; 6 languages: en, de, fr, it, es, zh; executable under Win10, Win11 - Contents: 1x USB flash drive	**6ES7823-1CA02-0YA0**
• TIA Portal Cloud Connector V2.0 – download [1] - Single license download. For use with separately licensed TIA Portal products; refer to entry ID 109739390, FAQ "What are the conditions for using the TIA Portal Cloud Connector?"; license key for download; software and documentation, see entry ID 109780755; Class A; 6 languages: en, de, fr, it, es, zh; executable under Win10, Win11 - Consignee email address required for delivery	**6ES7823-1CE02-0YA0**
• TIA Portal Cloud Connector V2.0 – For Industrial Edge	Industrial Edge Marketplace

Overview

The Teamcenter Gateway permits storage and management of TIA Portal projects and global libraries in Teamcenter. Program handling is integrated into the TIA Portal.

Licensing

- Please note the compatibility of the installed program versions for the operation of the Teamcenter Gateway.
- The software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- An upgrade to the current version is offered for users of previous versions.
- It is possible to conclude Software Update Service (SUS) contracts.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Selection and ordering data

Overview

SIMATIC Visualization Architect (SiVArc)

Challenge:

- To standardize the user interfaces of the visualizations throughout the plant
- Significant reduction of the engineering costs for generating the visualizations
- To make the in-house work standard usable

Solution:

- Automatic generation and creation of the visualizations, based on the program code of the PLC and corresponding visualization objects within the framework of system-wide library concepts.

Licensing

- The software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- An upgrade to the subsequent version is offered for users of previous versions.
- A rental license is available for temporary use
- The software can be tested in restricted mode without a license.
- It is possible to conclude Software Update Service (SUS) contracts.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Overview

The TIA Portal option ProDiag makes it possible to monitor a machine or plant and to intervene in the event of a fault. The monitoring messages which can be generated for the various faults provide specific information on the monitoring mode, location and cause of the fault. Information on troubleshooting can be provided in addition. Plant operators can then not only recognize faults, they can also identify any potential danger in advance and take appropriate countermeasures.

Licensing

- The runtime license for controllers includes 250 supervisions or an unlimited number of supervisions per CPU. From FW 2.0 onwards, the software can run on S7-1500/ET 200SP CPUs regardless of the TIA Portal version.
- For the visualization of the messages, the controls are licensed according to the HMI runtime platforms.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Overview

The SIMATIC Modular Application Creator enables the automated generation of TIA Portal projects based on pre-defined software modules. Especially with complex machine configurations, such as a multi-belt control, a printing machine or other applications with many axes,
this is very efficient compared to manually creating and parameterizing the associated automation project directly in the TIA Portal.

The software modules provide a technological view of the application and can be used in the TIA Portal without programming knowledge.
They are stored in a separate repository, independent of the tool, which needs to be connected to the tool.

Licensing

- The SIMATIC Modular Application Creator and the existing modules are available as a free download via the Siemens Industry Online Support.
- For modules that are charged for, an Engineering license is required that entitles the holder to generate TIA Portal projects for 365 days.

Selection and ordering data

SIMATIC Modular Application Creator For automated generation of TIA Portal projects with use of pre-configured software modules	Can be downloaded from this link.
SIMATIC Modular Application Creator Equipment modules Pre-configured software modules for use with the SIMATIC Modular Application Creator	Can be downloaded from this link.

Overview

The User Management Component (UMC) provides the possibility of central user management. Through the connection to the TIA Portal, users and user groups can be defined and managed across projects. Connection to a Microsoft Active Directory is also possible.

Licensing

- Central user management (UMC) is part of the scope of delivery of TIA Portal.
- The license model depends on the number of user accounts per UMC domain.
- Up to ten user accounts can be used without a license.
- For additional user accounts, 365-day rental licenses and single licenses are available to add to the required number of centrally managed users.

Selection and ordering data

Central user management (UMC) Software component to implement central user management, included in the scope of supply of the respective products (e.g. TIA Portal). The license model depends on the number of user accounts per UMC domain. Use of max. 10 user accounts possible without a license. 6 languages: de, en, fr, es, it, zh; executable on Windows 10 (21H2 or later), Windows 11 (21H2 or later), Windows Server 2019, Windows Server 2022 (21H2 or later)	
• Rental license 365 days with license certificate for 100 user accounts	**6ES7823-1UE30-0YA0**
• Rental license 365 days with license certificate for 4 000 user accounts	**6ES7823-1UE10-0YA0**
• Single license with license certificate for 100 user accounts	**6ES7823-1UE31-0YA0**
• Single license with license certificate for 1000 user accounts	**6ES7823-1UE21-0YA0**

Overview

Comprehensive TIA portfolio with flexible deployment and licensing options - tailored to your needs

TIA as a Service bundles cloud-based and on-premise software offerings for the flexible use of TIA Portal and related engineering services. It enables customers to choose the deployment model that best fits their individual IT strategy, security requirements, and operational needs.

The portfolio offers maximum freedom of choice through flexible licensing models, including subscription and usage-based options. This allows customers to scale their engineering capacity as needed and supports the transition from capital expenditure (CapEx) to operational expenditure (OpEx), enabling more predictable and adaptable cost structures.

TIA as a Service gives users the flexibility to select the right solution for each use case – from highly controlled local environments to flexible, on-demand software usage. By aligning licensing and deployment with business requirements, it helps optimize investment decisions, increase cost efficiency, and adapt engineering resources dynamically to project demands.

© Siemens AG 2026

Overview

Cloud-based services for engineering, simulation, and collaboration with TIA Portal

TIA Cloud Services bring engineering, simulation, and collaboration together in a flexible cloud environment. The portfolio combines three complementary services that cover the entire engineering lifecycle – from individual engineering workstations to simulation and team collaboration.

- TIA Portal Cloud provides a fully virtualized engineering environment, enabling instant access to TIA Portal without local installation and allowing users to scale engineering capacity on demand.
- TIA Simulation Cloud enables cloud-based execution of simulation scenarios, supporting virtual commissioning, testing, and validation without the need for local hardware.
- TIA Project-Server Cloud offers a centralized platform for collaborative engineering, allowing multiple users to work simultaneously on projects with full transparency and consistency.

TIA Cloud Services are based on flexible licensing models, including subscription and usage-based options, allowing customers to scale their usage according to project needs. All services are always up to date, eliminating the need for manual updates, infrastructure management, or maintenance activities.

By combining scalability, reduced IT effort, and seamless integration, TIA Cloud Services help increase engineering efficiency, reduce total cost of ownership, and accelerate time-to-market for automation solutions.

© Siemens AG 2026

Overview

Virtualized TIA Portal engineering environment in the cloud

TIA Portal Cloud provides a fully virtualized engineering environment, enabling seamless access to TIA Portal versions and option packages via the cloud. It allows rapid provisioning of engineering workplaces while significantly reducing local IT efforts.

Flexible usage scenarios – from occasional access to intensive project work – allow users to scale engineering capacity on demand. This increases efficiency and accelerates engineering processes through immediate availability of a ready-to-use engineering environment.

Licenses:

- 21-day trial:
  Free trial period enabling users to explore TIA Portal Cloud and its capabilities without commitment.
  https://tiacloudservices.siemens.com/tia-portal-cloud/trials/6ES7804-0CP20-1YA7/21-trial
- Pay-per-use (hour-based):
  Billed based on actual usage time with precise hourly accounting and monthly invoicing.
- Monthly subscription:
  Unlimited usage within one month; automatically renews unless cancelled before the end of the contract period.
- Annual subscription:
  Unlimited usage for one year, including free access to SITRAIN access – the digital learning platform.
- 365-day certificate:
  Fixed-term certificate with a validity of 365 days; does not renew automatically. Activation details are provided via PDF.
- 100-hour certificate:
  Certificate with a prepaid credit of 100 hours; activation details are provided via PDF.

Overview

Cloud-based simulation for virtual commissioning

TIA Simulation Cloud enables efficient, scalable simulation of automation solutions directly in the cloud. Users can execute simulation models without local hardware, accelerating virtual commissioning and reducing setup efforts.

The solution supports both 2D and 3D simulation scenarios and allows flexible scaling based on project requirements. TIA Simulation Cloud helps minimize risks, shorten time-to-market, and improve engineering quality through comprehensive testing, training, and validation in a virtual environment.

Offerings:

2D Simulation Engineering

- Cost-efficient 2D engineering and simulation
- 8-hour free trial: https://tiacloudservices.siemens.com/tia-simulation-cloud/2d-simulation-engineering/20

3D Simulation Player

- 2D engineering and simulation with performant 3D visualization
- 8-hour free trial: https://tiacloudservices.siemens.com/tia-simulation-cloud/3d-simulation-player/20

Selection and ordering data

Overview

Cloud-based TIA Project-Server for multi-user engineering

TIA Project-Server Cloud provides a centralized, cloud-based platform for managing and collaborating on TIA Portal projects. Multiple users can access projects simultaneously, track changes transparently, and coordinate engineering workflows efficiently.

The solution enables seamless collaboration across locations and teams, improving transparency, consistency, and productivity throughout the entire project lifecycle. By centralizing project data in the cloud, TIA Project-Server Cloud enhances collaboration, reduces coordination effort, and accelerates engineering execution.

Selection and ordering data

TIA Project Server Cloud, annual subscription including 500 GB project memory The user's email address must be assigned directly in SiePortal. Only the specific terms under https://tiacloudservices.siemens.com/terms-and-conditions apply.	**6ES7804-0PP01-1YA0**

Overview

On-premise software solutions for TIA engineering

TIA On Premise Services provide the established software portfolio for local TIA Portal engineering. They offer maximum control over infrastructure, data, and system integration, making them ideal for environments with specific IT, compliance, or security requirements.

Modern subscription-based licensing models ensure flexibility and scalability, allowing customers to adapt their usage to project needs while maintaining full control of their local environment.

With full compatibility to the broader TIA ecosystem, TIA On Premise Services enable seamless integration into existing infrastructures and support long-term, stable engineering operations where cloud usage is limited or not desired.

Overview

Preconfigured software packages for local TIA Engineering

TIA Portal Subscription Bundles offer preconfigured software packages for local engineering with TIA Portal. They combine core TIA Portal functionalities with optional add-ons, enabling a structured and ready-to-use solution for different engineering requirements.

The bundles support a wide range of use cases – from basic engineering tasks to advanced applications – while simplifying software selection and deployment.

With their subscription-based licensing model, TIA Portal Subscription Bundles provide predictable costs, continuous access to the latest software updates, and the flexibility to adapt usage as project needs evolve. This ensures efficient planning, reduced upfront investment, and a modern approach to local engineering software.

Bundles:

TIA Portal Basic

- STEP 7 Basic
- STEP 7 Safety Basic
- WinCC Basic

TIA Portal Engineering

- STEP 7 Professional (TIA Portal)
- STEP 7 Safety Advanced
- WinCC Adv/Unified (10k)
- TIA Portal Multiuser Engineering

TIA Portal Engineering & Simulation

- TIA Portal Engineering Bundle +
- S7-PLCSIM Advanced
- TIA Portal Test Suite Advanced

Overview

Subscription license for advanced PLC simulation

SIMATIC S7 PLCSIM Advanced Subscription enables powerful simulation of SIMATIC controller programs in a local environment. It supports virtual commissioning, testing, and validation of complex automation systems without requiring physical hardware.

With this subscription-based licensing model, users benefit from continuous access to the latest software updates, ensuring that their simulation environment is always up to date. At the same time, the subscription model offers flexibility to adapt usage to project needs while reducing upfront investment and enabling predictable costs.

Overview

SIMATIC AX Logic Control Engineering
Automation at the speed of software development

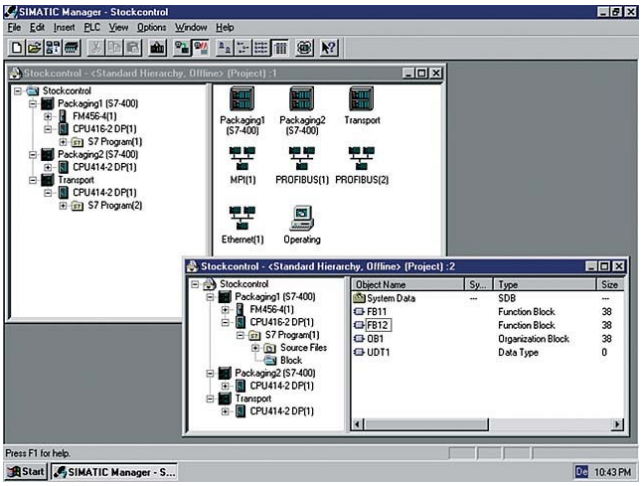
SIMATIC AX Logic Control Engineering brings IT practices to automation. It uses modular engineering to support IT-savvy automation engineers. The toolchain is versatile and adaptable to user needs. Engineers can work together from anywhere.

Development uses a modern IDE based on Visual Studio Code. Object-oriented ST code can be reused in ladder diagram (XLad). Unit testing improves software quality without hardware. Native GIT integration enables version and source control. A CLI-first approach accelerates engineering tasks. A GUI supports guided usage when needed. Package management with apax handles dependencies and updates. CI pipelines enable stable, automated release cycles. Cloud connections allow remote deployment from anywhere. Plain text source code supports transparency and automation. An open API enables extensions, scripts, and packages. A community on GitHub provides support and engagement.

Available as cloud SaaS or as a local AX Code IDE.

Runtime targets include S7-1500, S7-1200 G2 and Virtual S7-PLC. PLCSIM Advanced is also supported.

Runtime Targets:



- S7-1500
- S7-1200 G2
- Virtual S7-PLC
- PLCSIM Advanced

SIMATIC AX can be ordered in the Industrial Software Store under this link.

Find more information on Siemens.com.

© Siemens AG 2026

Overview

- Basic software STEP 7:
  The standard tool for the SIMATIC S7, SIMATIC C7 and SIMATIC WinAC automation systems.
- For fully utilizing the performance capability of the systems.
- With user-friendly functions for all phases of an automation project:
  - Configuration and parameter assignment of the hardware
  - Specifying the communication
  - Programming
  - Testing, commissioning and service
  - Documentation, archiving
  - Operating, diagnostic functions

Note

The STEP 7 (TIA Portal) engineering software is required to program the new generation of S7-1200, S7-1500 and ET 200SP CPU PLCs as well as the S7-1500 Software Controller; it can also be used for programming the S7-300, S7-400 and SIMATIC WinAC.

Siemens offers a combo license for both platforms which enables you to work using both STEP 7 (TIA Portal) as well as traditional engineering software (STEP 7 V5.x). See "STEP 7 Professional" for more information.

Licensing

- STEP 7 V5.7 can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- A 50 h rental license is available for limited use.
- An upgrade to version V5.7 is offered for users of the previous V5.3...5.6 versions.
- A V5.6 license is also valid for the version V5.7.
- A trial license is available for testing purposes.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Overview

STEP 7 Professional supports all IEC languages.
In addition to the languages familiar from STEP 7:

- LAD
- FBD
- STL

the following are also available:

- "Sequential function chart"
- "Structured text"

An offline simulation of user programs created with these languages is included. STEP 7 Professional thus replaces the combination of the individual packages STEP 7, S7-GRAPH, S7-SCL and S7-PLCSIM.

A PowerPack (conversion package) is available for customers who use STEP 7 already and wish to change. A valid STEP 7 license is required for purchasing the POWERPACK. A separate Software Update Service can be purchased for STEP 7 Professional.

Note

The STEP 7 (TIA Portal) engineering software is required to program the new generation of S7-1200, S7-1500 and ET 200SP CPU PLCs as well as the S7-1500 Software Controller; it can also be used for programming the S7-300, S7-400 and SIMATIC WinAC.

Siemens offers a combo license for both platforms which enables you to work using both STEP 7 (TIA Portal) as well as traditional engineering software (STEP 7 V5.x). See "Licensing" for more information.

Licensing

- New installations of STEP 7 Professional 2021 (based on STEP 7 V5.x) are only available as combo licenses together with STEP 7 Professional (TIA Portal). The software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license). A 50 h rental license is available for limited use.
- For users of the previous STEP 7 Professional 2006...2010 versions, an upgrade to the respective current Combo version (Vxx/SRx) is offered.
- The license of the version V16/2017 Combo can also be used for STEP 7 V5.7.
- PowerPack and upgrade enable migration from STEP 7 V5.7 to STEP 7 Professional Combo.
- A trial license is available for testing purposes.
- It is possible to conclude Software Update Service (SUS) contracts.

Overview (continued)

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Overview

- PASCAL-type high-level language
- Optimized for programming PLCs
- With PLCopen Base Level certificate
- For use in SIMATIC S7-300 (recommended for CPU 314 and CPU 312C), S7-400, C7 and WinAC

Licensing

- S7-SCL is an integral part of the STEP 7 Professional software package or is available as a stand-alone software product.
- S7-SCL V5.7 is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.7 is available for users of the previous versions as of V5.3.
- A separate update service can be purchased for S7 SCL.
- A trial license valid for 21 days is available for download via the Industry Online Support under this link.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Selection and ordering data

SIMATIC S7-SCL, Version 5.7 **Task:** High-level language programming **Target system:** SIMATIC S7-300 (CPU 314 or higher), SIMATIC S7-400, SIMATIC C7 **Requirement:** STEP 7 from V5.7; Windows 10/11 Professional/Enterprise, Windows Server 2016/2019/2022 **Type of delivery:** On CD; English, German, French, Spanish, Italian; license key on USB flash drive, with electronic documentation	
Floating license	**6ES7811-1CC08-0YA5**
Software Update Service (requires current software version)[1]	**6ES7811-1CA01-0YX2**
Upgrade floating from V5.3 to V5.7	**6ES7811-1CC08-0YE5**
SIMATIC Manual Collection DL in 5 languages All manuals for S7-1200/1500/200/300/400, LOGO!, SIMATIC DP, PC, PG, STEP 7, Engineering SW, Runtime SW, SIMATIC HMI, SIMATIC NET, SIMATIC IDENT Consignee email address required for delivery.	**6ES7998-8XE01-8YE0**
SIMATIC Manual Collection DL in 5 languages Software Update Service (SUS); within the framework of this contract, you will receive all current software versions as a download for one year. The contract is automatically extended by 1 year unless it is canceled 3 months before expiration. Period of delivery and service: 1 year from date of invoice Consignee email address required for delivery.	**6ES7998-8XE01-8YE2**

1) For more information see Software Update Service.

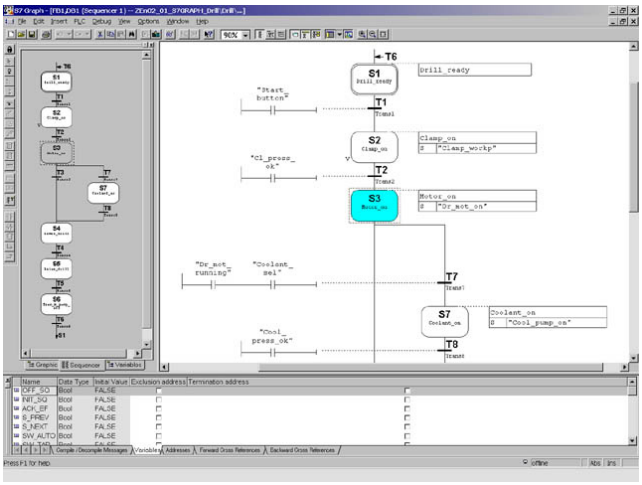
Technical specifications



Engineering tool	S7-SCL
Current version	V5.7
Software class	A
Application areas	
Can be used for	Text-based high-level language programming of simple and complex calculations, CASE, loop, jump, and comparison functions
Marketing message	Programming of algorithms and calculations made easy!
Advantages	• Clear and easy-to-read programs • Functional, module-based programming • CASE statement replaces a large number of jump and comparison functions • Easily understood by PLC programmers, as the programming philosophy of LAD/FBD/STL is retained • Easy switchover to PLC programming for PC programmers • Exchangeability (porting) of subroutines in accordance with IEC 61131-3 • Less time required for engineering compared to LAD/FBD/STL: Up to 20% for simple programs; at least 50% for demanding program structures
Sectors	• Labeling machines • Chemical plants (e.g. oxygen extraction, evaluation of measured values) • Rubber and plastics processing machines • Woodworking machines • Storage and logistics systems • Paper and printing machinery • Punching and cutting machines • Water industry • Coilers
Target systems	
Can be used in	S7-300 (CPU 313 or higher and CPU 312C or higher recommended) S7-400 C7 (C7-626 or higher recommended) WinAC
System requirements	
Operating system	Windows 10/11 Windows Server 2016/2019/2022
Required hard drive memory in the PG/PC	50 MB
Required software	STEP 7 V5.7
Properties	
Monitoring tags	Yes
Controlling tags	Yes
Single-step processing	Yes
Integration in CFC	Yes
Program runtimes	
with S7-300 (typical)	Similar to LAD/FBD/STL
with S7-400 (typical)	Similar to LAD/FBD/STL
Diagnostics	
Integration of diagnostic data in ProAgent	-
Integration of diagnostic data in ProTool/Pro	-
Integration of diagnostic data in WinCC	-
Supported standards	
IEC 61131-3	PLCopen certification • Base level ST available • Reusability Level ST available

Technical specifications (continued)

Available versions/licenses	
Floating license	CD-ROM with • Tool • Electronic manual • Getting Started guide • Examples License on USB flash drive Certificate of License Product information
Upgrade (floating license)	CD-ROM with • Tool • Electronic manual • Getting Started guide • Examples License on USB flash drive Certificate of License Product information
Software Update Service (SUS)	
Also a component of	
STEP 7 Professional	Yes
S7 Trainer Package	Yes
PCS 7	Yes
D7-SYS	-

© Siemens AG 2026

Overview

- For configuring and programming sequential processes using sequencers
- Standardized representation to EN 1131-3
- Clearly comprehensible program thanks to structuring of the process into separate steps
- With extensive diagnostic functions, integrated in the SIMATIC diagnostics concept
- With PLCopen Base Level certificate
- For use in SIMATIC S7-300 (recommended for CPU 315 and CPU 312C or higher), S7-400, C7 and WinAC

Overview (continued)

Licensing

- S7 GRAPH is an integral part of the STEP 7 Professional software package or is available as a stand-alone software product.
- S7-Graph V5.7 is supplied with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.7 is available for users of previous versions as of V5.3.
- A separate update service can be purchased for S7-GRAPH.
- A trial license valid for 21 days is available for download via the Industry Online Support under this link.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Selection and ordering data

SIMATIC S7-GRAPH, Version 5.7 **Task:** Configuring and programming of sequences **Target system:** SIMATIC S7-300, SIMATIC S7-400, SIMATIC C7 **Requirement:** STEP 7 V5.7; Windows 10/11 Professional/Enterprise, Windows Server 2016/ 2019/2022 **Type of delivery:** on CD; German, English, French, Spanish, Italian; including license key on USB flash drive, with electronic documentation	
Floating license	**6ES7811-0CC08-0YA5**
Software Update Service (requires current software version)[1)]	**6ES7811-0CA01-0YX2**

Overview

- For functional testing of the generated SIMATIC S7 user blocks on a programming device or PC, independent of the availability of the target hardware
- Shifts the detection and correction of programming errors to an early stage of development
- Enables an accelerated and cost-effective initial commissioning and enhances the program quality
- Can be used for LAD, FBD, STL, S7-GRAPH, S7-HiGraph, S7-SCL, CFC, S7-PDIAG, WinCC (local installation)

Licensing

- S7-PLCSIM is an integral part of the STEP 7 Professional software package or is available as a stand-alone software product
- S7-PLCSIM V5.4 is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.4 is offered for users of the previous versions.
- A separate update service can be purchased for S7-PLCSIM.
- A trial license valid for 14 days is available for download via the Industry Online Support under this link.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Selection and ordering data

S7-PLCSIM, Version 5.4 **Task:** Functional testing of SIMATIC S7 user blocks on programming device/PC **Target system:** SIMATIC S7-300, SIMATIC S7-400, SIMATIC C7 **Requirement:** STEP 7 V5.4 or higher incl. SP4/SP5 or STEP 7 > V5.5 **Type of delivery:** on CD; English, German, French, Spanish, Italian; license key on USB flash drive, with electronic documentation	
Floating license	**6ES7841-0CC05-0YA5**

Engineering tool	**S7-PLCSIM**
Type of license	Floating license
Software class	A
Current version	V5.4
Target system (recommended)	SIMATIC S7-300 SIMATIC S7-400 SIMATIC C7
Operating system	Windows 10/11 Windows Server
Required software packages	STEP 7 V5.4 with SP4 or SP5 or STEP 7 > V5.5
Disk space required in programming device/PC	5 MB

© Siemens AG 2026

Overview

- For the generation of automation programs by drawing a technology chart
- With extensive libraries of ready-made software blocks to which user-created blocks can be added
- Minimized outlay and reduced error susceptibility due to the interconnection of ready-made blocks
- Optimized integration in the world of automation, for example, through guaranteed compatibility with all STEP 7 tools
- Can be used for SIMATIC S7-300 (recommended for CPU 316 or CPU 314C or higher), SIMATIC S7-400, SIMATIC WinAC and D7-SYS

Licensing

- SIMATIC CFC V9.0 is supplied with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 9.0 is available for users of the previous 8.x versions.
- For SIMATIC CFC, the Software Update Service is available with the Standard, Compact and Download types of delivery.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Selection and ordering data

SIMATIC CFC, Version 9.0 **Task:** Graphic configuring and programming of automation applications in the form of technology charts **Target system:** SIMATIC S7-300/400, SIMATIC WinAC, D7-SYS **Requirements:** STEP 7 V5.6 or higher **Type of delivery:** Engineering software and electronic documentation on CD-ROM, license key on USB flash drive, Certificate of License	
Floating license	**6ES7658-1EX58-0YA5**
Floating license for download. Email address required for delivery[2]	**6ES7658-1EX58-0YH5**

Overview

- For creating safety-related automation applications with SIMATIC S7 in LAD or FBD (STEP 7 required)
- Implementation of safety functions by simply connecting function blocks
- With prefabricated block library
- Custom block creation possible
- Optimal embedding in the automation world thanks to total integration in the STEP 7 tools
- Scope of supply:
  - Distributed Safety Editor
  - Code generator
  - Debugger
  - Standard block libraries

Licensing

- SIMATIC S7 Distributed Safety is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.4 is offered for users of the previous versions 5.x.
- A trial license valid for 14 days is available for download via the Industry Online Support under this link.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Selection and ordering data

S7 Distributed Safety V5.4 SP5 Update 2 programming tool **Task:** Configuration software for configuring fail-safe user programs for SIMATIC S7-300F, S7-400F, WinAC RTX F, ET 200S, ET 200M, ET 200iSP, ET 200pro, ET 200eco, ET 200SP **Requirement:** Windows 7 SP1 (64-bit) Windows 10 Professional/Enterprise (64-bit) Windows Server 2008 R2 SP1 (64-bit) Windows Server 2012 R2 (64-bit), Windows Server 2016 (64-bit) STEP 7 from V5.5 SP1 Please also consider the operating systems that have been released for the STEP 7 version used

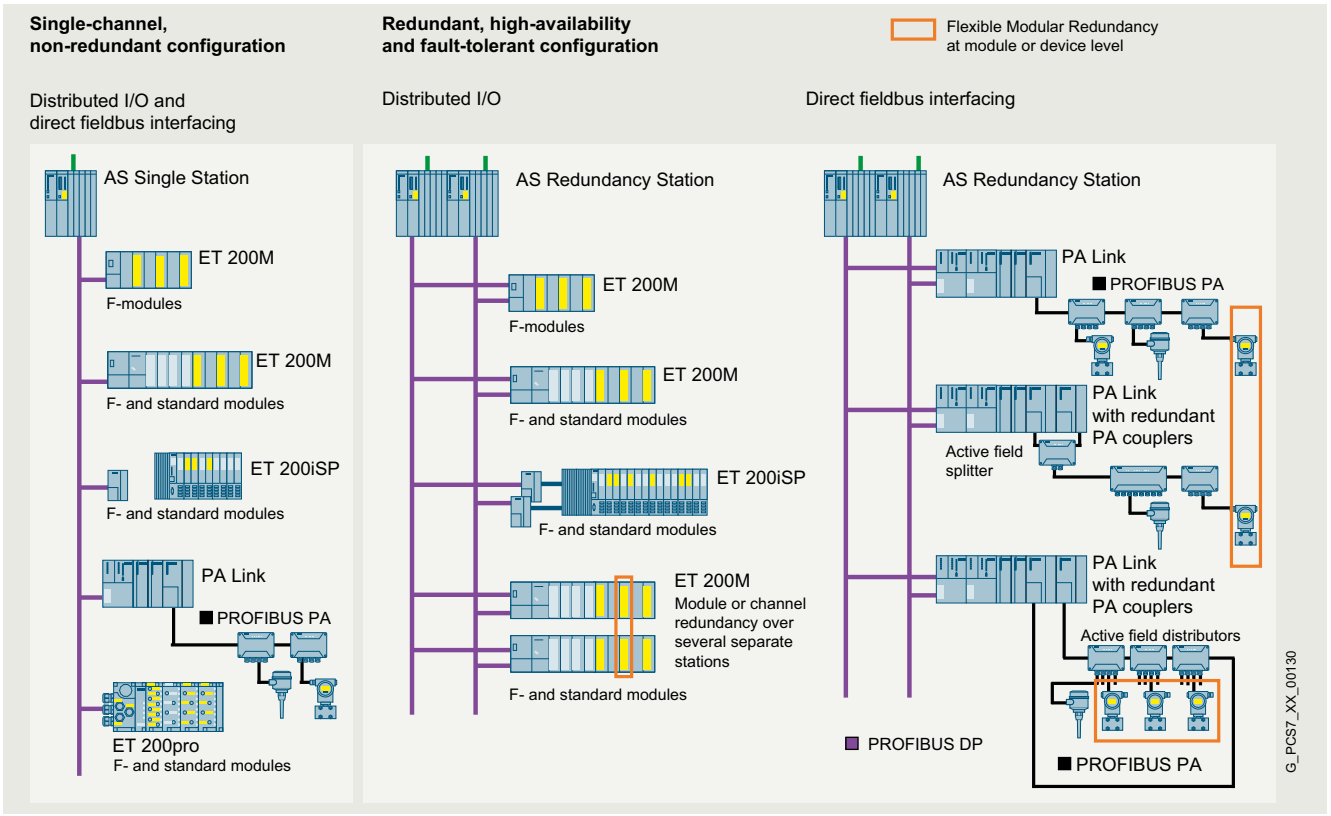
Overview

Safety Integrated for Process Automation is the comprehensive range of products and services from Siemens for safe, fault-tolerant applications in the process industry. This is characterized by:

- Safety-related F/FH automation systems of the S7-400 series (see "Automation Systems" section)
- Safe communication with the PROFIsafe profile via PROFIBUS (see section "Industrial Communication, PROFIBUS") or PROFINET (see section "Industrial Communication, PROFINET")
- Fail-safe transmitters (SITRANS P DS III) on the PROFIBUS PA with PROFIsafe (see Catalog FI 01, Field devices for process automation)
- ET 200SP HA, ET 200iSP, ET 200M, ET 200S and ET 200pro distributed I/O systems with safety-oriented F-I/O modules/submodules (see "Process I/O" section)
- Fail-safe process instruments/devices for connection to ET 200 distributed I/O systems (see Catalog FI 01, Field Instruments for Process Automation)
- SIMATIC Safety Integrated software for implementation and operation of safety applications, with additional components for the Engineering System and the operator stations: SIMATIC S7 F-systems, SIMATIC S7 Safety Matrix
- Special applications, for example, Partial Stroke Test
- Safety lifecycle management with support by highly qualified solution partners: services for all phases in the lifecycle of a safety instrumented system (analysis, implementation, and operation)

© Siemens AG 2026

Design



The PROFIsafe profile allows safety-related communication between the automation system (controller) and the process I/O via either PROFIBUS or PROFINET. The decision for choosing either PROFINET IO or the PROFIBUS DP/PA fieldbuses has a significant influence on the architecture of the safety-related system.

Safety-related design versions with PROFIBUS

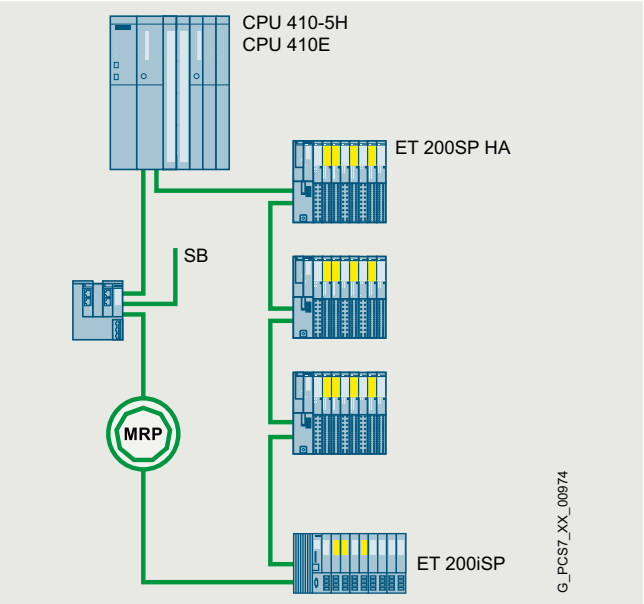
In the case of a safety-related system with PROFIBUS communication integrated into SIMATIC PCS 7, a distinction is made across all architecture levels between two design versions:

- Single-channel, non-redundant design
- Redundant, fault-tolerant design

Both design versions are extremely variable, and offer a large scope for different customer requirements. Standard automation (basic process control) and safety-related functions can be combined flexibly, not only in the area of distributed I/O. Even at the controller level, they can be combined in one system or separated. In addition, there are numerous possibilities arising from the use of flexible modular redundancy.

Safety-related design versions with PROFIBUS

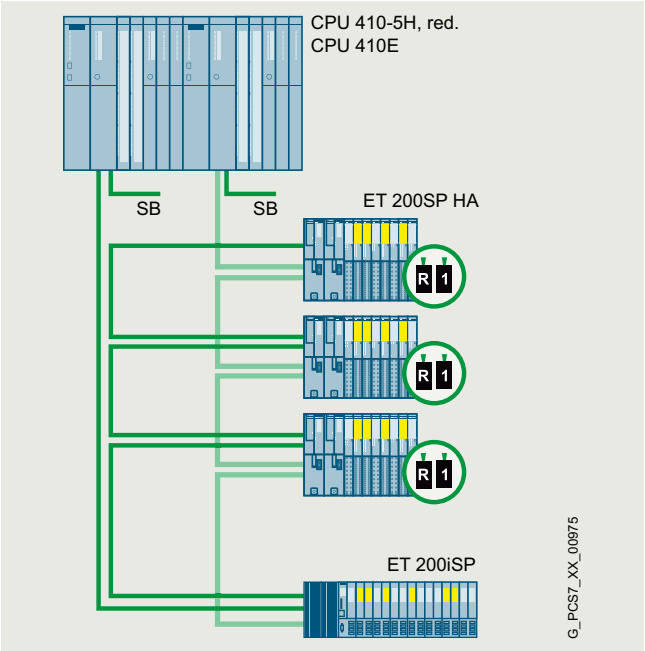
At the individual architectural levels (controller, fieldbus, I/O), you have the configuration alternatives shown in the figure in line with the I/O used (ET 200SP HA, ET 200iSP, ET 200M and ET 200pro remote I/O stations or PROFIBUS PA devices with PA profile 3.0 or higher).



Safety-related design versions with PROFINET

Safety-related AS single stations (F systems) and AS redundancy stations (FH systems) from the S7-400 range can be networked simply and effectively with ET 200M remote I/O stations via PROFINET IO. For this purpose, the PN/IE interface integrated in the CPU and the corresponding PROFINET interface module in the remote I/O stations (e.g. IM 155-6 PN HA for ET 200SP HA) are available on the automation system side.

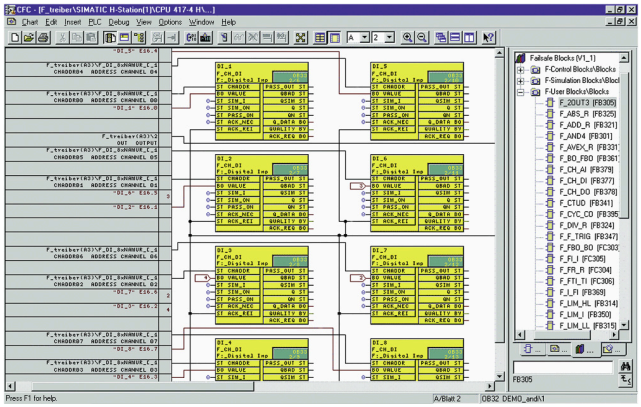
The availability of the I/O devices on an AS Single Station (F-system) can be increased by a ring topology with media redundancy. If the transmission link in the ring is interrupted at one point, for example, due to a break in the ring cable or the failure of a station, the redundancy manager then immediately activates the alternative communication path.



© Siemens AG 2026

Design (continued)

Safety-related PROFINET IO communication with media redundancy



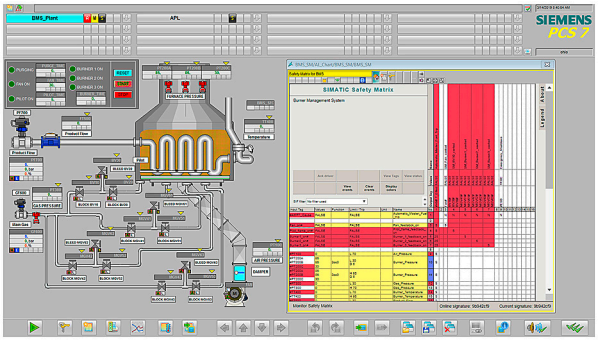
The maximum availability with minimum error handling times is achieved by the AS Redundancy Station (FH system) in conjunction with the redundant PROFINET configuration R1. From the CPUs of the H system onwards, the R1 devices are connected via two separate line structures. In order to increase availability, we recommend reverse cabling (as shown in the blueprint). In contrast to the single-sided I/O device connection to only one CPU, failure of a CPU in this case does not automatically lead to failure of the connected I/O devices.

Safety-related PROFINET IO communication with system redundancy

© Siemens AG 2026

Overview

The SIMATIC S7 F Systems engineering tool for configuration of safety-related SIMATIC PCS 7 automation systems and safety-related F-modules from the ET 200 range is integrated in the SIMATIC Manager. SIMATIC S7 F Systems are based on pre-configured and German Technical Inspectorate certified blocks. The following functions are then available:



- Parameterization of CPU and F signal modules
- Creation of safety-related applications in the CFC

Selection and ordering data

SIMATIC S7 F Systems	
SIMATIC S7 F Systems V6.4 Programming and configuration environment for creating and using safety-oriented STEP 7 programs 2 languages (English, German), software class A Runs on the following operating systems • Windows 10 Enterprise 2015 LTSB (64-bit), Windows 10 Enterprise 2019 LTSC 64-bit, Windows Server 2016 Standard Edition 64-bit, Windows Server 2016 Datacenter Edition 64-bit, Windows Server 2019 Standard Edition 64-bit, Windows Server 2019 Datacenter Edition 64-bit Floating license for 1 user, without SIMATIC PCS 7 Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License, bundled with 1 × SIMATIC S7 F Systems Software Media Package per order item	**6ES7833-1CC46-0YA5**
• Online delivery License key download and online Certificate of License combined with SIMATIC S7 F Systems Software Media Package (software download and online Certificate of License) Note: Email address required	**6ES7833-1CC46-0YH5**
SIMATIC S7 F Systems Software Media Package	
SIMATIC S7 F Systems Software Media Package V6.4 Installation software without license 2 languages (English, German), software class A Runs on the following operating systems: • Windows 10 Enterprise 2015 LTSB 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, Windows Server 2016 Standard Edition 64-bit, Windows Server 2016 Datacenter Edition 64-bit, Windows Server 2019 Standard Edition 64-bit, Windows Server 2019 Datacenter Edition 64-bit Without SIMATIC PCS 7 Software Media Package Note: Can only be used in conjunction with a valid license.	
• Goods delivery Software on DVD and Certificate of License	**6ES7833-4CC46-0YT8**
• Online delivery Software download and online Certificate of License Note: Email address required!	**6ES7833-4CC46-0YG8**
Upgrades for SIMATIC S7 F Systems See "Upgrades for Safety Integrated for Process Automation" in section "Update/upgrade packages", "Updates/upgrades asynchronous to the PCS 7 version". Note: With a SIMATIC S7 F Systems Upgrade from V5.x to V6.x, the type of SIMATIC S7 F Systems License changes from single license to floating license.	

© Siemens AG 2026

Overview

Process image of an operator station with the SIMATIC S7 Safety Matrix Viewer displayed

The SIMATIC S7 Safety Matrix, which can be used in addition to the CFC, is an innovative safety lifecycle tool from Siemens that can be used not only for user-friendly configuration of safety applications, but also for their operation and service. The tool, which is based on the proven principle of a cause & effect matrix, is ideally suited to processes where defined states require specific safety reactions.

The SIMATIC S7 Safety Matrix means that programming of the safety logic is not only significantly simpler and more convenient, but also much faster than conventional processes. During the risk analysis of a plant, the configuration engineer can assign precisely defined reactions (effects) to events (causes) which may occur during a process.

Selection and ordering data

SIMATIC S7 Safety Matrix Runs with the following operating systems (see SIMATIC S7 Safety Matrix V6.3 Readme for the latest information): • On engineering station under: - MS Windows 7 SP1 (64-bit) (Ultimate, Enterprise, Professional) - MS Windows 10 Enterprise 2015 LTSB - MS Windows 10 Enterprise 2019 LTSC - MS Windows Server 2008 R2 SP1 - MS Windows Server 2012 R2 Standard - MS Windows Server 2016 Standard - MS Windows Server 2019 Standard • On operator station (for Safety Matrix Viewer) under: - MS Windows 7 Ultimate SP1 (32-bit) - MS Windows 7 SP1 (64-bit) (Ultimate, Enterprise, Professional) - MS Windows 10 Enterprise 2015 LTSB - MS Windows 10 Enterprise 2019 LTSC - MS Windows Server 2008 R2 SP1 - MS Windows Server 2012 R2 Standard - MS Windows Server 2016 Standard - MS Windows Server 2019 Standard	
SIMATIC S7 Safety Matrix Tool V6.3 Creation, configuration, compilation and loading of the SIMATIC S7 Safety Matrix as well as operator control and monitoring in a SIMATIC PCS 7 environment 2 languages (German, English), software class A, floating license for 1 user Without SIMATIC PCS 7 Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License, bundled with 1 × SIMATIC S7 Safety Matrix Software Media Package per order item	**6ES7833-1SM03-0YA5**
• Online delivery License key download and online Certificate of License, combined with SIMATIC S7 Safety Matrix Software Media Package (software download and online Certificate of License) Note: Email address required; installation software also available separately as SIMATIC S7 Safety Matrix Software Media Package.	**6ES7833-1SM03-0YH5**
SIMATIC S7 Safety Matrix Viewer V6.3 For operator control and monitoring of the SIMATIC S7 Safety Matrix via OS Single Station/OS Client Runtime software, 2 languages (German, English), software class A, floating license for 1 user Without SIMATIC PCS 7 Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License, bundled with 1 × SIMATIC S7 Safety Matrix Software Media Package per order item	**6ES7833-1SM63-0YA5**
• Online delivery License key download and online Certificate of License, combined with SIMATIC S7 Safety Matrix Software Media Package (software download and online Certificate of License) Note: Email address required; installation software also available separately as SIMATIC S7 Safety Matrix Software Media Package.	**6ES7833-1SM63-0YH5**

Selection and ordering data (continued)

SIMATIC S7 Safety Matrix Software Media Package	
SIMATIC S7 Safety Matrix Software Media Package V6.3 (incl. SP) Installation software without license, 2 languages (German, English), software class A Without SIMATIC PCS 7 Software Media Package Note: Can only be used in conjunction with a valid license.	
• Goods delivery Software on DVD and Certificate of License	**6ES7833-4SM36-0YT8**
• Online delivery Software download and online Certificate of License Note: Email address required!	**6ES7833-4SM36-0YG8**
Upgrades for SIMATIC S7 Safety Matrix Tool and SIMATIC S7 Safety Matrix Viewer See "Safety Integrated Upgrades for Process Automation", chapter "Update/upgrade packages", section "Updates/upgrades asynchronous to the PCS 7 version"

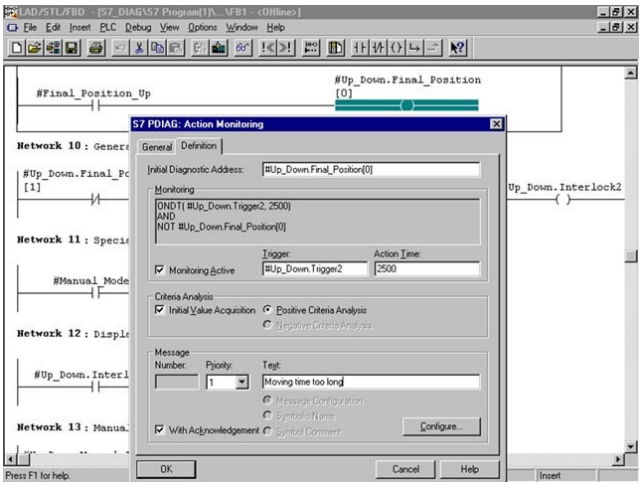
System requirements for SIMATIC S7 Safety Matrix

© Siemens AG 2026

Overview

- Software package for assembling fault-tolerant control systems based on software
- Designed for control systems with single-channel distributed I/O
- For use in applications with low demands on changeover speed, such as the control of hydroelectric power plants, cooling circuits, traffic flows, level control, measured data acquisition
- Inexpensive thanks to the use of standard S7-300 and S7-400 components
- I/O linking with PROFIBUS DP in redundant configuration
- Optional control via WinCC operator station

Selection and ordering data



Program package software redundancy V1.2 **Task:** Configuring a redundant control. Target system: SIMATIC S7-300, S7-400 **Requirement:** STEP 7 V5.2, NCM S7 for PROFIBUS **Type of delivery:** incl. electronic documentation (English, German, French, Spanish, Italian), 4 application examples and faceplate for WinCC on CD-ROM	
Single license (for 2 CPUs)	**6ES7862-0AC01-0YA0**
Single license, without software and documentation	**6ES7862-0AC01-0YA1**
SIMATIC Manual Collection DL in 5 languages All manuals for S7-1200/1500/200/300/400, LOGO!, SIMATIC DP, PC, PG, STEP 7, Engineering SW, Runtime SW, SIMATIC HMI, SIMATIC NET, SIMATIC IDENT Consignee email address required for delivery.	**6ES7998-8XE01-8YE0**
SIMATIC Manual Collection DL in 5 languages Software Update Service (SUS); within the framework of this contract, you will receive all current software versions as a download for one year. The contract is automatically extended by 1 year unless it is canceled 3 months before expiration. Period of delivery and service: 1 year from date of invoice Consignee email address required for delivery.	**6ES7998-8XE01-8YE2**

Hardware requirements	
CPU	S7-300: CPU 313C-2 DP, 314C-2 DP, 315-2 DP, 316-2 DP, 318-2 DP S7-400: all CPUs
Redundancy link of the CPUs	MPI, PROFIBUS, Industrial Ethernet; existing connections can also be used
Usable modules for ET 200M	IM 153-2; all DI/O, AI/O for ET 200M; FM 350-1 counter module; CP 341
Software requirements	
Configuration/programming	STEP 7 V4.0
Communication configuration for redundant PROFIBUS DP	NCM S7 for PROFIBUS

© Siemens AG 2026

Overview

- For configuration of process diagnostics with SIMATIC S7
- Increases the availability of machines and production plants and provides supports with fault analysis and elimination on-site
- For use on the SIMATIC S7-300, S7-400

Licensing

- S7-PDIAG V5.7 is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.7 is available for users of previous versions.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Selection and ordering data

S7-PDIAG, Version 5.7 **Task:** Configuring of process diagnostics for LAD/FBD/STL **Target system:** SIMATIC S7-300 (CPU 314 and higher); SIMATIC S7-400 **Requirement:** From STEP 7 V5.7; Windows Server 2016/2019/2022, Windows 10/11 Professional, Windows 10/11 Enterprise **Type of delivery:** on CD; German, English, French, Spanish, Italian; incl. authorization diskette, with electronic documentation	
Floating license	**6ES7840-0CC08-0YA5**
Software Update Service (requires current software version)[1)]	**6ES7840-0CA01-0YX2**
Upgrade to V5.7	**6ES7840-0CC08-0YE5**
SIMATIC Manual Collection DL in 5 languages All manuals for S7-1200/1500/200/300/400, LOGO!, SIMATIC DP, PC, PG, STEP 7, Engineering SW, Runtime SW, SIMATIC HMI, SIMATIC NET, SIMATIC IDENT Consignee email address required for delivery.	**6ES7998-8XE01-8YE0**
SIMATIC Manual Collection DL in 5 languages Software Update Service (SUS); within the framework of this contract, you will receive all current software versions as a download for one year. Technical specifications

Engineering tool	**S7-PDIAG**
Type of license	Floating license
Software class	A
Current version	V5.7
Target system (recommended)	SIMATIC S7-300 (CPU 314 or higher) SIMATIC S7-400
Operating system	Windows Server 2016/2019/2022, Windows 10/11 Professional, Windows 10/11 Enterprise
Required software packages	STEP 7 V5.7 or higher
Disk space required in programming device/PC	26 MB

© Siemens AG 2026

Overview

- For integrating continuous PID controllers, pulse controllers and step controllers in the application program
- Reduces engineering costs thanks to time-saving parameterization and optimization of the controller
- For use in SIMATIC S7-300 (CPU 313 or higher), S7-400 and WinAC

Licensing

- The Standard PID Control consists of a parameterization tool (engineering software) and function blocks (runtime software).
- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- Function blocks may be copied as often as required onto any programming devices/PCs. However, one license is always required for each CPU on which they are used.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Selection and ordering data

1) Depending on the CPU
2) With 5 control loops

© Siemens AG 2026

Overview

- For creating complex closed-loop control structures
- Preferred for implementation in closed-loop control equipment in mid-range and high-end applications and in process engineering
- For use in SIMATIC S7-300 (CPU 313 or higher), S7-400 and WinAC

Licensing

- The Modular PID Control consists of a parameterization tool (engineering software) and function blocks (runtime software).
- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- Function blocks may be copied as often as required onto any programming devices/PCs. However, one license is always required for each CPU on which they are used.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Overview

- PID Self-Tuner: For expanding existing PID controllers to create self-tuning PI or PID controllers.
- Optimization of PI or PID controllers with 3-step action (HEATING – OFF – COOLING)
- Convenient online initial setting and online adaptation during operation
- Ideally applicable to temperature controllers, but also suitable for level and flow controllers
- Can be used with SIMATIC S7-300 (CPU 313 or higher), SIMATIC S7-400 and WinAC; in combination with PID Control (integrated in STEP 7), Standard PID Control, Modular PID Control, FM 355, FM 455 as well as with any PID algorithm

Licensing

- The PID Self-Tuner complements the Standard PID Control or Modular PID Control software packages.
- Function blocks may be copied as often as required onto any programming devices/PCs. However, one license is always required for each CPU on which they are used.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager here: this link.

© Siemens AG 2026

Overview

- Optional package for STEP 7 V5.7 SP2 for configuring closed-loop control and automation tasks with SIMATIC TDC
- Extensive block library
- Generation of user libraries in ANSI C with D7-FB-GEN function block generator

Licensing

- D7-SYS is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 10.0 is offered for users of previous versions V9.1 or higher.
- A separate Software Update Service can be purchased for D7-SYS.
- As of version 8.1, the D7-FB-GEN block generator that was previously sold separately is included in the D7-SYS scope of delivery.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Overview

Drive ES/STARTER is the engineering system used to integrate the communication, configuration and data management functions of Siemens drive technology into the SIMATIC automation world easily, efficiently and cost-effectively.

The following software packages are available for selection:

- STARTER
- SIMATIC PDM with FDI Device Package
- Drive ES PCS 7

The Drive ES (**D**rive **E**ngineering **S**oftware) fully integrates drives from Siemens into the world of Totally Integrated Automation (STEP 7 V5.x).

- Drive ES PCS neo Add-On

Drive ES PCS neo integrates drives from Siemens into the world of SIMATIC PCS neo system.

Selection and ordering data

Drive ES PCS 7

Description	Article No.
Drive ES PCS 7 V9.1 SPx *) Block library for PCS 7 for the integration of drives in Classic Style (as predecessor) Requirement: PCS 7 V9.1 or higher Type of delivery: DVD-ROM Languages: en, de, fr, it, es With electronic documentation	
• Single-user license incl. 1 runtime license	**6SW1700-2JD00-0AA0**
• Runtime license (on paper)	**6SW1700-5JD00-1AC0**
• Runtime license (eCoL)	**6SW1700-5JD00-1AH0**
• Update service for single-user license	**6SW1700-0JD00-0AB2**
• Upgrade from V6.x/V7.x/V8.x/V9.x to V9.1 SPx *)	**6SW1700-2JD00-0AA4**
Drive ES PCS 7 APL V9.1 SPx *) Block library for PCS 7 for the integration of drives in APL Style (Advanced Process Library) Requirement: PCS 7 V9.1 or higher Type of delivery: DVD-ROM Languages: en, de, fr, it, es With electronic documentation	
• Single-user license incl. 1 runtime license	**6SW1700-2JD01-0AA0**
• Runtime license (on paper)	**6SW1700-5JD00-1AC0**
• Runtime license (eCoL)	**6SW1700-5JD00-1AH0**
• Update service for single-user license	**6SW1700-0JD01-0AB2**
• Upgrade of Drive ES PCS 7 APL V8.x, V9.x to V9.1 SPx *)or Drive ES PCS 7 V6.x, V7.x, V8.x, V9.x classic to Drive ES PCS 7 APL V9.1 SPx *)	**6SW1700-2JD01-0AA4**
Drive ES PCS 7 V10.0 SPx *) Block library for PCS 7 for the integration of drives in Classic Style (as predecessor) Requirement: PCS 7 V10.0 or higher Type of delivery: DVD-ROM, OSD Languages: en, de, fr, it, es With electronic documentation	
• Single-user license incl. 1 runtime license (DVD-ROM)	**6SW1700-3JD00-0AA0**
• Single-user license incl. 1 runtime license (OSD)	**6SW1700-3JD00-0AG0**

Selection and ordering data (continued)

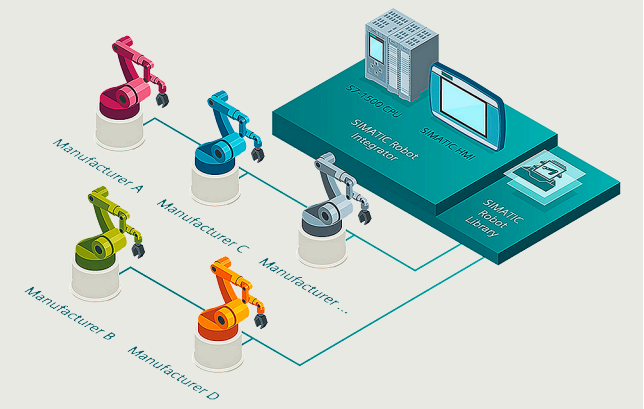
Drive ES PCS 7 Software Update Service

A software update service can also be purchased for the Drive ES PCS 7 software. The user will automatically receive the latest software, service packs and full versions for one year after ordering.

The update service can only be ordered in addition to an existing (i.e. previously ordered) full version.

• Period of update service: 1 year

The update service is automatically extended by 1 further year unless canceled up to 6 weeks prior to expiration.



Description	Article No.
Drive ES PCS 7	
• Update service for single-user license	**6SW1700-0JD00-0AB2**
Drive ES PCS 7 APL	
• Update service for single-user license	**6SW1700-0JD01-0AB2**

Drive ES PCS neo

Description	Article No.
Drive ES PCS neo V4.1 Add-On for SIMATIC PCS neo for the integration of SINAMICS drives Requirement: PCS neo V4.1 License reference for the license code and the Certificate of License for the Drive ES PCS neo Add-On via OSD Languages: de, en, fr, it, es, zh, ja	**6SW1700-2JE01-0AH0**
Drive ES PCS neo V5.0 Add-On for SIMATIC PCS neo for the integration of SINAMICS drives Requirement: PCS neo V5.0 License reference for the license code and the Certificate of License for the Drive ES PCS neo Add-On via OSD Languages: de, en, fr, it, es, zh, ja	**6SW1750-1CE00-0YA0**
Drive ES PCS neo V6.0 SP1 Add-On for SIMATIC PCS neo for the integration of SINAMICS drives Requirement: PCS neo V6.0 and V6.0 SPx License reference for the license code and the Certificate of License for the Drive ES PCS neo Add-On via OSD Languages: de, en, fr, it, es, zh, ja	**6SW1750-1CE01-0YA0**
Runtime license Drive ES PCS neo Add-On SINAMICS library To execute the function blocks for an additional SIMATIC PCS neo Controller Language-neutral, single license for 1 installation Type of delivery: Electronic Certificate of License (OSD)	**6SW1750-2CE00-0YB0**

Overview

With the SIMATIC Robot Library, robot arms of different robot manufacturers can be programmed consistently in the Totally Integrated Automation Portal (TIA Portal).

The SIMATIC Robot Library concept moves the command sets of a robot control to the TIA Portal, thus enabling manufacturer-independent and consistent programming of industry robots (incl. cobots) in the TIA Portal for the first time. The programs can be run on a SIMATIC S7-1500 Controllers. Additional programming on the robot control is not necessary.

Note:

The SIMATIC Robot Library can be supplemented by the free application example SIMATIC Robot Integrator. This offers a comprehensive user interface for industry robots incl. configuration, teaching, jog mode and diagnostics for SIMATIC HMI.

System requirements

- SIMATIC STEP 7 (TIA Portal) V19 or higher for SIMATIC S7-1500 as of firmware V2.8 and on SIMATIC S7-1500S as of firmware V20.8.
- SIMATIC STEP 7 (TIA Portal) V19 or higher for SIMATIC S7-1500V as of firmware V3.1.
- Interpreter software from the respective robot manufacturer on the robot control required.

Licensing

- A Single Runtime License is required for each controlled robot arm.
- The licenses can only be obtained via Online Software Delivery (OSD). The download contains the software and a license certificate for a robot arm. For information on activating the license, please read the Readme file included in the download.
- The SIMATIC Robot Library V1.2 can also be requested as trial version via the Siemens Industry Online Support or Technical Support and can then be used free of charge for 2 hours.
- The Interpreter software for the respective robot control is made available by the respective robot manufacturer. Siemens has no influence on the Interpreter license model of the robot manufacturer. Therefore, please contact the relevant robot manufacturer directly (if you wish, Siemens can assist you with finding a contact person).

Selection and ordering data

SIMATIC Robot Library V1.2 STEP 7 (TIA Portal) runtime option for consistent programming of robot arms of various robot manufacturers in the Totally Integrated Automation Portal (TIA Portal). **Requirement:** SIMATIC STEP 7 (TIA Portal) V19 or higher for SIMATIC S7-1500 as of firmware V2.8 and on SIMATIC S7-1500S as of firmware V20.8. SIMATIC STEP 7 (TIA Portal) V19 or higher for SIMATIC S7-1500V as of firmware V3.1; Interpreter software from the respective robot manufacturer on the robot control required	
Single Runtime License Download[1] contains license certificate for 1 robot alarm Consignee email address required for delivery.	**6ES7825-0AE00-3AA0**

© Siemens AG 2026

Overview

The Windows application SIMATIC Robot Simulator provides an SRCI-based universal virtual robot controller (VRC). It can be used to simulate SRCI-supporting robot arms from different manufacturers. The SIMATIC Robot Library is also required for this purpose.

The SIMATIC Robot Library concept shifts robot programming to the Totally Integrated Automation Portal (TIA Portal) and thus the program of industrial robots (including cobots) to a SIMATIC S7-1500 controller.

This makes the robot program also executable in SIMATIC S7-PLCSIM Advanced, which makes it possible to simulate robot applications with the SIMATIC Robot Simulator.

Note

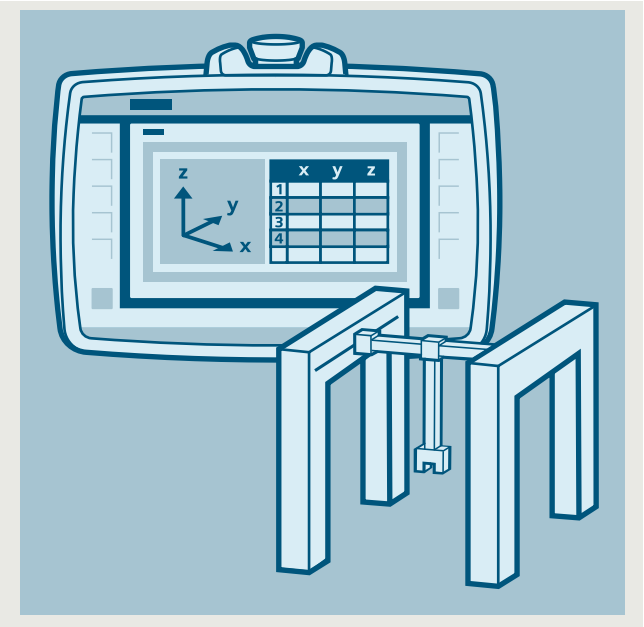
The SIMATIC Robot Simulator can be supplemented by the free application example SIMATIC Robot Integrator. This offers a comprehensive user interface for industrial robots incl. configuration, teaching, jog mode and diagnostics with SIMATIC HMI.

System requirements

- Processor: Intel Core I7™ - 6820EQ (or equivalent); one core is recommended for each robot arm instance running at the same time
- RAM: 6 GB
- Hard disk: 5 GB
- Minimum graphics memory: 500 MB
- Minimum screen resolution: 1024 x 1024
- SIMATIC S7-PLCSIM Advanced V6.0 or higher

Licensing

- A floating license is required for up to five simultaneously running robot arm instances.
- Licenses are valid for 365, 180, or 90 days, depending on the type.
- The licenses can only be obtained via Online Software Delivery (OSD).
- The SIMATIC Robot Simulator V1.1.0.0 can also be requested as a trial version via Siemens Industry Online Support or Technical Support and can then be used with limited functionality.
- To use the SIMATIC Robot Simulator, the SIMATIC Robot Library is required as a trial or licensed.



Selection and ordering data

SIMATIC Robot Simulator V1.1.0.0 SRCI-based universal, virtual robot controller (Windows application) for simulating robot arms from different manufacturers that support SRCI with the aid of the SIMATIC Robot Library. **Prerequisite:** SIMATIC Robot Library ≥ V1.0.0.2 SIMATIC S7-PLCSIM Advanced ≥ V6.0 Processor: Intel Core I7™ -6820EQ (or equivalent), one core is recommended for each robot arm instance running at the same time RAM: 6 GB Hard disk space: 5 GB Minimum graphics memory: 500 MB Minimum screen resolution: 1024 x 1024 **Runs on:** Windows 10	
Floating license download for 365 days [1] Contains license certificate for up to 5 simultaneously running robot arm instances Consignee email address required for delivery.	**6ES7825-1AE00-0YA8**
Floating license download for 180 days [1] Contains license certificate for up to 5 simultaneously running robot arm instances Consignee email address required for delivery.	**6ES7825-1AE00-0YA7**
Floating license download for 90 days [1] Contains license certificate for up to 5 simultaneously running robot arm instances Consignee email address required for delivery.	**6ES7825-1AE00-0YA3**

Overview

With the SIMATIC Cartesian Portal, kinematics can be configured, programmed and operated with up to 6 positioning axes with synchronous point-to-point control (sPTP).
The Plug & Play solution comprises a convenient user interface for programming, diagnostics and operation of the kinematics via the HMI.

The SIMATIC Cartesian Portal V1.0 software solution consists of a TIA Portal project and a library project for the TIA Portal V17 and V18.

SIMATIC Cartesian Portal V1.0 contains the following HMI configuration functions:

- Channel-granular configuration of the kinematics and additional axes;
  Per channel, up to 6 axes and additionally up to 25 further axes are available for multi-axis positioning with sPTP. The number of channels is only limited by the performance and the memory of the PLC.
- Axis configuration;
  The dynamic parameters, the axis limits and the homing of the different axes can be configured.
- Tag and I/O configuration;
  Bool and Real tags can be created. Logical step enabling conditions consisting of multiple inputs and tags can be combined into one Boolean tag. Digital inputs and outputs can be configured via the I/O address.
- Points table;
  By means of input or teaching of axis positions, path points can be defined that can be used for programming the kinematics.
- Zone configuration;
  Multiple restricted zones can be created in the workspace as protection zones. These are checked cyclically against both the target coordinates and the current axis values. A violation leads to a stop response of the axes.

The program editor offers the following functions:

Overview (continued)

- Synchronous point-to-point commands;
  All axes are traversed synchronously with multi-axis positioning. The destination is specified either using the points table or by direct input with optional blending.
- Single axis commands;
  The additional axes can be homed, positioned, torque-limited or speed-controlled.
- Wait functions;
  Step enabling conditions, based on a digital input, a Bool tag or a wait time, can be programmed.
- Calculate tags and assign values;
  Digital outputs can be set via an input mask. In addition, floating point tags can be calculated, incremented or assigned absolute values.
- Program control structures;
  Labels, branches, loops and parallel sequences allow flexible program design.

SIMATIC Cartesian Portal V1.0 is executable on SIMATIC S7-1511T for V17 and SIMATIC S7-1511 for V18. Details on scalability and quantity structures can be found in the documentation.

System requirements

- SIMATIC STEP 7 Professional (TIA Portal) as of V17
- SIMATIC WinCC Advanced ES as of V17

Licensing

- SIMATIC Cartesian Portal is available as Runtime option for TIA Portal. A license is required for each CPU on which SIMATIC Cartesian Portal runs.
- The product can only be ordered via Online Software Delivery (OSD). The download contains the license certificate and the software.
- The following additional licenses are required to use SIMATIC Cartesian Portal:
  - SIMATIC STEP 7 Professional (TIA Portal) as of V17
  - SIMATIC WinCC Advanced ES as of V17

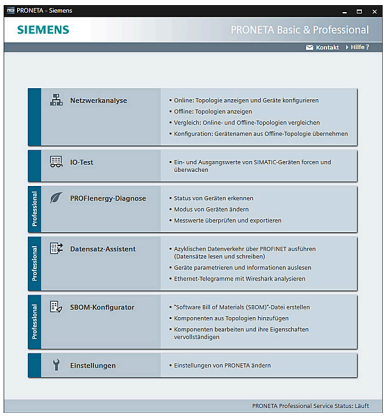
Selection and ordering data

SIMATIC Cartesian Portal V1.0 Single Runtime license download includes license certificate; programming and control of multi-axis kinematics with sPTP for 2-6 positioning axes; executable on SIMATIC S7-1500(F) from SIMATIC S7-1511 upwards, including user operating concept Consignee email address required for delivery	**6ES7823-0GE01-1AA0**

© Siemens AG 2026

Overview

SIMATIC Robot Pick AI (robot capability) is a pre-trained, Deep Learning-based image processing software for advanced robotics applications that provides out-of-the-box cognitive performance for selecting rugged pick points (6-DOF gripping poses) for arbitrary "unknown" items in boxes at runtime. It is a generic capability for arbitrary objects. Specific training through CAD models is not required.
Suitable, for example, for robotic solutions for unit load removal in intralogistics.



Selection and ordering data

SIMATIC Robot Pick AI V1.1 AI vision software for pick-by-robot applications with TIA Portal integration, single license, product download includes: Certificate of License (CoL), AI vision software package, STEP 7 (TIA Portal) FBs and documentation[1]. Tested industrial PCs: SIMATIC IPC BX-39A, SIMATIC S7-1500 TM MFP. Supported 3D cameras: IDS Ensenso N-series, Zivid 2 L100, Intel RealSense D400. License is activated via the responsible sales contact.	**6ES7865-0AD10-1AA0**

Overview

Asset management and diagnostics with PRONETA Professional

The recording of devices in automation systems is a complex and time-consuming task. The information regarding the components used is becoming increasingly important for plant operators to ensure stable operation. In addition, there are legal requirements to create an SBOM (Software Bill of Material) for machines, plants, etc.

PRONETA Professional takes this task off the user's hands and supports machine and plant builders, operators, and maintenance personnel in recording the details of their used components. Networks can be automatically scanned at regular intervals, thus transparently documenting the plant configuration. With the SBOM function, the prerequisite for continuous vulnerability management is created. Additionally, the Dataset Assistant offers the possibility to send PROFINET datasets to PROFINET devices via acyclic communication.

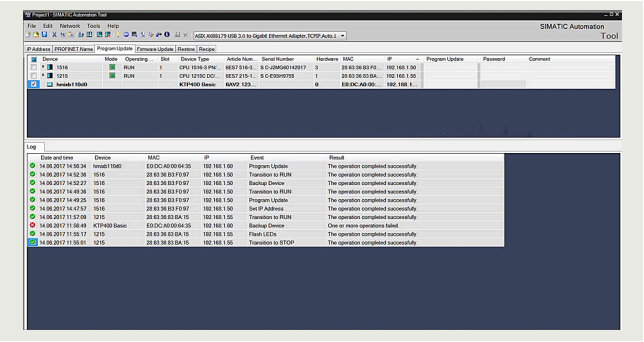
Licenses

- The software can be installed on one computer (single license).

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Selection and ordering data

PRONETA Professional V2.0	
Software for asset management with API, PROFIenergy diagnostics, data record wizard; 3 languages en/de/cn, can be run under Windows 10 (64-bit) and Windows 11 (64 Bit)	
Single license; software, documentation and license for download	**6ES7853-2BE02-0YA0**
Single license upgrade from V1.x to V2.0; software, documentation and license for download	**6ES7853-2BE02-0YE0**



Technical specifications

PRONETA Professional V2.0 can be used on the following operating systems:

- Microsoft Windows 10 (64-bit)
- Microsoft Windows 11 (64-bit)

© Siemens AG 2026

Overview

- To support commissioning and service activities independent of the engineering framework
- For configuration, operation, maintenance and documentation of automation networks
- Rapid overview of the status of the SIMATIC automation system
- Time savings thanks to parallel operations (license required)
- Optimum upgrade support for the devices used and their versions through the display of article numbers, firmware versions and HW versions
- Simple traceability of performed operations and resulting changes in the system through the optional, automatic storage of event log entries in a file
- Automated processes for optimum API-based workflows (license required)

Supported products:

- SIMATIC ET 200
  - ET 200AL IM
  - ET 200AL SM and IO-Link
  - ET 200eco
  - ET 200M IM
  - ET 200MP IM
  - ET 200S IM
  - ET 200pro IM
  - ET 200pro IO-Link and RFID
  - ET 200SP CPU
  - ET 200SP IM and server modules
  - ET 200SP SM, AS-i, CM, CP, TM, IO-Link, motor starters
- SIMATIC S7-1200
  - S7-1200 CPU
  - S7-1200 SM and CM
- SIMATIC S7-1500
  - S7-1500 CPU
  - S7-1500 SM and other modules

Overview (continued)

- SIMATIC HMI
  - HMI Basic 2nd Generation
  - HMI Comfort
  - HMI Mobile
- SITOP power supplies
- RFID and MOBY
- SCALANCE

Licenses

- The software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- The following license types are provided:
  - 21-day trial license (without license key); download as a registered customer from this link.
  - SIMATIC Automation Tool – Basic scope of functions
  - SIMATIC Automation Tool Advanced – extended scope of functions, including:
    - Scheduler for planning device operations at a specific time and with selectable frequency
    - Card browser for working with files and folders on SIMATIC Memory Cards in CPUs
    - Extended options for handling SIMATIC Automation Tool projects - Archiving of SAT projects and associated file data
    - Support of devices downstream from a NAT router
    - Possibility to insert multiple devices in one operation
    - Support of CPUs connected via a CM (communications module) or CP (communications processor)
    - Firmware installation in 2 sequences - Option to download the firmware update files to devices and activate the new firmware at a later time.
- SIMATIC Automation Tool Advanced PowerPack V3/V4 upgrade to Advanced V4 - License key upgrade for activating the extended V4 functions based on an available V3/V4 license key.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this link.

Overview

Configuration options with SIMATIC PDM

SIMATIC PDM (Process Device Manager) is a universal, vendor-independent tool for the configuration, parameter assignment, commissioning, diagnostics and servicing of intelligent field devices (sensors and actuators) and field components (remote I/Os, multiplexers, control room devices, compact controllers, compact modules), which in the following sections will be referred to simply as devices.

With *one* software product, SIMATIC PDM enables users to work with over 4 500 devices and device variants of Siemens and over 200 other manufacturers worldwide on a *single* homogeneous user interface.

The user interface satisfies the requirements of the VDI/VDE GMA 2187 and IEC 65/349/CD directives. Parameters and functions for all supported devices are displayed in a consistent and uniform fashion independent of their communications interface. Even complex devices with several hundred parameters can be represented clearly and processed quickly. Using SIMATIC PDM it is very easy to navigate in highly complex stations such as remote I/Os and even connected field devices.

From the viewpoint of device integration, SIMATIC PDM is the most powerful open process device manager on the global market. Devices not previously supported can be integrated in SIMATIC PDM by importing their device description packages (either EDD or FDI). This provides security for your investment and saves you investment costs, training expenses and follow-up costs.

SIMATIC PDM supports the operative system management in particular through:

- Uniform representation and operation of devices
- Uniform representation of diagnostics information
- Indicators for preventive maintenance and servicing
- Detection of changes in the project and device
- Increasing the operational reliability
- Reducing the investment, operating and maintenance costs
- Quantity options for
  - Transfer of parameters between devices
  - Transfer of parameter sets to the devices
  - Export and import functions
  - Diagnostics update

SIMATIC PDM can be used extremely flexibly and tailored to a specific task for field device service:

- Single-point station for point-to-point connection to field devices
- Local service and parameter assignment station with connection to fieldbus segments
- Central service and parameter assignment station with connection to plant bus
- Central HART service and parameter assignment station for HART multiplexers and WirelessHART field devices
- Integrated into the stand-alone SIMATIC PDM Maintenance Station
- Integrated into the SIMATIC PCS 7 process control system

Maintenance personnel can assign field device parameters at mobile and stationary workstations with SIMATIC PDM. Practically every workstation integrated in the production plant can be used for

© Siemens AG 2026

Overview (continued)

configuration. Service personnel are thus able to work directly at the location of the field device, while data is stored centrally in the engineering station or maintenance station. This leads to a significant shortening of maintenance and travel times. Additional device-independent system functions support higher-level maintenance stations for creating progress lists for work and servicing.

When a maintenance station is configured in the SIMATIC PCS 7 process control system, SIMATIC PDM is integrated into it and transmits parameter data, diagnostic information and processing information. You can switch directly to the SIMATIC PDM views from the diagnostics faceplates in the maintenance station to perform diagnostics and work on the device in more detail.

A SIMATIC PDM user administration system based on SIMATIC Logon is used to assign various roles with defined function privileges to users. These function privileges refer to SIMATIC PDM system functions, e.g. writing to the device.

For all devices integrated with device description packages, SIMATIC PDM provides a range of information for display and further processing on the maintenance station, for example:

- Device type information (electronic rating plate)
- Detailed diagnostics information (manufacturer information, information on error diagnostics and troubleshooting, further documentation)
- Results of internal condition monitoring functions
- Status information (for example local configuration changes), device test completed
- Information on changes (Audit Trail report)
- Parameter information

Basic configuration for individual product packages	
SIMATIC PDM Basic V9.2 including 4 TAGs; product package for operation and configuration of field devices and components; communication via PROFIBUS DP/PA, HART (modem, RS 232, PROFIBUS/PROFINET), Modbus, Ethernet or PROFINET 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, runs with Windows 10 Professional 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, for operation within the product family SIMATIC PCS 7 the specifications there take precedence, (see SIMATIC PDM V9.2 Readme for the latest information), floating license for 1 user Without SIMATIC PCS 7 Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License, bundle with 1 × SIMATIC PDM Software Media Package per order item	**6ES7658-3AB78-0YA5**
• Online delivery License key download and online Certificate of License combined with SIMATIC PDM Software Media Package (SIMATIC PDM and device library software download) Note: Email address required!	**6ES7658-3AB78-0YH5**

Selection and ordering data (continued)

Configuration for a local service and parameter assignment station	
SIMATIC PDM Service V9.2 Product package for service and measuring circuit tests on a local service station, with • SIMATIC PDM Basic incl. 4 TAGs • 50 TAGs 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, runs with Windows 10 Professional 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, for operation within the product family SIMATIC PCS 7 the specifications there take precedence, (see SIMATIC PDM V9.2 Readme for the latest information), floating license for 1 user Without SIMATIC PCS 7 Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License, bundle with 1 × SIMATIC PDM Software Media Package per order item	**6ES7658-3JD78-0YA5**
• Online delivery License key download and online Certificate of License combined with SIMATIC PDM Software Media Package (SIMATIC PDM and device library software download) Note: Email address required!	**6ES7658-3JD78-0YH5**
Configuration for a central service and parameter assignment station	
SIMATIC PDM Stand-alone Server V9.2 Product package for service and device management in plant units, with - SIMATIC PDM Basic incl. 4 TAGs - SIMATIC PDM Extended - SIMATIC PDM Server - 2 × SIMATIC PDM 1 Client - 100 TAGs 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, runs with Windows 10 Professional 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, for operation within the product family SIMATIC PCS 7 the specifications there take precedence, (see SIMATIC PDM V9.2 Readme for the latest information), single license for 1 installation Without SIMATIC PCS 7 Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License, bundle with 1 × SIMATIC PDM Software Media Package per order item	**6ES7658-3TX78-0YA5**
• Online delivery License key download and online Certificate of License combined with SIMATIC PDM Software Media Package (SIMATIC PDM and device library software download) Note: Email address required!	**6ES7658-3TX78-0YH5**
SIMATIC PDM system-integrated product packages

Selection and ordering data (continued)

Configuration for integration in SIMATIC S7 configuration environment	
SIMATIC PDM S7 V9.2 Product package for use in a SIMATIC S7 configuration environment, with - SIMATIC PDM Basic incl. 4 TAGs - SIMATIC PDM Extended - SIMATIC PDM Integration in STEP 7/PCS 7 - 100 TAGs 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, runs with Windows 10 Professional 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, for operation within the product family SIMATIC PCS 7 the specifications there take precedence, (see SIMATIC PDM V9.2 Readme for the latest information), floating license for 1 user Without SIMATIC PCS 7 Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License, bundle with 1 × SIMATIC PDM Software Media Package per order item	**6ES7658-3KD78-0YA5**
• Online delivery License key download and online Certificate of License combined with SIMATIC PDM Software Media Package (SIMATIC PDM and device library software download) Note: Email address required!	**6ES7658-3KD78-0YH5**
Configuration for integration in SIMATIC PCS 7 configuration environment	
SIMATIC PDM PCS 7 V9.2 Product package for use in a SIMATIC PCS 7 configuration environment 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, runs with Windows 10 Professional 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, for operation within the product family SIMATIC PCS 7 the specifications there take precedence, (see SIMATIC PDM V9.2 Readme for the latest information) Floating license for 1 user, with - SIMATIC PDM Basic incl. 4 TAGs - SIMATIC PDM Extended - SIMATIC PDM Integration in STEP 7/PCS 7 - SIMATIC PDM Routing - 100 TAGs Without SIMATIC PCS 7 Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License, bundle with 1 × SIMATIC PDM Software Media Package per order item	**6ES7658-3LD78-0YA5**
• Online delivery License key download and online Certificate of License combined with SIMATIC PDM Software Media Package (SIMATIC PDM and device library software download) Note: Email address required!	**6ES7658-3LD78-0YH5**
SIMATIC PDM PCS 7-FF V9.2 Product package for use in a SIMATIC PCS 7 configuration environment, including FOUNDATION Fieldbus H1 communication 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, runs with Windows 10 Professional 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, for operation within the product family SIMATIC PCS 7 the specifications there take precedence, (see SIMATIC PDM V9.2 Readme for the latest information) Floating license for 1 user, with - SIMATIC PDM Basic incl. 4 TAGs - SIMATIC PDM Extended - SIMATIC PDM Integration in STEP 7/PCS 7 - SIMATIC PDM Routing - SIMATIC PDM Communication FOUNDATION Fieldbus - 100 TAGs Without SIMATIC PCS 7 Software Media Package	

Selection and ordering data (continued)

• Goods delivery License key on USB flash drive and Certificate of License, bundle with 1 × SIMATIC PDM Software Media Package per order item	**6ES7658-3MD78-0YA5**
• Online delivery License key download and online Certificate of License combined with SIMATIC PDM Software Media Package (SIMATIC PDM and device library software download) Note: Email address required!	**6ES7658-3MD78-0YH5**
SIMATIC PDM PCS 7 Server V9.2 Product package for use in a SIMATIC PCS 7 configuration environment, including server functionality 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, runs with Windows 10 Professional 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, for operation within the product family SIMATIC PCS 7 the specifications there take precedence, (see SIMATIC PDM V9.2 Readme for the latest information) Single license for 1 installation, with - SIMATIC PDM Basic incl. 4 TAGs - SIMATIC PDM Extended - SIMATIC PDM Integration in STEP 7/PCS 7 - SIMATIC PDM Routing - SIMATIC PDM Server - 100 TAGs Without SIMATIC PCS 7 Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License, bundle with 1 × SIMATIC PDM Software Media Package per order item	**6ES7658-3TD78-0YA5**
• Online delivery License key download and online Certificate of License combined with SIMATIC PDM Software Media Package (SIMATIC PDM and device library software download) Note: Email address required!	**6ES7658-3TD78-0YH5**
Optional product components for SIMATIC PDM	
SIMATIC PDM Extended V9.2 For enabling additional system functions 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, runs with Windows 10 Professional 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, for operation within the product family SIMATIC PCS 7 the specifications there take precedence, (see SIMATIC PDM V9.2 Readme for the latest information), floating license for 1 user Without SIMATIC PCS 7/SIMATIC PDM Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License	**6ES7658-3NX78-2YB5**
• Online delivery (without SIMATIC PCS 7/SIMATIC PDM Software Media Package) License key download and online Certificate of License Note: Email address required!	**6ES7658-3NX78-2YH5**

Selection and ordering data (continued)

SIMATIC PDM Integration in STEP 7/SIMATIC PCS 7 V9.2 For integration in a SIMATIC S7/SIMATIC PCS 7 configuration environment 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, runs with Windows 10 Professional 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, for operation within the product family SIMATIC PCS 7 the specifications there take precedence, (see SIMATIC PDM V9.2 Readme for the latest information), floating license for 1 user Without SIMATIC PCS 7/SIMATIC PDM Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License	**6ES7658-3BX78-2YB5**
• Online delivery License key download and online Certificate of License Note: Email address required!	**6ES7658-3BX78-2YH5**
SIMATIC PDM Routing V9.2 For plant-wide navigation to field devices 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, runs with Windows 10 Professional 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, for operation within the product family SIMATIC PCS 7 the specifications there take precedence, (see SIMATIC PDM V9.2 Readme for the latest information), floating license for 1 user Without SIMATIC PCS 7/SIMATIC PDM Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License	**6ES7658-3CX78-2YB5**
• Online delivery License key download, online Certificate of License Note: Email address required!	**6ES7658-3CX78-2YH5**
SIMATIC PDM Server V9.2 For activating the server functionality 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, runs with Windows 10 Professional 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, for operation within the product family SIMATIC PCS 7 the specifications there take precedence, (see SIMATIC PDM V9.2 Readme for the latest information), single license for 1 installation Without SIMATIC PCS 7/SIMATIC PDM Software Media Package	
• Goods delivery License key on USB flash drive, Certificate of License	**6ES7658-3TX78-2YB5**
• Online delivery License key download and online Certificate of License Note: Email address required!	**6ES7658-3TX78-2YH5**
SIMATIC PDM Communication FOUNDATION Fieldbus V9.2 For communication with field devices on FOUNDATION Fieldbus H1 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, runs with Windows 10 Professional 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, for operation within the product family SIMATIC PCS 7 the specifications there take precedence, (see SIMATIC PDM V9.2 Readme for the latest information), floating license for 1 user Without SIMATIC PCS 7/SIMATIC PDM Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License	**6ES7658-3QX78-2YB5**
• Online delivery License key download and online Certificate of License Note: Email address required!	**6ES7658-3QX78-2YH5**

Selection and ordering data (continued)

SIMATIC PDM HART Server V9.2 For using HART multiplexers as well as for configuration of WirelessHART field devices 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, runs with Windows 10 Professional 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, for operation within the product family SIMATIC PCS 7 the specifications there take precedence, (see SIMATIC PDM V9.2 Readme for the latest information), floating license for 1 user Without SIMATIC PCS 7/SIMATIC PDM Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License	**6ES7658-3EX78-2YB5**
• Online delivery License key download and online Certificate of License Note: Email address required!	**6ES7658-3EX78-2YH5**
SIMATIC PDM Command Interface V9.2 Use of remote control of SIMATIC PDM with 1 × SIMATIC PDM 1 Client Note: Special conditions of purchase and supply	
• Goods delivery (without SIMATIC PCS 7/SIMATIC PDM Software Media Package) License key on USB flash drive and Certificate of License	**6ES7658-3SX78-2YB5**
SIMATIC PDM 1 Client Cumulative client license for SIMATIC PDM configurations with SIMATIC PDM Server, software class A, single license for 1 installation	
• Goods delivery License key on USB flash drive and Certificate of License	**6ES7658-3UA00-2YB5**
• Online delivery License key download and online Certificate of License Note: Email address required!	**6ES7658-3UA00-2YH5**
SIMATIC PDM TAGs TAG licenses for expanding the available TAG volume, cumulative, software class A, floating license for 1 user	
• Goods delivery License key on USB flash drive and Certificate of License	
- 10 TAGs	**6ES7658-3XC00-2YB5**
- 100 TAGs	**6ES7658-3XD00-2YB5**
- 1 000 TAGs	**6ES7658-3XE00-2YB5**
• Online delivery License key download and online Certificate of License Note: Email address required!	
- 10 TAGs	**6ES7658-3XC00-2YH5**

SIMATIC PDM Software Media Package	
SIMATIC PDM Software Media Package V9.2 Installation software without license, 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, runs with Windows 10 Professional 64-bit, Windows 10 Enterprise 2019 LTSC 64-bit, for operation within the product family SIMATIC PCS 7 the specifications there take precedence, (see SIMATIC PDM V9.2 Readme for the latest information) Without SIMATIC PCS 7 Software Media Package Note: Can only be used in conjunction with a valid license or in demo mode!	
• Goods delivery SIMATIC PDM and device library software on DVD	**6ES7658-3GX78-0YT8**
• Online delivery SIMATIC PDM and device library software download Note: Email address required!	**6ES7658-3GX78-0YG8**

Technical specifications

SIMATIC PDM V9.2	
Hardware	• PG/PC/notebook with processor corresponding to operating system requirements
Operating system (alternatives)	• Windows 10 Professional • Windows 10 Enterprise 2019 LTSC • When integrated, specifications for SIMATIC PCS 7 take precedence
Integration in STEP 7/PCS 7	• SIMATIC PCS 7 V8.1/V8.2 (without Communication FOUNDATION Fieldbus) • SIMATIC PCS 7 V9.x
SIMATIC PDM Client	• Microsoft Internet Explorer 10 or 11 • Google Chrome

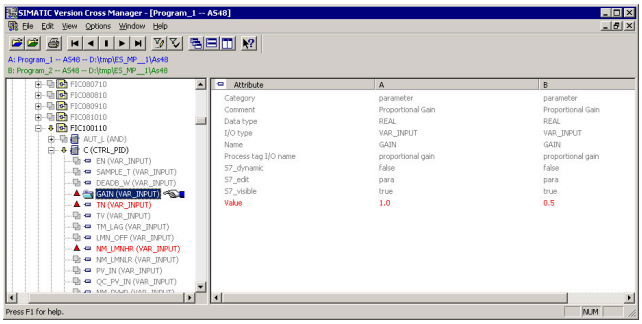
Overview

The User Management Component (UMC) provides the possibility of central user management. Through the connection to the TIA Portal, users and user groups can be defined and managed across projects. Connection to a Microsoft Active Directory is also possible.

Licensing



- Central user management (UMC) is part of the scope of delivery of TIA Portal.
- The license model depends on the number of user accounts per UMC domain.
- Up to ten user accounts can be used without a license.
- For additional user accounts, 365-day rental licenses and single licenses are available to add to the required number of centrally managed users.

Selection and ordering data

Central user management (UMC)	
Software component to implement central user management, included in the scope of supply of the respective products (e.g. TIA Portal). The license model depends on the number of user accounts per UMC domain. Use of max. 10 user accounts possible without a license. 6 languages: de, en, fr, es, it, zh; executable on Windows 10 (21H2 or later), Windows 11 (21H2 or later), Windows Server 2019, Windows Server 2022 (21H2 or later)	
• Rental license 365 days with license certificate for 100 user accounts	**6ES7823-1UE30-0YA0**
• Rental license 365 days with license certificate for 4 000 user accounts	**6ES7823-1UE10-0YA0**
• Single license with license certificate for 100 user accounts	**6ES7823-1UE31-0YA0**
• Single license with license certificate for 1000 user accounts	**6ES7823-1UE21-0YA0**
• Single license with license certificate for 4000 user accounts	**6ES7823-1UE11-0YA0**

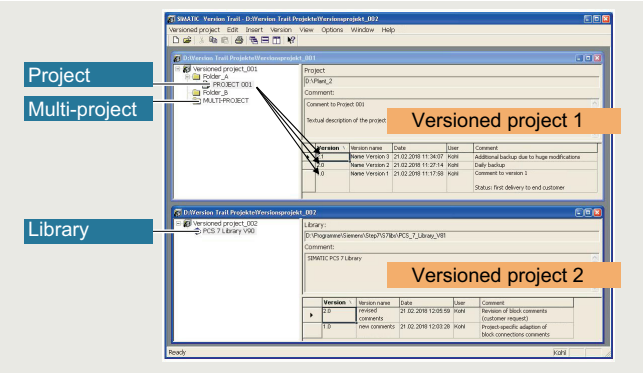
Overview

The SIMATIC Version Cross Manager is a user-friendly tool for determining the differences between various versions of individual projects or multiprojects by:

- Tracing missing, additional or differing objects by comparing hardware configuration, communication, plant hierarchy, CFC/SFC charts, SFC details, block types, messages, global tags, signals and run sequences
- Graphic display of comparison results in a combination of tree and tabular formats
- Clear hierarchical structuring according to the technological hierarchy of the plant
- Color-coded identification of the differences

Note:



As the function "Control module adjustment" is based on a basic functionality of the Version Cross Manager (VXM), you need a VXM license to use this function. In the absence of a license, a message appears telling you to install Version Cross Manager. This is not actually necessary, all you need to install is a valid VXM license that will enable the relevant functionality on the engineering station.

Selection and ordering data

SIMATIC Version Cross Manager V9.0 6 languages (English, German, French, Italian, Spanish, Chinese), software class A Runs with the following operating systems (see VXM Readme in the Siemens Industry Online Support for the latest information) • Windows 7 Ultimate 64-bit • Windows 10 Enterprise 2015 LTS 64-bit • Windows Server 2012 R2 Standard Edition 64-bit • Windows Server 2016 Standard Edition 64-bit Floating license for 1 user, without SIMATIC PCS 7 Software Media Package	
• Goods delivery License key on USB flash drive and Certificate of License as well as TIA Engineering Toolset CD	**6ES7658-1CX58-2YA5**
• Online delivery License key download, online Certificate of License and TIA Engineering Toolset (software download) Note: Email address required!	**6ES7658-1CX58-2YH5**
Upgrade package (only for TIA applications)	
SIMATIC Version Cross Manager upgrade from V7.1/V8.2 to V9.0 6 languages (English, German, French, Italian, Spanish, Chinese), software class A, for operating systems see above Floating license for 1 user, without SIMATIC PCS 7 Software Media Package	
• Goods delivery License key on USB flash drive, Certificate of License and TIA Engineering Toolset CD	**6ES7658-1CX58-2YE5**
• Online delivery License key download, online Certificate of License and TIA Engineering Toolset (software download) Note: Email address required!	**6ES7658-1CX58-2YK5**

Overview

Siemens offers industry-standard AI solutions for supporting employees and improving machine performance in critical planning and production processes. This enables customers to make quick and confident decisions and to increase their productivity significantly.

In detail, the following offer is available:

- Applications
  Vertical and application-specific software (bundles) and related services for solving a specific customer problem
- Consultation
  Various offers regarding AI enablement, co-creation and guidance
- Engineering
  Software tools and software-as-a-service (SaaS) offers on every aspect of data, creation, provision and operation of your AI

Overview

SIMATIC Robot Pick AI (robot capability) is a pre-trained, Deep Learning-based image processing software for advanced robotics applications that provides out-of-the-box cognitive performance for selecting rugged pick points (6-DOF gripping poses) for arbitrary "unknown" items in boxes at runtime. It is a generic capability for arbitrary objects. Specific training through CAD models is not required.
Suitable, for example, for robotic solutions for unit load removal in intralogistics.

Selection and ordering data

SIMATIC Robot Pick AI V1.1 AI vision software for pick-by-robot applications with TIA Portal integration, single license, product download includes: Certificate of License (CoL), AI vision software package, STEP 7 (TIA Portal) FBs and documentation[1)]. Tested industrial PCs: SIMATIC IPC BX-39A, SIMATIC S7-1500 TM MFP. Supported 3D cameras: IDS Ensenso N-series, Zivid 2 L100, Intel RealSense D400. License is activated via the responsible sales contact.	**6ES7865-0AD10-1AA0**

Overview

The Visual Inspection Cockpit is an Industrial Edge application that enables AI-powered visual inspection without requiring AI expertise. It combines flexible AI and robust computer vision algorithms to solve complex visual inspection challenges in production environments. The application allows users to integrate multiple inspection tasks into a single system, using only a small number of NOK training images.

The application can be ordered from this link.

Technical specifications

- Platform: Siemens Industrial Edge
- AI Capabilities: Flexible vision algorithms
- Image Training: Minimal image requirements
- Integration: PLC and IT system compatibility
- Deployment: Managed Edge Infrastructure

Article number	6ES7730-.....-.... SIMATIC IPC MD-57A
General information	
Design of the programming device	Mobile computer
Display	
Design of display	15.6" full HD display in 16:9 format
Screen diagonal	15.6 in
Resolution (pixels)	
• Horizontal image resolution	1 920 pixel
• Vertical image resolution	1 080 pixel
General features	
• Non-reflecting	Yes
• Luminance	300 cd/m²
Backlighting	
• Type of backlighting	LED
Control elements	
Keyboard	
• Design	QWERTZ
Touch operation	
• Integrated touch pad	Yes; Touch pad
Supply voltage	
Design of the power supply	External wide-range power supply, lithium ion battery
Rated value (DC)	19 V
Line frequency	
• permissible range, lower limit	47 Hz
• permissible range, upper limit	63 Hz
Processor	
Processor type	i7-12800HE (2.4 to 4.6 GHz; 14 cores (6 performance cores; 8 efficient cores); 24 MB Smart Cache
Chipset	integrated at CPU
Hyper-threading	Yes
Turbo Boost Technology 2.0	Yes
Graphic	
Graphics controller	Intel® Iris® X Integrated Graphics Controller
Drives	
CD-RW	No
DVD-ROM	No
DVD-RW	No
Hard disk	No
SSD	Yes; M.2
• Memory capacity	1 Tbyte; ...
TPM Security Chip	Yes; 2.0_
Storage	
Type of memory	DDR5 SO-DIMM
Work memory	
• Number of slots	2; _
Accumulator	
Replaceable	Yes; lithium polymer
Capacity	8 A·h

Interfaces	
Number of interfaces PROFIBUS DP	1; 1x PROFIBUS DP / MPI; 9-pin Sub-D socket; 9.6 kBaud to 12 MBaud
Number of RS 232 interfaces	1; 1x COM
Number of USB interfaces	6
• Type A	4; 2x USB-A 3.2 Gen1 and 2x USB-A 3.2 Gen2x1
• type C	2; USB-C 4.0
Number of chip-card readers	1; Smart Card Reader (ISO/IEC 7816)
MPI	Yes
Bluetooth radio standard	Yes; V5.3
Multimedia card/SD card slot	2 in 1 (SDHC UHS-II, MMC)
Card reader for SIMATIC memory cards	SIMATIC memory cards (for S7-300/400), SMC (for S7-1x00), SIMATIC micro memory card (for S7-300/C7/ET 200) - including programming interfaces
Universal Audio Jack	No
Video interfaces	
• analog video signal (VGA)	Yes; via adapter from HDMI to VGA
• DVI-I	Yes; via adapter from HDMI to DVI
• DisplayPort	Yes; via adapter from HDMI to DisplayPort
Industrial Ethernet	
• Industrial Ethernet interface	2x Ethernet (RJ45)
- 100 Mbps	Yes
- 1000 Mbps	Yes; Gigabit Ethernet; 2x RJ45 with 2 independent MAC/IP addresses
• Wake on LAN	Yes
• IAMT (Intel Active Management Technology)	Yes
WLAN	
• Type	IEEE802.a/b/g/n/ac R2/ax R2(PreStandard)
Interrupts/diagnostics/status information	
LED status display	4 status LEDs
EMC	
Interference immunity against discharge of static electricity	
• Interference immunity against discharge of static electricity acc. to IEC 61000-4-2	Yes; ±4 kV contact discharge acc. to IEC 61000-4-2, ESD; ±8 kV air discharge acc. to IEC 61000-4-2, ESD
Interference immunity to cable-borne interference	
• Interference immunity on supply cables	±2 kV (according to IEC 61000-4-4, burst); ±1 kV (according to IEC 61000-4-5, surge pulse/line to line); ±2 kV (according to IEC 61000-4-5, surge pulse/line to ground)
• Interference immunity on signal cables	±1 kV (according to IEC 61000-4-4, burst, length < 30 m); ±2 kV (according to IEC 61000-4-4, burst, length > 30 m); ±2 kV (according to IEC 61000-4-5, surge sym./line to ground, length > 30 m)
Degree and class of protection	
IP degree of protection	IP30
Standards, approvals, certificates	
CE mark	Yes
CSA approval	Yes
UL approval	Yes
DIN/ISO 9001	Yes
Ambient conditions	
Ambient temperature during operation	
• min.	5 °C; Max. 10 °C/h (no condensation)
• max.	40 °C; Max. 10 °C/h (no condensation)
Operating systems	
Local language of operating system	Multi-Language User Interface (MUI): 6 languages (English, German, French, Spanish, Italian, Chinese)
pre-installed operating system	
• Windows 11	Yes; Windows 11 IoT Enterprise (version 22H2)

Overview

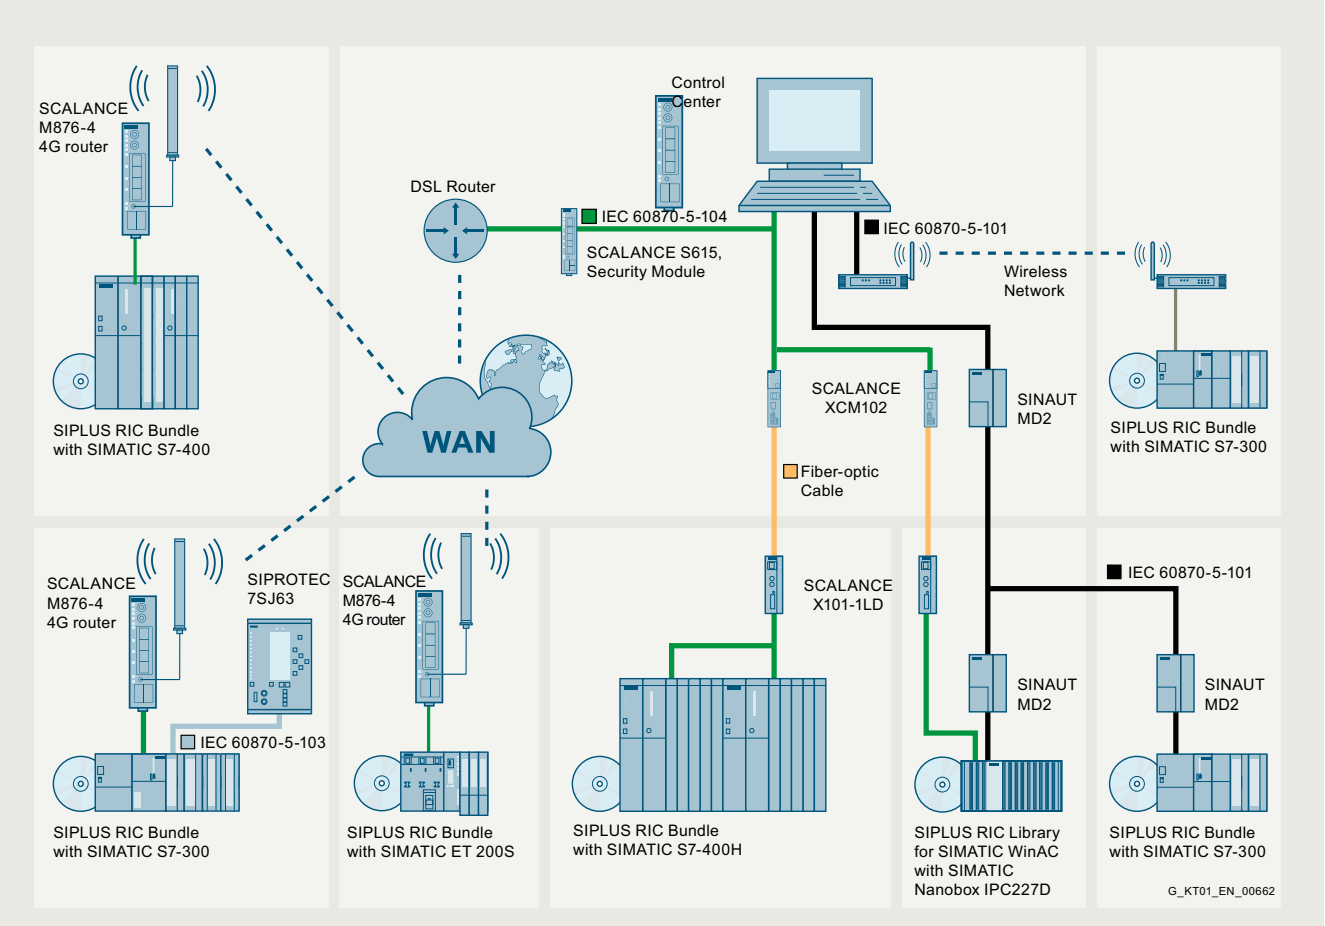
Telecontrol systems for controlling and monitoring widely distributed plants usually consist of a supervisory control system (telecontrol center) and one or more outstations connected over large distances for the automation of distributed plant sections.

SIPLUS RIC is a versatile telecontrol system that uses the internationally standardized telecontrol protocols:



- Serial transmission IEC 60870-5-101
- Ethernet (TCP/IP) IEC 60870-5-104
- Connection of protection devices IEC 60870-5-103

It provides secure communication with reduced data volume for reliable operation in the Wide Area Network (WAN) thanks to event-driven, time-stamped transmission and monitored output of commands.

Application

SIPLUS RIC offers maximum functionality and modularity to meet the requirements made upon the monitoring and control of spatially distributed systems, even under extreme environmental conditions.

It is therefore suitable for sectors such as Oil, Gas, Water, Wastewater, Power Generation/Distribution, and Transportation.

© Siemens AG 2026

Overview

IEC 60870-5-101, -103, -104 are standardized, vendor-independent protocols. With SIPLUS RIC, they can be parameterized with the SIMATIC Manager or TIA Portal without the need for additional installations.

The IEC 60870-5-101 protocol supports classical WAN connections via dedicated lines,

The coupling is made

- directly
- via media converters (e.g. modems) or
- via the serial interfaces (RS232 or RS485) of the communications modules, e.g. 1SI, CP 341, CP 441 or CM PtP/PTP

The IEC 60870-5-103 protocol permits serial communication with protection devices, e.g. SIPROTEC. The link is made similar to IEC 60870-5-101 via serial communications modules.

The IEC 60870-5-104 protocol supports TCP/IP-based WAN connections such as internet/DSL or GPRS/UMTS/LTE. Either the PN interfaces of the CPUs or the Industrial Ethernet communications modules, e.g. CP 343, CP 443 and CM/CP 154x, are used as interfaces. Redundancy groups and substitute routes (combinations of serial and Ethernet transmission paths) are both possible and enabled via the interfaces.

Security requirements for IEC 104 communication can be achieved with:

- external components (firewall/VPN gateways such as SCALANCE S)
- integrated security features (e.g. firewall/VPN of Advanced CPs)

TLS can be used within the mechanisms (and limitations) provided by SIMATIC for the encryption of IEC 60870-5-104 communication.

The libraries for the IEC 60870-5-101 and -104 protocols are supplied as master (SCADA/Control Center/Controlling Station (control system)) and slave (substation/RTU/Controlled Station) including activation for PN-CPU and CP interface. The IEC 60870-5-103 library is only available as master.

SIMATIC Controllers can also communicate with third-party products by means of the IEC protocols and exchange data from the SIMATIC Controller.

By combining the different library variants (within a CPU), information from lower-level stations and also protection devices can be forwarded to the control stations (node or gateway functionality). Reversed direction signal paths are also supported.

The modular concept in connection with presets enables a fast configuration of stations with basic functionality. Specific requirements (e.g. individual addresses, transfer of external time stamps) can also be parameterized and programmed individually. Example projects are available to make starting easier. They can be used as a basis for one's own projects or initial tests.

Libraries including the example projects and documentation can be downloaded from Siemens Online Support as trial versions and used without a valid license (activation code) in demo mode (15 minutes of full functionality after each CPU restart).

© Siemens AG 2026

Overview

If a system based on SIMATIC S7-1500, S7-1500R/H, ET 200SP or Software Controller is to communicate with a Siemens control center, e.g. SIMATIC PCS 7 TeleControl, WinCC TeleControl, WinCC OA, or a control center of a third-party supplier using the IEC 60870-5 telecontrol standard, the IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) telecontrol protocols can be used in the SIMATIC automation systems.

SIPLUS RIC libraries offer an integrated, scalable system based on SIMATIC S7-1500/ET 200SP functionalities for the following data volumes:

- 200 data points, for use with CPU 1510SP-1 PN[1)], CPU 1511-1 PN and CPU 1511C-1 PN
- 800 data points, for use with CPU 1512SP-1 PN and CPU 1512C-1 PN
- 1000 data points, for use with CPU 1513-1 PN
- 2000 data points, for use with CPU 1515-2 PN
- 4000 data points, for use with CPU 1516-3 PN/DP
- 5000 data points, for use with CPU 1517-3 PN/DP and with CPU 1518-4 PN/DP

The work memory for data is used for buffering the message frames. Longer communication failure times can thus be bridged. The SIPLUS RIC software libraries are based on the standard TIA Portal and can be used on various, mutually compatible types of SIMATIC S7 devices, thus saving hardware costs and programming overhead.

The libraries and licenses are delivered digitally or as a download (OSD, Online Software Delivery). Three variants are available for selection:

- 50 data points ("tags")
- 500 data points
- Unlimited number of data points

Only information objects in monitoring direction (e.g. messages, measured values) are counted.

A license certificate is supplied with the order, which can be used to request activation codes for permanent use of the purchased protocols on the employed hardware (linked to serial number). For more information on this, see this link.

The license certificate required for the activation of all telecontrol protocols IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) is available for download in SiePortal after purchase.

1) CPU 1510SP-1 PN is only suitable for small installations due to the small amount of work memory. If the CPU is used for other tasks besides the IEC protocol, it is absolutely necessary to check the work memory load beforehand.

Overview

If a SIMATIC ET 200S-based system is to communicate with a Siemens control center, e.g. SIMATIC PCS 7 TeleControl, WinCC TeleControl, WinCC OA, or a control center of a third-party supplier using the IEC 60870-5 telecontrol standard, the IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) telecontrol protocols can be used in the SIMATIC automation systems.

SIPLUS RIC libraries offer an integrated, scalable system based on SIMATIC ET 200S functionalities, for data volumes up to 200 information points.

The non-retain memory can also be used for buffering message frames. Longer communication failure times can thus be bridged. The SIPLUS RIC software libraries are based on the standard SIMATIC Manager or TIA Portal and can be used on various, mutually compatible types of SIMATIC S7 devices – this saves hardware costs and programming overhead.

The libraries and licenses are delivered digitally or as a download (OSD, Online Software Delivery).
A license certificate is supplied with the order, which can be used to request activation codes for permanent use of the purchased protocols on the employed hardware (linked to serial number). For more information on this, see this link.

Overview

If a SIMATIC S7-300-based system is to communicate with a Siemens control center, e.g. SIMATIC PCS 7 TeleControl, WinCC TeleControl, WinCC OA, or a control center of a third-party supplier using the IEC 60870-5 telecontrol standard, the IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) telecontrol protocols can be used in the SIMATIC automation systems.

SIPLUS RIC libraries offer an integrated, scalable system based on SIMATIC S7-300 functionalities, for the following data volumes:

- 200 information points, for use with CPU 314
- 1000 information points, for use with CPU 315
- 2000 information points, for use with CPU 317
- 5000 information points, for use with CPU 319

The non-retain memory can also be used for buffering message frames. Longer communication failure times can thus be bridged. The SIPLUS RIC software libraries are based on the standard SIMATIC Manager or TIA Portal and can be used on various, mutually compatible types of SIMATIC S7 devices – this saves hardware costs and programming overhead.

The libraries and licenses are delivered digitally or as a download (OSD, Online Software Delivery).

© Siemens AG 2026

Overview

If a SIMATIC S7-400/S7-400H-based system is to communicate with a Siemens control center, e.g. SIMATIC PCS 7 TeleControl, WinCC TeleControl, WinCC OA, or a control center of a third-party supplier using the IEC 60870-5 telecontrol standard, the IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) telecontrol protocols can be used in the SIMATIC automation systems.

SIPLUS RIC libraries offer an integrated, scalable system based on SIMATIC S7-400/S7-400H functionalities for the following data volumes:

- 1000 information points, for use with CPU 412 or CPU 412H
- 2000 information points, for use with CPU 414 or CPU 414H
- 5000 information points, for use with CPU 410H, CPU 416/CPU 416H or CPU 417/CPU 417H

The data memory, which is limited to 256 MB in the CPU 410H for data blocks generated online, is used for buffering the frames. Longer communication failure times can thus be bridged. The SIPLUS RIC software libraries are based on the standard SIMATIC Manager or TIA Portal and can be used on various, mutually compatible types of SIMATIC S7 devices – this saves hardware costs and programming overhead.

The libraries and licenses are delivered digitally or as a download (OSD, Online Software Delivery).
A license certificate is supplied with the order, which can be used to request activation codes for permanent use of the purchased protocols on the employed hardware (linked to serial number). For more information on this, see this link.

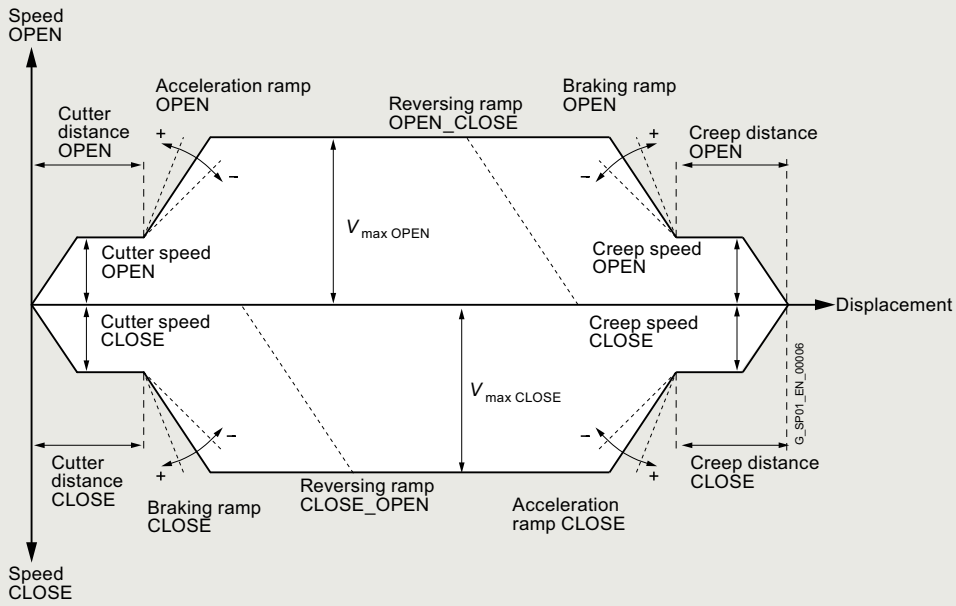
Design

SIDOOR automatic door control systems

The SIDOOR product family is primarily intended for the operation of sliding doors, whereby these doors can be operated both horizontally and vertically.

Door control systems are characterized by the fact that there are always two defined states for the open and closed position of the door.



The door is always controlled, regulated and moved between these two positions in accordance with the guidelines of the respective application.

In a defined learn run via "single-button operation", the door system independently determines the values for the door width, the dynamic door weight and the drive direction of the geared motor and stores these data in a non-volatile memory.

The optimum drive characteristics at the door are automatically calculated and are consistently adhered to.

The travel curve transitions are rounded off so that the door movement is smooth and jerk-free.

Door control system is the general term for a controller of an access system.

Creep speed	Reduced speed in the vicinity of the OPEN position of the elevator door (creep distance)
Cutter speed	Reduced speed in the vicinity of the CLOSED position of the elevator door (cutter distance)
Creep distance	Range of door travel in the vicinity of the OPEN position
Cutter distance	Range of door travel in the vicinity of the CLOSED position
V_{max}	Maximum permissible door speed

Reversing ramp OPEN_CLOSE	Travel reverses from the OPEN to the CLOSE direction
Reversing ramp CLOSE_OPEN	Travel reverses from the CLOSE to the OPEN direction

Note:
When reversing from the open to the close direction, the door is braked with the reversing ramp OPEN_CLOSE, and starts the closing movement with the acceleration ramp CLOSE.

Travel curve

© Siemens AG 2026

Application

The elevator door drive is comprised of a controller and the maintenance-free drive unit, geared motor or gearless EC technology direct drive motor.

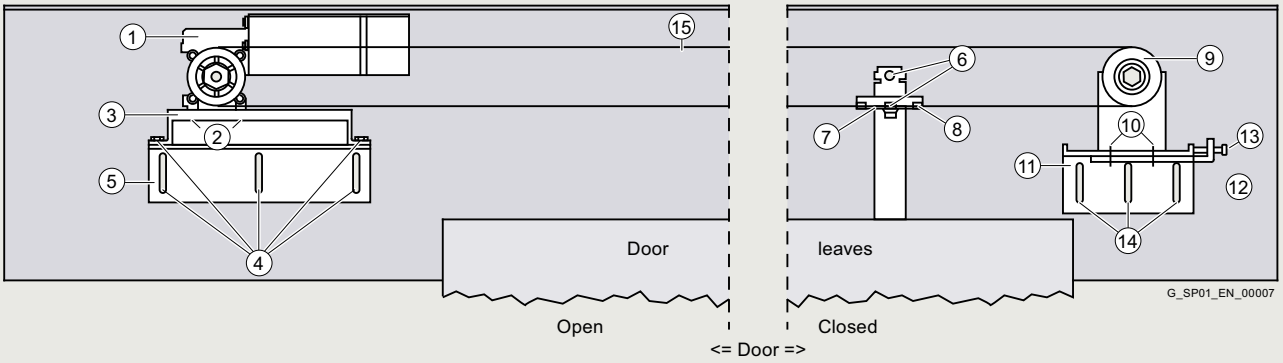
Control devices are electronic controllers connected to the power supply via an external power supply unit (SIDOOR NT40 or SIDOOR Transformer). They are generally connected to the higher-level controller via digital or fieldbus interfaces, and can be configured via a user interface.

The SIDOOR AT40 and SIDOOR ATE500E control devices can be used to operate horizontally operated cabin and shaft doors as well as vertical doors for lifting or rolling doors at adjustable speeds and accelerations.

Geared motors form the maintenance-free drive unit in the door drive. The geared motors feature DC motors with non-self-locking gearing, and are speed-controlled. The set force and speed limits are not exceeded. The gearless motor (direct drive) is the maintenance-free drive unit of the door drive.

Operation of the named door drives does not require limit switches. The door width and the "OPEN"/"CLOSE" positions are determined automatically.

The power is transmitted by a toothed belt. The toothed belt passes over a deflector pulley and can be fitted with 2 door clutch holders. This enables it to drive both one-sided and centrally-opening doors. The accessories are not included in the scope of supply, see "Accessories".



© Siemens AG 2026

Design

The product-specific property of the elevator door controllers is based on the fact that the closing weights/closing springs integrated in the shaft doors are also taken into account.

These weights/springs are integrated in the shaft doors so that open doors close automatically if the cabin is not at the relevant floor.

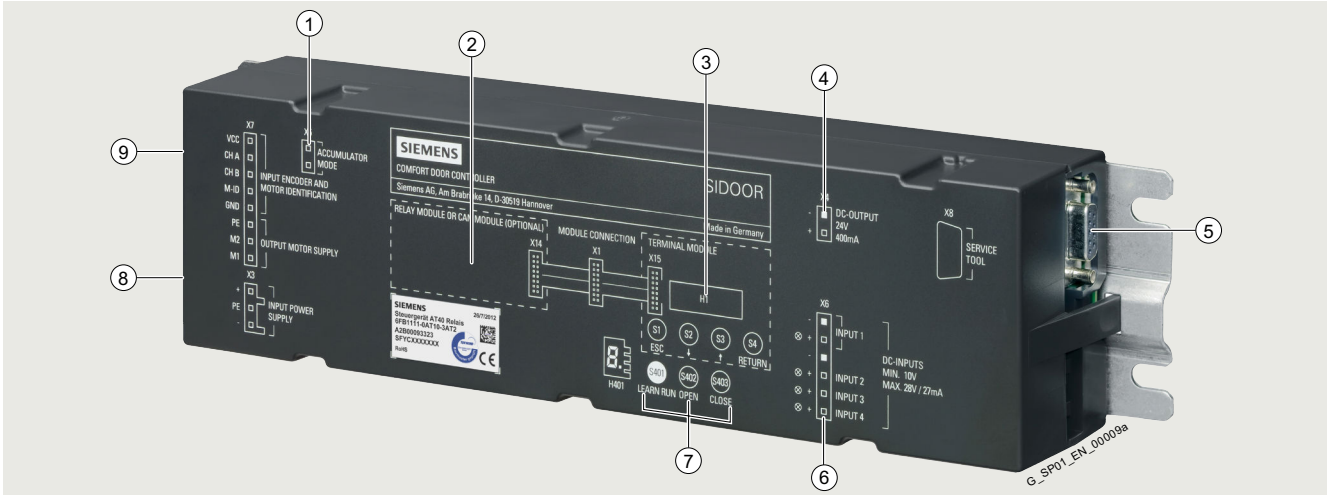
They must also be moved by the elevator door drive in their opening direction and support it in the closing movement.

Complete motor mounting

(1) Geared motor
(2) 4 x locking hexagonal safety bolts M5 x 10
(3) Rubber-metal anti-vibration mount
(4) 10 x locking hexagonal safety bolts M6 x 16
(5) Mounting bracket for the motor mounting

Mounting material for door clutch holder

(6) 2 x locking hexagonal safety bolts M6 x 12
(7) Door clutch holder
(8) Clamping plate



Deflector unit and clamping device

(9) Deflector unit
(10) 2 x locking hexagonal safety bolts M6 x 12
(11) Mounting bracket for the deflector unit and tensioning device
(12) Tensioning lug for the deflector unit and tensioning device
(13) Tensioning screw M6 x 30
(14) 10 x locking hexagonal safety bolts M6 x 16
(15) Toothed belt (length 4 m)

Mounting suggestion for door control systems

Overview

1. Optional: additional input signal
2. CAN or relay module version
3. Terminal module
4. Connection for 24 V DC/400 mA output voltage
5. Connection
   - Software Kit
6. Input signal connection
7. Control panel
8. Connector
   - NT40 switched-mode power supply or
   - Mains transformer
9. Motor connection

SIDOOR AT40 elevator door drive (relay module version)

SIDOOR AT40 – SIDOOR enables the quick, easy and versatile installation, configuration and operation of a wide range of elevator door systems.

- Version:
- RELAY (including relay and terminal module)
- CAN (including CAN and terminal module),
  two controllers are available: SIDOOR AT40 CAN and CAN ADV.
  - Certified by CiA (CiA 301 / CiA 417).
  - The door system can be visualized and parameterized by the elevator controller using the "Virtual Terminal" function.
  - With the SIDOOR AT40 CAN ADV controller, parameters for evaluating mechanical wear can be provided at the door. These parameters can be accessed from the CAN-BUS via the elevator controller or other bus nodes and can be evaluated floor-dependently by an external evaluation logic. It includes, e.g. event counters, maximum current values in the slow end distance of the door, traversing times and energy values of the opening and closing cycles, as well as other performance values.
  - The evaluation can affect the maintenance cycles of the elevator system.
- For dynamic door weights up to 600 kg, depending on motor variant
- Automatic door weight detection
- 4 to 8 kg maximum counterweight (depending on motor version)
- Operating temperature -20 to +50 °C
- Flexible motor management (four different motor types), automatic detection
- Opening width 0.3 to 5 m
- Auxiliary power output 24 V DC ± 15 %; 0.4 A (short-circuit-proof)
- Output stage short-circuit-proof
- Supports power-optimized operation in the elevator cabin
- Vandal-proof
- IP54 degree of protection for 180 to 600 kg motor versions, gear unit IP40 (SIDOOR M5: entirely IP54)
- The current operating states are indicated via a 7-segment display or a terminal module directly in the elevator door drive or externally. The SIDOOR SOFTWARE KIT or the SIDOOR LINK with the SIDOOR SUPPORT App are used for this, see Additional units.

SIDOOR ATE500E elevator door drive

The SIDOOR ATE500E elevator door drive enables the quick, easy and versatile installation, configuration and operation of EC technology gearless elevator door systems.

- Design:
  - Relay module
  - CAN module
- For dynamic door weights up to 280 kg
- High control performance and optimized drive characteristic transitions
- Automatic door weight detection (single-button commissioning)
- 6 kg maximum counterweight of the coupled floor door
- Operating temperature -25 to +50 °C without restrictions
- Automatic identification of the connected motor
- Opening width 0.3 to 5 m
- Auxiliary voltage output 24 V DC ± 15%; 0.4 A (short-circuit-proof)
- Output stage short-circuit-proof
- Optimized energy consumption during cabin operation (DCPS)
- Vandal-proof
- IP20 degree of protection
- The current operating states are indicated via a 7-segment display directly in the elevator door drive or externally using the Software Kit, see"Additional units".

Overview

SIDOOR Transformer

The SIDOOR TRANSFORMER and SIDOOR TRANSFORMER UL are standard power supply units operated with 220-240 V AC, 50/60 Hz, from the SIDOOR product range. They can be used for controllers capable of controlling masses of up to 400 kg.

Overview

The SIDOOR NT40 switched-mode power supply unit is operated with 230 V AC (± 15 %), 50/60 Hz, to power the elevator door controllers.

It is especially suitable for door systems with high door weights.

On the output side, the power supply unit delivers a voltage of 36 V DC (± 3 %) SELV at a rated output power of < 100 W.

In order to enable fast acceleration/deceleration of the doors by the controller, the device can briefly (< 2 s) deliver a current of 15 A (corresponds to a short-time power output of 540 W).

Overview

SIDOOR Software Kit

The scope of delivery of the SIDOOR Software Kit includes an installation CD.

The CD includes the following functionalities:

SIDOOR User Software	The component that enables the door control system to be configured, parameters to be assigned, and analyzed.
Siemens HCS12 Firmware Loader	This component is used to update the operating software of the door controller.
SIDOOR USB to UART Bridge Driver	This driver is essential for operation of the USB adapter.

Note:

Some firmware updates are offered as free downloads in the Siemens Industry Online Support. For information on the availability and acquisition of more firmware, please contact Technical Support.

Overview

SIDOOR LINK

SIDOOR SUPPORT App

A Bluetooth LE 5.0 connection can be established via the SIDOOR LINK to a smartphone or tablet with the SIDOOR SUPPORT app installed.

The SIDOOR SUPPORT app enables easy commissioning and maintenance of a door system with a SIDOOR controller, is suitable for smartphones or tablets as of Android version 9 and is available from the Google Play store.

The SIDOOR LINK is connected to the SIDOOR controller via the respective cable.

You do not need to open the cover of the controller to do this.

Note:
If the SIDOOR SUPPORT (app) is in the "Quick adjustment" or "Total adjustment" menu, the drive commands of the controller are blocked via the command inputs.

Overview

SIDOOR geared motors are a combination of gear unit, motor and sensor. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning.

The maintenance-free, variable speed drive unit comprises a DC motor with non-self-locking gearing.

The geared motors must be selected according to the mass to be moved. Two different versions are available for each of the SIDOOR M2 to SIDOOR M5 geared motors, with gear output on the left or on the right: The gear outlet direction is defined as left or right when viewing the gear unit from the front.

- SIDOOR M2 geared motors (max. door weight 120 kg)
  - SIDOOR M2 L (pinion left) 6FB1103-0AT10-5MA0
  - SIDOOR M2 R (pinion right) 6FB1103-0AT11-5MA0
- SIDOOR M3 geared motors (max. door weight 180 kg)
  - SIDOOR M3 L (pinion left) 6FB1103-0AT10-4MB0
  - SIDOOR M3 R (pinion right) 6FB1103-0AT11-4MB0
- SIDOOR M4 geared motors (max. door weight 400 kg)
  - SIDOOR M4 L (pinion left) 6FB1103-0AT10-3MC0
  - SIDOOR M4 R (pinion right) 6FB1103-0AT11-3MC0
- SIDOOR M5 geared motors (max. door weight 600 kg)
  - SIDOOR M5 L (pinion left) 6FB1103-0AT10-3MD0
  - SIDOOR M5 R (pinion right) 6FB1103-0AT11-3MD0

Geared motors: SIDOOR M2 L 6FB1103-0AT10-5MA0 (version with pinion left), SIDOOR M3 L 6FB1103-0AT10-4MB0 (version with pinion left), SIDOOR M4 L 6FB1103-0AT10-3MC0 (version with pinion left), SIDOOR M5 L 6FB1103-0AT10-3MD0 (version with pinion left) (Images are shown in the order from bottom to top)

Overview

SIDOOR MED280 direct drive

SIDOOR direct drives are a combination of motor and sensor. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning.

The maintenance-free drive unit consists of a gearless, speed-controlled, electronically commutated motor with non-self-locking gearing.

Direct drives are designed for certain masses and can control both drive directions.

- SIDOOR MED280 direct drive for max. 280 kg (6FB1203-0AT12-7DA0)

Selection and ordering data

SIDOOR MED280 direct drive Motor for door control, for max. dynamic door weights of 280 kg	**6FB1203-0AT12-7DA0**

Accessories

The following accessories are available for the SIDOOR MED280 direct drives:

- Motor holder for flexible integration in the door system. Choice of cable outlets.
  - SIDOOR motor holder 6FB1104-0AT03-0AD0
  - Mounting bracket 6FB1104-0AT01-0AS0 for direct drives for flexible accommodation of the motor holder

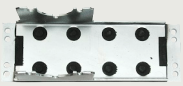
Overview

A range of accessories is available for SIDOOR elevator door drive systems with geared motors:

This is necessary to ensure low-noise operation of the door leaves by the controller. The geared motors can be optimally integrated into the respective door drive system.



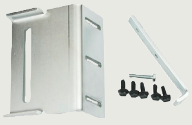
Rubber-metal anti-vibration mounts for geared motors

To ensure low-noise door operation, SIDOOR geared motors are integrated in the door system using rubber-metal anti-vibration mounts.

- Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0 for SIDOOR M2 and SIDOOR M3 geared motors.
- Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0 for SIDOOR M4 and SIDOOR M5 geared motors.

Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0

Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0



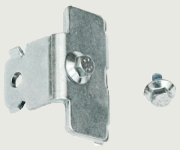
Mounting brackets

Two different mounting brackets are available with elongated holes:

- Mounting bracket 6FB1104-0AT01-0AS0 for the geared motors for flexible accommodation of the rubber-bonded metal
- Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit. For setting the toothed belt to the required belt tension.

Mounting bracket 6FB1104-0AT01-0AS0 for mounting the geared motor

Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit



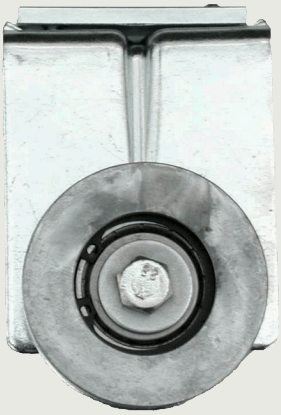
Door clutch holder

The door clutch holder serves to connect the respective door leaf by means of a toothed belt while also functioning as a toothed-belt lock. One door clutch holder per door leaf is required. The toothed-belt lock can accommodate both open ends of the toothed belt.

A door clutch holder is available for each toothed belt width:

- Width 12 mm: 6FB1104-0AT01-0CP0
- Width 14 mm: 6FB1104-0AT02-0CP0

Overview (continued)



Door clutch holder 6FB1104-0AT01-0CP0 (packaging size = 1 unit)

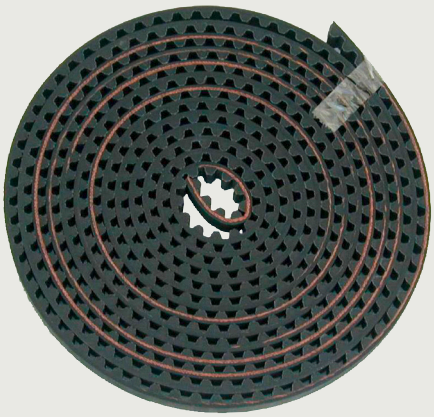
Deflector unit

The deflector unit 6FB1104-0AT03-0AS0 contains an embedded belt pulley which can be mounted on the door system.

The STS toothed belt is redirected via this deflector unit (toothed belt width 12 mm or 14 mm). .

Deflector unit 6FB1104-0AT03-0AS0

STS toothed belt



The door system is moved between the end positions of the door using the STS toothed belts. Two different toothed belt lengths can be ordered for each toothed belt width.

Toothed belt width 12 mm:

- Length 4 m: 6FB1104-0AT01-0AB0
- Length 45 m: 6FB1104-0AT02-0AB0

Toothed belt width 14 mm:

- Length 4 m: 6FB1104-0AT03-0AB0
- Length 55 m: 6FB1104-0AT04-0AB0

Application

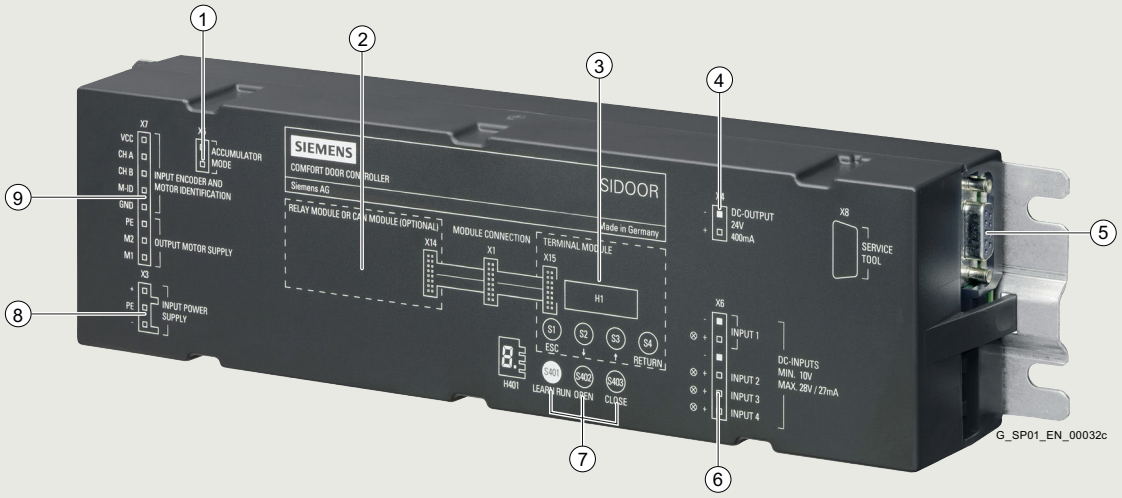
The door drive system consists of a controller and a maintenance-free drive unit, the geared motors.

Control devices are electronic controllers connected to the power supply via an external power supply unit. They are generally connected to the higher-level controller via digital or fieldbus interfaces, and can be configured via a user interface.

These controllers are available for selection for industrial applications:

- SIDOOR ATD401W, digital I/O, masses of up to 700 kg
- SIDOOR ATD420W, connected to the higher-level controller via PROFIBUS interface, masses of up to 700 kg
- SIDOOR ATD430W, connected to the higher-level controller via PROFINET interface, masses of up to 700 kg

The safe functions – force limitation, energy limitation and end position detection – fulfill the requirements according to EN ISO 13849-1 for Category 2 and Performance Level d. The drives are suitable for power-operated guards according to EN ISO 14120



Geared motors form the maintenance-free drive unit in the door drive. The geared motors are DC motors with non-self-locking gearing, and are speed-controlled. The set force and speed limits are not exceeded.

Operation of the named door drives does not require limit switches. The door width and the "OPEN"/"CLOSE" positions are determined automatically.

The power is transmitted by a toothed belt. The toothed belt passes over a deflector pulley and can be fitted with 2 door clutch holders. This enables it to drive both one-sided and centrally-opening doors. The accessories are not included in the scope of supply, see "Accessories".

SIDOOR ATD401W

The SIDOOR ATD401W enables the quick, easy and versatile installation, configuration and operation of a wide range of industrial door drive systems.

- Relay module design
- Masses of up to 700 kg
- Automatic determination of the door weight and friction during the learn run
- Digital inputs, for example for direct connection of a light barrier as type 2 ESPE (electro-sensitive protective equipment) according to EN 61496-1
- 3 relay outputs for position feedback and reversing feedback
- Operating temperature -20 to +50 °C
- Flexible motor management, automatic recognition of the geared motor
- Opening width 0.3 to 5 m
- Auxiliary voltage output 24 V DC ± 15%; 0.4 A (short-circuit-proof)
- Output stage for the motor control is short-circuit-proof
- Indicates the current operating states on a 7-segment display directly on the controller or using the Software Kit or the SIDOOR LINK with the SIDOOR SUPPORT App

Overview

The SIDOOR NT40 switched-mode power supply unit is operated with 230 V AC (± 15 %), 50/60 Hz, to power the elevator door controllers.

It is especially suitable for door systems with high door weights.

On the output side, the power supply unit delivers a voltage of 36 V DC (± 3 %) SELV at a rated output power of < 100 W.

In order to enable fast acceleration/deceleration of the doors by the controller, the device can briefly (< 2 s) deliver a current of 15 A (corresponds to a short-time power output of 540 W).

Installation type/mounting	
Mounting type	Four 5 mm screws
Supply voltage	
Rated value (AC)	230 V
relative symmetrical tolerance of the supply voltage	15 %
Line frequency	
• permissible range, lower limit	50 Hz
• permissible range, upper limit	60 Hz
Input current	
Current consumption for 2 s, max.	3.5 A
Rated value at 230 V AC	0.7 A
Operational current of fuse protection at input, min.	6 A
Operational current of fuse protection at input, max.	10 A
Tripping characteristic class of fuse protection at input	B
Output voltage	
Rated value (DC)	36 V; SELV
Relative symmetrical tolerance of the output voltage	3 %
Output current	
Current output (rated value)	2.5 A
Temporary overload current (for 2 s maximum)	15 A
Power	
Active power input, max.	100 W
Emitted active power, max.	100 W
Emitted active power (restricted to 2 s)	540 W
Efficiency at 230 V AC (with 100 W emitted active power)	90 %
Active apparent power, max.	650 V·A
Standards, approvals, certificates	
CE mark	Yes
EAC (formerly Gost-R)	Yes
TÜV Inspectorate approval	Yes
China RoHS compliance	Yes
Standard for EMC	EMC Directive 2004/108/EC, EN 12015, EN 12016
Standard for safety	EN 61010-1 / EN 61010-2-201
Ambient conditions	
Ambient temperature during operation	
• min.	-20 °C
• max.	55 °C
• Remark	No direct exposure to the sun
Ambient temperature during storage/transportation	
• Storage, min.	-20 °C
• Storage, max.	70 °C
• Transportation, min.	-40 °C
• Transportation, max.	70 °C
Altitude during operation relating to sea level	
• Installation altitude above sea level, max.	2 000 m
Relative humidity	
• No condensation, min.	10 %
• No condensation, max.	93 %
Cables	
Cable length	
• Input side	2 m
• Output side	1.5 m
Connection method	
Design of electrical connection at input	SCHUKO connector DIN 49.441, CEE7/VII

Overview

The 3-phase SITOP PSU8200 are technology power supplies for challenging solutions. The wide-range input allows a connection to almost any electricity supply network worldwide and ensures a high degree of safety even if there are large voltage fluctuations.

To further increase 36 V availability, SITOP power supplies can be combined with redundancy modules.

Product highlights

- 3-phase, 36 V DC / 13 A
- Input voltage 320 ... 575 V AC
- Up to 94% efficiency
- cULus, cCSAus, ABS and DNV GL certifications

Selection and ordering data

SITOP PSU8200 3-phase, 36 V DC/13 A Stabilized power supply Input: 400 ... 500 V 3 AC Output: 36 V DC/13 A	**6EP3446-8SB10-0AY0**

Accessories

Article number	**6EP3446-8SB10-0AY0**
product brand name	**SITOP**
type of current supply	**36 V/13 A**
General information	
Technical Product Detail Page	https://i.siemens.com/1P6EP3446-8SB10-0AY0
input	
type of the power supply network	3-phase AC
supply voltage at AC	
• minimum rated value	400 V
• maximum rated value	500 V
• initial value	320 V
• full-scale value	575 V
wide range input	Yes
buffering time for rated value of the output current in the event of power failure minimum	15 ms
operating condition of the mains buffering	at Vin = 400 V
line frequency	50 Hz/60 Hz
line frequency	47 ... 63 Hz
input current	
• at rated input voltage 400 V	1.2 A
• at rated input voltage 500 V	1 A
current limitation of inrush current at 25 °C maximum	16 A
I2t value maximum	0.8 $A^2 \cdot s$
fuse protection type	none
fuse protection type in the feeder	Required: 3-pole connected miniature circuit breaker 6 ... 16 A characteristic C or circuit breaker 3RV2011-1DA10 (setting 3 A) or 3RV2711-1DD10 (UL 489)
output	
voltage curve at output	Controlled, isolated DC voltage
output voltage at DC rated value	36 V
output voltage	
• at output 1 at DC rated value	36 V
	36 V
output voltage adjustable	Yes; via potentiometer
adjustable output voltage	36 ... 42 V; max. 480 W
relative overall tolerance of the voltage	3 %
relative control precision of the output voltage	
• on slow fluctuation of input voltage	0.1 %
• on slow fluctuation of ohm loading	0.2 %
residual ripple	
• maximum	100 mV
voltage peak	
• maximum	200 mV
display version for normal operation	Green LED for 36 V OK
type of signal at output	Relay contact (NO contact, rating 60 V DC/ 0.3 A) for 36 V OK
behavior of the output voltage when switching on	No overshoot of Vout (soft start)
response delay maximum	2.5 s

Technical specifications (continued)

Article number	6EP3446-8SB10-0AY0
product brand name	SITOP
type of current supply	36 V/13 A
voltage increase time of the output voltage	
• maximum	500 ms
output current	
• rated value	13 A
• rated range	0 ... 13 A; +60 ... +70 °C: Derating 2%/K
	10.1 ... 19.9 A
supplied active power typical	468 W
short-term overload current	
• at short-circuit during operation typical	39 A
duration of overloading capability for excess current	
• at short-circuit during operation	25 ms
constant overload current	
• on short-circuiting during the start-up typical	14 A
bridging of equipment	Yes; switchable characteristic
number of parallel-switched equipment resources	2
efficiency	
efficiency in percent	94 %
power loss [W]	
• at rated output voltage for rated value of the output current typical	30 W
closed-loop control	
relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical	0.1 %
relative control precision of the output voltage load step of resistive load 50/100/50 % typical	1 %
setting time	
• load step 50 to 100% typical	0.2 ms
• load step 100 to 50% typical	0.2 ms
relative control precision of the output voltage at load step of resistive load 10/90/10 % typical	2 %
setting time	
• load step 10 to 90% typical	0.2 ms
• load step 90 to 10% typical	0.2 ms
• maximum	10 ms
protection and monitoring	
design of the overvoltage protection	< 48 V
property of the output short-circuit proof	Yes
design of short-circuit protection	Alternatively, constant current characteristic approx. 14 A or latching shutdown
• typical	14 A
overcurrent overload capability	
• in normal operation	overload capability 150 % Iout rated up to 5 s/min
enduring short circuit current RMS value	
• typical	14 A
display version for overload and short circuit	LED yellow for "overload", LED red for "latching shutdown"

Overview

SIDOOR Software Kit

The scope of delivery of the SIDOOR Software Kit includes an installation CD.
The CD includes the following functionalities:

SIDOOR User Software	The component that enables the door control system to be configured, parameters to be assigned, and analyzed.
Siemens HCS12 Firmware Loader	This component is used to update the operating software of the door controller.
SIDOOR USB to UART Bridge Driver	This driver is essential for operation of the USB adapter.

Note:
Some firmware updates are offered as free downloads in the Siemens Industry Online Support. For information on the availability and acquisition of more firmware, please contact Technical Support.

Overview

SIDOOR LINK

SIDOOR SUPPORT App

A Bluetooth LE 5.0 connection can be established via the SIDOOR LINK to a smartphone or tablet with the SIDOOR SUPPORT app installed.

The SIDOOR SUPPORT app enables easy commissioning and maintenance of a door system with a SIDOOR controller, is suitable for smartphones or tablets as of Android version 9 and is available from the Google Play store.

The SIDOOR LINK is connected to the SIDOOR controller via the respective cable.

You do not need to open the cover of the controller to do this.

Note:
If the SIDOOR SUPPORT (app) is in the "Quick adjustment" or "Total adjustment" menu, the drive commands of the controller are blocked via the command inputs.

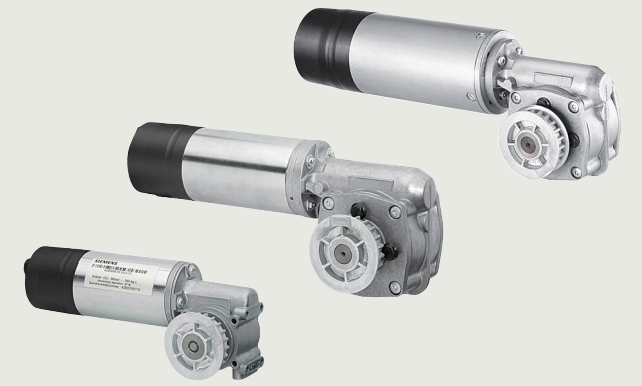
Overview

The SIDOOR geared motor is a combination of a gear unit, motor and incremental encoder matched to the complete system.
It is easy to connect to the controller via the interface provided, and is automatically detected during commissioning.

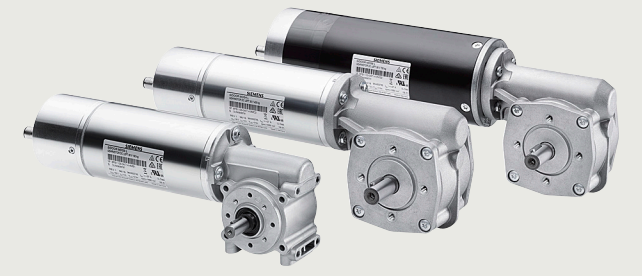
The maintenance-free, variable speed drive unit comprises a DC motor with non-self-locking gearing. All geared motors are available with the output shaft on the left or right. The view is toward the front of the gear unit.

The "mass to be moved" has to be taken into account when selecting the geared motor:



The weight to be moved is calculated from the sum of the mass equivalent of the moment of inertia of the motor rotor, the moved door weight and the moved door mechanism weight. The weight of the door to be moved and the moved weight of the door mechanism depend on the application. You can find additional information in the system manual.

The **output shaft** is appropriately prepared for the mechanical coupling of the door.



- SIDOOR M3, M4 and M5 Basic motors: Output gear with 56 mm effective diameter for the use of a S8M toothed belt (see Accessories).
- Advanced motors: Gearbox output shaft with groove and feather key A 5x5 according to DIN 6885; the output gear design and effective diameter can be freely configured between 28 mm and 122 mm. Advanced motors are recommended, among other things, for a mechanical coupling to the door via gear rack or chain.

Advanced motors:	
SIDOOR MDG3 L	6FB1103-0AT14-4MB1

Accessories

The following accessories are available for the geared motors:

- Rubber-metal anti-vibration mount for low-noise door operation
  - 6FB1104-0AT02-0AD0 for SIDOOR MDG180 and SIDOOR M3 geared motors (door weights up to 180 kg).
  - 6FB1104-0AT01-0AD0 for SIDOOR MDG400, SIDOOR MDG400 NMS, SIDOOR MDG700 NMS, as well as SIDOOR M4 and M5 geared motors (door weights greater than 180 kg).
- Mounting bracket 6FB1104-0AT01-0AS0 for the geared motor mount for flexible accommodation of the rubber-bonded metal.
- Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit
- MDG cable for connecting MDG motors to the door controller
  - SIDOOR CABLE MDG in cable lengths 0.5 m/1.5 m/5.0 m/7.0 m/10 m/15 m/20 m for the SIDOOR MDG180, MDG400, MDG400 NMS motors.
  - SIDOOR CABLE MDGin cable lengths 5 m/10 m/15 m/20 m for the SIDOOR MDG3, MDG4 and MDG5 motors as well as the SIDOOR MDG700 NM motor.
- MDG-PULLEY belt pulley for DC geared motor and S8M toothed belt, effective diameter 56 mm.

See "Accessories".

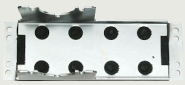
Overview

An extensive range of accessories is available for the door control drives.

This is necessary to ensure low-noise operation of the door leaves by the motor. The geared motors can be optimally integrated into the respective door drive system.

Accessories for all controllers for industrial applications

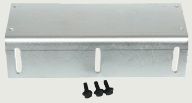


Rubber-metal anti-vibration mounts for geared motors

To ensure low-noise door operation, SIDOOR geared motors are integrated in the door system using rubber-metal anti-vibration mounts.

- Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0 for SIDOOR M3 and SIDOOR MDG3 geared motors
- Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0 for SIDOOR M4 and MDG4 as well as SIDOOR M5 and MDG5 geared motors

Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0 for geared motors with masses to be moved of up to 180 kg



Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0 for geared motors with masses of up to 700 kg

Mounting bracket

Two different mounting brackets are available with elongated holes:

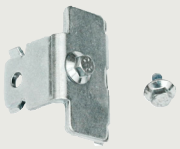
- Mounting bracket 6FB1104-0AT01-0AS0 for mounting SIDOOR geared motors, for flexible accommodation of the rubber-bonded metal
- Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit. For setting the toothed belt to the required belt tension.

Mounting bracket 6FB1104-0AT01-0AS0 for mounting the geared motor

Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit

mounting rail holder

The standard mounting rail holder 6FB1144-0AT00-3SA0 is available for mounting controllers on the TH 35 standard mounting rail according to IEC 60715.

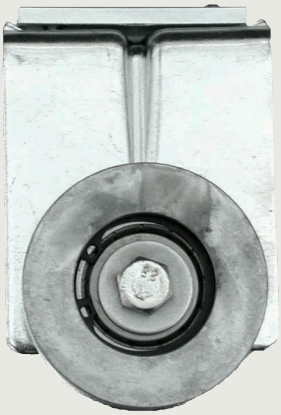


Door clutch holder

The door clutch holder serves to connect the respective door leaf by means of a toothed belt while also functioning as a toothed-belt lock. One door clutch holder per door leaf is required. The toothed-belt lock can accommodate both open ends of the toothed belt.

A door clutch holder is available for each toothed belt width:

Overview (continued)



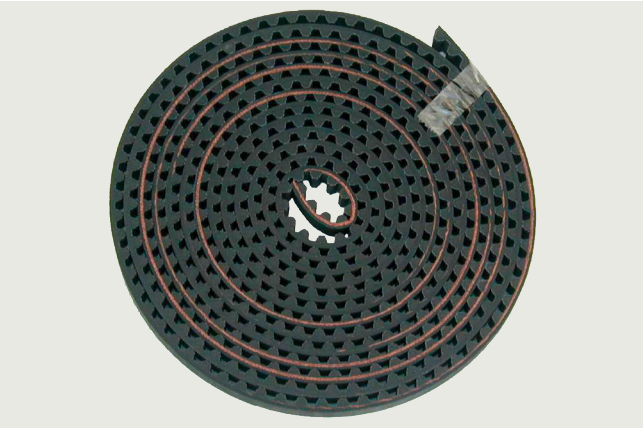
- Width 12 mm: 6FB1104-0AT01-0CP0
- Width 14 mm: 6FB1104-0AT02-0CP0

Door clutch holder 6FB1104-0AT01-0CP0 (packaging size = 1 unit)

Deflector unit

The deflector unit 6FB1104-0AT03-0AS0 contains an embedded belt pulley which can be mounted on the door system. The STS toothed belt is redirected via this deflector unit.

Deflector unit 6FB1104-0AT03-0AS0



STS toothed belt

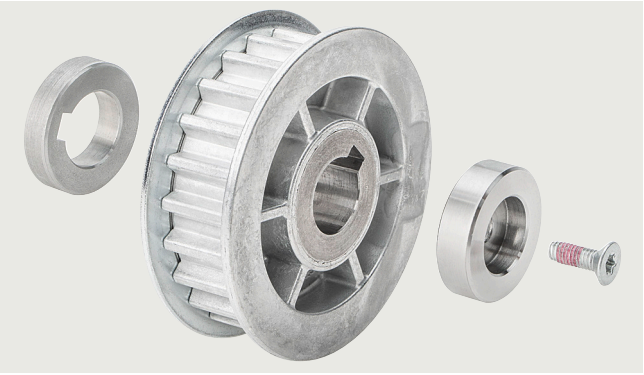
The door system is moved between the end positions of the door using the STS toothed belts. Two different toothed belt lengths can be ordered for each toothed belt width.

- Toothed belt width 12 mm:
  - Length 4 m: 6FB1104-0AT01-0AB0
  - Length 45 m: 6FB1104-0AT02-0AB0
- Toothed belt width 14 mm:
  - Length 4 m: 6FB1104-0AT03-0AB0
  - Length 55 m: 6FB1104-0AT04-0AB0

© Siemens AG 2026

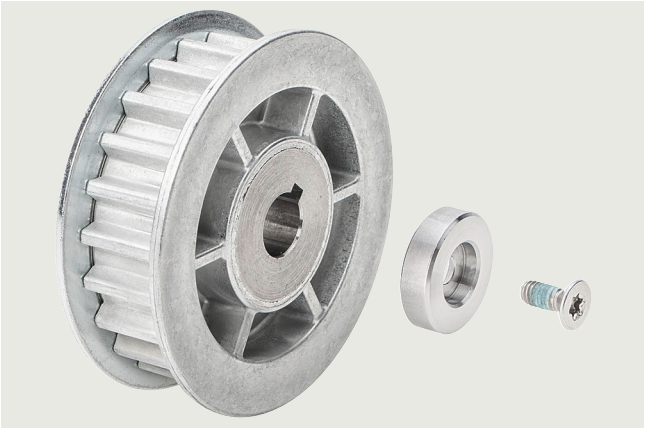
Overview (continued)

Toothed belt 6FB1104-0AT01-0AB0 (width 12 mm, length 4 m)



Toothed belt 6FB1104-0AT02-0AB0 (width 12 mm, length 45 m)

MDG-PULLEY belt pulley



This belt pulley is used for DC geared motors with the S8M toothed belt with an effective diameter of 56 mm.

- for SIDOOR MDG4, MDG5 DC geared motors: 6FB1104-0AT14-0AS1
- for SIDOOR MDG3 DC geared motors: 6FB1104-0AT10-0AS1

SIDOOR MDG-PULLEY 14-S8M-56, 6FB1104-0AT14-0AS1

Overview (continued)

SIDOOR MDG-PULLEY 10-S8M-56, 6FB1104-0AT10-0AS1

Accessories for machine tool door drives only

SIDOOR MDG-CABLE cable set

This cable set connects the ATD4xxW door controller to the SIDOOR MDG3, MDG 4 and MDG 5 geared motors. Various lengths are available.

- Length 5 m: 6FB1104-0AT05-0CB2
- Length 10 m: 6FB1104-0AT10-0CB2
- Length 15 m: 6FB1104-0AT15-0CB2
- Length 20 m: 6FB1104-0AT20-0CB2

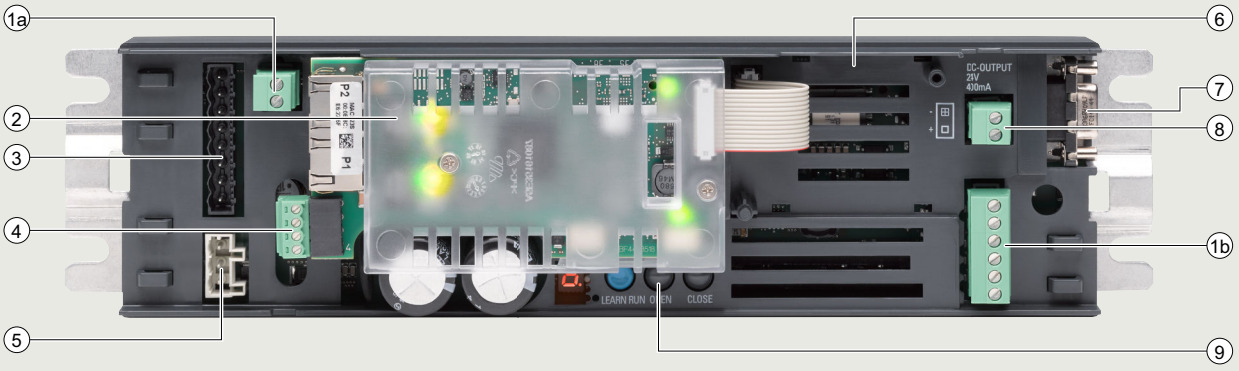
Overview

Automatic Door Control Systems for Railway Applications



The product-specific application/requirement lies in complying with the special railway requirements concerning functional safety.

Interior railway doors have a closing spring which must always bring the door into the "CLOSED" position. This applies to either side, even when a train car is inclined at 10°.

These specific operating states are handled by the door controller.

SIDOOR ATE530S/531S wiring diagram

The SIDOOR ATE53xS door controller is an "intelligent" door drive which can be used for safety-oriented operation of platform screen doors (PSD) according to individual requirements.
Siemens has once again shown just how easy integration can be with the innovative SIDOOR ATE53xS platform screen door drive in conjunction with SIDOOR MED280 or MEG251 motors.
The PROFINET module integrated in the SIDOOR ATE53xS enables standardized, certified connection to PROFINET IO systems.

- Use of standard automation components
- Full integration into TIA Portal and STEP 7 thanks to PROFINET connection
- Parameter assignment and monitoring of door control parameters via the PROFINET interface (function blocks available as example applications in SIOS).
- Application example:
  Synchronization of two-panel and independent platform screen doors with SIDOOR ATE530S PROFINET EC door drive and S7-1500 CPU via TIA Portal
- Application example:
  Safety-oriented automation of platform screen doors with SIDOOR ATE530S PROFINET EC door drive and S7-1500 CPU via TIA Portal
- Read-in of two safe signals (two-channel, antivalent)
- High level of system safety thanks to safe torque off (e.g. self-release in the event of a fault)
- Firmware update for all SIDOOR controllers on an entire platform possible centrally via TCP/IP
- SIL 2 according to IEC 62061

SIDOOR ATE530G

The SIDOOR ATE530G drive control is designed for controlling gap fillers between external train doors and the platform edge. The gap filler facilitates easy access for passengers. The innovative SIDOOR ATE530G drive solution enables operation of a gap filler with adjustable speed, acceleration and motor currents.
A project-specific motor is used depending on the application.
The SIDOOR ATE530G controller is activated by digital signals from a higher-level door control, and reports information about its current state via digital signals back to the door control.
The following drive functions are supported:

- System start-up after power failure
- "Extend", "Retract" command
- Gap filler is moved by a travel curve profile
- Obstruction detection
- Ice-breaker function
  Icing can be shifted broken by repeated extension and retraction of the gap filler with increased force.
- Reversing at the platform edge

The SIDOOR ATE530G controller fulfills Basic Integrity in accordance with EN 50657:2017

SIDOOR ATD400T interior railway door drive

The SIDOOR ATD400T interior railway door drive is an "intelligent" door drive which enables interior and gangway doors to be opened and closed at adjustable speeds and accelerations.

- Relay module design
- For dynamic door weights up to 180 kg
- Automatic door weight detection
- Operating temperature -20 to +70 °C [1)]
- Flexible motor management (two different motor types), automatic detection
- Opening width 0.25 to 4 m
- Door can be operated with and without closing springs (60 to 80 N)
- With two identical door leaves, can be used up to a train inclination of 0 to 10%
- Forces and energies are limited in accordance with EN 14752
- EMC according to EN 50121-3-2
- Fulfills HL3 according to fire protection standard EN 45545-2 (Railway applications – Fire protection on rail vehicles)
- Vandal-proof

1) Note:

- Maximum output current at 24 V DC:
  - 0.4 A at ≤ 55 °C ambient temperature during operation
  - 0.1 A from 55 °C to 70 °C ambient temperature during operation, with restrictions at operating temperatures > 55 °C
- Maximum ambient temperature during operation:
  - 55 °C
  - 70 °C with restrictions at operating temperatures > 55 °C
- Restrictions at operating temperatures > 55 °C:
  - Use the 24 V output voltage only for operating the control inputs (max. 0.1 A)
  - Use a sufficiently large (at least 350 x 350 mm), unpainted metal mounting plate
  - The maximum drive parameters are restricted to the default values
  - If temperature class T3 according to EN 50155 is used, the maximum air temperature of 85 °C must not be exceeded near the printed-circuit board

Overview

SIDOOR Software Kit

The scope of delivery of the SIDOOR Software Kit includes an installation CD.

The CD includes the following functionalities:

SIDOOR User Software	The component that enables the door control system to be configured, parameters to be assigned, and analyzed.
Siemens HCS12 Firmware Loader	This component is used to update the operating software of the door controller.
SIDOOR USB to UART Bridge Driver	This driver is essential for operation of the USB adapter.

Note:

Some firmware updates are offered as free downloads in the Siemens Industry Online Support. For information on the availability and acquisition of more firmware, please contact Technical Support.

Overview

SIDOOR motors are speed controlled, taking set force and speed limits into account. The gear outlet direction is defined as left or right when viewing the gear unit from the front. The power is transmitted by a toothed belt. The toothed belt passes over a deflector pulley and can be fitted with 2 door clutch holders. This enables it to drive both one-sided and centrally-opening doors.

SIDOOR geared motors are available in two technological versions.

- 1. DC technology in version (area of application: interior railway doors)
  - DC geared motor
    SIDOOR geared motors are a combination of gear unit, motor, and encoder. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning. The variable speed drive unit comprises a speed-controlled DC motor with non-self-locking gearing.
- 2. EC technology in version (area of application: platform screen doors)
  - EC direct drive
    SIDOOR direct drives are a combination of motor and sensor. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning. The maintenance-free drive unit consists of a gearless, speed-controlled, electronically commutated motor. The EC direct drive can be fitted in various mounting orientations, facilitating reduced inventory management and minimizing assets.
  - EC geared motors
    EC geared motors are electronically commutated DC motors with non-self-locking gearing and are speed-controlled.
    They are easy to connect to the controller via the interface provided and are automatically detected during commissioning. Due to the brushless drive technology, EC geared motors are subject to less abrasion compared with DC geared motors and thus have a longer service life. On account of the brushless drive technology, no commutation noises come from this motor, so it generates less noise than the DC geared motors.

Motors for interior railway door drives

The following **DC geared motors** are available for interior railway door drives. They should be selected according to the dynamic door weight.

- SIDOOR MDG180 geared motors, compliance with fire protection standard EN 45545-2 (max. door weight 180 kg)
  - SIDOOR MDG180 L EN 45545-2 (pinion left) 6FB1103-0AT16-4MB0
  - SIDOOR MDG180 R EN 45545-2 (pinion right) 6FB1103-0AT15-4MB0
- SIDOOR M3 geared motors (max. door weight 180 kg)
  - SIDOOR M3 L (pinion left) 6FB1103-0AT10-4MB0
  - SIDOOR M3 R (pinion right) 6FB1103-0AT11-4MB0

Motors for platform screen door drives
EC technology:

- SIDOOR MEG251 geared motors (max. door weight 250 kg)
  - SIDOOR MEG251 L (pinion left), 6FB1203-5AT00-7MP0
  - SIDOOR MEG251 R (pinion right), 6FB1203-5AT01-7MP0

Overview

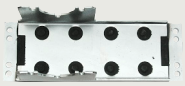
A comprehensive range of accessories is available for the SIDOOR systems. This is necessary to ensure low-noise operation of the door leaves by the controller.

Accessories for SIDOOR DC and EC geared motors



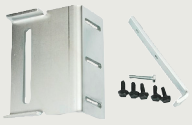
Rubber-metal anti-vibration mount

To ensure low-noise door operation, the SIDOOR geared motors are integrated in the door system using rubber-metal anti-vibration mounts.

- Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0 for SIDOOR M3 and SIDOOR MDG180 DC geared motors (also for EN 45545-2) and SIDOOR MEG251 EC geared motors (door weights up to 250 kg)
- Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0 for SIDOOR M4 DC geared motors (door weights up to 400 kg)

Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0

Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0

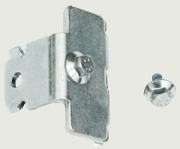


Mounting bracket

Two different mounting brackets are available with elongated holes:

- Mounting bracket 6FB1104-0AT01-0AS0 for SIDOOR M3 and SIDOOR MDG180 DC geared motors (also for EN 45545-2) and SIDOOR MEG251 EC geared motors for flexible accommodation of the rubber-bonded metal.
- Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit, this enables the toothed belt to be set to the required belt tension.

Mounting bracket 6FB1104-0AT01-0AS0 for mounting the geared motor

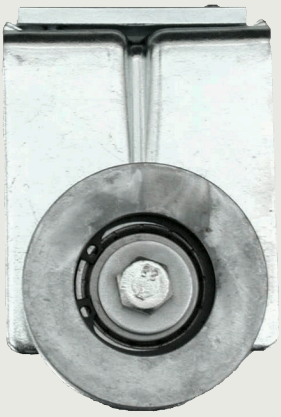


Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit

Door clutch holder

The door clutch holder 6FB1104-0AT01-0CP0 serves to connect the respective door leaf by means of a toothed belt while also functioning as a toothed-belt lock. One door clutch holder per door leaf is required. The toothed-belt lock can accommodate both open ends of the toothed belt.

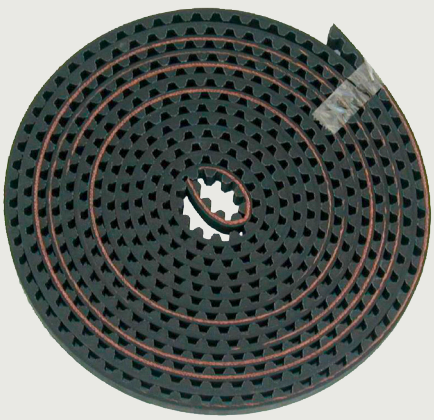
Overview (continued)



Door clutch holder 6FB1104-0AT01-0CP0 (packaging size = 1 unit)

Deflector unit

The deflector unit 6FB1104-0AT03-0AS0 contains an embedded belt pulley which can be mounted on the door system.



The STS toothed belt is redirected via this deflector unit.

Overview

SIMATIC HMI operator control and monitoring systems – excellent operator control and monitoring

The right solution for every visualization task – for machine manufacturers, integrators, and end users:
For greater transparency in machines – all the way to the controller and monitoring of entire plants.
SIMATIC HMI (Human Machine Interface) enables seamless industrial visualization solutions for monitoring machines and plants. It offers maximum efficiency in engineering and comprehensive control options – with brilliant displays or powerful, PC-based solutions.
Due to increasing digitalization, solutions such as SIMATIC HMI are crucial for mastering complex environments.

Advantages:

- Efficient engineering – The integration into the Totally Integrated Automation Portal (TIA Portal) permits full access to the entire digital automation – from digital planning to integrated engineering, all the way to transparent operation.
- Devices for all environments – Robust SIMATIC HMI Panels and industry PCs meet all requirements for harsh environments in a wide range of industries.
- Scalable HMI solutions – HMI solutions ranging from small machine-level solutions to plant-wide SCADA systems, which can be individually customized due to open interfaces.
- Equipped for the future – The combination of state-of-the-art technologies and powerful systems enables the implementation of increasingly complex processes and reliable fulfillment of growing requirements – while protecting your investments.

General information on SIMATIC HMI is available at this link
General information on SIMATIC SCADA systems is available at this link

SIMATIC HMI software – a lot more than just visualization software

With the SIMATIC WinCC Unified (TIA Portal), SIMATIC WinCC V8 and SIMATIC WinCC Open Architecture product families, SIMATIC HMI covers the entire engineering and visualization software spectrum for the human machine interface.

- SIMATIC WinCC Unified (TIA Portal) is the most innovative HMI system, universally applicable, from Panel to Edge to PC-based applications. The functionality covers both visualization tasks at machine level and SCADA applications on PC-based multi-user systems,

More information on WinCC Unified is available at this link

- SIMATIC WinCC V8, leading in the manufacturing industry, is the proven SCADA system for complex requirements, e.g. distributed or redundant systems and IT/OT integration.

More information on WinCC V8 is available at this link

- SIMATIC WinCC Open Architecture, leading in infrastructure applications, addresses applications with high customer-specific adaptation requirements.

More information on WinCC Open Architecture is available at this link

SIMATIC HMI – brilliant and rugged HMI devices for all applications

- SIMATIC HMI Key Panels
  Preassembled and ready for installation, for conventional operator panels.

More information on Key Panels is available at this link

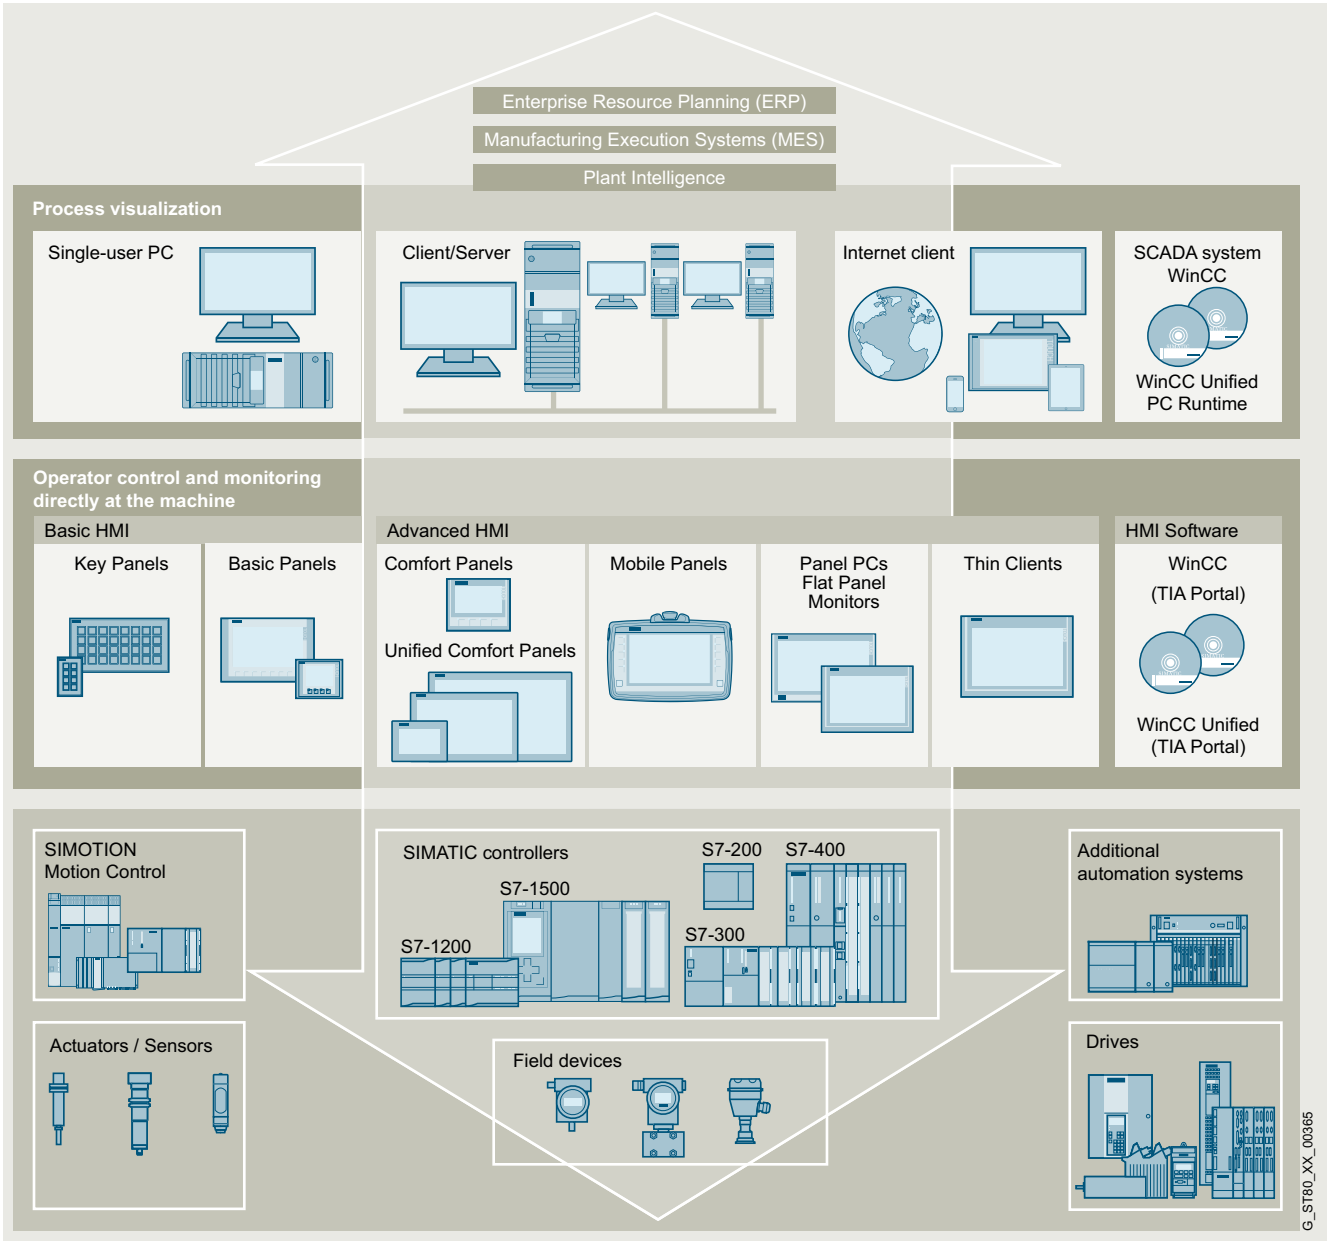
- SIMATIC HMI Unified Panels
  SIMATIC HMI Unified Basic Panels are a cost-effective entry-level solution and are the new standard in the basic segment of machine visualization.
  Also available as SIPLUS variant for extreme ambient conditions.
- SIMATIC HMI Unified Comfort Panels are the high-end panels for maximum machine transparency and more flexibility in the field of application, even under special ambient conditions (PRO, Hygienic and SIPLUS).

More information on Unified Panels is available at this link

- Mobile Panels
  Portable HMI devices for mobile deployment on site.

More information on Mobile Panels is available at this link

- SIMATIC HMI Industrial Web Panels - Thanks to their capacitive glass front with multi-touch technology, the Industrial Web Panels are as convenient to use as a smartphone or tablet. The sharp colors and high contrast improve readability and user-friendliness. You operate your customized HTML 5 web application on a SIMATIC IPC, an Open Controller or Unified Runtime via the integrated browser.



More information is available at this link

Individual HMI devices in customized versions

More information is available at this link

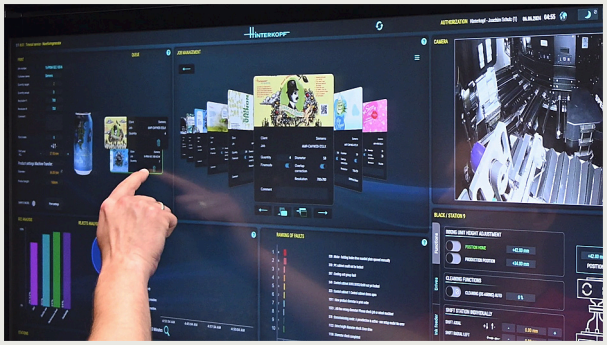
© Siemens AG 2026

Overview (continued)

Taking usability to the next level

One swipe, one tap, and the user can immediately see what the selected design looks like on the beverage can. A quick check, and the process is ready to start. Thanks to innovative user guidance, the machine data is so transparent that the complex printing process can be controlled completely intuitively.

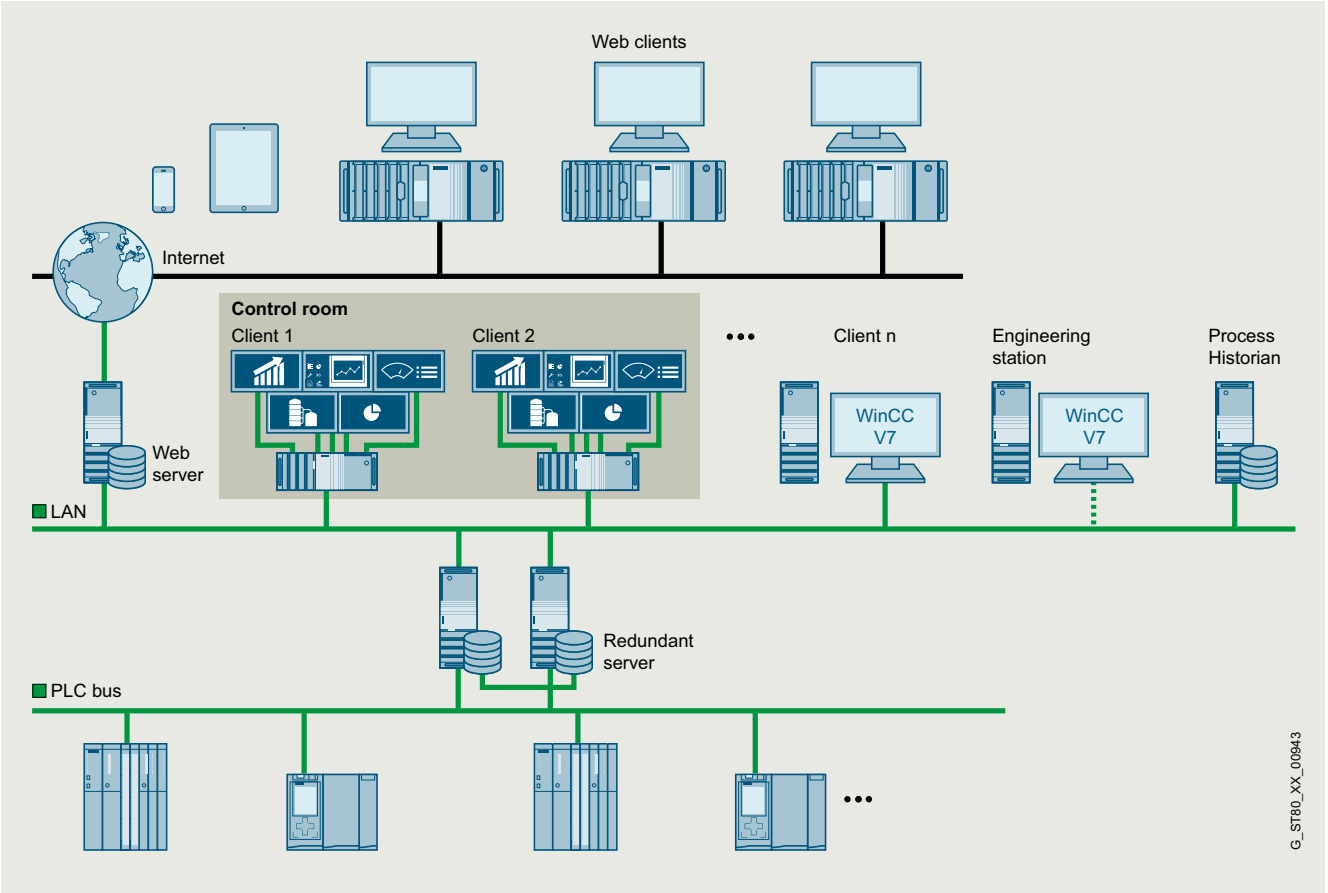
Advantages of the solution consisting of SIMATIC WinCC Unified and SIMATIC IPC:



- Efficient engineering and a high degree of openness
- Modern, intuitive user interface as a sales argument and image factor
- Simplified service, shorter downtimes, less remote support

Innovative usability with web technologies at Hinterkopf - Siemens DE

Control system optimizes the productivity of a hot dip galvanizing plant



© Siemens AG 2026

Overview (continued)

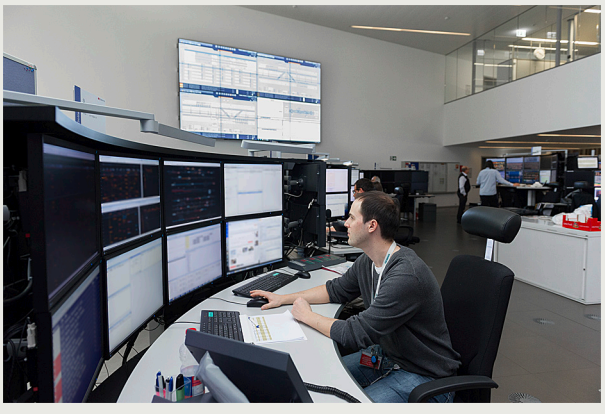
As semi-finished products, galvanized steel sheets play a key role in industrial production, such as car manufacturing. One proven method of protecting steel sheets from rust is the application of a zinc coating in a hot dip galvanizing process, in which strips of sheet steel are drawn through a bath containing liquid zinc. Plants for this process are complex and in continuous operation, thus placing high demands on the process control system and the hardware used. Advantages of the SIMATIC SCADA system and SIMATIC IPC solution:

- SIMATIC WinCC V7/V8 SCADA control system whose scalability and openness also permits the implementation of future function extensions.
- Redundant setup of the control system and operating stations with industry-compatible SIMATIC industrial PCs and Thin Clients.
- Optimum overview thanks to multi-monitor solution in the control room and more than 27 operating stations throughout the plant and production hall.
- Availability of the production data over a long period in SIMATIC Process Historian for reasons of traceability.
- Increased productivity using long-term analyses of plant availability, productivity, energy consumption and quality.
- More effective support and shorter downtimes thanks to fast, web-based access to plants with the SIMATIC WinCC WebNavigator.

© Siemens AG 2026

Overview (continued)

Modernization of a plant in the food and beverage industry on the basis of an integrated automation and visualization solution



The modernization involved equipping 3 production lines with an expanded SCADA control system, a new control architecture, converters and motor starters. The project was implemented smoothly, and the integrated hardware and software solution with the TIA Portal enabled the simplification of the engineering process.

Advantages of the solution with the SIMATIC SCADA system WinCC Professional in the TIA Portal, S7-1500 and SIMATIC IPC:

- Simplified application engineering
- Efficient monitoring of the production lines enables the optimal path through the production to be defined for each batch.
- Increased productivity
- Simple and intuitive operation implemented thanks to good visual support
- Better control of the motors involved with the process
- Integration of the production data into the existing ERP system
- Faults in the current process can be easily localized

Tunnel control system for the longest railway tunnel in the world

The heart of the monitoring of the entire tunnel infrastructure is the IT/OT and SCADA system WinCC Open Architecture, which is used here as the tunnel control system SIMATIC WinCC Open Architecture. Continuous availability of the entire system is essential to ensure the trouble-free operation of the Gotthard Base Tunnel.

The Gotthard Base Tunnel has a tunnel control center at the south and north portals. The two tunnel control systems installed there monitor and control all of the installed systems and plants. All the required data are acquired, collated and visualized on the tunnel control system. A fully integrated maintenance management tool and an operations control system are also part of the tunnel control system with a large screen display.

The advantages of the solution:

- Highest fail-safety thanks to the presence of doubly redundant tunnel control equipment – Disaster Recovery System (2x2 redundancy)
- Central monitoring of the infrastructure simplifies fault management
- More efficient operation through central control of the entire infrastructure
- Integration of many (sub-)systems thanks to OPC UA as a standardized interface throughout the entire project
- Optimal user friendliness through uniform user interface across all plants, overview of all systems at one work station as well as large screen display (multi-monitor management)

© Siemens AG 2026

Overview

SIMATIC Industrial PC

Due to their scalable portfolio, SIMATIC Industrial PCs can be used in a wide range of industrial applications.

Rack PC

Rack PCs are flexible, high-availability industrial PC systems for powerful yet compact applications using 19" technology.

Box PC

SIMATIC Box PCs provide mechanical engineers, plant engineers and control cabinet builders with particularly rugged industrial PC systems for use in powerful yet compact applications.

Panel PC

SIMATIC Panel PCs are suitable thanks to their high industrial compatibility for use in control cabinets, consoles and control panels, as well as directly on the machine. Typical areas of application can be found in both factory and process automation.

Mobile devices

SIMATIC industrial mobile devices open up new areas of application in the context of Industry 4.0. Designed for industrial use, they can impress with their many functions in everyday work. Typical areas of application are in maintenance/service, production, measurement and testing technology, and in local engineering and commissioning.

Industrial monitors

Flexible operating concepts can be implemented with SIMATIC industrial monitors. They are industrial-grade LCD monitors with brilliant displays set apart from the PC.

Devices for special requirements

Selected SIMATIC IPCs are available as fully-enclosed devices (PRO devices) and are ideal for industrial applications in harsh environments due to their extremely rugged design. They are, for example, specially designed for mounting on a support arm/pedestal. As industry-specific versions, selected SIMATIC IPCs also offer variants with stainless steel fronts (HYG devices), e.g. for the food, beverages and tobacco industries.

SIMATIC IPC Software

A graded concept is available for effective early detection of potential failures and minimization of actual downtimes. It consists of hardware and software components especially developed for SIMATIC IPC, which can be used to increase availability on a system-specific basis, depending on safety requirements. In addition, software packages are offered for many SIMATIC IPCs that, when ordered, produce genuine price advantages.

© Siemens AG 2026

Overview

Distributed Control System SIMATIC PCS 7:
Room for new perspectives

In process engineering plants, the process control system is the starting point for optimal value added: All procedures and processes can be operated, monitored and influenced with the process control system.

The more powerful the process control system, the more effectively this potential can be used. For this reason, performance is in the foreground with SIMATIC PCS 7, alongside scalability, flexibility, and integration. Starting with planning and engineering, the process control system offers powerful tools, functions and features for cost-effective and efficient plant operation through all phases of the plant life cycle.

Performance through integration

Integration is one of the special strengths of SIMATIC PCS 7. This has many aspects:

- Horizontal integration into TIA
- Vertical integration into hierarchical communication
- System-integrated tools for engineering tasks
- Integration of the field level, including drives, switchgear, etc.
- Integrated functions, e.g. for batch process automation, route control, process safety, energy management, telecontrol tasks, etc.

Horizontal integration

A system for integrated automation of the entire process chain, from incoming raw materials to outgoing goods – this is one of the decisive advantages resulting from the seamless integration of SIMATIC PCS 7 into Totally Integrated Automation.

The process control system is mainly responsible for automating the primary processes here, but it can do much more: All auxiliary facilities, as well as the electrical infrastructure in the form of low-voltage or medium-voltage switchgear and the building management system, can also be integrated into the system.

Integration of selected SIMATIC standard components – automation systems, industrial PCs, network components, or distributed process I/O – into the process control system guarantees optimum

Overview (continued)

interaction of individual components, and secures economic benefits such as simple selection, reduced stock keeping, and global support.

Vertical integration

The hierarchal communication of a company encompasses the field level, the control level, and the process level, up to management and enterprise resource planning (ERP). Thanks to standardized interfaces – based on international industry standards as well as internal interfaces – SIMATIC PCS 7 is able to provide process data for analysis, planning, coordination, and optimization of plant sequences or production and business processes – in real time, and at any location in the company.

Central engineering

SIMATIC PCS 7 convinces with graded functional diversity, consistent operator control philosophy, and uniformly structured engineering and management tools. A central engineering system with a coordinated range of tools for integrated system engineering and configuring of batch automation, safety functions, material transport or telecontrol systems creates value added over the entire life cycle. Reductions in configuring and training costs result in minimization of total cost of ownership (TCO) over the entire plant life cycle.

Functional diversity

Depending on the typical process automation or customer-specific requirements, SIMATIC PCS 7 can be functionally expanded for the following, for example:

- Batch process automation (SIMATIC BATCH)
- Functional safety and protection functions (Safety Integrated for Process Automation)
- Route control for material transport (SIMATIC Route Control)
- Telecontrol of remote units (SIMATIC PCS 7 TeleControl)
- Automation of electrical switchgear (SIMATIC PCS 7 PowerControl)

Custom automation

The unique scalable system architecture makes SIMATIC PCS 7 the ideal basis for cost-effective implementation of individual automation solutions and a cost effective operation of process plants.

SIMATIC PCS 7 users receive sustainable benefits from the modular system platform, based on SIMATIC standard components. Its uniformity enables flexible scaling of hardware and software, as well as perfect interaction, both within the system and beyond system limits. The architecture of the process control system SIMATIC PCS 7 is designed in such a way that the control technology can be used for the project planning according to the customer's requirements, optimally adapted to the dimensions of the plant. The control technology allows retrofit or reconfiguration for capacity expansion or technological changes at any time. If the plant grows, then SIMATIC PCS 7 simply grows along with it – making expensive reserve capacities unnecessary!

Use the opportunities offered by the object-oriented type and instance concept of SIMATIC PCS 7. The technological connections, variant formation and bidirectional comparison of the types with the instances make the control module types (CMT) even more powerful compared to the original function block templates. The technological connections of a Control Module such as parameters, signals or messages can be provided with attributes and used via drag and drop, e.g. on an SFC plan. In turn, options and variants can be used to extend the core function of the CMT with specific

© Siemens AG 2026

Overview (continued)

modules or functions, which can be activated individually for each instance. This minimizes the number of types required and thus reduces the effort for maintenance and service. For the technological content of the CM types, the future-oriented Adanced Process Library (APL) is included in the standard of SIMATIC PCS 7. Another major advantage resulting from the comprehensive type and instance concept is the seamless integration into other tools like SIMATIC PCS 7 Plant Automation Accelerator or SIMIT.

Flexibility and performance in engineering

The workflow in the engineering of process plants is and remains a challenge: Numerous participants, many different data formats and multiple interfaces frequently result in transmission errors and system discontinuity and thus in greater time input and costs. Information generally gets lost or needs to be corrected manually when data is exchanged between multiple disciplines.

For the first time, a fully integrated solution is now available for planning and documenting plant projects: the SIMATIC PCS 7 Plant Automation Accelerator. Customers benefit in particular from consistent engineering without system discontinuities between automation planning and the control system.

The object-oriented approach of the SIMATIC PCS 7 Plant Automation Accelerator makes it possible to work on a central data platform, thus ensuring completely integrated planning – from plant engineering through to automation – based on an electronic workflow. This workflow ranges from planning, the preparation of bids – including bills of material – and the automatic generation of control data from the electrical plans of the SIMATIC PCS 7 process control system, through to controlled mass data engineering and direct as-is documentation of the plant.

This modular engineering approach enhances overall project efficiency and minimizes risks. A high level of standardization and simple configuration additionally save engineering time and costs during the implementation phase. Simple synchronization between planning and engineering avoids duplicate input and interface losses and reduces project runtimes.

Flexibility in operation

Process control also becomes more complex due to the multi-layer nature of automation engineering and the increased merging with information technology. Intuitive and fault-free operation is therefore more important than ever with regard to efficient working and the minimization of downtimes and servicing requirements. Using effective Advanced Process Control (APC) functions and an excellent operator system, SIMATIC PCS 7 supports optimization as well as user-friendly and safe control of the process. Monitoring of product quality and performance indicators additionally allows the process to be operated more economically. At the same time, SIMATIC PCS 7 convinces with high flexibility, plant availability, and investment security.

Process control and maintenance

SIMATIC PCS 7's operator system is used to monitor process operation using various views, and permits interventions when necessary. Its architecture is flexible and scalable – from single-user systems up to multi-user systems with a redundant client/server architecture. The operator interface takes account of the current specifications of NAMUR (user association of automation technology in the process industries) and PI (Profibus International) and offers a high level of user-friendliness for simple, intuitive interaction with the plant. Ergonomic symbols, task-oriented faceplates, uniform representation of status information, and optimized alarm functions allow safe process control.

The alarm management function integrated in SIMATIC PCS 7 is able to focus on essential alarms and to specifically guide the operator in exceptional circumstances. In this way, it systematically reduces the workload of operating staff.

Preventive and predictive maintenance strategies reduce total cost of ownership. With the SIMATIC PCS 7 Maintenance Station, maintenance personnel always have a watchful eye on critical production equipment such as pumps, valves, distillation columns or motors, and can carry out the relevant maintenance measures in good time before servicing is required – independent of the maintenance plan and without the risk of an unplanned plant standstill.

Process optimization

SIMATIC PCS 7 supports process optimization in many different manners, including:

- Control Performance Monitoring
- Advanced Process Control
- Process Historian

The Control Performance Monitoring function monitors and signals the control quality of the closed-loop control block. If the performance declines, the controller can be optimized in good time or specific maintenance measures can be initiated.

The integrated I&C libraries of SIMATIC PCS 7 also provide higher quality closed-loop control functions with which cost-effective Advanced Process Control applications can be implemented: multi-variable control, predictive control, or override control. It is thus possible to effectively improve profitability, product quality, and safety in in small and medium-sized plants.

Current and historic process data form the basis of all optimization. Secure and user-friendly real-time data storage and analysis is handled using the Process Historian. The process values, messages, and batch data managed in the database of the Process Historian can be called extremely rapidly. User-specific processing and visualization of this historic data are supported by the information server, which is a reporting system based on the Microsoft Reporting Services.

SIMATIC PCS 7 system and technology components

With the rugged, high-performance SIMATIC PCS 7 system components from Catalog ST PCS 7, you already have a versatile platform for cost-effective implementation and economical operation of your process control systems. Perfect interplay of these system components makes it possible for you to sustain high-quality production and to establish new products significantly faster on the market.

With SIMATIC PCS 7 technology components from Catalog ST PCS 7 T that can be seamlessly integrated into the process control system, you can expand the functional scope of the system components in a carefully targeted manner for specific automation tasks.

This covers a wide spectrum, for example:

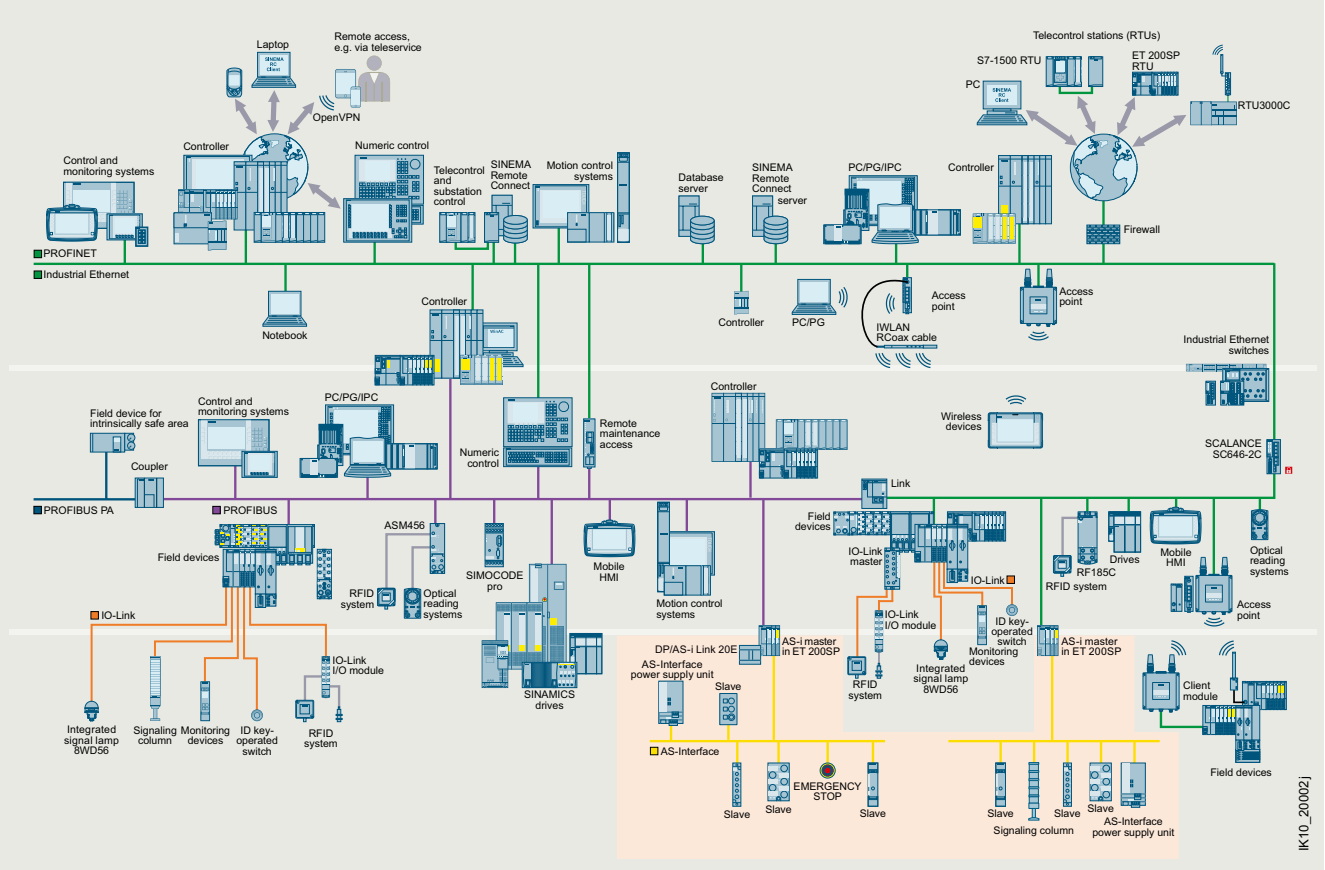
- Telecontrol for monitoring and controlling remote plant units
- Automation technology for electrical low-voltage or medium-voltage switchgear
- Industry-specific automation systems for the cement and mining industries, as well as for laboratory and training facilities
- Graphical objects for task-oriented optimization of process visualization
- Block libraries for technological functions, package unit and panel integration, monitoring and analyzing mechanical assets, as well as for building automation systems (heating, ventilation, air-conditioning – FMCS/HVAC)
- Editors and function blocks for the efficient configuration of small or medium-sized automation systems with simple parameter control and materials management

© Siemens AG 2026

Overview (continued)

- Process analytical technology for quality assurance through optimization of development and production processes based on up-to-date measurements, and critical quality and performance attributes
- Simulation system for testing and commissioning of plant-specific application software
- Flexible, high-performance Manufacturing Execution System (MES)
- System expansion for operator systems for the integration of third-party controllers, programmable logic controllers and package units
- Products for migration of the process control systems TELEPERM M, APACS+/QUADLOG or Bailey INFI 90/ NET 90 with SIMATIC PCS 7

Additional functionality can be integrated using add-on products



Modularity, flexibility, scalability, and the openness of SIMATIC PCS 7 offer optimal prerequisites for integrating supplementary components and solutions in the process control system in an applicative manner and thus extend and round off its functionality.

Many supplementary add-on products for SIMATIC PCS 7 have been developed by Siemens as well as by external partners (see Catalog ST PCS 7 AO, Add-ons for the SIMATIC PCS 7 Process Control System). These software packages and hardware components authorized by the system manufacturer enable cost-effective implementation of SIMATIC PCS 7 for special automation tasks.

© Siemens AG 2026

Overview

Industrial communication – the backbone of automation

Powerful and open communication systems ensure trouble-free communication for automation systems, covering

- data communication or
- process or field communication.

Openness and flexibility of the individual communication systems in different topologies enable linking of a wide variety of systems and their subsequent expansions. By using standardized communication systems, it is possible to connect standardized components from different suppliers without any problems. This ensures maximum protection of investment, as existing networks can be extended without any adverse effects.

© Siemens AG 2026

Overview (continued)

In the area of industrial communication, Siemens provides components for an integrated overall solution beyond the network's limits.

These include:

- Passive network components, e.g. FastConnect cabling systems
- Active network components, e.g. SCALANCE X Industrial Ethernet switches as well as RUGGEDCOM devices for harsh ambient conditions.
- Interfaces for connecting programmable controllers to the communication systems:
  - Integrated interfaces
  - Communications processors
- Components for wireless networks, e.g. Industrial Wireless for private 5G networks as well as 5G routersLAN, SCALANCE W Access Points, and Client Modules for private 5G networks as well as 5G routers
- Components for industrial security, e.g. network security with Industrial Security Appliances SCALANCE S
- Remote monitoring and control with solutions for both telecontrol systems and units.
- Simple remote access for TeleService and remote maintenance with SCALANCE M and SINEMA Remote Connect
- Network transitions, e.g. IE/PB LINK PN IO
- Components for AS interface
- SINEC software family for efficient network management

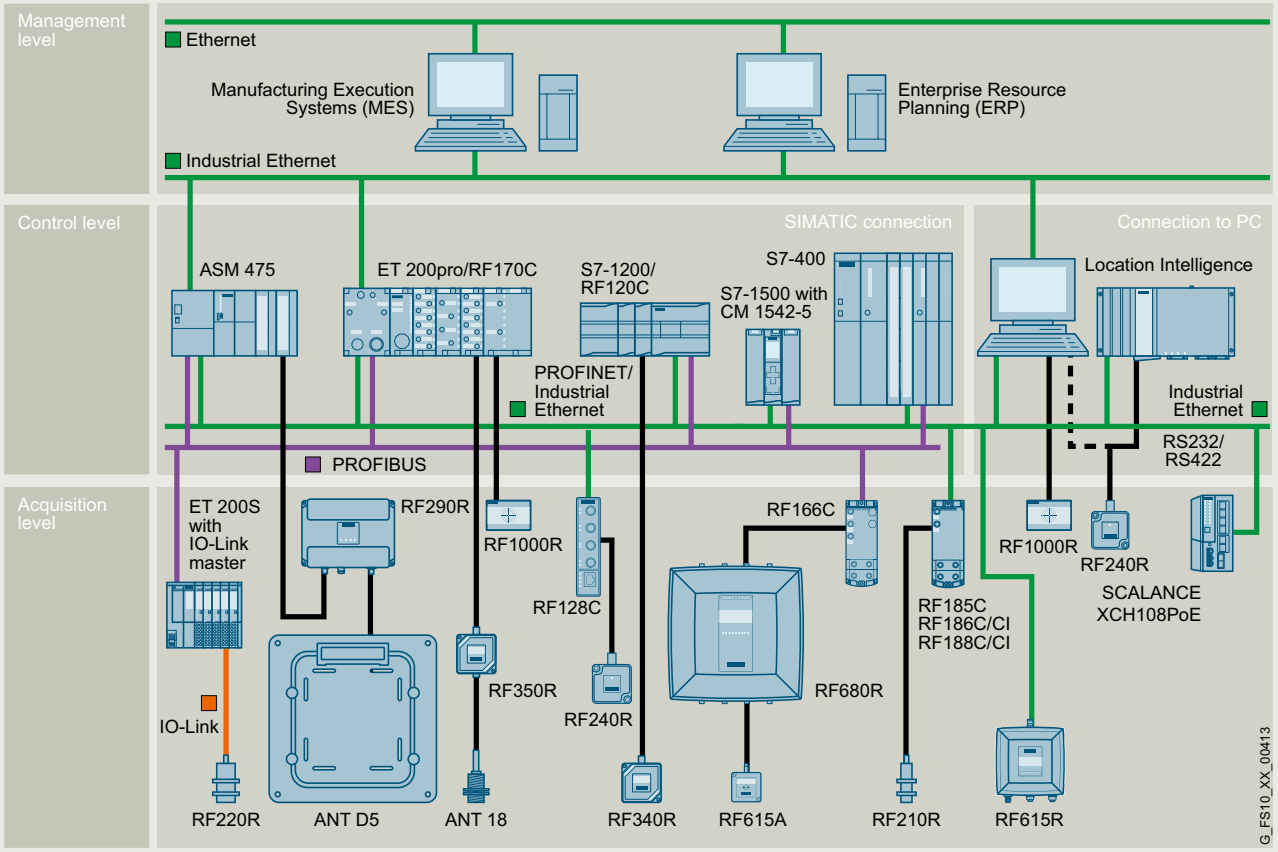
Overview



SIMATIC Ident and Location Intelligence for cross-company data intelligence

Industrial processes in the digital enterprise require full transparency and a high degree of customization. Our solutions close the gap between the real and the digital world – and thus open up new added value potential throughout the production and supply chain.

Already today, we offer the industry of tomorrow a unique, comprehensive, and end-to-end portfolio of RFID-based identification solutions as well as intelligent software for capturing, processing, and analyzing production and process data. With Location Intelligence, SIMATIC Ident creates end-to-end transparency regarding status, movements, and process flows, enabling well-founded, data-driven optimization of quality, efficiency, and process reliability. Connectivity to TIA enables the seamless integration of products into automation solutions. Integration into existing IT and cloud applications ensures maximum flexibility and future-proofs manufacturing. Plant availability, utilization rates, and optimization potentials are made transparent, forming the basis for faster decision-making and continuous improvement—for enhanced competitiveness and a flexible future.

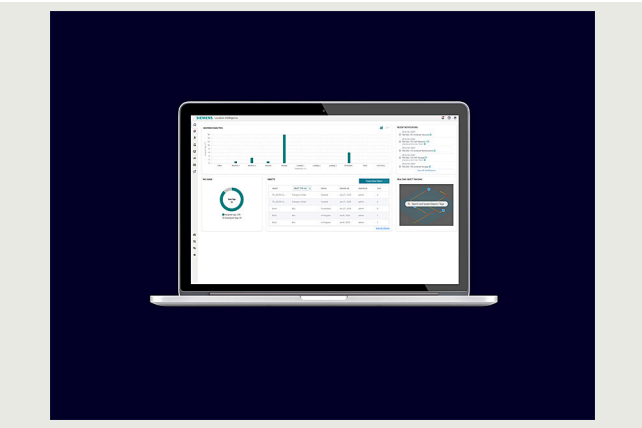
Overview



RFID systems

Openness and flexibility of the individual communication systems in different topologies enable linking of a wide variety of systems and their subsequent expansions. By using standardized communication systems, it is possible to connect standardized components from different suppliers without any problems. This ensures maximum protection of investment, as existing networks can be extended without any adverse effects.

Line of sight between the write/read device and the transponder is not necessary. Rugged, compact readers in a high degree of protection with either integrated or external antennas are available for interference-free data communication. Cost-efficient, maintenance-free, passive labels and passive transponders in various designs and with various memory capacities are likewise available, as are powerful antennas.

Location Intelligence

The web-based software Location Intelligence provides real-time transparency into production and logistics processes. By transforming real-time data into actionable insights, it helps identify bottlenecks, optimize material flow, and improve operational decisions. Manufacturers benefit from higher throughput, faster response times, reduced search effort, and reliable, data-driven workflows that increase the efficiency and competitiveness of the entire plant.

Overview (continued)

SINAMICS V20 – the perfect solution for basic applications

- Power range from 0.12 kW to 30 kW
- Voltage:
  - 230 V 1 AC: 200 V to 240 V 1 AC (-15 % to +10 %)
  - 400 V 3 AC: 380 V to 480 V 3 AC (-15 % to +10 %)
- Integrated USS and Modbus RTU interfaces
- Integrated braking module for all 400 V 3 AC versions
- Parameter readout and cloning without power supply
- Integrated connection and application macros
- ECO mode for *U*/*f*, U^2/f
- Integrated hibernation mode in idle state
- Wireless commissioning, operation and diagnostics via mobile device or laptop thanks to optional SINAMICS V20 Smart Access web server module
- Expansion of 400 V converters with two digital inputs and two digital outputs (relay outputs) thanks to optional SINAMICS V20 I/O Extension Module

SINAMICS G220 – the variable frequency converter for all industries

SINAMICS G220 is the new high-performance variable frequency converter designed to meet current and future challenges in every industry. Thanks to improved hardware and software, SINAMICS G220 takes digital drive technology to a new level, making applications more efficient, secure and future-proof.

SINAMICS G120X – the infrastructure converter for HVAC/water/wastewater

- Power range from 0.75 kW to 630 kW
- The specialist for pump, fan and compressor applications
- Thanks to the integrated DC link reactor with a maximum output of 250 kW and optional resistance to harmful gases up to environmental class 3C3, the rugged and dependable design ensures reliable, stable and largely robust operation.
- Variety of functions relevant for pumps, fans and compressors, e.g. deragging or pipe fill mode, automatic restart, flying restart, flux reduction, cascade connection, hibernation mode and real-time clock
- Functions especially for building technology as well as heating/air conditioning/ventilation applications, e.g. four integrated PID controllers, essential service mode, bypass mode and programmable time switches

SINAMICS G120C – the compact and versatile frequency converter with optimum functionality

- Compact unit
- Highest power density in its class
- Power range from 0.55 kW to 132 kW
- Easy commissioning and maintenance
- With BOP-2 or IOP-2 operator panel
- Safety Integrated: STO
- Available communication: PROFIBUS DP, USS, Modbus RTU, PROFINET, EtherNet/IP
- Wireless commissioning, operation and diagnostics via mobile device or laptop thanks to optional SINAMICS G120 Smart Access web server module
- Integrated in the TIA Portal with SINAMICS Startdrive

SINAMICS G115D – the distributed drive system

The SINAMICS G115D distributed drive system meets all the requirements that system manufacturers place on drives for applications in conveyor technology with a focus on the intralogistics and airport industries as well as for simple, horizontal applications in the automotive and food and beverage industries. The converter is supplied with degree of protection up to IP66 and sets standards in terms of efficiency – from the installation phase to commissioning

SINAMICS G120D – the distributed single drive for high-performance solutions

- Positioning capability
- Power range from 0.75 kW to 7.5 kW
- Energy-efficient due to regenerative feedback and low line harmonic distortion
- Safety Integrated: STO, SS1, SDI, SSM and SLS encoderless
- Thanks to the modular design, electronics stocks are minimal
- Interchangeable memory card
- Communication via PROFIBUS DP, PROFINET, EtherNet/IP
- Integrated in the TIA Portal with SINAMICS Startdrive

SINAMICS G130/SINAMICS G150 – the universal frequency converters for high-performance single drives

- Available as a standardized control cabinet or built-in units
- Output range from 75 kW to 800 kW or 2700 kW with parallel switching
- Specially for drives with quadratic and constant load characteristics, medium performance requirements, but no regenerative feedback capability
- Service-friendly thanks to easy-to-access device modules
- Communication via PROFIBUS DP, PROFINET, EtherNet/IP
- Sensorless vector control
- Safety Integrated: STO, SBC, SS1 with SBR/SAM, SS2, SLS, SOS, SSM, SDI, SLA, SBT
- Simple commissioning and parameterization via the AOP30 Advanced Operator Panel or PC-supported using the STARTER and SINAMICS Startdrive commissioning tools

SINAMICS S200 – the single axis AC/AC servo drive system in standard servo motion market

Example: SINAMICS S200 servo drive system consisting of a SINAMICS S200 servo converter, 200 ... 240 V 1 AC / 3 AC, PROFINET, frame size FSB, a SIMOTICS S-1FL2 servomotor, shaft height 30, metal hybrid connector, outlet direction drive end (DE) and MOTION-CONNECT 350 dual cables for power and communication

The SINAMICS S200 servo drive system is a single axis AC/AC servo drive system with compact design, high dynamic performance, ease of use and high reliability for motion control applications in standard servo motion market. It comprises SINAMICS S200 servo converters, SIMOTICS S-1FL2 servomotors, MOTION-CONNECT 350 and 380 connection systems and engineering tools.

System components

SINAMICS S200 servo converters

The SINAMICS S200 servo converters consist of a basic version and a standard version with pulse train input position control (PTI) or PROFINET RT/IRT (PN) to meet various needs of applications and work perfectly together with SIMATIC controllers.

- SINAMICS S200 Basic servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC
- SINAMICS S200 servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC and 0.2 to 7 kW at 380 ... 480 V 3 AC

SIMOTICS S-1FL2 servomotors

With flexible encoder options, including absolute encoders 17-bit singleturn, 21-bit singleturn and 21-bit singleturn + 12-bit multiturn, the system provides precise and accurate performance. The encoders can be used without a battery, making it easy to operate and maintenance.

- Low Inertia for high dynamic performance
- Medium Inertia for dynamic and smooth operational performance
- High Inertia for smooth operational performance

MOTION-CONNECT 350 and 380 connection systems

The cables are available in lengths of up to 30 m and one step further optimized in easy and secure installation with "one-push-lock" motor connecting solution for motor shaft heights 20, 30 and 40.

- MOTION-CONNECT 350 cables, which provide a connection solution for fixed installation applications
- MOTION-CONNECT 380 cables, which provide a connection solution for drag chain installation applications that require a high number of bending cycles

SINAMICS S210 – the single-axis servo drive for highly dynamic applications

The servo drive system comprises a SINAMICS S210 servo converter, a SIMOTICS S-1FK2, S-1FT2 or S-1FS2 servomotor and a matching One Cable Connection (OCC) for connecting the motor to the converter. SINAMICS S210 is a single-axis AC/AC servo converter system with high performance and dynamic response for mid-range Motion Control applications.

SINAMICS S210 servo converters are available for the following line voltages:

- 200 V to 240 V 1 AC (1 AC series)
- 200 V to 480 V 3 AC (3 AC series)

The high performance of the SINAMICS S210 servo drive system in conjunction with the SIMOTICS S-1FK2, S-1FT2 or S-1FS2 servomotor derives from the following features:

- Low moment of inertia and high overload capability of the motor
- High-resolution encoder with fast scanning
- Current controller clock cycle of 62.5 µs and a pulse frequency of 8 kHz of the servo converter

This enables short cycle times on the machine even with complex motion control.

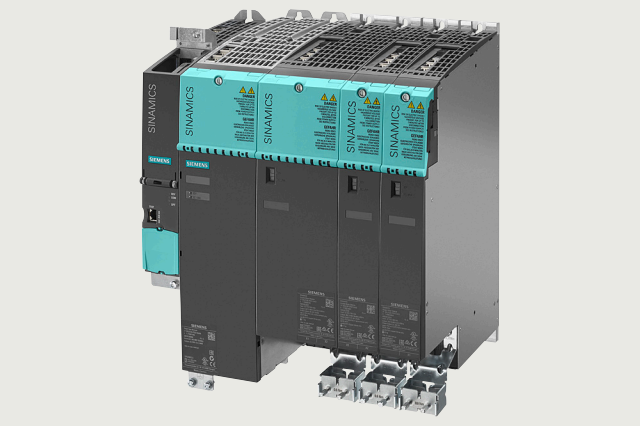
Overview (continued)

SINAMICS S220 – precise drive technology for modern automation



The SINAMICS S220 is a modular drive system for applications with high demands on precision, performance and integration in automation environments. The compact design, diverse module types and extensive digital functions enable flexible applications in different industrial sectors. Digital services such as simulation, condition monitoring and predictive maintenance support efficient project processes and high system availability.

- High power density with reduced space requirements
- Precise motion control with advanced safety features
- Modern system architecture for optimal connectivity and future expansions

- Internet:
  http://www.siemens.com/sinamics-s220

SINAMICS S120 – the flexible, modular drive system for demanding single-axis and multi-axis applications from the low-end to the high-end performance range

- Modular drive system for single-axis and multi-axis applications in all areas of machine and plant manufacturing
- Servo/vector control, U/f control
- Power range from 0.55 kW to 5700 kW
- Various types of construction for different application areas
- Highly flexible due to, for example, modular system architecture, different cooling methods, support for a wide range of motors/encoders, easy expansion
- High degree of scalability with regard to performance, number of axes, functionality
- Integrated safety functions
- Comprehensive motion control functionality
- High availability and efficiency, even in unstable networks
- Automatic parameterization and easy drive commissioning/optimization

Overview (continued)

SINAMICS S150 – the sophisticated drive solution for single drives in the medium to top performance ranges

- Particularly suitable for applications with high requirements regarding precision and dynamic response in the mid to upper performance range, as well as for frequent braking cycles with high braking energies and four-quadrant operation
- Ready-to-operate control cabinet
- Power range from 75 kW to 1200 kW
- Straightforward configuring and commissioning provided by the SIZER, SINAMICS Startdrive and STARTER engineering tools
- High availability and efficiency, even in unstable networks
- Line-friendly operation thanks to Clean Power Filter (line feedback < 1 %)
- Reactive power compensation possible
- Equipped as standard with PROFINET or PROFIBUS DP interface for connection to higher-level controls

SINAMICS DCP – the compact DC-DC Converter for industrial applications

With the SINAMICS DCP (DC Power Converter), Siemens extends its portfolio of Compact DC-DC Converters.

In these, Siemens is combining its expertise in DC technology with the advantages of the well-proven SINAMICS family. SINAMICS DCP is setting new standards when it comes to quality, reliability and technical functionality.

The SINAMICS DCP is suitable for industrial drive train applications. As a bidirectional boost and buck converter on both sides with scalable power rating, it combines multiple functions in one single device. With variable voltage levels, current can flow in both directions. This makes the SINAMICS DCP ideal for charging and discharging batteries and supercapacitors.

The high internal switching frequency makes a compact design and low weight possible. As a result, it can be installed in electrical cabinets in a space-saving way.

PROFIBUS is used as the standard communications interface. Optionally, either PROFINET, EtherNet/IP or Modbus TCP can be retrofitted as an additional interface via the CBE20 interface card. The BOP20 Basic Operator Panel is available for status displays and local operator control.

Special features

- Bidirectional boost and buck converter in one unit (on both sides of the device)
- High efficiency
- High switching frequency
- Compact: The reactor, power unit and control station form one unit
- Temperature-controlled fans (only for DCP 120 kW/DCP 250 kW)
- Battery charging characteristic
- Communications interfaces: PROFIBUS (standard), optional EtherNet/IP or Modbus TCP

The functionality can be expanded with other SINAMICS components such as Active Line Modules.

Software feature

- Voltage and current regulation
- 3 overload profiles
- Stable voltage in the DC link

Power rating

The SINAMICS DCP is available with a power rating of 30 kW, 120 kW and 250 kW.

SINAMICS DCM – the scalable drive system for basic and sophisticated DC drive applications

- Power range 6 kW to 30 MW
- For machinery and plants in industry
  - Steel/aluminum
  - Plastic
  - Printing
  - Paper
  - Hoisting gear
  - Mining
  - Oil and gas
  - Static excitation units
  - Heating applications
  - Magnet applications
- New systems and retrofit business
- Communication as standard via PROFIBUS DP, RS485 or USS, and optionally via PROFINET, EtherNet/IP or Modbus RTU
- Safety Integrated: STO, SS1 acc. to IEC 61508 SIL 3 as well as EN ISO 13849-1 PL e
- Control unit variance
- Field power supply in line with requirements
- Electronics power supply for connection to 24 V DC
- Power unit isolated to ground (isolated voltage sensing)
- Free function blocks and Drive Control Chart (DCC)
- Expandable functionality using SINAMICS components
- Single-phase operation possible
- Coated modules and nickel-plated copper busbars
- Wide temperature range
- High overload capability
- Low torque ripple at low speeds
- Very compact design

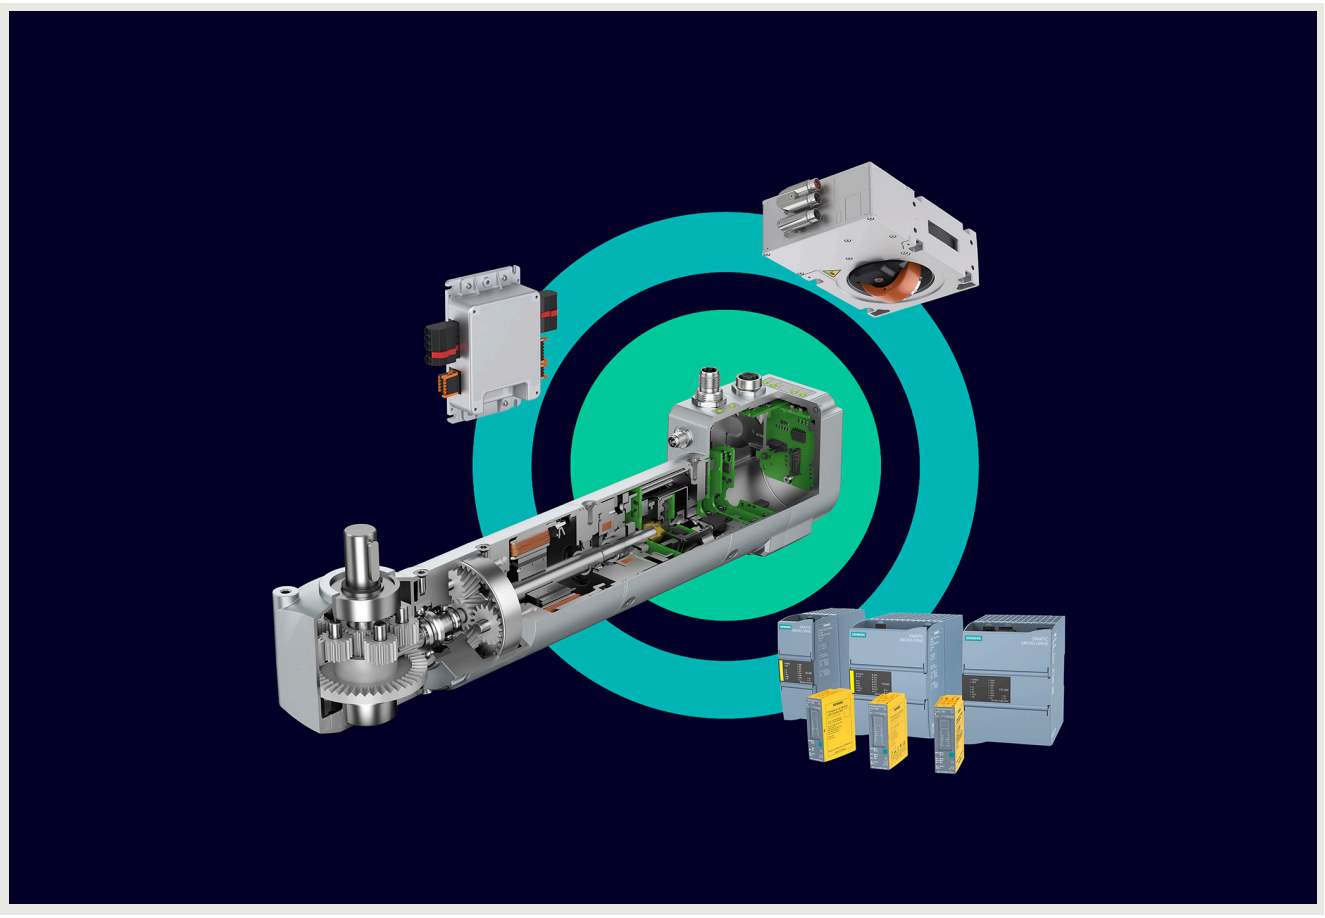
Overview

SIMOTICS E – Extra low-voltage motors with oder without integrated converters



Example: SIMOTICS E-1EE1 extra low-voltage motor without integrated converter and without gearbox; shaft height 40R, length 60

The SIMOTICS E extra low-voltage motors, with or without integrated converters, are a targeted addition to the Siemens portfolio and strengthen our role as a technology leader in factory automation and digitalization. They are ideal for intelligent, battery-powered systems in intralogistics and production – for example in mobile robots, driverless transport systems or in the automated conversion of machines. In addition to battery-powered solutions, the focus is also on stationary applications and can be served in a targeted manner with the portfolio.

The VTD extra low-voltage converters or the SIMATIC MICRO-DRIVE extra low-voltage converters control SIMOTICS E extra low-voltage motors without an integrated converter precisely and efficiently. The result: more flexibility and productivity.

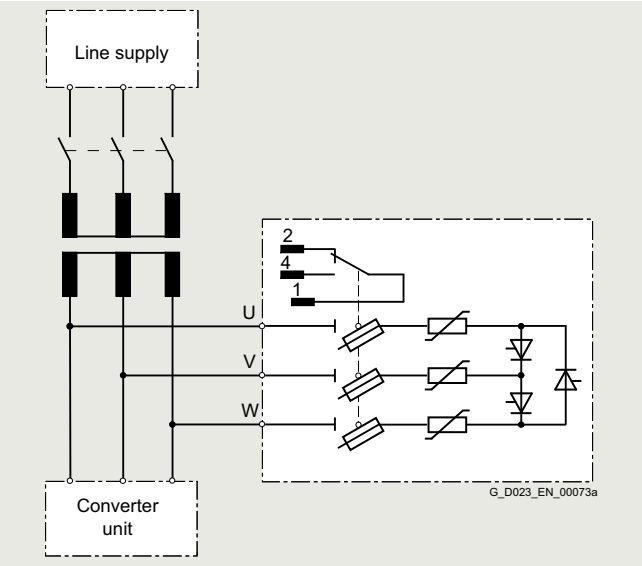
www.siemens.com/simotics-e/configuration
and in Catalog D 60 at:
www.siemens.com/d60

SIMOTICS E drive system for extra low-voltage with SIMOTICS E extra low-voltage motors, VTD and SIMATIC MICRO-DRIVE extra low-voltage converters and SIMOTICS E ArgoDrive driving steering system

© Siemens AG 2026

Overview



SICROWBAR AC

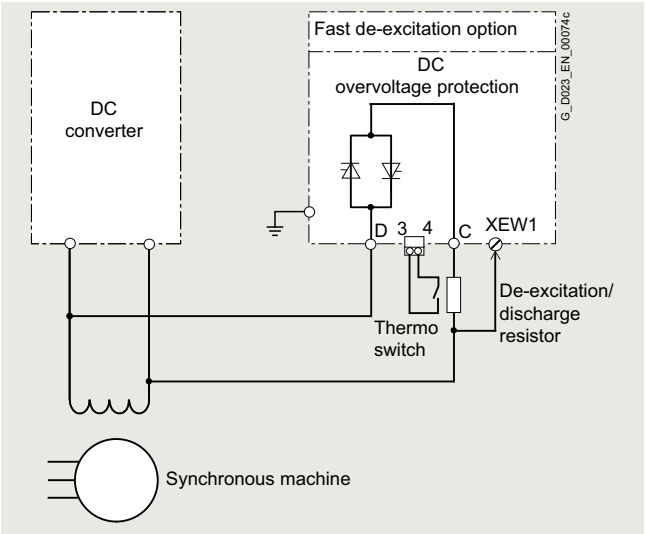
SICROWBAR AC is used to protect power semiconductors in converters (thyristors and diodes) against overvoltage that occurs between the phases of a three-phase network. The range of applications is not restricted to protecting DC drive converters, but also comprises infeed/regenerative feedback units of the AC drive technology that are equipped with thyristors.

Overvoltage that occurs on the AC side of converters is mainly caused by switching operations when disconnecting from the line supply at the transformer's primary side. This applies both to operational switching operations (shutdown at no-load) as well as in the case of a fault (shutdown under load).

The overvoltage protection is mainly used in the following configuration::

More information

- Catalog D 23.1
- Internet:
  https://www.siemens.com/d23-1
  https://sieportal.siemens.com



Overview (continued)

SICROWBAR DC

SICROWBAR DC protects coils and converters against overvoltage conditions when they are used to supply large inductances, for instance, the excitation coils of synchronous machine motors, DC machine motors or hoisting solenoids. An appropriate de-excitation/discharge resistor must be provided. A thermostatic switch can be ordered as an option for the resistor from the manufacturer.

The fast de-excitation option G11 (module 7VV3003-7FG00) makes it possible to initiate fast de-excitation, triggered by a higher-level signal, for the 7VV3003-5... units.

SIRIUS relays – one range for every application

Our range of SIRIUS relays offers everything you need for motor feeder applications. Easy and convenient. From a single source. Whether you require compact timing relays or reliable monitoring relays, particularly narrow coupling relays, plug-in relays, or signal converters – our relay range is the most complete and comprehensive portfolio on the market. Quite simply, there is one for every possible need. What is more: all SIRIUS relays are particularly easy to use. So take a closer look at our product range and see for yourself. You'll be surprised.

SIRIUS 3UG, 3RR, 3RN, 3RS monitoring relays – reliable monitoring and protection

SIRIUS relays from Siemens offer maximum protection for machines and plants and communicate with the control level via IO-Link. The SIRIUS relays for IO-Link reliably monitor network quality, current values, voltages, speeds and temperatures, and at the same time they open up an even wider field of applications for you.

3UG monitoring relays are used to monitor electric and non-electric variables which cannot (or should not) be directly recorded by an automation system.

- Monitoring of networks for overvoltage or undervoltage, direction of rotation, frequency, or asymmetry
- Monitoring of loads through power factor, power or current measurement
- Monitoring for insulation faults and residual currents
- Monitoring of levels or speeds

The **3RR current monitoring relays** are suitable not only for monitoring motors or other loads, but are also well suited for monitoring multi-phase currents of the entire plant or the driven process. In this way, for example, an idling pump or an overload is promptly detected and reported in good time. The 3RR2 monitoring relays can be set up individually or integrated directly into the load feeder.

3RN thermistor motor protection relays monitor the winding temperature of motors fitted with a PTC sensor.

Overview (continued)

- Compliance with the ATEX Directive 2014/34/EU through conformity with the EN 50495 and EN 60947-8 standards
- Compliance with the safety requirements for PL c according to ISO 13849-1 or SIL 1 according to IEC 62061
- Fast fault diagnostics through display of open circuits and short circuits
- Solid-state compatible output due to hard gold-plated contacts

3RS2 temperature monitoring relays can be used to measure temperatures in solid, liquid and gas media. The temperature is acquired by sensors in the medium, evaluated by the device, and monitored for overshoot, undershoot, or to ensure that it remains within an operating range (window function).

The family comprises an analog multi-function device which can be set using DIP switches and potentiometers, and digital devices which can be parameterized via an intuitive LCD. The digital device is also available as a version with IO-Link.

All 3RS26 digital devices, including the 3RS28 versions with IO-Link, come with Safety certification according to IEC 62061 or ISO 13849-1 up to SIL 1/PL c as well as EN 14597 for heat generating systems and EN 50156 for burners.

Furthermore, the functionality of the 3RS26/3RS28 digital devices can be expanded using a 3RS29 sensor expansion module with two additional resistance sensors, e.g. for monitoring three-phase motors or transformers.

The 3RS29 sensor expansion module also features an additional relay for outputting the sensor status, and an additional analog input 4 to 20 mA. The 3RS29 is connected wirelessly via a SIL 1-certified infrared communications interface.

SIRIUS speaks IO-Link

With the SIRIUS monitoring relay for IO-Link you are opting for maximum flexibility: As well as the autonomous monitoring function that is still available, measured values and data can also be transferred directly to the controller via IO-Link. Parameterization can also be performed either locally or via IO-Link. This means that the SIRIUS relays for IO-Link are fully integrated into Totally Integrated Automation, our open system architecture for end-to-end automation. You also profit from significantly simplified device replacement – thanks to data matching and automatic reparameterization via a parameter server.

SIRIUS 3RP, 7PV timing relays

Electronic timing relays are used in control, starting, protective, and control circuits for all switching operations involving time delays.

Due to their sophisticated and compact design, the 3RP timing relays are ideal timer modules for control cabinet, switchgear and controller manufacturers in the industrial sector. Due to their narrower design, the 7PV timing relays are particularly suitable for use in heating, ventilation and air-conditioning systems and compressors.

SIRIUS 3RA28 function modules and solid-state time-delay auxiliary switch blocks

The 3RA281. function modules enable the assembly of starters and contactor assemblies for direct-on-line and star-delta (wye-delta) starting. They include the key control functions required for the particular feeder, e.g. timing and electrical interlocking function. The function modules that function as timing relays are mounted quickly and simply on SIRIUS contactors – without any great wiring effort. They enable both ON-delay and OFF-delay switching of contactors.

The 3RA283. solid-state time-delay auxiliary switch blocks, which can be mounted on contactors, are designed for contactor coil voltages in the range from 24 to 240 V AC/DC (wide voltage range). Auxiliary switches for control and alarm signals are used specially for switching the smallest signals for electronics applications. They are used, for example, for allowing a pump or fan to run on, similar to an OFF-delay timing relay or for the delayed activation of a gate

© Siemens AG 2026

Overview (continued)

drive. Both the electrical and mechanical connection are made by simple snapping on and locking. A varistor is integrated in the time-delay auxiliary switch to attenuate contactor coil switching overvoltages.

SIRIUS 3RQ1, 3RQ2, 3RQ4 and LZS coupling relays

The SIRIUS coupling relays are ideally suited for coupling to and from controllers, making them the perfect choice for SIMATIC controllers. They can be used for electrical separation, voltage conversion, signal amplification as well as overvoltage and EMC protection.

The force-guided **3RQ1 coupling relays** (up to SIL 3/PL e) are available in widths of 17.5 mm and 22.5 mm. In accordance with the force-guided operation specified in IEC 60947-5-1 (IEC 61810-3), the contacts of the installed relays are connected to each other so that NO contacts and NC contacts are never closed at the same time. In this way, opening failures are reliably detected and maximum safety is ensured. 3RQ1 coupling relays serve to reliably couple safe controllers, also for safety applications up to SIL 3/PL e.

The universally applicable **3RQ2 coupling relays** set standards: With a wide voltage range from 24 to 240 V AC/DC, they are the star attraction on the coupler market. The reduced variety of devices simplifies product selection and standardization. In this series, we offer devices in the proven 22.5 mm industrial enclosure, featuring one, two or three changeover contacts, as well as screw and spring-loaded terminals (push-in connection). The versions with hard gold-plated contacts ensure exceptionally high contact reliability, even at low currents. Thanks to the tried and tested industrial enclosure, you can enjoy the benefits of user-friendly connection systems with permanent wiring, just as with our timing relays.

The new **3RQ4 coupling relays** set new standards in sustainability, innovation, and quality. The design is based on SIMATIC controllers. The relays feature a fully sustainable design, are made from 80% bio-based plastic, and are manufactured entirely in Germany. With a width of just 6.2 mm, they are ideal for space-optimized installation in control cabinets with narrow tier spacing or in flat control boxes. All versions are available with screw and spring-loaded terminals (push-in technology). The wire inlet and front-side clamping option reduce wiring times.

3RQ4 coupling relays are available as:

- Coupling relays with relay output
- Coupling relays with plug-in relay
- Coupling relays with semiconductor output

The right choice depends on the respective area of application.

The coupling relays with relay output have ATEX, railway and marine approval. The fixed connection of the relays makes them more rugged in harsh environmental conditions.

Coupling relays with plug-in relay are perfect for standard applications. The relays used can be replaced during operation.

A highlight of the 3RQ4 portfolio are the semiconductor variants. These are the perfect choice for a wide range of applications. Due to their virtually unlimited service life and ultra-fast, reliable switching operations, they can significantly reduce maintenance costs. Even if a standard relay needs to be replaced just once, a solid-state coupling relay is usually more cost-effective.

LZS coupling relays with plug-in relays are available as complete units or as single modules for customer assembly or as spare parts in the RT and PT designs.

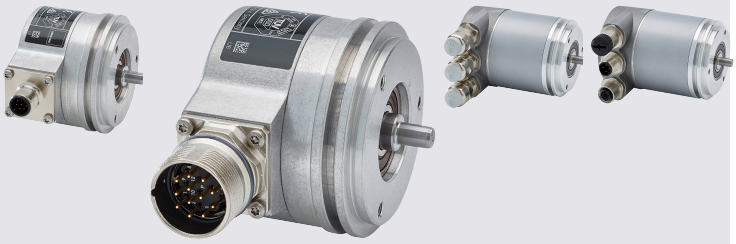
- Can be used for contact multiplication, adaptation of potential, or for switching small loads
- Max. four changeover contacts in one device:
  - Wide-voltage versions with or without hard gold-plated contacts
  - With screw or push-in spring-loaded terminals

Overview (continued)

SIRIUS 3RS70 signal converters

The 3RS70 signal converters feature the same enclosure concept as the 3RQ4 coupling relays. They are mainly used for the electrical separation and conversion of analog signals. Sensors/actuators and controllers generally have different potentials and therefore require electrical separation in the signal circuit. This is either integrated in the controller or is implemented using signal converters.

A signal has to be converted into another signal if, for instance, a voltage signal needs to be converted into a current signal for transmission over a long distance, or if the output of a sensor and the input of a controller are not compatible with one another.



The implemented frequency outputs offer another application. In this case, the input signal is converted into a proportional frequency. This means that analog signals can be processed with digital inputs.

This is important if the controller does not have any provisions for an analog input, or if all of its analog inputs are already assigned, e.g. when devices are retrofitted.

Catalog	D 21.4							

Motion control encoders are optoelectronic built-on encoders that detect the traversing distances, angles of rotation, speeds or positions of machine axes. Motion control encoders are direct measuring systems that are built-on to shafts, axes or motors. They can be used in conjunction with numerical and programmable logic controllers, drives and position displays. Motion control encoders are system-tested, certified components that have been harmonized for use with the following systems:

- SINUMERIK CNC controls
- SIMATIC programmable logic controllers
- SINAMICS drive systems

Motion control encoders are used with machine tools and production machines as additional external measuring systems. They are available as incremental or absolute encoders.

- In the case of incremental encoders, the machine must travel to a reference point after each power-off state, as the position is not usually stored in the controller. Movements of the machine while the power is off are not recorded. Incremental encoders are suitable for use in simple machine concepts with mostly small dimensions.
- Absolute encoders, on the other hand, also record movements while the power is off and return the actual position after power on. Travel to a reference point is not necessary. Absolute encoders are suitable for complex machines or machines with large dimensions.

All motion control encoders are available as Synchro flange and clamp flange versions. The absolute encoders are also available with a hollow shaft and torque arm.

The motion control encoders are driven via a plug-in coupling or spring disk coupling. Alternatively, pulleys can also be used.

The motor control encoder supply voltage is 5 V DC or alternatively 10 V to 30 V DC. The 10 V to 30 V DC version supports longer cable lengths. Most control systems supply the voltage directly at the measuring circuit connector. With SINAMICS, the measuring systems are provided with power via the Sensor Modules.

For motion control encoders with cables, the cable length including the connector is 1 m.

The following bending radii must be observed for the cable to the built-on encoder:

- One-time bending: ≥ 20 mm
- Continuous bending: ≥ 75 mm

Overview

SINUMERIK 828D – the powerhouse among the compact CNCs

With their unique CNC performance, SINUMERIK 828D CNCs set productivity benchmarks when it comes to milling and turning on standard machines as well as functions for easy automation of grinding machines. With new SINAMICS drives and SIMOTICS motion control motors SINUMERIK 828D is now even more productive.

Rugged and maintenance-free

An operator panel front of die-cast magnesium, the panel-based CNC design with minimal interfaces and the high degree of protection on the front of the PPU make the SINUMERIK 828D CNCs reliable partners even in harsh environments.

Designed without a fan or hard disk, with NVRAM memory technology and no back-up battery, SINUMERIK 828D CNCs are completely maintenance-free.

User-friendly

The SINUMERIK 828D CNCs are easy to operate thanks to a full QWERTY CNC keyboard with short-stroke keys and a high-resolution 12.1" TFT color display or 15.6" touch display.

CNC data are quickly and easily transferred via the USB 3.1 interface on the operator panel front.

Optimum scalability

Based on the three CNC performance versions SW 24x, SW 26x and SW 28x of the SINUMERIK 828D CNCs, favorably-priced compact and also complex machines with additional axes/spindles as well as up to 2 machining channels and 2 handling channels can be implemented.

Digital twin

Create MyVirtualMachine and/or Run MyVirtualMachine minimize setup and run-in times, reduce collision hazards and speed up program optimization. Increased productivity and safety - even before the actual machine starts.

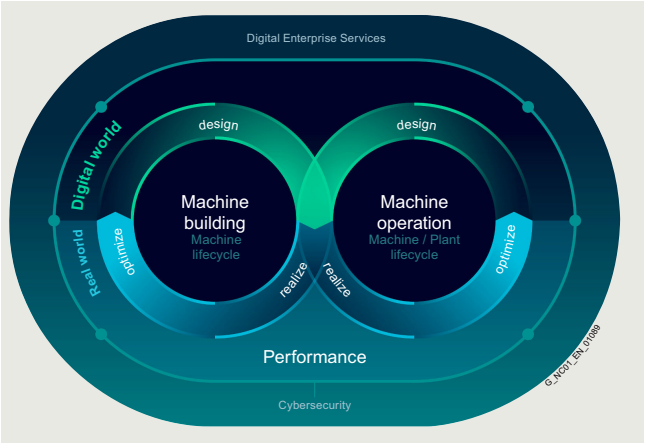
Overview



SINUMERIK ONE: the next level CNC in the premium class

SINUMERIK ONE – the digital native CNC with the pioneering CNC system for highly productive machine tools. Thanks to its digital twin, the key element in digital transformation, SINUMERIK ONE helps to simulate and test work processes completely virtually.

Boosting productivity with SINUMERIK and digitalization solutions

Shorter product introduction times and increasing individualization of products influence production with machine tools. High productivity is more important than ever for machine manufacturers and users. The key factor is optimum interaction of automation and CNC solutions and sophisticated technology – and the effective integration of digital solutions. This applies to all areas: from design and construction of a machine to operation and service. SINUMERIK connects automation, competence in technology, and digitalization to form a single solution offering for more productivity. SINUMERIK CNC systems are the optimum solution for the production of individual parts or series production, for simple or complex workpieces.

Benefits

Merging the real world with the virtual world

The new SINUMERIK ONE is specifically designed for smart manufacturing.

- The digital twin is an integral part of the CNC system; virtual and real CNC merge and complement each other
- Significant reduction [1] in product development and market launch times thanks to the **digital first** strategy
- Improved networking and data communication capabilities
- Significant reduction [1] in the duration of real commissioning thanks to virtual commissioning preparation
- Significantly increased CNC performance
- Significantly shorter downtimes [1] and complete integration into the TIA Portal thanks to the integrated SIMATIC S7-1500F PLC

This means that the SINUMERIK ONE can be seamlessly integrated into digital solutions and workflows.

[1] Actual savings depend on the specific application.

Overview

MOTION-CONNECT includes connection systems and components which are optimally tailored to individual areas of application. MOTION-CONNECT cables feature state-of-the-art connection systems to ensure fast, reliable connection of different components, and offer maximum quality as well as system-tested reliability.

MOTION-CONNECT power cable and signal cable

MOTION-CONNECT cables are available as fully-assembled power and signal cables or sold by the meter. The pre-assembled cables can be ordered in length units of 10 cm (3.94 in) and can be extended, if necessary.

Whatever your machine requirements, MOTION-CONNECT offers the solution.

- **Robust, high-performance and easy to use**
  thanks to pre-assembled cables with a rugged metal connector in degree of protection IP67 and reliable SPEED-CONNECT quick-release lock
- **Outstanding and proven quality**
  achieved by consistent quality management and system-tested cables

Cables are available in two different qualities – MOTION-CONNECT 500 and MOTION-CONNECT 800PLUS.

MOTION-CONNECT 500	MOTION-CONNECT 800PLUS
• Cost-effective solution for predominantly fixed installation • Suitable for low mechanical loading • Tested for travel distances up to 5 m (16.4 ft)	• Meets requirements for use in cable carriers • Suitable for high mechanical loading • Oil resistance • Tested for travel distances of up to 50 m (164 ft)

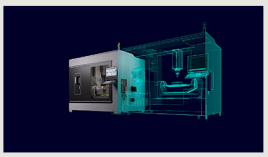
Overview

Lern the way you like it – with SITRAIN

SITRAIN provides comprehensive technical knowledge for a wide range of industries and applications. Its offering is consistently aligned with the needs of learners and the requirements of innovative companies. Benefit from modern learning methods, personalized support, and practical knowledge that sustainably enhances your daily work and professional development. SITRAIN stands for successful, flexible, and continuous learning.

Education and training directly from the manufacturer

SITRAIN offers high-quality training covering Siemens' industrial product and solution portfolio and has more than 30 years of experience in technical training. Discover the wide range of opportunities to expand your expertise and find the course that perfectly fits your needs.

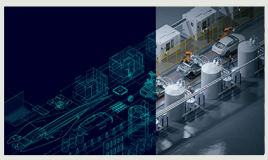


Industrial Automation Systems SIMATIC

Training available for:
SIMATIC S7-1200/S7-1500. TIA Portal,
SIMATIC S7-300/400

Drive Technology

Training available for:
SINAMICS S120, S210,
SINAMICS G120, G220,
SINAMICS G130/G150/S150,
SINAMICS G180,
SINAMICS DCM

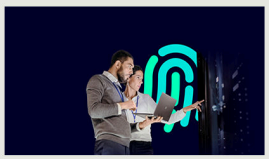


SINUMERIK CNC automation system

Training available for:
SINUMERIK 840D,
SINUMERIK 840D sl and
SINUMERIK ONE

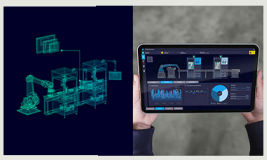
Process Control Systems

Training available for:
SIMATIC PCS 7,
SIMATIC PCS neo



Digital Enterprise

Training available for:
Openness, SIMIT, OPC UA,
Industrial Edge,
virtual commissioning



Industrial Communications

Training available for:
OPC UA, PROFINET, SCALANCE, RUGGEDOM, Industrial Ethernet, Remote Communication

Cybersecurity

Training available for:
Industrial security for factory and process automation,
SINEC Security Software Suite and IT/OT security for industrial networks

Operator Control and Monitoring Systems

Training available for:
SIMATIC WinCC Unified in TIA Portal, SIMATIC WinCC in TIA Portal, SIMATIC WinCC V8

Motion Control

Training available for:
SIMATIC Motion Control and SIMOTION

Smart Infrastructure

Training available for
SIRIUS, SENTRON, SIVACON, ALPHA, SIMOCODE and circuit breakers

Process Analytics & Instrumentation

Training is available for process analytics and instrumentation and explosion protection

Additional training offer

SIMOVE with automated guided vehicles (AGV), cranes, guidelines and standards for control cabinets

Overview (continued)

Different learning formats and methods for maximum learning success

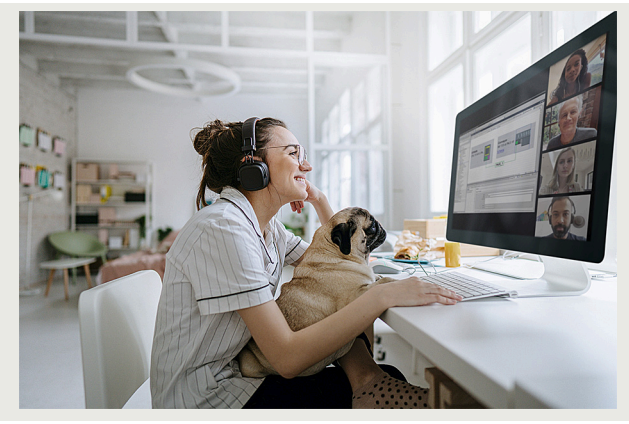
With SITRAIN trainings, you can shape your further education according to your individual preferences and the demands of your professional routine. You have the option to choose between online training and classroom courses – depending on which format suits you best.

In addition, you decide whether to complete your training flexibly on demand or attend scheduled sessions.

Whether with a learning consultant, as part of a team, or through self-paced learning – SITRAIN offers maximum flexibility and tailored options for your learning process.

Discover our three learning formats:

Learning Event



SITRAIN Learning Events are the perfect choice to achieve a defined learning goal in the shortest possible time. You learn in a protected learning environment outside of the daily work routine under the guidance of a learning consultant – virtually, in the training center, or at your company.

Learning Membership I SITRAIN access

SITRAIN access is a digital learning platform where knowledge is delivered through modular content such as tutorials, presentations, exercises, and tests. Learners benefit from a growing course offering as well as the Siemens Virtual Lab, where they can deepen their knowledge in a practical way – without the need for installation. Learn anywhere, anytime, flexibly and online.

Learning Journey

The Learning Journey is the perfect combination of virtual live sessions with a learning consultant and self-learning modules for sustainable learning success. The modular approach enables an easy integration of learning into your daily work. This also includes access to the digital learning platform, SITRAIN access, for one year.

© Siemens AG 2026

Overview (continued)

Live
Learn together with others, simultaneously and guided by a learning consultant. Online, in the SITRAIN training center or at your company.

Self-reliant
Expand your knowledge self-determined with industry learning and work on your learning units at your own pace and according to your own schedule.

On demand
Get the knowledge you need, exactly when you need it. Be it to answer a current question or to work on a special topic.

Individual
Talk directly with the learning consultant, clarify detailed questions and get personal coaching for transferring the learned topics to your own application.

Overview

The electronic products described in this catalog comply with the requirements and protection objectives of the following EU directives insofar as they relate to the product concerned. They also comply with the corresponding harmonized European standards (EN) published for these products in the Official Journals of the European Community.

- 2014/35/EU "Electrical equipment designed for use within certain voltage limits" (Low Voltage Directive))
- 2014/30/EU "Electromagnetic Compatibility" (EMC Directive)
- 2014/34/EU "Equipment and protective systems intended for use in potentially explosive atmospheres" (Explosion Protection Directive)
- 2011/65/EU "Restriction of the use of certain hazardous substances in electrical and electronic equipment" (RoHS Directive)
- For F-modules, the following also applies: 2006/42/EC "Machinery Directive"

The originals of the declarations of conformity are kept available by us for the responsible supervisory authorities.

They are also available for download on the Siemens Industry Online Support website (https://sieportal.siemens.com), keyword "Declaration of Conformity".

Note on the EMC Directive:

SIMATIC-Produkte sind bezüglich der Störaussendung ausgelegt für den Einsatz im Industriebereich. In terms of their interference emissions, SIMATIC products are designed for industrial applications.

If individual products deviate from this specification, it is noted in the catalog with the products.

The installation instructions in the manuals must be adhered to when installing and operating the products described in this catalog. These contain, for example, important information on installation in cabinets and on the use of shielded cables.

Notes for machine manufacturers

The SIMATIC automation system is not a machine within the context of the EU machine guidelines. Therefore a declaration of conformity with regard to the EU machine directive 89/392/EEC or 2006/42/EU (new edition, applicable from end of 2009) may not be provided for SIMATIC.

The EU machine directive regulates the requirements placed on a machine or a part thereof. A machine is understood for the purposes of this guideline to be a combination of interconnected parts or mechanisms (see also EN 292-1, Paragraph 3.1).

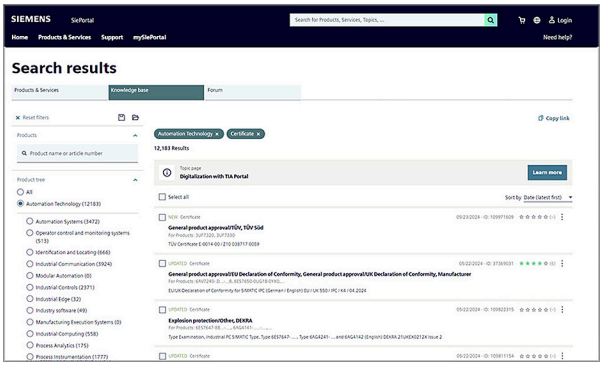
SIMATIC is part of the electrical equipment of a machine, and must therefore be integrated into the evaluation of the complete machine by the machine manufacturer.

As electrical equipment, SIMATIC is subject to the low-voltage directive which, as a "total safety directive", covers all dangers just like the machine directive.

The EN 60204-1 standard (safety of machines, general requirements for the electrical equipment of machines) is applicable to the electrical equipment of machines.

The following table will help you in the provision of your declaration of conformity, and shows which criteria according to EN 60204-1 (2006-06) apply to SIMATIC. You can obtain further information from the enclosed declaration of conformity according to the low-voltage and EMC directives (with list of included standards).

Overview (continued)



EN 60204-1	Topic/criterion	Notes
Paragraph 4	General requirements	The requirements are met when the equipment is assembled/ installed in accordance with the installation guidelines. Please note the relevant information in the manuals.
Paragraph 11.2	Digital input/output interfaces	The requirements are met
The requirements are met	Paragraph 12.3	The requirements are met when the equipment is installed in lockable cabinets to protect against alteration of the memory contents by unauthorized persons
Paragraph 20.4	Voltage tests	The requirements are met

Certificates, authorizations, approbations, declarations of conformity

An overview of the certificates available for SIMATIC products (CE, UL, CSA, FM, shipping authorizations) can be found in the internet under this link.

The lists are continously updated. The data for products which have not yet been included in the overview is continously collected and prepared for the subsequent edition.

You can also find certificates, approbations, verification certificates or characteristic curves under Product support "Entry list"

Quality management

The quality management system of the Siemens Operating Company Digital Industries, Business Unit Factory Automation, complies with the international standard ISO 9001.

The products and systems described in this catalog are sold under application of a quality management system certified by DQS in accordance with DIN EN ISO 9001.

The DQS certificate is recognized in all IQ Net countries.

DQS Registered Certificate No.:

Overview

Knowledge & technology – the keystones to success in digitalization

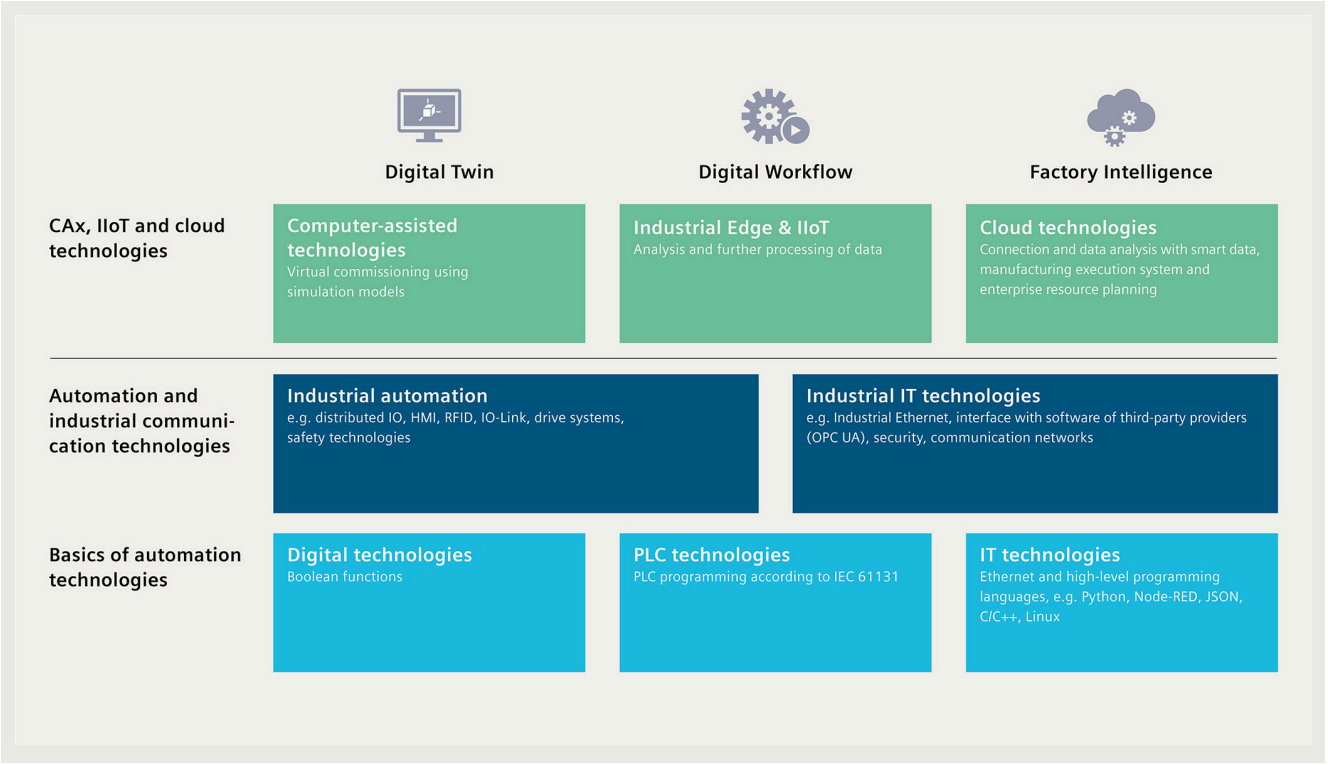
Digitalization is quickly and radically changing our world. What does this mean for education?

In the world of Industry 4.0, companies can expect a host of new opportunities and challenges. New systems are verified on the spot through simulations. Automated mass production processes can make every product on the conveyor belt a unique product.

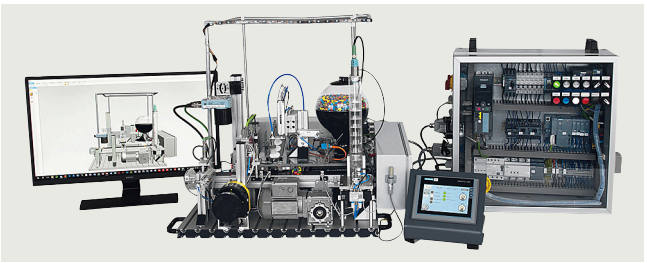
New products are now market-ready much faster. Siemens is shaping this transformation as a technology leader in the field of automation and process lifecycle management (PLM).

These new digitalization processes are changing the know-how requirements for employees. Many educational institutions are facing the challenge of conveying Industry 4.0 know-how as part of their teaching and training. The Siemens Automation Cooperates with Education (SCE) program is supporting educators on the way to Industry 4.0.

The SCE digitalization concept for educators



The SCE digitalization concept presented here shows how digitalization can be implemented in educational institutions – from vocational schools to universities.



Digitalization (or Industry 4.0) know-how is now introduced through computer aided technology, Industrial Edge and IIoT as well as Cloud technologies. It is founded on the basics of automation, such as digital technologies, PLC and information technologies, and on advanced automation and industrial communication technologies.

The level of digitalization knowledge can be weighted, depending on the vocational field or branch of study –
e.g. mechanical engineering, automation engineering or computer science.

© Siemens AG 2026

Overview (continued)

As part of their project work, students at Vocational School 2 in Wolfsburg, Germany, have implemented the three levels of the SCE Industry 4.0 concept. A virtual twin created with the Siemens NX Mechatronics Designer (MCD) CAD software was used for the design and virtual commissioning. This enables fast and efficient assembly of the real automation system, e.g. with SIMATIC S7-1500/ET 200SP/RFID, for use in classes. Production data, such as the number of bottles filled, production date and system parameters, are uploaded to a cloud using SIMATIC IOT2000.

Please find further information under this link and this link.

The SCE offers

Learning and training documents

More than 100 didactically prepared learning and training documents are available through SCE and incorporate the digitalization concept. They are designed for use in classes, but can also be customized or used for individual study. These documents are available for free download, most of them in 7 languages.

Please find further information under this link.

© Siemens AG 2026

Overview (continued)

Trainer packages

The 90 SCE trainer packages help educators teaching and implementing the SCE digitalization concept. Trainer packages comprise specially compiled, genuine Siemens hardware and software products. The trainer packages are based on the learning and training documents and are offered to schools, colleges and universities at special terms.

Please find further information under this link.

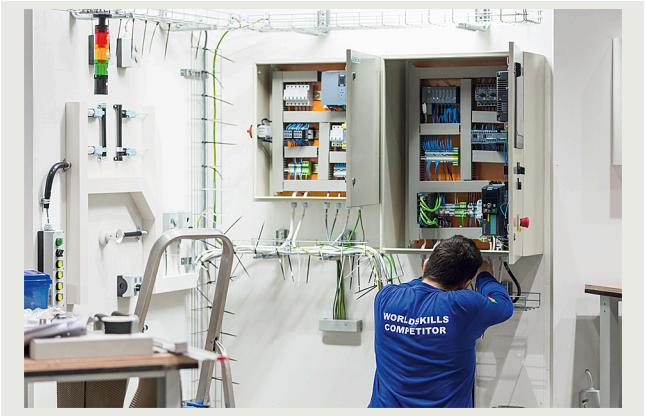
Educator courses

Excellent teaching content is needed to introduce students to digitalization. For this purpose, SCE holds educator courses in certain regions. Based on our learning and training documents and through practical exercises, educators acquire the latest Industry 4.0 know-how.

Please find further information under this link.

Support for your projects / textbooks

We support you on selected projects with advice and assistance from SCE contact partners.



As a special service, we support textbook authors. We maintain a list of textbooks on the SCE website

Please find further information under this link und this link.

Partnerships for proliferation of Industry 4.0 in education

Partnership with WorldSkills

As a technology powerhouse, we support vocational training of students around the world. Since 2010, we have partnered with WorldSkills as a Global Industry Partner in order to amplify this cause.

WorldSkills is an international organization whose mission is to raise the profile and recognition of skilled people, and show how important vocational skills are in achieving economic growth and personal success. Every two years, WorldSkills hosts the world championships of skills.

Siemens provides the competitors with automation products, such as SIMATIC S7-1500 and LOGO!, for the disciplines: industrial control, electrical installations, Polymechanics/Automation and manufacturing technology.

Additionally, we support selected continental and regional competitions.

Please find further information under this link.

Partnerships with educators

We provide support to educators and educational organizations in the form of one-on-one advice through SCE contact partners and Siemens experts as well as long-term cooperation.

Please find further information under this link.

Partnerships with producers of learning systems

For practical training in classrooms and labs, numerous producers of learning systems offer a wide range of complete didactic solutions based on SCE trainer packages

Please find further information under this link.

Information portal

To facilitate your teaching assignment and/or for selfstudy, we offer educators and students a comprehensive SCE information portal. At this portal you have quick access to all SCE offers, e.g. learning and

Overview

Siemens Solution and Approved Partners – Helping you to success

Superior competence in automation and drive technology

Siemens works in close collaboration with selected partner companies worldwide to ensure that the automation and drive technology requirements of its customers are complied with to the greatest extent possible – at all times and in any location.

We place great value on our customers acting in accordance with the same ideals which characterize Siemens as a whole: Competence, professionalism and quality. That is why continuous development through qualification and certification measures in line with global standards is a central aspect of our Partner Program. This means that with our partners, you benefit from the same high quality standards all over the world. The partner emblem is the symbol for tried and tested quality.

The partner network for industry

Competence and experience in your region: Provided by the Siemens Partner Program.

We work with both Solution Partners and Approved Partners within the context of our global network. At present we cooperate with more than 1,500 Solution Partners around the world. And we continue to expand our network of over 150 Approved Partners in more than 80 countries worldwide.

Siemens Solution Partner – Automation Drives

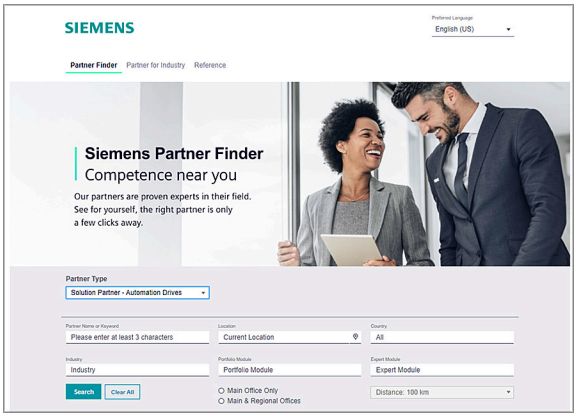
At present we cooperate with more than 1,500 **Solution Partners** around the world. They are characterized by extensive application, system and sector knowledge, as well as proven project experience, and are able to implement future-proof tailored solutions of the highest quality, based on our product and system portfolio.

Overview (continued)

Siemens Approved Partner – Value Added Reseller

With their detailed technical knowledge, **Siemens Approved Partners – Value Added Resellers** offer a combination of products and services that range from specialist technologies and customized modifications to the provision of high-quality system and product packages. They also provide qualified technical support and assistance.

Siemens Approved Partner – Industry Services



Siemens Approved Partner – Industry Services: put their unique expertise entirely at the service of enhancing your productivity and can be instrumental in ensuring the availability of your plants.

Partner Finder

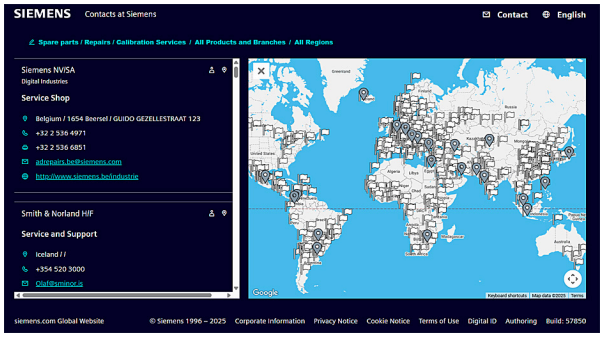
Just a few clicks away from the ideal partner for your task!

Partner Finder

In the Siemens global Solution Partner program, customers are certain to find the optimum partner for their specific requirements - with no great effort. The Partner Finder is basically a comprehensive database that showcases the profiles of all our solution partners.

Easy selection:
Set filters in the search screen form according to the criteria that are relevant to you. You can also directly enter the name of an existing partner.

Skills at a glance:
Gain a quick insight into the specific competencies of any particular partner with the reference reports.



Direct contact option:
Use our electronic query form under this link.

More information regarding Siemens Partners for industry is available from the Internet under this link.

© Siemens AG 2026

Overview

Partners at Siemens

At your service locally, around the globe for consulting, sales, training, service, support, spare parts on the entire portfolio of Siemens.

Your partner can be found in our Personal Contacts Database at: www.siemens.com/automation-contact

You start by selecting the required competence, products and branches, a country and a city or by a location search or free text search.

Overview

At Digital Enterprise Services, we provide you with comprehensive services throughout the entire lifecycle. From a fully digital factory to a reliable spare parts supply and quick support in the event of outages, we work with our partners to ensure your plant operates optimally – improving availability, productivity, and efficiency.

Our services take industry to the next level and give you a competitive edge:

- **Industrial Digitalization Services:**
  Accelerate your digital transformation with our Digitalization Services. Our scalable offerings combine the real and digital worlds by delivering value through IT/OT solutions, improved Overall Equipment Effectiveness (OEE), advanced AI, predictive maintenance and robust cybersecurity while keeping you ahead of competition.
- **Industrial Sustainability Services:**
  Our services include data-driven energy consumption analyses and measures to extend equipment lifespan. Specific savings potential is system-specific and determined individually. Siemens makes no blanket commitments regarding CO_2 reductions or the customer's sustainability targets.
- **Industrial Lifecycle and Training Services:**
  Our tailored Lifecycle Services deliver expert maintenance and support worldwide, enhancing the availability and performance of your industrial assets throughout their lifecycle – from individual machines and systems to entire plants or factories. In addition, our flexible and future-oriented training offerings for all industries and applications empower you to get the most out of your investments.

Overview

Software types

Every software subject to a license is assigned to a type.
The following software types are defined:

- Engineering software
- Runtime software

Engineering software

This includes all software products for creating (engineering) user software, e.g. for configuring, programming, parameterizing, testing, commissioning, or servicing. Data generated with Engineering software or executable programs can be duplicated for your own use or for use by third parties free-of-charge.

Runtime software

This includes all software products required for plant/machine operation, e.g. operating system, basic system, system expansions, drivers, etc.
The duplication of the Runtime software or executable programs created with the Runtime software for your own use or for use by third parties is subject to a charge. You can find information about license fees according to use in the ordering data (e.g. in the catalog). Examples of categories of use include per CPU, per installation, per channel, per instance, per axis, per control loop, per variable, etc.
Information about extended rights of use for parameterization/configuration tools supplied as integral components of the scope of delivery of the Runtime software can be found in the accompanying readme files.

License types

Siemens Digital Industries and Smart Infrastructure offers different types of licenses for software:

- Floating license
- Single license
- Rental license
- Trial / Demo license

Floating license

The software may be installed by the licensee for internal use on up to 10 times as many Instances as it has purchased licenses for objects (e.g., users or devices) specified in the Order. Only the concurrent user is licensed. The concurrent user is the person using the program. Use begins when the software is started. One license is required for each concurrent user.

Single license

Unlike the floating license, only one installation of the software is permitted per license. The type of use licensed is specified in the ordering data and in the Certificate of License (CoL). Types of use include, for example, per instance, per axis, per channel, etc.
One single license is required for each type of use defined.

Rental license

The rental license supports the "temporary use" of Engineering software. Once the license key has been installed, the software can be used for a defined time (the operating hours do not have to be consecutive). One license is required for each installation of the software.

Trial /Demo license

A trial license supports "short-term use" of the software in a non-productive context, e.g. for testing and evaluation purposes. It can be transferred to another license.

Certificate of License (CoL)

The CoL is the licensee's proof that the use of the software has been licensed by Siemens. A CoL is required for every type of use and must be kept in a safe place.

Overview (continued)

Available versions

Software is constantly being updated. The delivery versions

- PowerPack
- Upgrade

can be used to access these updates.
Existing bug fixes are supplied with the ServicePack delivery version.

PowerPack

PowerPacks are conversion packages used to upgrade to more powerful software.

The licensee receives a new license agreement and Certificate of License (CoL) with the PowerPack. This CoL, together with the CoL for the original product, proves that the new software is licensed.
A separate PowerPack must be purchased for each original license of the software to be replaced.

Upgrade

An upgrade allows a newer, available version of the software to be used under the condition that a license for a previous version has already been acquired. The licensee receives a new license agreement and CoL with the upgrade. This CoL, together with the CoL for the previous version, proves that the new software is licensed.
A separate upgrade must be purchased for each original license of the software to be upgraded.

ServicePack

ServicePacks are used to debug existing products. ServicePacks may be duplicated for use as prescribed according to the number of existing original licenses.

License key

Siemens Digital Industries and Smart Infrastructure offers software products with and without license keys.
The license key serves as an electronic license stamp and is also the "switch" for activating the software (floating license, rental license, etc.)
The complete installation of software products requiring license keys includes the program to be licensed (the software) and the license key (which represents the license).

Software Update Service (SUS)

Within the framework of the SUS contract, you are provided with the software and latest license for the relevant product at no cost over a period of one year from the date of invoice. The contract is automatically extended by a further year unless canceled three months before expiration.

The prerequisite for agreeing to an SUS is the presence of the current version of the relevant software.

Overview

1. General Provisions

1.1 Scope

The purchase of hardware, software, cloud services and other services (collectively "Offerings") through this catalog from Siemens Aktiengesellschaft ("Siemens") is subject to the following General Terms and Conditions for the sale of Siemens Offerings ("Catalog T&C"). These Catalog T&C apply only for orders placed with Siemens in Germany. Customer means the entity that places an order via Siemens.

1.2 Order Process

If Customer writes something in the "free choice text" (F), it is solely for Customer's internal order processing and is not reviewed or taken into consideration by Siemens and will not be legally binding.

1.3 Formation of contract

Any information provided in this catalog or in SiePortal does not constitute a binding offer and may contain errors. In particular, illustrations contained in the Offering descriptions, or in Siemens' catalogs are not binding. Any data, statement to dimensions and weights in our Offering descriptions and catalogs are subject to change without prior notice and become only binding upon contract conclusion.

An individual contract between Siemens and Customer is established when Siemens expressly accepts an order from Customer electronically or in another form, or if such acceptance does not occur, when Siemens fulfills Customer's order through delivery or performance. When the order is placed in SiePortal Siemens will send Customer an electronic confirmation of the receipt of the order, which, however, does not constitute an acceptance of the order. Neither is the Customer obligated to place an order, nor is Siemens obligated to accept any orders placed by Customer.

1.4 Additional Terms

Subordinately to these Catalog T&C, the specific terms and conditions in the text of the product description (if available) apply. If the text of the product description says that the specific terms and conditions mentioned there apply exclusively, only those specific terms and conditions apply. If the text of the product description does not contain any specific terms and conditions or if the specific terms and conditions mentioned there do not apply exclusively, the following terms and conditions apply subordinately in the version valid at the time of contract conclusion:

1.4.1 Hardware

- a. "General Conditions for the Supply of Products and Services of the Electrical and Electronics Industry ("Grüne Lieferbedingungen"-GL) "[1] and
- b. the Siemens "Terms on Export Control and Electronically Order Processing "[1]

If the hardware contains open-source software those terms prevail over the GL, we will provide a notification with the hardware specifying the applicable terms. The same applies with respect to any third-party software components in the hardware.

1.4.2 Other Offerings than hardware

- a. for software on premise including any associated maintenance and support services:
  the "General Software and Cloud Supplemental Terms (AGB Germany) "[2] and the
  "Specific Supplemental Terms for on-premises Software of Infrastructure & Industry Business[2];
- b. for cloud services:
  the "General Software and Cloud Supplemental Terms (AGB Germany) "[2] and the cloud services product specific terms stated in the product description;
- c. for services:
  the "Services Supplemental Terms (AGB Germany) "[2]; and

Overview (continued)

- d. generally for all Offerings under a. - c.:
  "Base Terms Germany (AGB Germany) "[2].

1.5 Customers with master or frame agreement

To the extent Offerings purchased are covered by an existing master or frame agreement, the terms and conditions of that agreement shall apply instead of these Catalog T&C.

1.6 Payment agreement and data sharing

If Customer can select and selects that a payment agreement shall apply to the order, upon conclusion of the order the payment agreement will apply and prevail over these Catalog T&C.

For the assessment of financing options, Siemens shares information and data in relation to Customer's company obtained within the scope of its business relationship with its affiliates (as defined in the Base Terms Germany (AGB Germany)).

2. Prices, payment terms and price escalation

2.1 Prices

The prices are in € (Euro), EXW INCOTERMS®2020, exclusive packaging.

2.2 Taxes

All prices and expenses stated in the order are exclusive of any taxes, duties, tariffs and any other charges ("Tax"). Customer will pay or refund Siemens for any applicable Tax imposed by any government authority for Customer's use or receipt of the Offerings.

If Customer is exempt from value-added or sales tax, or similar taxes, it must provide a valid, timely, and executed exemption certificate, direct pay permit, or other such government-approved documentation.

If Customer is required by law to deduct or withhold Tax, Customer will increase the amount it pays to Siemens so that Siemens still receives the amount originally invoiced. Customer will promptly provide all tax receipts confirming it has paid Tax or has withheld Tax.

2.3 Price escalation

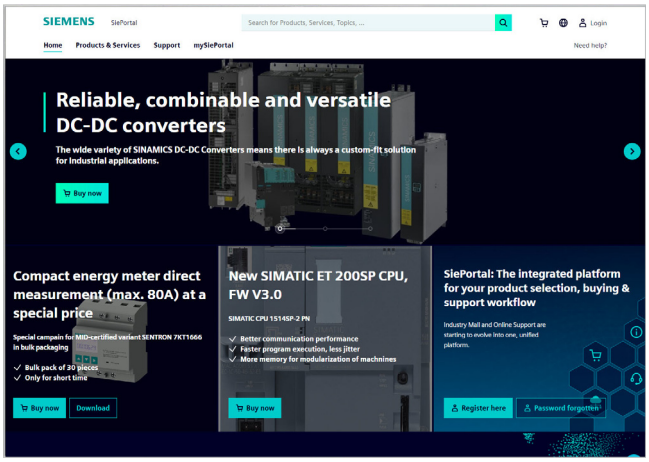
2.3.1 Price escalation for metal surcharges

To account for fluctuations commodity prices (silver, copper, aluminum, lead, gold, dysprosium and/or neodymium), surcharges will apply to Offerings containing these metals. Surcharges are calculated daily using the Offering's Metal Factor, which defines the applicable commodity and pricing methods. . Details are provided in the exhibit "Metal surcharges "[3]. The surcharges calculated by using these pricing methods will be added to the Offering's price.

If applicable, the Metal Factor is shown with the Offering's price information or listed on SiePortal (https://sieportal.siemens.com).

2.3.2 General price escalation

If, between ordering and delivery, there are any new or modified taxes, duties, tariffs, or equivalent measures that are directly or indirectly applicable to Siemens' offering, including any hardware, software, or service components contained therein, or a price increase of more than 20% for relevant commodities (e.g. electronic components, semiconductors) applies, Siemens reserves the right to adjust the price accordingly.



2.4 Price Changes

Prices stated in the SiePortal or in Siemens' catalogs are subject to change without prior notice.

3. Units of measurement and weight

The dimensions and weight of all Offerings are given in meters and kilograms. If the dimensions or weight of the Offerings are specified in other units of measurement, such as inches or pounds, this indicates that these Offerings are intended for export.

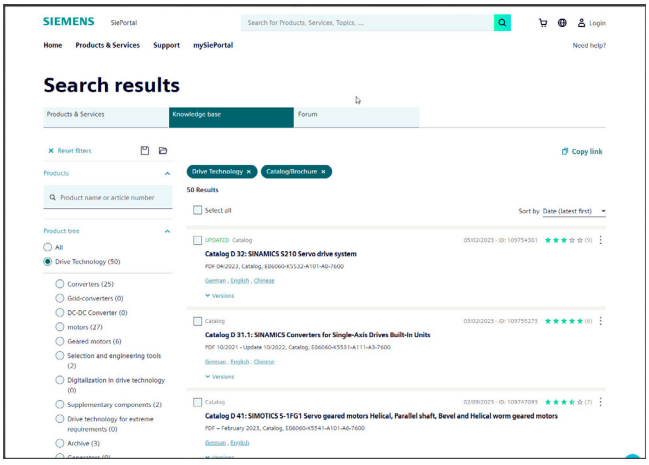
Easy product selection and ordering with SiePortal



SiePortal > Products & Services

The internet ordering platform of Siemens AG is located in SiePortal. It provides you with online access to a comprehensive product spectrum that is presented in an informative, well-organized way.

Powerful search functions help you select the required products, while configurators enable you to configure complex product and system components quickly and easily. CAx data are also available for you to use.

Data transfer allows the entire procedure, from selection through ordering to tracking and tracing, to be carried out online. Availability checks, individual customer discounting, and quotation preparation are also possible.

Cybersecurity information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks.

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept.

Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place

For additional information on industrial cybersecurity measures that may be implemented, please visit
www.siemens.com/cybersecurity-industry

Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats.

To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under
